ARLD010 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, The Weekly DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

LESOTHO, 7P. Gert, ZS6AYU is QRV as 7P8GF until March 13. Activity is on 40 to 10 meters using only CW. QSL to home call.

MALTA, 9H. Peter, G3PHO is QRV as 9H3C from Gozo Island, IOTA EU-023, until March 15. Activity is on 80 to 10 meters and possibly 160 meters. This includes an entry in the RSGB Commonwealth contest. QSL to home call.

KUWAIT, 9K. Some members of the Kuwait ARS are QRV as 9K2F from Failaka Island, IOTA AS-118, until March 12. QSL via 9K2HN.

TONGA, A3. A group of operators are QRV as A35YZ until March 24. Activity is on 160 to 6 meters using CW, SSB, RTTY, SSTV and PSK31 with several stations active. QSL via DL7DF.

FEDERAL REPUBLIC OF GERMANY, DA. Special event station DQ0STRATEX is QRV until January 31, 2013 to commemorate the March 10 and March 24 launches of the stratospheric balloon projects named StratexB. Activity is on all bands and modes. On the balloons an APRS beacon will be on 144.800 MHz and a speech beacon on 430.375 MHz FM. QSL via DK4REX.

BOSNIA-HERZEGOVINA, E7. Special event station E720RS is QRV until the end of 2012 to commemorate the 20th anniversary of the founding of Republika Srpska, the Serbian entity in Bosnia-Herzegovina. QSL via E78CB.

DOMINICA, J7. Simon, G7SOZ is QRV as J79SZ until March 15. This includes an entry in the RSGB Commonwealth contest. QSL to home

call.

JAPAN, JA. Special event station 8N5KOCHI is QRV until March 22 to mark an ARISS school contact from Kochi on Shikoku Island, IOTA AS-076. QSL via bureau.

DENMARK, OZ. Stefan, DL7AOS is QRV as 5P5K until March 24. Activity is on 80 to 6 meters. This includes an entry in the upcoming Russian DX contest. QSL to home call.

SLOVENIA, S5. Members of the Radio club Skofja Loka are QRV as S540DKR until the end of April in celebration of its 40th jubilee. QSL via S59DKR.

SEYCHELLES, S7. Tom, DL5NEN and Claudia, DO5NEN will be QRV as S79NEN from Mahe and La Digue, both IOTA AF-024, from March 12 to 28. Activity will be on 40 to 10 meters using CW, SSB and RTTY. This includes entries in the upcoming CQ WPX SSB and BARTG HF RTTY contests. QSL via DO5NEN.

CHAD, TT. Elvira, IV3FSG is QRV as TT8ES from N'Djamena until March 18. Activity is on the HF bands using SSB and digital modes. QSL via IK3GES.

BERMUDA, VP9. Bob, G3PJT is QRV as VP9/G3PJT until March 15. This includes an entry in the RSGB Commonwealth contest. QSL to home call.

VIET NAM, XV. Retu, OH4MDY, plans to be QRV as XV2RZ from March 14 to April 16. QSL to home call.

CHATHAM ISLANDS, ZL7. Dave, VO1AU is QRV as ZL7/VO1AU until March 13. Activity is on the HF bands using CW and SSB. This includes being a Single Op/All Band entry in the RSGB Commonwealth contest. QSL via VO1MX.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Somalia, 6O0M, 2011 operation. If you had this operation rejected, send a note to bmoore (at) arrl.org to have your record updated. Burundi, 9U3TMM, reported as December 2011 and January 2012. If you had this operation rejected, send a note to bmoore (at) arrl.org to have your record updated. Afghanistan, T6BP, current operation commencing in 2011. Macquarie Island, VK0TH and AX/VK0TH, current operations. If you had VK0TH rejected, send a note to bmoore (at) arrl.org to have your record updated.

THIS WEEKEND ON THE RADIO. The North American RTTY Sprint, RSGB Commonwealth CW Contest, AWA John Rollins Memorial CW DX Contest, QRP CW Fox Hunt, NCCC Sprint, AGCW QRP CW Contest, QRP ARCI HF Grid Square CW Sprint, EA PSK63 Contest, Idaho QSO Party, SKCC Weekend CW Sprintathon, UBA Spring CW Contest, NSARA SSB Contest and Wisconsin QSO Party will certainly keep contesters busy this upcoming weekend.

The NAQCC-EU Monthly CW Sprint is scheduled for March 12. The CW QRP Fox Hunt, RSGB 80-meter Club CW Championship and CWops Mini-CWT CW Test are scheduled for March 14. Please see March QST, page 86 and the ARRL and WA7BNM Contest Web Sites for details.

ARLD010 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, The Weekly DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

LESOTHO, 7P. Gert, ZS6AYU is QRV as 7P8GF until March 13. Activity is on 40 to 10 meters using only CW. QSL to home call.

MALTA, 9H. Peter, G3PHO is QRV as 9H3C from Gozo Island, IOTA EU-023, until March 15. Activity is on 80 to 10 meters and possibly 160 meters. This includes an entry in the RSGB Commonwealth contest. QSL to home call.

KUWAIT, 9K. Some members of the Kuwait ARS are QRV as 9K2F from Failaka Island, IOTA AS-118, until March 12. QSL via 9K2HN.

TONGA, A3. A group of operators are QRV as A35YZ until March 24. Activity is on 160 to 6 meters using CW, SSB, RTTY, SSTV and PSK31 with several stations active. QSL via DL7DF.

FEDERAL REPUBLIC OF GERMANY, DA. Special event station DQ0STRATEX is QRV until January 31, 2013 to commemorate the March 10 and March 24 launches of the stratospheric balloon projects named StratexB. Activity is on all bands and modes. On the balloons an APRS beacon will be on 144.800 MHz and a speech beacon on 430.375 MHz FM. QSL via DK4REX.

BOSNIA-HERZEGOVINA, E7. Special event station E720RS is QRV until the end of 2012 to commemorate the 20th anniversary of the founding of Republika Srpska, the Serbian entity in Bosnia-Herzegovina. QSL via E78CB.

DOMINICA, J7. Simon, G7SOZ is QRV as J79SZ until March 15. This includes an entry in the RSGB Commonwealth contest. QSL to home call.

JAPAN, JA. Special event station 8N5KOCHI is QRV until March 22 to mark an ARISS school contact from Kochi on Shikoku Island, IOTA AS-076. QSL via bureau.

DENMARK, OZ. Stefan, DL7AOS is QRV as 5P5K until March 24. Activity is on 80 to 6 meters. This includes an entry in the upcoming Russian DX contest. QSL to home call.

SLOVENIA, S5. Members of the Radio club Skofja Loka are QRV as S540DKR until the end of April in celebration of its 40th jubilee. QSL via S59DKR.

SEYCHELLES, S7. Tom, DL5NEN and Claudia, DO5NEN will be QRV as S79NEN from Mahe and La Digue, both IOTA AF-024, from March 12 to 28. Activity will be on 40 to 10 meters using CW, SSB and RTTY. This includes entries in the upcoming CQ WPX SSB and BARTG HF RTTY contests. QSL via DO5NEN.

CHAD, TT. Elvira, IV3FSG is QRV as TT8ES from N'Djamena until March 18. Activity is on the HF bands using SSB and digital modes. QSL via IK3GES.

BERMUDA, VP9. Bob, G3PJT is QRV as VP9/G3PJT until March 15. This includes an entry in the RSGB Commonwealth contest. QSL to home call.

VIET NAM, XV. Retu, OH4MDY, plans to be QRV as XV2RZ from March 14 to April 16. QSL to home call.

CHATHAM ISLANDS, ZL7. Dave, VO1AU is QRV as ZL7/VO1AU until March 13. Activity is on the HF bands using CW and SSB. This includes being a Single Op/All Band entry in the RSGB Commonwealth contest. QSL via VO1MX.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Somalia, 6O0M, 2011 operation. If you had this operation rejected, send a note to bmoore (at) arrl.org to have your record updated. Burundi, 9U3TMM, reported as December 2011 and January 2012. If you had this operation rejected, send a note to bmoore (at) arrl.org to have your record updated. Afghanistan, T6BP, current operation commencing in 2011. Macquarie Island, VK0TH and AX/VK0TH, current operations. If you had VK0TH rejected, send a note to bmoore (at) arrl.org to have your record updated.

THIS WEEKEND ON THE RADIO. The North American RTTY Sprint, RSGB Commonwealth CW Contest, AWA John Rollins Memorial CW DX Contest, QRP CW Fox Hunt, NCCC Sprint, AGCW QRP CW Contest, QRP ARCI HF Grid Square CW Sprint, EA PSK63 Contest, Idaho QSO Party, SKCC Weekend CW Sprintathon, UBA Spring CW Contest, NSARA SSB Contest and Wisconsin QSO Party will certainly keep contesters busy this upcoming weekend. The NAQCC-EU Monthly CW Sprint is scheduled for March 12. The CW QRP Fox Hunt, RSGB 80-meter Club CW Championship and CWops Mini-CWT CW Test are scheduled for March 14. Please see March QST, page 86 and the ARRL and WA7BNM Contest Web Sites for details.

20277. CW Contest on 17M?

Yahoo group: DX-IS (2013)
Date: 2013-01-03 02:49:28 UTC
From: Lee ZL2AL
Topic: 20277 Message: 20277

I am listening to a group of contesters calling "CQ NYP" on and around 18,089Khz on CW and answering with the std 599 + Nr report. The time is 02:48 UTC on Jan 3 (We in ZL are 15 - 18 hours ahead of the USA)

IS this the thin edge of the wedge? Will contesting become a reality on the WARC bands?

Anybody else hearing them

73, Lee ZL2AL

20278. RE: [DX-IS] CW Contest on 17M?

Yahoo group: DX-IS (2013)
Date: 2013-01-03 03:14:29 UTC
From: Ron Notarius W3WN
Topic: 20277 Message: 20278

No copy here. I don't see any spots for it either (although my cluster filters may be blocking it)

Any calls?

And I hate to have to remind you, but there is no law anywhere that I know of that bans contesting on 17 meters. I'm NOT saying it's a good idea - it's not - but it's not against the law.

I wonder if this is just a small group somewhere having a little fun? If that's the case, let's not make a big deal out of it.

Hi Ron
Of course it's not against the ITU guidelines. Hams can do virtually whatever we like within our bands which includes the WARC bands and that's a good thing.

I just was quite surprised having never heard a contest on the WARC bands since we all had access to them all those years ago. The lack of contests is a gentleman's agreement and I am actually quite amazed it has lasted this long. My questions were a bit tongue in cheek.

Interesting that there was no hint of any contest in any of the published contests at this time. Also interesting that it happened on a weekday and only seemed to last for a short while that I heard it. Propagation for me fades out around that time but the contest was still going.

Callsigns? JA's, BY's a BA that I heard. All the signs point to a small group having a bit of fun in that part of the world. It is highly unlikely that we will see the next CQWW included in the WARC bands. Contesters get enough flak from the weekend rag chewers as it is. :-)

One of the best defenses contesters have is that the WARC bands, as well as the opposite mode, are always available for non-contest use, even in the really big contests. I hope we're not edging toward changing that.

73, Pete N4ZR
Check out the Reverse Beacon Network at

I would hazard a guess that NYP stood for "New Year's Party." It may
be something akin to Straight Key Night. SKN isn't a contest and all
ham bands are allowed.

So this may be someone's party for the New Year and not a contest. I
didn't hear any of the stations but I'm guessing it was a small group.
I never saw any announcements about it anywhere.

ARLD001 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

KENYA, 5Z. Bertrand, DF3ZS and Tom, DL1QW will be QRV as 5Z4/DF3ZS and 5Z4/DL1QW, respectively, from Diani Beach from January 7 to 20. Activity will be on 80 to 10 meters using CW, SSB and RTTY. QSL to home calls.

SENEGAL, 6W. Francis, F6BLP is QRV as 6W7SK until January 18 from Saly Portudal. Activity is holiday style on 80 to 10 meters using mostly CW. This may include some activity on 160 meters. QSL to home call.

FEDERAL REPUBLIC OF GERMANY, DA. Special event station DL50FRANCE is QRV during all of 2013 to commemorate the 50th anniversary of the French-German Treaty of Friendship, also known as the Elysee Treaty. QSL via DK8VR.

PHILIPPINES, DU. Bob, WT3A is QRV as DU7TET and is usually active on 160 meters between 0945 and 1300z. QSL to home call.

ST. VINCENT, J8. Al, W6HGF will be QRV as J8/W6HGF from Saint Vincent and the Grenadines from January 9 to 24. Activity will be on all bands, with an emphasis on the higher bands when possible using mostly RTTY and other digital modes. QSL direct to home call.

MONGOLIA, JT. Chak, JT1CO has been active on 30 meters around 2100z. QSL direct.

PAPUA NEW GUINEA, P2. Nao, JA2VQP is working as a volunteer and teaching mathematics at the Divine Word University in Wewak for the next two years. He has recently been issued the call P29NO and

plans to be active in the coming months.

NETHERLANDS, PA. Special event station PD110MVV is QRV until January 14 to commemorate the 110th jubilee of the football club MVV Maastricht. QSL via PD3R.

SLOVENIA, S5. Special event station S5300TP is QRV during all of 2013 to mark the 300 years since the Tolmin Peasant Uprising of 1713. QSL via S59DAP.

MOUNT ATHOS, SV/A. Monk Apollo, SV2ASP/A has been active on 40 meters using SSB around 0600z to 0700z. He has also been active on 17 meters using SSB around 1400z. QSL direct to home call.

NAMIBIA, V5. Ewald, DJ2BQ is QRV as V5/DJ2BQ until January 18. Activity is on 80 to 10 meters using RTTY. QSL to home call.

MONTSERRAT, VP2M. Bjorn, SM0MDG is QRV as VP2MSW until January 8. Activity is mainly on 17 and 15 meters, and possibly 10 meters if conditions permit. QSL via M0URX.

LAOS, XW. Larry is now QRV as XW1A. Activity is on 160 to 2 meters using CW and SSB. This will eventually include RTTY. QSL via E21EIC.

ROMANIA, YO. Members of the Radioclub QSO Banat Timisoara are QRV as YP10KQT during all of 2013 to celebrate their 10th anniversary. QSL via YO2KQT.

MACEDONIA, Z3. To commemorate the assignment of the Z3 prefix 20 years ago, special event station Z320RSM is QRV. Also, Special event stations Z320A to Z320Z are also QRV. QSL via operators' instructions.

THIS WEEKEND ON THE RADIO. The ARRL RTTY Roundup, Kid's Day SSB Contest, EUCW 160-Meter CW Contest, QRP CW Fox Hunt, NCCC Sprint CW Ladder, PODXS 070 Club PSKFest and the QRP ARCI Pet Rock CW Celebration are all on tap for this upcoming weekend. The ARS Spartan CW Sprint is scheduled for January 8. The CWops Mini-CWT CW Test and QRP CW Fox Hunt are scheduled for January 9. Please see January 2013 QST, page 87, and the ARRL and WA7BNM Contest websites for details.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30104
SIDC SOLAR BULLETIN 04 Jan 2013, 1259UT
SIDC FORECAST (valid from 1230UT, 04 Jan 2013 until 06 Jan 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 04 Jan 2013 10CM FLUX: 129 / AP: 001
PREDICTIONS FOR 05 Jan 2013 10CM FLUX: 131 / AP: 001
PREDICTIONS FOR 06 Jan 2013 10CM FLUX: 133 / AP: 001
COMMENT: Several C-class flares have been produced in the past 24h, the
strongest one being a C1.7 from NOAA AR 1640, peaking at 21:38 UT on
January 3. This AR has developed into a beta-gamma-delta magnetic
configuration. It will most likely produce more C-class flares, and has
potential for M-class events. In the last images from SWAP and SDO an
eruption can be seen in NOAA AR 1639 (located at S16 W30) starting at
09:00 UT. There is still not enough coronagraph data to asses a possible
Earth-directed CME. Geomagnetic conditions are quiet and expected to
remain so.

TODAY'S ESTIMATED ISN : 100, BASED ON 05 STATIONS.

05 January 2013 A.R.I. DX Bulletin
No 1131
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9U - A team of operators from Belgium and the Netherlands will be
active as 9U4U from Bujumbura, Burundi on 14-23 February. They
plan to run four stations with amplifiers on 160-10 metres SSB, CW
and RTTY, with at least one station focusing on 160 and 180 metres
every night. QSL via M0URX, direct or bureau (OQRS for both
options at www.m0urx.com), and LoTW "at the earliest opportunity".
The website for the expedition is at www.9u4u.be
9X - Carl, SM6CPY will be active holiday style as 9X0PY from Rwanda on
15-31 January. He will operate mainly CW on various bands,
depending on antenna possibilities. QSL via home call, direct or
bureau. [TNX DX World]
A3 - Werner, DJ9KH will be active as A31WH/p from Vava'u Island
(OC-064) from 20 February to 3 March. Prior to that, he will be
QRV as A31WH from Tongatapu (OC-049). QSL via home call, direct or
bureau. [TNX rsgbiota.org]
DL - Special station DL50FRANCE will be active until the end of the
year, to celebrate the 50th anniversary of the Elysee Treaty, the
Treaty of Friendship that set the seal on reconciliation between
France and Germany. QSL via DK8VR. [TNX DX Newsletter]
FY - Christian, F5UII (www.f5uii.net) will be active in his spare time
as FY/F5UII from Kourou, French Guiana on 13-30 January. He will
operate SSB only from the FY5KE radio club's premises, typically
on weekdays before 12 UTC and after 22 UTC. He also plans to spend
a weekend on Ile Royale (SA-020), and operate SSB with 100 watts
on 40, 20, 17, 15 and 10 metres. QSL via home call, direct or
bureau. Follow him on Twitter (@f5uii) for updates. [TNX F5UII]
HR - Gerard, F2JD will be active as HR5/F2JD from Copan, Honduras for
three months starting around 25 February. He will operate CW, SSB
and RTTY on the HF bands. QSL via F6AJA and logsearch at
http://lesnouvellesdx.fr/voirlogs.php [TNX F6AJA and Les Nouvelles
DX]
KP4 - Special event callsign N4D will be active on 11-25 January for the
ARRL Puerto Rico State Convention (www.arrlpr.org). QSL via
WP4CRG. During the convention, on 26-27 January, look for the the
official ARRL amateur radio station to be QRV as W1AW/KP4.
OE - A number of OE2013 prefixed callsigns will be in use between 15

January and 18 February to celebrate the FIS Alpine World Ski Championships that will take place in Schladming, Austria. Information on the relevant award can be found at http://wmdiplom2013.oevsv.at/
ST - Sam, K0YAK (ex 9N7AK) is now in Khartoum, Sudan, and will be active as ST2SF beginning in late January and continuing through at least mid-April. His licence includes full HF privileges, but is limited to 100w. He plans to be QRV on 40-10 metres (perhaps also 80 and 6m) SSB, CW and digital modes. QSL via LoTW or K0YAK.
T8 - Mike JA6EGL (T88SM), Yas JA6UBY (T88CP) and Yu JE6DND (T88HK) will be active from Koror (OC-009), Palau on 9-14 January. They will operate CW and SSB on 80-10 metres. QSL direct to home calls. [TNX DX World]
VK9L - Look for JA3ARJ/VK9 (QSL via JA3ARJ), JA3BZO/VK9 (QSL via JA3BZO), JA3HJI/VK9 (QSL via JA3HJI), AE6XY/VK9 (QSL via JA1CJA), W7AVO/VK9 (QSL via JA3AVO) and W7PBL/VK9 (QSL via JH3PBL) to be active from Lord Howe Island (OC-004) on 11-18 January. It will be a "DX vacation" with planned activity on 80-6 metres CW, SSB and digital modes. [TNX DX World]
VK9N - Lee, VK3GK will be active as VK3GK/9 from Norfolk Island (OC-005) on 11-15 January. He will operate holiday style on 80-10 metres SSB, with some CW. QSL via home call. [TNX DX World]
W - Dennis, WA2USA will be active as WA2USA/4 from St. George Island (NA-085) between 20 January and 27 February. He will operate mainly CW on 30, 20 and 15 metres, with some SSB on 40 and 20 metres. He will also participate on all bands in the ARRL International DX CW Contest (16-17 February) and the NAQP RTTY Contest (23-24 February). QSL via home call, direct or bureau. [TNX rsgbiota.org]

IOTA TOUR ---> Vincent, F4BKV and Col, MM0NDX will be active from nine IOTA island groups (EU-029, EU-128, EU-057, EU-129, EU-132, EU-042, EU-125, EU-172 and EU-171) in Denmark (OZ/F4BKV & OZ/MM0NDX), Germany (DL/F4BKV & DL/MM0NDX) and Poland (SP/F4BKV & SP/MM0NDX) between 10 and 13 January. They plan to operate SSB on 40, 20, 17 and 15 metres. When active in Denmark they might use a special call. Find their planned itinerary and follow their progress on Twitter (@IOTA_Trip). Bureau QSLs via home calls; direct cards for both via F4BKV (OQRS on www.f4bkv.net). [TNX MM0NDX]

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

CQ MM DX CONTEST ---> The results of the CQ Manchester Mineira DX Contest 2012 are now available at www.cqmmdx.com. This year's event will be held on 20-21 April. [TNX PY4WAS]

DAYTON CONTEST DINNER ---> The 21st Annual Dayton Contest Dinner will be held on 18 May at the Crowne Plaza Hotel. Tickets are available exclusively on http://contestdinner.com

DX DINNER ---> The Southwest Ohio DX Association (SWODXA) is pleased to again sponsor the DX Dinner, to be held in conjunction with the 2013 Dayton Hamvention on Friday, 17 May at the Dayton Marriott Hotel. Details can be found on the SWODXA Events website (www.swodxaevents.org) and updates will be sent out regularly via Twitter (@SWODXA). [TNX W8GEX]

IDXC 2013 ---> Registration is now open for the 64th International DX Convention, to be held at the Visalia Conference Center in Visalia (CA), on 19-21 April. Complete details can be found at www.dxconvention.com

IOTA BASH ---> The 9th annual IOTA Bash will be held on 1-2 March in Boerne, Texas, about 20 miles northwest of San Antonio. The agenda will include presentations on some of the most recent IOTA expeditions and a nice social programme. Details and registration form are available on the IREF website (www.islandradio.org). [TNX AD5A]

IOTA NEWS ---> "Following receipt of new information the IOTA Manager has decided to put on hold acceptance of 7T50I/P cards for Agueli Island AF-097. None will be accepted during the January update period. A final decision will not be taken before February" [TNX G3KMA]

POSTAL RATES (FRANCE) ---> French postal rates for standard letter items (up to 20g) have increased since 1 January:
0.80 EUR European Union plus HB9, HB0, T7 and HV
0.95 EUR rest of the world

QSL G100RSGB ---> An online "Am I in the log" facility and detailed information on the QSL service for G100RSGB, GD100RSGB and the other Gx100RSGB stations, Celebrating the Radio Society of Great Britain's centenary [425DXN 1130], can be found at www.rsgb.org/centenary (click on "RSGB Centenary Special Event Station Log and QSL Management" on the right).

QSL VIA N2ZN ---> With immediate effect, N2ZN is the QSL manager for all of WJ2O's DXpeditions - they are listed at www.wj2o.com (with logsearch). QSL direct (Kenneth J. Boasi, 5018 Ontario Center Rd, Walworth NY 14568, USA) or bureau.

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Luciano Lucini, IK2QPO (ik2qpo[@]425dxn.org).

QSLs received direct or through managers: 1A0C, 2O12L, 3B9SP, 3D2C, 3W2BB, 4L1MA, 4O7VB, 5R8IC, 5U5U, 5X1NH, 5Z4EE, 7O6T, 7T50I/p (AF-094), 7X4AN, 7Z7AB (AS-190), 9A8VB, 9M6NA, A31MA, AA4VK/CY0, AH0/N0AT, AH0I, C50C, C5A, C6AXY, CP4DR, CU1ARM, CU2ARA, CU3URA, CU4ARG, CU5AM, CU6GRP, CU9AC, D2QV, D64K, DU1GM, E40VB, E51AIU, E51AND, E51TLA, EL2A, EL2DT, EL2ES, EL2LF,

EL2MF, EL2WE, ES5Q, EW7LO, FK8HZ, H44RK, H44USMC, HC2/KF6ZWD, HC2AC, HT9H, JW7QIA, JW7XM, JX5O, JY8VB, KH8/N6XT, KL7RRC/p, LX1NO, MS0WRC (EU-010), NH8S, OA7/DF7NX, OJ0R, P29FR, P29NI (OC-069), P29VCX (OC-025, OC-103, OC-135, OC-240), P29VPB (OC-069), P29ZAD, PJ4/KU8E, PJ7I, RI1FJ, S01MZ, S79NU, SU9VB, T30PY, T6LG, T6MO, TT8TT, V31MW, V31NO, V5/DF2UU, V63PR, V85SS, VK9/OH1VR, VP2ETE, VP2MDD, VP2MGZ, VP2MYL, WA4DAN/CY0,WH0/K0BBC, YI1RZ, YJ0AFU, Z60K, Z81D, ZC4LI, ZL7A.

20287. ARLP001 Propagation de K7RA

Yahoo group: DX-IS (2013)
Date: 2013-01-04 16:28:05 UTC
From: jjreisert@alum.mit.edu
Topic: 8562 Message: 20287

SB PROP @ ARL $ARLP001
ARLP001 Propagation de K7RA

ZCZC AP01
QST de W1AW
Propagation Forecast Bulletin 1 ARLP001
>From Tad Cook, K7RA
Seattle, WA January 4, 2013
To all radio amateurs

SB PROP ARL ARLP001
ARLP001 Propagation de K7RA

The New Year brings dreams of solar cycles of old, so distant now, sweetly remembered for their profusion of sunspots. We hear many times from operators who began in the amateur radio service as teenagers at the peak of Cycle 19. With youthful optimism, they naturally assumed that radio propagation would always be like that, when a few watts and a modest radiator on 10 meters spanned the globe during all the days and nights.

If you were age 13 to 17 in 1957 to 1959, the peak of Cycle 19, perhaps you were born between 1941 and 1945, and probably looked forward to the next peak in activity. That may have been a disappointment when Cycle 20 peaked around 1969, as that had a somewhat broader peak but at a far lower level. You can see it graphically at http://wm7d.net/hamradio/solar/historical.shtml. These young adults, now 24 to 28 years old in 1969, might be busy starting families and careers, and no doubt fondly recalling simpler times and the tremendous propagation of their younger years.

Cycle 21 peaked around 1980, and the former teenaged ham of Cycle 19 was now 35 to 39 years old. This was quite an improvement over the last cycle, as was Cycle 22, which looked like an echo of Cycle 21. Cycle 22 peaked around 1991-1992, with a more pronounced double-peak. The former teenager was now 47 to 51 years old, solidly into middle-age, and still wondering if sunspot activity would ever roar back to the levels of the late-1950s.

The following cycle, number 23, was another double-peak, but significantly lower in 2000 to 2002 than the previous cycle. Perhaps another disappointment for the now 56 to 60 year old ham, who then sees solar activity slide into a long and low minimum over the next decade, impossible to imagine 60 years earlier. The 160 meter operators, quite happy in this situation with a much quieter Sun, have no such longing for the active Sun of yesteryear.

Now the young ham of the late 1950s contemplates the peak of Cycle 24, apparently much lower than any seen in most of the past century, and expected to grow to maximum this year. Now we have many more tools to observe and measure both solar activity and propagation, and we know that activity could still increase significantly. Some foresee decades of lower activity, but of course predicting future solar activity is a very tricky proposition, and anything could happen.

At
http://www.solen.info/solar/images/comparison_recent_cycles.png
you can see a comparison of recent cycles, from 21 to the current 24.

While we've seen a number of papers and predictions for a series of quieter sunspot cycles, some disagree. For instance, Michael Proctor, professor of Astrophysical Fluid Dynamics at Cambridge University is not convinced. He was quoted this year as saying, "This present cycle is similar to the weak one that ended in 1913, and that was followed by a strong cycle."

Those were Cycles 14 and 15, and Cycle 15 was only strong relative to 14. Cycles 17, 18 and 19 were stronger than 15, and so were 21, 22 and 23.

It is also important to remember there is wild variability in solar activity. To make those graphs of sunspot numbers appear smooth, each point on the graph actually represents an average of a year of data. When averaged, the flurry of solar activity at the end of 2011 and some future activity in 2013 could appear as a broad peak on a graph.

NASA looks frequently at their predictions for the current cycle, and often adjusts them every month. The latest shows a smoothed sunspot number a bit lower than the forecast from several weeks ago. In the December 10 forecast they predicted a smoothed sunspot number of 72 in the late in 2013, but that number is now 69 in the January 2 release. Note these are the lower international sunspot numbers, which are always less than Boulder numbers presented in this bulletin. Read the report at
http://solarscience.msfc.nasa.gov/predict.shtml.

With the change from 2012 to 2013, now is a good time to review sunspot numbers and trends. Average daily sunspot numbers in 2013 were up substantially from 2012. From 2004 through 2012 the yearly progression was 68.6, 48.9, 26.1, 12.8, 4.7, 5.1, 25.5, 29.9 and 82.3. I took all the daily sunspot numbers for 2012, added them together, and the sum was 30,133. Divide that by 366 (the number of days in 2012, a leap year) and the result is approximately 82.3. In 2011 it was 10,913 divided by 365, yielding 29.9.

The 2012 average was higher than any year after 2003. But at the peak of Cycle 23, the averages from 1998 to 2003 were all higher:

88.7, 136.3, 173, 170.3, 176.7, and 109.2. It seems unlikely that average daily sunspot numbers this year will reach anywhere near the level of 2000-2002.

We observe a moving 3-month average of sunspot numbers, in an attempt to smooth out some of the variations. Unfortunately, the past three months were much lower then the three month period ending one month earlier. The current average of 74.4, centered on November 2012, is lower than any three month period since averages centered on February and March of 2012.

The 3 month period previous to the current one is centered on October 2012, and covers September through November. The average then was 82.3. To recap averages from previous bulletins, the three-month moving averages of daily sunspot numbers centered on July 2011 through November 2012 were 63, 79.6, 98.6, 118.8, 118.6, 110, 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9, 89.9, 81.2, 82.3, and 74.4.

Looking at the past week, yesterday we saw a sizable gain in solar flux, when the value went from 106.7, 113.6, 117.8, and 119 to 128.8, on December 30 through January 3. NOAA and USAF predict solar flux at 130 on January 4-6, 125 and 120 on January 7-8, 115 on January 9-10, 110 on January 11, 105 on January 12-13, 110 on January 14-17, 115 on January 18-20, and 120 on January 21-23.

Predicted planetary A index is 5 on January 4-12, 10 on January 13, 5 on January 14-25 and 8 on January 26.

F.K. Janda, OK1HH issues a weekly geomagnetic forecast. This week he says geomagnetic conditions will be quiet January 4, quiet to active January 5, mostly quite January 6, quiet January 7-9, quiet to unsettled January 10-12, active to disturbed January 13, quiet to unsettled January 14-16, quiet January 17-19, mostly quiet January 20-21, and quiet on January 22-26.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for December 27 through January 2 were 78, 54, 49, 37, 87, 99, and 90, with a mean of 70.6. 10.7 cm flux was 106.8, 105.8, 104.3, 106.7, 113.6, 117.8, and 119, with a mean of 110.6. Estimated planetary A indices were 1, 2, 3, 4, 2, 1, and 3, with a mean of 2.3. Estimated mid-latitude A indices were 0, 2, 3, 4, 1, 1, and 2, with a mean of 1.9.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30105
SIDC SOLAR BULLETIN 05 Jan 2013, 1251UT
SIDC FORECAST (valid from 1230UT, 05 Jan 2013 until 07 Jan 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 05 Jan 2013 10CM FLUX: 140 / AP: 001
PREDICTIONS FOR 06 Jan 2013 10CM FLUX: 142 / AP: 010
PREDICTIONS FOR 07 Jan 2013 10CM FLUX: 144 / AP: 007
COMMENT: An M1.7 flare was observed at 09:31 UT, it originated at an
active region at the east limb that will rotate into view today. NOAA
ARs 1640 and 1650 produced C-class flares. Activity at the C level is
expected and probably more M-class events. Geomagnetic conditions are
quiet. The effect of a small coronal hole is expected to be seen at the
Earth between 24 and 48 hours, increasing geomagnetic conditions
(probably up to active levels).

TODAY'S ESTIMATED ISN : 101, BASED ON 04 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30106
SIDC SOLAR BULLETIN 06 Jan 2013, 1237UT
SIDC FORECAST (valid from 1230UT, 06 Jan 2013 until 08 Jan 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition
PREDICTIONS FOR 06 Jan 2013 10CM FLUX: 145 / AP: 005
PREDICTIONS FOR 07 Jan 2013 10CM FLUX: 143 / AP: 010
PREDICTIONS FOR 08 Jan 2013 10CM FLUX: 145 / AP: 007
COMMENT: Several C-flares occurred in the past 24 hours. The strongest
one was a C3 from NOAA AR 1653 peaking at 03:03 UT. Other flaring
regions are 1652, 1650 and 1645. These last two have a beta magnetic
configuration, while 1652 and 1653 are still not visible completely
(rotating into view from the east limb). NOAA AR 1640 remains the most
complex AR, as it's still slowly growing in size and keeps its
beta-gamma-delta configuration, this region is approaching the west limb
but can still produce M-class flares. Geomagnetic conditions have been
quiet. Unsettled to (isolated) active levels can be expected in the next
24h with the arrival of a fast speed stream from a small coronal hole.

TODAY'S ESTIMATED ISN : 108, BASED ON 03 STATIONS.

20292. Still no propagation

Yahoo group: DX-IS (2013)
Date: 2013-01-07 16:17:04 UTC
From: John G.
Topic: 20292 Message: 20292

To follow up on a message from a couple of months ago. Right now the solar flux is 143, the SSN is 186 and the K index is 1. Should be great conditions but where are they? 15 is open weakly to EU (as it was yesterday in the RTTY RU), 12 has no signals, haven't even checked 10 since 12 is closed. Didn't work a single EU on 20m yesterday afternoon in the contest.

So what the heck is going on?

73 John AF5CC

It's the middle of winter! We've had some great LP openings on
10/12/15m into the middle-east in the mornings for the last week or
so. It's the middle of summer in the southern hemisphere....

To be accurate, winter is just 17 days old today. The middle of winter is in mid-February. But, Iain, I concur about conditions. Even up here in the not so frozen northeast, morning conditions have been interesting. As the sun rises during the day things go downhill. So by 1500Z there's not much above 20M and for that matter, not a lot on 20 either. Both 30 and 40 have proven interesting just before and after sunset.

I often wonder how Marconi made his first contact with the west coast of Europe on Dec. 12, 1902 from Glace Bay, NS -- just 20 miles east of me.

From: Thomas
Topic: 20295 Message: 20295

Disappointing condx to say the least! 10 meters was open to EU during the week at 1600Z here in the U.P. During the RTTY RU, I only worked three stations. No USA just HI, KP4, and CO. I worked 33 stations on 10 last year, with a lower SFI.

20 meters to EU fair. JA openings in the evening so-so. With my 4 element SteppIR at 72 feet and 1000 watts, I usually have a nice run on 20 and 15 to JA. This past weekend just a few in the log.

Also, 40 meter openings to Europe were worse than last year. Overall,I made 100 fewer contacts on 40 than 2012.

80 meters was at least quiet. Not much QRN or QRM.

Will 10 and 15 ever be as "hot" as during the 2000-2002 period? I'm beginning to doubt it.

73 es GUD DX,

See http://wsprnet.org/drupal/wsprnet/map enter a band (All or 20M may lock up your computer if you leave the Call blank and 12 or 24 hours) leave the call blank and select 6 or 12 or less hours, then click on update to see 5 W or less signals reported. A good real time indicator of propagation. My FLEX-1500 and HV-2 received and the spotted JA and VK stations on 40M at my grayline Saturday morning. 10 meters has been open over the past 30 minutes from the Midwest to South America. 15M has been open over the same period only between Germany and South Africa, while 20M is open between the US and Western Europe.

According to LoTW site:

"Jan 7, 2013: Log Processing Running Again -- Additional capacity and processing power will be brought online today."

At 2200 UTC they have processed almost 24 hours worth of logs in 6 or 7 hours!

propagation

See http://wsprnet.org/drupal/wsprnet/map
enter a band (All or 20M may lock up your computer if you leave the Call blank
and 12 or 24 hours) leave the call blank and select 6 or 12 or less hours,
then click on update to see 5 W or less signals reported. A good real time
indicator of propagation. My FLEX-1500 and HV-2 received and the spotted JA
and VK stations on 40M at my grayline Saturday morning. 10 meters has been
open over the past 30 minutes from the Midwest to South America. 15M has been
open over the same period only between Germany and South Africa, while 20M is
open between the US and Western Europe.

20309. Most Wanted Survey

Yahoo group: DX-IS (2013)
Date: 2013-01-09 15:00:36 UTC
From: Zack Widup
Topic: 20309 Message: 20309

I was just perusing the DX Pub. Most Wanted Survey:

http://www.dxpub.net/MOST-WANTED-SURVEY.html

I guess it's reassuring that I haven't worked only two in the top ten - P5 and 3Y/B. The others I need are way down the list - EP, YA, Z8. I guess just about everyone worked South Sudan but me? One more that I need, A9, wasn't even on the list.
:-)

Obviously ZL9 and PT0S will be falling soon given the recent DXpedtiions. Looks like we need some activations in the Southern Indian Ocean. What is even more amazing is that I have 2 of the top 10-KP1 and FR/T with my little pea shooter station.
Have even worked both of those entities twice.

SB DX ARL ARLD002
ARLD002 DX news

This week's bulletin was made possible with information provided by NC1L, PP1CZ, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

RWANDA, 9X. Carl, SM6CPY plans to be QRV as 9X0PY from January 15 to 31. Activity will be holiday style using mainly CW on the HF bands. QSL to home call.

BAHAMAS, C6. Rick, K6VVA is QRV as C6AVA from Bimini Island, IOTA NA-0148, until January 14. Activity is on the HF bands using CW. This includes a possible entry in the North American CQ QSO Party. QSL via N6AWD.

FEDERAL REPUBLIC OF GERMANY, DA. Special event station DB100AWPB is QRV to commemorate the 100th anniversary of the "Ausbesserungswerk Paderborn" of the German Railway. QSL via DO6NIK.

MINAMI TORISHIMA, JD1. Take, JG8NQJ will be QRV as JG8NQJ/JD1 beginning January 15 until the middle of April while on work assignment. Activity will be in his spare time. QSL to home call.

PUERTO RICO, KP4. Members of the Caribbean Amateur Radio Group are QRV using special call N4D until January 25 on the occasion of the ARRL Puerto Rico State Convention which occurs the end of the month. QSL via WP4CRG.

AUSTRIA, OE. Austrian stations have the option of using the special prefix OE2013 from January 15 to February 18 to commemorate the Ski World Cup in Schladming. QSL via operators instructions.

FERNANDO DE NORONHA, PY0F. Leo, PP1CZ is on vacation on Fernando de Noronha, IOTA SA-003, from January 15 to 21. He will be QRV as PY0F/PP1CZ. Activity will be in his free time using CW, SSB and

RTTY on the HF bands, with a focus on 160 and 80 meters using only CW. QSL to home call.

POLAND, SP. Janusz, SP9YI will be QRV with special event call sign HF0A from January 15 to February 28 to celebrate the 10th Arctic Activity Week. QSL to home call.

PALAU, T8. Mike, JA6EGL, Yas, JA6UBY and Yu, JE6DND are QRV as T88SM, T88CP and T88HK respectively, from Koror Island, IOTA OC-009, until January 14. Activity is on 80 to 10 meters using CW and SSB. QSL direct to home calls.

BELIZE, V3. Gerd, DJ4KW is QRV as V31YN until January 24. Activity is on 160 to 10 meters. QSL to home call.

LORD HOWE ISLAND, VK9L. Operators JA3ARJ, JA3BZO, JA3HJI, AE6XY, W7AVO and W7PBL are QRV as home calls /VK9L until January 18. Activity is on 80 to 6 meters using CW, SSB and RTTY. QSL via operators' instructions.

NORFOLK ISLAND, VK9N. Lee, VK3GK is QRV as VK3GK/9 until January 15. Activity is in his spare time on 80 to 10 meters using SSB and some CW. QSL to home call.

VIET NAM, XV. Sei, JA7LU and Hiroo, JA2VWG will be QRV as XV4LU and XV4DD, respectively, from Phu Quoc Island, IOTA AS-128, from January 12 to 16. Activity will be on 40 to 10 meters using SSB and RTTY. QSL direct to home calls.

EL SALVADOR, YS. Roberto, I2JIN is QRV as YS3CW from Corinth until January 31. Activity is on 80 to 10 meters using mainly CW. QSL to home call.

CAYMAN ISLANDS, ZF. Pet, K8PGJ will be QRV as ZF2PG from Grand Cayman from January 12 to 20. Activity will be holiday style on 20 to 10 meters using mainly SSB. This includes an entry in the upcoming North American SSB QSO Party. QSL to home call.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC Credit: Conway Reef, 3D2C, 2012 operation. If you had cards previously rejected for this operation please send an email to bmoore@... to be put on a list for an update.

THIS WEEKEND ON THE RADIO. The QRP CW Fox Hunt, NCCC CW Sprint Ladder, Old New Year Contest, SKCC Weekend CW Sprintathon, MI QRP January CW Contest, UK DX BPSK63 Contest, WW PMC Contest, North American CW QSO Party, DARC 10-Meter Contest and the NRAU-Baltic CW and SSB Contest are all on tap for this upcoming weekend. The NAQCC-EU Monthly CW Sprint is scheduled for January 14. The AWA Linc Cundall Memorial CW Contest and QRP CW Fox Hunt are scheduled for January 16. Please see January 2013 QST, page 87, and the ARRL and WA7BNM Contest websites for details.

20313. Italian postage raise

Yahoo group: DX-IS (2013)
Date: 2013-01-11 05:02:25 UTC
From: DO1DXX
Topic: 20313 Message: 20313

Hi all,

just want to spread out this info - tnx Gianni!

Andy - DO1DXX

HI Folks,
Just to inform DXers and Chasers of the new postal rate in force since 01.Jan.2013 in Italy.
Within Italy the rate goes from 0.60 to 0.70 Cents, within Europe, from 0.75 to 0.85 Cents.
From Italy to North & South America, Africa & Asia, the rate goes from 1,60 euro to 2.00 euro.
From Italy to Australia & Oceania from 2.00 Euro to 2,50 euro.
The USD is trading in Italy to the value of 1 ? = 1.3056 $ or 1 $ = 0.7659 ?; that means are necessary 3 USD to cover postal expense to deliver a letter to North & South America , Africa & Asia and 4 USD to Australia & Oceania.
It's embarrassing to say that, but this is unfortunately, the situation that affects not only this Country but I think, the entire globe.
As QSL manager of quite a few different foreign callsigns, I am therefore sorry to say that if there isn't a sufficient postal coverage, I can't deliver your QSL cards direct, nor put them in the bureau as for that, I should pay an extra costs (ARI ask about 35 USD/year for each different foreign callsign managed through the bureau). I trust, in your understanding, and I suggest eventually to join your friends and send a cumulative requests in one envelope to share the costs.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30111
SIDC SOLAR BULLETIN 11 Jan 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 11 Jan 2013 until 13 Jan 2013)
SOLAR FLARES : Active (M-class flares expected, probability >= 50%)
GEOMAGNETISM : Warning condition (activity levels expected to increase, but no numeric
forecast given)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 11 Jan 2013 10CM FLUX: 174 / AP: 001
PREDICTIONS FOR 12 Jan 2013 10CM FLUX: 179 / AP: 001
PREDICTIONS FOR 13 Jan 2013 10CM FLUX: 184 / AP: 001
COMMENT: The main driver of solar activity is likely to be NOAA AR
1654, which has produced several C flares in the past 24 hours, and a
M1.2 flare, today, at 0911 UT (peak time). A metric type II burst was
observed, and a CME was probably associated to it. At the time this
message is prepared, coronagraphic observations do not allow to see if a
CME has indeed occurred. Active conditions (M flare likely) are expected
for the next 48 hours from this region, with a risk of an X class flare.
Geomagnetic conditions might evolve quickly from quiet to active levels
in the coming days if CMEs related to NOAA AR 1654 flares occur; which
justifies issuing a warning condition.

No 1132
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9M4_spr- John 9M6XRO, Steve 9M6DXX, James 9V1YC, Ben DJ0YI/N6MUF, Don G3BJ, Christian EA3NT and Tony KM0O will be operating as 9M4SLL from Pulau Layang Layang, Spratly Islands (AS-051) on 10-18 March. Activity will be on 160-10 metres CW, SSB and RTTY, using "several stations with linear amplifiers to vertical antennas all within a few metres of the ocean". QSL via M0URX (please use his OQRS for both direct and bureau cards at http://m0urx.com/). Logs will be uploaded to LoTW as soon as possible after the end of the operation. [TNX 9M6DXX]
9M6 - Before joining the 9M4SLL team, Ben DJ0YI will be active as 9M6/N6MUF from Kota Kinabalu, East Malaysia on 1-8 March (QSL via DJ0YI, direct or bureau, and LoTW). [TNX DJ0YI]
C6 - W4BUW (C6AGH), W8GEX (C6DX) W8CAA and AA4NN will be active from Great Exuma (NA-001), Bahamas on 20-27 January. They plan to run three stations on 160-10 metres SSB, CW and RTTY. QSL via home calls.
FR - Pierre, F8APV and Stephane, F8EOI will be active as FR/F8APV and FR/F8EOI from Reunion Island (AF-016) from 21 January to 8 February. They will be QRV on "40 metres and up", with a ficus on 30m CW and 20m SSB. [TNX DX World]
J7 - "The Daily DX" Editor, Bernie McClenny (W3UR) and his father Tony (N3ME) will be active from Dominica (NA-101) in late January-early February. Bernie will operate as J77A (22 January-1 February) and Tony will operate as J76A (22 January-11 February); both will be QRV in their spare time on 160-6 metres CW, SSB and RTTY. The special prefixes are in celebration of the beginning of their Amateur Radio careers (1977 and 1976 respectively). QSL via home calls, direct or bureau, and LoTW. [TNX The Daily DX]
JD1_mt - Take, JG8NQJ will be back to Minami Torishima (OC-073) on 15 January and will remain there until mid-April. He plans to be QRV in his spare time as JG8NQJ/JD1 mainly on 10, 12, 15 and 17 metres CW. QSL via JA8CJY (direct) or JG8NQJ (bureau).
UA_ant - Nick, RW6ACM will be active as as RI1ANP from Russian Antarctic station Progress from 1 February until the end of year. QSL via RN1ON, direct or bureau. [TNX RN1ON]
YS - Roberto, I2JIN will be active again as YS3CW from Corinth, El

Salvador on 11-31 January. He will operate mainly CW on 80-10 metres. QSL via I2JIN, direct or bureau, and LoTW. [TNX DX Coffee]

AFRICAN TOUR ---> Once again Peter, HA3AUI will be active as 6W2SC from Senegal and J5UAP from Guinea-Bissau between approximately 17 January and 10 March. He plans to operate CW on 40-10 metres. Side trips to either 6W and J5 IOTA island groups are being considered. QSL via HA3AUI, direct only. [TNX NG3K]

IOTA TOUR ---> Col, MM0NDX has had to cancel his participation in the 10-13 January IOTA Tour [425DXN 1131] due to a family matter. Vincent, F4BKV is doing the trip solo, with planned activity from nine IOTA island groups (EU-029, EU-128, EU-057, EU-129, EU-132, EU-042, EU-125, EU-172 and EU-171) in Denmark, Germany and Poland. Follow his progress on Twitter (@IOTA_Trip). QSL via F4BKV (OQRS on www.f4bkv.net). [TNX MM0NDX]

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The December 2012 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

CQ DX MARATHON ---> The CQ DX Marathon is a year-long DX hunt, with participants competing to see who can work the greatest number of countries ("entities") and CQ zones during the calendar year. The 2013 edition started at 00.00 UTC on 1 January and will end at 23.59 UTC on 31 December. Complete rules and submission information can be found at www.dxmarathon.com - and do not forget to submit your 2012 scores by 31 January 2013 (next year's deadline will be 10 January 2014). High claimed scores will be published in February and the complete results of the 2012 Marathon will be in the June 2013 issue of CQ Magazine. [TNX K9EL]

CONTEST UNIVERSITY ---> Early bird registration is now open for 2013 Dayton Contest University (CTU) will be held on 16 May at the Crowne Plaza in Dayton, Ohio. It will be the seventh for CTU Dayton. Topics, professors and registration form can be found on http://contestuniversity.com

DX SOUND CLIPS ---> Tom's (K8CX) DX sound clips for 2012 can be found at http://hamgallery.com/dx2012/; the collection of 135 clips covers the major DXpeditions, plus rare and semi-rare DX. This makes 15 full years of sound clips available. There are also some recordings on the site from the 1960s and 1970s. "I am looking for on-the-air recordings in any format to be added to the site", Tom says. Please contact him (k8cx[@]hamgallery.com) if you have any. [TNX K8CX]

DXCC NEWS ---> 3D2C (Conway Reef 2012) has been approved for DXCC credit. If you had cards previously rejected for this operation, please send an e-mail to bmoore[@]arrl.org to be put on the list for an update. [TNX NC1L]

MOST WANTED SURVEY ---> The DX Magazine's annual Most Wanted Survey was conducted in September-October 2012 [425DXN 1114]. The top 20 DXCC Entities are:
1. P5 North Korea 11. PY0S St. Peter & Paul Rocks
2. KP1 Navassa Island 12. KH5K Kingman Reef
3. 3Y Bouvet Island 13. ZL9 Auckland & Campbell Isls
4. FT5Z Amsterdam & St. Paul Isls 14. KH5 Palmyra & Jarvis Isls
5. VK0 Heard Island 15. SV/A Mount Athos
6. FT5W Crozet Isls 16. E3 Eritrea
7. BS7H Scarborough Reef 17. BV9P Pratas
8. VP8 South Sandwich Isls 18. FT5J/E Juan de Nova, Europa Isls
9. ZS8 Marion Island 19. VP8 South Georgia
10. FT5T Tromelin Island 20. KH3 Johnston
The 100 Most Wanted listing, with the results of the 2011 survey for comparison, can be found at http://www.dxpub.net/MOST-WANTED-SURVEY.html. The complete breakdown by continent is published in the January/February 2013 issue of "The DX Magazine"; a breakdown by mode and for 160/80 metres will be published in the March/April 2013 issue.

POSTAL RATES (CANADA) ---> Canadian postal rates will rise again on 14 January. The new base prices for standard letter items up to 30g are as follows:
Canada CAD 0.63
U.S.A. CAD 1.10
International CAD 1.85
Stamps are subject to taxes that can vary from Province to Province. Actual rates can be calculated through the "Find a Rate" on-line service provided by Canada Post (www.canadapost.ca).

+ SILENT KEY + John Dack, W7KH (ex W7GUV) passed away on 7 January at 91 years of age. First licensed in 1938, he sat at the top of DXCC Mixed standings, with 398 entities (340 current and 58 deleted).

Propagation Forecast Bulletin 2 ARLP002
>From Tad Cook, K7RA
Seattle, WA January 11, 2013
To all radio amateurs

SB PROP ARL ARLP002
ARLP002 Propagation de K7RA

After last week's somewhat downbeat look at sunspot cycles, current, past and future, we sure have some great activity to report this week.

The average daily sunspot number more than doubled in the past week, rising nearly 93 points to 163.3. Average daily solar flux was up more than 37 points to 147.7. On top of that, the geomagnetic conditions were very quiet, which is a wonderful combination, not often seen in more active solar cycles.

There is a bit of uncertainty regarding the mid-latitude A-index on January 5-6. Some sort of outage for 24 hours blocked the data (from Fredericksburg, Virginia) on 8 consecutive 3-hour readings from late January 5 (UTC) through early January 6. The mid-latitude K-index tracked closely with the planetary K-index from January 3-9, so if the data were not missing, the January 5 mid-latitude A-index would probably have been a little higher, and the January 6 mid-latitude A-index a little lower than reported. The daily A-index is based solely upon the eight K-index readings throughout the day.

Currently NOAA and USAF predict solar flux values of 175 on January 11-12, 170 on January 13-14, 165, 150 and 125 on January 15-17, 105 on January 18-19, 110 and 120 on January 20-21, 125 on January 22-24, 130 on January 25-28, 135 on January 29, 140 on January 30 through February 1, then 135, 140, 135 and 130 on February 2-5, and 125 on February 6-7.

A predicted planetary A index is 5 on January 11, 8 on January 12-13, 5 on January 14-19, 8 on January 20-21, 5 in January 22-25, 10 on January 26, 5 on January 27 through February 2, 8 on February 3-5, 5 on February 6-8, and 10 on February 9.

The forecast is from January 10, and the solar flux portion is identical to the same report on January 9. The A index portion is

only slightly different on a couple of days, otherwise the same as Wednesday's forecast.

OK1HH has an updated geomagnetic activity forecast. He says to watch for quiet to unsettled conditions January 11-12, active to disturbed January 13, quiet to unsettled January 14, mostly quiet January 15, quiet to active January 16, quiet on January 17-19, mostly quiet January 20-21, quiet on January 22-25, mostly quiet January 26, quiet to active January 27, quiet January 28-29, mostly quiet January 30-31, and quiet again on February 1-2.

Howard Lester, N7SO of Schuylerville, New York recently saw his wire antennas go down in a big wind. The former inverted vee is now suspended two feet above ground at the feedpoint, and 12 feet above ground at each end. So it is now an actual upright V instead of an inverted vee. Howard was excited to see what he could work this week with the fast rising solar flux and sunspot numbers.

He wrote, "Mysteriously, the antenna system still loads with identical settings on my transmatch. So I decided to try transmitting, called a guy on SSB in Germany, and he came back to me with a nice signal report. Then a guy in Greece. And on 17 CW I broke through a little pileup to Iceland."

This was from January 9-10. On January 10 he wrote, "I made a couple of contacts on 15 SSB to Poland and to eastern Ukraine, both less than 1 hour after sunrise. They're all using giant antennas, so no wonder they hear me. It seems awfully early in the morning this time of year for 15, let alone 12, to be open, except that the flux is so high right now.

"I just worked OZ1ADL, Jan, in Galten, Denmark on 12 meter SSB. He gave me a 59 report, and was especially surprised after I described my antenna situation. But, HIS antenna is a 13-element log periodic at 100 feet."

With the fast-rising solar flux this week, it has been fun to examine the thrice daily readings from the observatory at Penticton, British Columbia.

Check
ftp://ftp.geolab.nrcan.gc.ca/data/solar_flux/daily_flux_values/fluxtable.txt
and look at the first column on the left for date, second column for time and the fifth column for observed solar flux. Daily readings are at 1800, 2000 and 2200 UTC, but the 2000 UTC reading (local noon) is the official solar flux number for the day.

Carl Luetzelschwab, K9LA of Indianapolis, Indiana has some observations on recent solar activity. Carl wrote, "The New Year welcomed us with a nice increase in solar activity. In the past several days I, along with many others, worked A45XR and A65BP (and others) in the late morning hours on 12m and 10m via long path to

the southwest from here in the Midwest. I even worked VU2XO on 10m SSB via long path (to the south) at 1638z on Friday January 4 - he was extremely weak but workable.

"These QSOs are good examples of low probability openings, and they were aided by the increased aforementioned solar activity. VOACAP predicts these openings (even at low solar activity), along with many other low probability paths. You just have to be there when they happen.

"Both ends of the path are looking toward the equatorial ionosphere, with the highest MUFs in the world (even at low solar activity). Our end of the path is in daylight, which of course is good for these higher band QSOs. The other end is past sunset, but not far enough past sunset to have the MUF decrease significantly - thank goodness the ionosphere recombines much slower after sunset than it ionizes at sunrise. And more than likely this wasn't conventional multi-hop - I suspect chordal hops that kept the losses down."

Thank you, Carl.

Several readers had comments about past solar cycles. Lou De Chiaro, WB2IJT of Lindenwold, New Jersey wrote, "I was fairly active on HF during the late 1960s when Cycle 20 peaked. At the time, my rig was a Heath SB-300 receiver and SB-400 transmitter running around 100 watts CW output. My largest HF antenna consisted of a rhombic that measured around 40 feet in the short dimension and about 300 feet in the long dimension. The best propagation results happened on 10 meters during the 1969-1970 period, and I both observed 20 dB/S9 signals and received equally glowing reports from several VK and ZL stations on both CW and SSB. My QTH at the time was in northern NJ. Since then, I have unfortunately not seen signals of comparable strength from 'down under,' though one always wants to remain hopeful."

Ken Bourke, N6UN of San Diego, California wrote, "I was born in 1940 and fit the age group that you talk about and the expectations we had. I enjoyed the current article about this age group as it moved thru the 11 year sunspot cycles and it is very accurate and true. No cycle compares to the 1958 one.

"We old QCWA hams always hope and think we will have another cycle like that 1958 one, but it never has happened. In 1958 I was 18 years old, in Illinois (W9ZVG, Extra Class), with 1 KW and a quad at 60 feet. But I even got bored working so many DX countries. I did not know I was experiencing a once in a lifetime event. 15 meters was also hot. I made a tape recording of the crowded 10 meter band on old tape at 7.5 ips.

"But I always thought the band would come back like that 1958 event every 11 years, but it never has come back like 1958. I still keep hoping and do think some cycle in the future will be even stronger,

with a higher daily 23 cm solar flux than our 110 or 120 today, like over 150 or 200 daily, solar flux which might occur with a big long term solar eruption and massive solar wind. I keep waiting for a lot of long term continuous solar activity."

Fortunately, solar flux this week is actually over 150, rising to 174 on January 10 and predicted at 175 on January 11-12.

Tom Gallagher, N6RA of San Francisco, California wrote, "I was one of the lucky ones to be on the air and hunting DX in the 50s. I'm now 70. I was licensed in 1955 as KN4DRO in Miami at the age of 12. I quickly got into DXing (having been an SWL DXer at the age of 10 and a BC band DXer at the age of 6 when my parents gave me my own little BC band radio). In 1958 I received DXCC #3698. I had about 210 countries when I went off to college in 1960 (I was actually the #9 DXer in the state of Florida with my puny station when I went off to college). I had a very modest station--50 watts on CW and AM (I had 140 countries on AM phone) with a 2 element quad at 30 feet. My experience during the various sunspot cycles was very much like you outlined. I had them all for a while, but missed South Sudan (haven't sent in the new PJ cards yet).

"6 meters has taken my interest in the last 13 years or so. There seem to be a lot of geezer HF DXers on 6! I had hopes of making DXCC on 6, but it's harder than I ever envisioned from the West Coast and the sunspots don't seem to be cooperating. I do have some juicy DX on 6 from 2001, such as Z22JE, ZD7, 3W, DU, VR2, etc."

Before closing, check out a couple of interesting articles about solar activity at http://earthsky.org/space/nasas-three-minute-solar-cycle-primer and http://earthsky.org/space/frank-hill-sees-future-sunspot-drop-no-new-ice-age.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30112
SIDC SOLAR BULLETIN 12 Jan 2013, 1201UT
SIDC FORECAST (valid from 1230UT, 12 Jan 2013 until 14 Jan 2013)
SOLAR FLARES : Active (M-class flares expected, probability >= 50%)
GEOMAGNETISM : Warning condition (activity levels expected to increase, but no numeric
forecast given)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 12 Jan 2013 10CM FLUX: 173 / AP: 002
PREDICTIONS FOR 13 Jan 2013 10CM FLUX: 173 / AP: 001
PREDICTIONS FOR 14 Jan 2013 10CM FLUX: 173 / AP: 001
COMMENT: NOAA AR 1654 still has the potential for M class flares in the
coming 48 hours, with a slight risk for an X flare; we therefore
forecast active conditions for solar activity. An M 1.0 flare occurred
on Jan. 11, in this region, at 1507 UT (peak time). So far, no
Earth-directed CME, related to this region's flaring activity can be
observed. However warning conditions are issued for the geomagnetic
activity. Current conditions are quiet.

TODAY'S ESTIMATED ISN : 105, BASED ON 07 STATIONS.

From: Phil Snyder
Topic: 20320 Message: 20320

At the request of Jack, W9NJB, I was asked to post this.

W9NJB is the manager for V25A prior to 12/23/2012. These QSO's were made by Bob K9MDO.

As of 12/23/2012 the call has been re-assigned to KG2A.

Thanks for the bandwidth.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30113
SIDC SOLAR BULLETIN 13 Jan 2013, 1212UT
SIDC FORECAST (valid from 1230UT, 13 Jan 2013 until 15 Jan 2013)
SOLAR FLARES : Active (M-class flares expected, probability >= 50%)
GEOMAGNETISM : Warning condition (activity levels expected to increase, but no numeric
forecast given)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 13 Jan 2013 10CM FLUX: 165 / AP: 003
PREDICTIONS FOR 14 Jan 2013 10CM FLUX: 165 / AP: 001
PREDICTIONS FOR 15 Jan 2013 10CM FLUX: 162 / AP: 001
COMMENT: Solar activity is dominated by NOAA ARs 1652 and 1654, which
both have the potential for M class flares in the coming 48 hours, with
a small risk of an X class flare from AR 1654. Two M flares occurred on
Jan. 13: a M1.0 flare, peaking at 00:50 UT, and a M1.7 flare, peaking at
08:38 UT, both in AR 1652. The second one was associated with a metric
type II burst. Both flares were quite impulsive with no obvious CME
signatures (but no LASCO observations are yet available for the second
event). If this is confirmed, geomagnetic conditions should be mostly
quiet during the next 48 hours, but due to the risk of a geoeffective
CME, warning conditions are issued.

TODAY'S ESTIMATED ISN : 084, BASED ON 07 STATIONS.

Not much to talk about, Al . . . no DXpeditions ongoing, flux is up, 12/10 are not quite rocking yet because we are in the "January lull", and LoTW is fixed. Nothing to complain about and not much on the horizon to look forward to. Any DXpeditions of note in the next month or two?

Hi Al

Other than Paul's report I have gotten only two since yesterday around
1400Z.
Not much for these guys to talk about since LOTW is running again

Yup, Jim, with LoTW seemingly fixed there appears to be little to talk about. Conditions might improve over the next few days, though.

I worked a JE8 on 30M around 1900 yesterday. Big signal and me with just an inverted vee and 100W on that band. Also worked JT1CO around the same time one day last week, also on 30M.

And yes, it was an e-mail issue here -- got 280 e-mails when I got it sorted out!!!!!

Hi Roger,

I have IK28ac in my log. I can't recall where I got it, but I try to get grids as close as possible for all stations I work because my logging program (DXKeeper od the DXLabs suite) calculates the distance from my QTH.I like to know how far the signal goes. I can't imagine it was a rough guess . . . I must have found it somewherefrom a source I considered credible.

I worked XV1X on 10M long path this morning. Does that beat a JT
on 30M? :-)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-January, through Sunday, 13th-January there were 219 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JT, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9L, VK9N, VP2E, VP2M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2012 DX SOUND BITES! Tom, K8CX, has done it again. He has provided DXers with 135 memorable DX sound clips from 2012. Visit Tom's famous "HAM GALLERY" Web at: http://hamgallery.com/dx2012
While there also check out some of his other features on his Web page,

such as: 15 years of "Rare DX Sound Clips" of the past (as well as some clips from the 1960's and 1970's), QSL Card Museum, Dayton Photo Galleries and Tribute to Silent Key Ham Operators. Tom states, "If anyone has any old HF recordings, I would be interested in hearing from them."

5B, CYPRUS. Roman, UR0MC, will be active as 5B/UW2M during the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/High-Power entry. QSL via US0LW.

9M4, SPRATLY ISLANDS. Operators John/9M6XRO, Steve/9M6DXX, James/9V1YC, Ben/DJ0YI/N6MUF, Don/G3BJ, Christian/EA3NT and Tony/KM0O will be active as 9M4SLL from Layang-Layang Island (AS-051) between March 10-18th. Activity will be on 160-10 meters using CW, SSB and RTTY. They will have several stations on the air with amplifiers into vertical antennas all within a few meters of the ocean. QSL Manager for this operation is Tim, M0URX (OQRS, direct, by the Bureau, LoTW). Logs will be uploaded to LoTW as quickly as possible after the DXpedition. More details will be forth-coming.

AAW NEWS (How may I register my station for 10th AAW?). Gianni, I1HYW, reports: "Next month, February, will start the 10th Antarctic Activity Week; here below there is a brief explanation on how to join the Antarctica Activity Week (see <www.waponline.it>). To enter the AAW, it's necessary to get a special callsign (not the home call) issued to celebrate the event, (just for example I have requested as every year, my IR1ANT call issued by the Ministry of Communication of my Country for the AAW event). In alternative, one can use his home callsign adding /AAW, or /ANT, or /WAP, or /A which stands for Antarctica to any special event callsign will be given a WAP reference number to be used during the event. I don't know the law/rules of foreign countries, but the applicant should get in any case an authorization to eventually use his own callsign /ANT or /A etc.... , since just a pure own call is not a special event call, but a classic home call which could not be given a WAP reference number. Participation is open and hunters can try to contact as many as AAW SES which WAP reference number can be used when applying for WAP Antarctic Awards according to the Award□s rules. The list of participants already registered for the 10th AAW is available at WAP Web site at: http://www.waponline.it/Default.aspx?tabid=113 "

C6, BAHAMAS. Operators George/W4BUW (C6AGH), Joe/W8GEX (C6DX), Janet/W8CAA and Joe/AA4NN will be active adjacent to the ocean on Great Exuma Island (NA-001), Bahamas, between January 20-27th. Activity will be on 160-10 meters using CW, SSB and RTTY, with three stations on the air. QSL C6AGH via W4BUW and C6DX via W8GEX.

C6, BAHAMAS. George, KQ8Z/GM0IIO, will once again be active as C6AZZ from Grand Bahama Island (NA-080, WLOTA 0527, WW Loc. FL06UO). This time it will be for the ARRL DX CW Contest (February 16-17th) and the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/Single-Band (20m)/Low-Power entries. He states that he will be on other bands for a few days before and after the contests. If like last time, activity will

focus on 6 meters (CW, SSB, FM) if there are any band openings, otherwise on 80-10 meters, mainly CW with some SSB using his Icom 756 Pro3. George will use a 80m OCFD antenna at 40 feet. The 20m antenna will be a full sized 20m delta loop right on the beach vertically polarized with the apex at 40 feet. QSL via KQ8Z.

CQ NEWS (CQ Facebook "Fans" Top 10,000). Richard, W2VU, Editor of CQ Amateur Radio, reports on January 9th: "CQ Facebook 'Fans' Top 10,000 Mark - Nearly Half Under Age 45 -- As 2013 began, the number of 'likes' on the CQ Facebook page exceeded 10,000 for the first time. These fans of CQ continue to represent a considerably younger group of ham radio operators than organized ham radio has been reaching through traditional means. CQ has had a page on Facebook since 2010, and the demographics of its fans have remained consistent even at the numbers have grown. 'Over 46% of CQ's Facebook fans are under age 45,' said CQ Editor Rich Moseson, W2VU. 'In addition, fully three-quarters are under age 55 and 20% are under age 35. This is continued proof that there is a significantly higher number of younger hams 'out there' than we commonly see at club meetings and hamfests. It also shows that reaching these younger hams requires 'meeting them on their turf'.'
Facebook statistics show that CQ's fans are drawn from all over the world, with some 20 countries represented and members in the U.S. accounting for fewer than half of the total. CQ's Facebook page may be found at < https://www.facebook.com/CQMag>.
CQ Amateur Radio magazine < www.cq-amateur-radio.com> is the world's leading independent amateur radio publication, with print and digital edition readers in over 100 countries. CQ sponsors more than a dozen amateur radio contests and operating awards, including the world's most popular participation sport, the CQ World Wide DX Contest.
CQ is a publication of CQ Communications, Inc., which also publishes Popular Communications < www.popular-communications.com>, CQ VHF <www.cq-vhf.com> and WorldRadio Online < www.worldradiomagazine.com> magazines. In addition, Spanish and Portuguese versions of CQ are published in Spain and Brazil, respectively."

DAYTON HAMVENTION NEWS.....
* Contest Dinner - Tim, K3LR, Dayton Contest Dinner Chairman reports - [edited] "The North Coast Contesters are proud to announce: The 21st Annual Dayton Contest Dinner
The 2013 Contest Dinner tickets are on sale now exclusively via the Contest Dinner Web site. Thanks to Scott, KA9FOX, and QTH.com for designing, building and running the Contest Dinner Web site: http://contestdinner.com
Master of Ceremonies for the Dayton Contest Dinner is CQ Contest Hall of Fame member and World Wide Radio Operators Foundation (WWROF) Chairman, John Dorr, K1AR. Dr. Robert G. Cox, K3EST will be our featured speaker.
The Contest Dinner will be held on Saturday night, May 18th, at 6:30 PM. Cash bar opens at 5:30 PM. Located at the newly renovated Crowne Plaza Hotel (Official Contester Hotel) 5th and Jefferson Streets (Next to the Dayton Convention Center) Dayton (Downtown), Ohio in the

PRESIDENTIAL BALLROOM on the second floor.
Seating is random. Tables are set in rounds of 10. You can purchase
an entire table for your club or group (purchased group tables are
set for 8).
Tickets are only available at: http://contestdinner.com
There will be no tickets for sale at the door.
Also remember to visit the 25th annual Contest Super Suite (all FOUR
nights during Dayton) - details are here: http://contestsupersuite.com
We expect another sold out event for the Dayton Contest dinner. Get
your tickets early!"

* Dayton Contest University - Tim, K3LR, CTU Chairman, reports [edited]:
"I am pleased to announce that early bird registration (lowest fee)
is now open for 2013 Dayton ConTest University ('CTU') to be held
all day on Thursday May 16, 2013, at the Crowne Plaza in Dayton, Ohio.
Six different countries have hosted CTUs. USA, Germany, Italy,
England, Brazil and Finland. CTU Australia will be held in a few weeks.
Nearly 2000 students have attended CTUs with more than 60 CTU Professors
sharing their contesting experiences.
2013 will be the seventh year in a row for CTU Dayton. The 2013
suggested CTU topics are listed on the CTU web site at:
http://contestuniversity.com
The 2013 CTU Professor line up is outstanding. New 2013 CTU Professors
are - K5GN, N0JK, K9YC, K3EST and K6MM. Also past CTU Professors - who
will give new papers this year are W3LPL, K1DG, W0YK, NC0B, N6TV, K5ZD,
M0DXR and K3LR.
Details and early bird discounted registration information is on
the CTU web site at: http://contestuniversity.com
Important - as we did last year - if you want to sign up for CTU
2013 Dayton and you have given (or will give by Dayton 2013) a talk
about Amateur Radio Contesting to any club, hamfest or group since
May 20, 2012 - you qualify for a 10.00 USDs registration fee discount.
Please choose the 'Registration w/Discount' option to get the 10.00
USDs discount. Spreading the word about contesting is lots of fun and
can save you money!
Early CTU student signups will have the opportunity to help select
the 2013 Dayton CTU class outline topics. For a limited time, once
you have registered, please help construct the CTU curriculum content
by going to this survey link: http://www.surveymonkey.com/s/8XZG5NS
Thanks to all of the CTU sponsors Icom America, Superbertha.com, DX
Engineering, CQ Magazine and INRAD for making CTU possible. Thanks to
W9PA and K1SO for all of their help with CTU. Special thanks to Scott,
KA9FOX from QTH.com for hosting and constructing the CTU web site."

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting
the following operation for DXCC credit:
3D2C ☐ Conway Reef; 2012 Operation
If you had cards previously rejected for this operation please send an
E-mail to <bmoore@...> to be put on the list for an update.

DX MARATHON (Update). John, K9EL, CQ DX Marathon Manager, reports [edited]:
"The 2012 DX Marathon ended at 0000z January 1, 2013, and the 2013 Marathon began immediately! Yes, everyone's country and zone count reset to Zero and the race for the most countries and CQ zones for 2013 is underway.
Everyone can participate in the Marathon ☐ details and complete rules are available at: http://www.dxmarathon.com
The deadline for submission of 2012 logs is January 31, 2013. We know an earlier date was published, so the date was extended to avoid any confusion. Next year's deadline will be January 10, 2014.
To submit your score, use the latest Marathon Score Sheet (2012.5) that can be downloaded from the DX Marathon website. If you use computer logging, see the website for links to tools that simplify the submission process. Please note if you are using the ADIF to DX Marathon tool created by Jim, AD1C, make sure you are using the latest version. The tool changes each year in response to DX Marathon changes.
Double-check your submission for errors, making sure all information is filled out at the top of the form, BAND data was used instead of frequencies and MODE is either CW, Phone or Digital. SSB is also accepted.
If you are entering in Formula Class, be sure to include a detailed description of your antenna. And don't forget to add your comments on the Marathon at the end of the form.
The Marathon offers special awards for single mode and single band submissions. Simply enter only QSOs for a particular band or mode and the computer will classify your submission accordingly.
The DX Marathon website offers additional information on pirates and other helpful hints. If you have questions, feel free to contact me at: john@dxmarathon.com
Once your submission has been computer validated for all required information and proper formatting, your callsign will be listed on the received logs page on the DX Marathon website.
High claimed scores will be published in February and the complete results of the 2012 Marathon will be in the June 2013 issue of CQ Magazine."

DX SURVEY RESULTS (DX Magazine's 2012 Most Wanted Countries Survey).
DX Magazine's has published their Most Wanted Countries. Here are the "Top 20" (in the World-Wide "Weighted" Rankings Mixed Modes) as per DX Magazine (Jan./Feb. issue):

2012 Rank	2011 Prefix	2012 Country	2011 Rank	2012 Rank	2011 Prefix	2012 Country	2011 Rank
1	P5	North Korea	1	11	PY0S	St. Peter and Paul	16
2	KP1	Navassa Island	2	12	KH5K	Kingman Reef	18
3	3Y/B	Bouvet	3	13	ZL9	Auckland/Campbell	15
4	FT5Z	Amsterdam	6	14	KH5	Palmyra	17
5	VK0/H	Heard Island	4	15	SV/A	Mount Athos	14
6	FT5/W	Crozet	7	16	E3	Eritrea	24
7	BS7H	Scarborough	8	17	BV9P	Pratas Island	21
8	VP8/S	South Sandwich	9	18	FR/JE	Juan de Nova/Europa	20
9	ZS8	Marion Island	10	19	VP8/G	South Georgia	22
10	FT5T	Tromelin Island	13	20	KH3	Johnston Island	23

The "Top 100" is on the DX Publishing, Inc. Web site at:
http://www.dxpub.net/MOST-WANTED-SURVEY.html

EY, TAJIKISTAN. Nodir, EY8MM, from Dushanbe, will be active during the CQ 160 Meter CW Contest (January 25-27th) as a Single-Op entry. QSL K1BV via direct, by the Bureau or LoTW. Check out his home page at:
http://www.ey8mm.com

FR, REUNION ISLAND. Operator Pierre/F8APV will once again return to Reunion Island (AF-016) this time with Stéphane/F8EOI and be active as FR/F8APV and FR/F8EOI between January 21st and February 8th. Activity will be active on 40-10 meters, using a Buddipole antenna system (longer than standard with telescopic long whip) and with a focus on 30 meters CW and 20 meters SSB. QSL via their home callsigns. ADDED NOTE: Pierre will accept skeds at: pierre.goasguen.f8apv@...

FY, FRENCH GUYANA. Marc, F1HAR, will be active as FY5KE in the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/Single-Band (15m)/High-Power entry. QSL via LoTW, by the REF Bureau or direct to FY5KE.

GB6, ENGLAND (Special Event). Operator Herbie/G6XOU and friends will be operating as GB6WLB between January 19-27th, as part of the RNLI SOS Radio week. They will operate on most HF bands from Walton on the Naze, in Essex, England. (EU-005, WAB TM22, Loc. JO01PU). Herbie is a keen PSK operator, and this call has been registered as EPC #19125. QSL via G6XOU - please see QRZ.com for details. All logs will be uploaded to eQSL.cc. Event details are on the Web site at <www.sosradioweek.org.uk>.

IOTA NEWS.....
EU-145. Operators Colin/G3VCQ, Andy/M0GAV and Sharon/M3VCQ will be active as CT7ACG (callsign pending) from Culatra Island (DIA Ai-01, DIP AL-001, PIP ST-019, WLOTA 0144) between July 26-29th. Activity will include an entry in the RSGB IOTA Contest (July 27-28th). Outside of the contest, look for the team members to be active on all bands and modes. QSL direct or by the Bureau to CT7ACG. Look for updates at:
http://www.sheffield-live.co.uk

NA-143. Joe, K5KUA, will once again activate Galveston Island (USI TX001S, Galveston county, Texas) between January 18-21st. Activity will be CW only on 40-10 meters, mainly 40/20m as conditions and time permits. QSL via K5KUA, direct or by the Bureau.

SA-050. Jose, CE8DMT, is now active from Puerto Williams on Navarino Island. His length of stay is unknown at this time. Activity has been on 40 and 15 meters SSB. QSL via his home callsign.

SA-096. (A CALL FOR HELP/Donations) Lutz, DK8UH, Secretary & QSL Manager of GDXF, informs OPDX readers [edited]: "The GDXF has supported the LU6W DXpedition, which a short time ago activated the South American IOTA group SA-096 for the first time ever. The experienced crew with Cezar/VE3LYC, Johan/PA3EXX, as well

as members of the Radio Club Puerto Madryn, experienced consider-
able difficulties on the island of Escondida. Both a team and
a boat crew member were so severely injured, that an immediate
return was required for medical attention. Items already off-
loaded had to be immediately secured and left on the island,
but were then lost to the heavy seas. This loss of several
radios, antennas, a laptop and other equipment has hit the
team hard financially. Further details can be read at:
http://lu8w.yosalite.com
The GDXF requests anyone who wishes to help to please donate
to the LU6W team. All received donations will be forwarded and
a list for accountability purposes will be published. For
donations from outside of Germany:
PayPal - schmadel@...-heidelberg.de
Or for direct transfer:
Account holder: GDXF c/o Schmadel
Bank: Volksbank Neckartal eG
BIC: GENODE61NGD
IBAN: DE116729170000262036 00 "

J3, GRENADA. Bob, G3PJT, will be active as J34G from Grenada (NA-024,
WLOTA 0718) between March 5-20th. Activity will probably be holiday style
using a K2 w/100 watts and vertical antennas. He plans to also be in the
RSGB's 75th Commonwealth Contest (March 9-10th). Look for him outside of
the contest, especially on 80 and 30 meters. QSL via his home callsign.

J7, DOMINICA. Operators Bernie/W3UR (Editor of "The Daily DX") and his
father Tony/N3ME will be active from Dominica (NA-101) between the end
of January and early February. Their schedule and callsigns are as
follows: J77A - Operator Bernie; between January 22nd-February 1st
J76A - Operator Tony; between January 22nd-February 11th
ADDED NOTE: Their special prefixes represent the year they
received their amateur radio license (1976 and 1977).
Activity will be during their spare time and on 160-6 meters using CW,
SSB and RTTY. QSL via their home callsigns, direct or by the Bureau
or LoTW.

JD1, MINAMI TORISHIMA. Take, JG8NQJ, will once again be active as JG8NQJ/JD1
from Marcus Island in the Minami Torishima (OC-073) group starting January
15th. He is there to work on the island's weather station and will stay
until mid-April. Activity will be mainly on 17/15/12/10 meters CW. QSL
via his home callsign, by the Bureau or direct to JA8CJY: Susumu 'Sin'
Sanada, 5-17, 5-4, Shin-Ei, Toyohira, Sapporo 004, Japan. Online log is
available at: http://dx.qsl.net/cgi-bin/logform.cgi?jd1-jg8nqj

OH0, ALAND ISLAND. Operators Juha/OH1JT, Ari/OH5DX and Tomi/OH6EI will be active as OH0Z during the CQ 160 Meter CW Contest (January 25-27th) as a Multi-Single entry. QSL via W0MM.

P2, PAPUA NEW GUINEA (Update). Nao, JA2VQP, who has been in PNG since September 26, 2012, and will be there for the next two years, informs OPDX of the following update. He is a volunteer of JICA (Japanese ODA) teaching mathematics at the Divine Word University in Wewak, East Sepic Province (north coast of PNG main land). He states that he has received a full PNG license, P29NO, thanks to some advice by Renzo, P29FR. Nao, states, "Recently, I brought my FT-857 and a antenna tuner from Japan. There is wide space to build up antennas, but I have no materials. I would like to start with a long wire. I would appreciate if anyone could send me materials to make antennas. Blacking out is very frequent, and the internet condition is really bad. I've not decided the QSL Manager yet. I have applied for the LoTW. I'll be in Port Moresby, the capital city of PNG, starting Jan. 19th, and stay for a week. Then I'll be able to get other things there. I will try to be active at Wewak by the end of this month, maybe. I can operate CW, SSB and RTTY. I am thinking of other modes." So begin looking for P29NO in the coming months. Watch QRZ.com for updates.

PW7, BRAZIL (Special Event). Look for members of the Natal Digital Group <http://natal-digital-group.blogspot.com.br> to activate special event station PW7F between January 18-20th. Activity is to celebrate the 413th anniversary of "Fortaleza dos Reis Magos" or also known as "Forte dos Reis Magos", located in the city of Natal, state of Rio Grande do Norte, BRAZIL. See QRZ.com for some pictures. Operations will be on 160-10 meters using CW, SSB and the Digital modes. Operators mentioned are Ed/PS7DX, Nazareno/ PS7NN, Mac/PS7GL, Carlos/PS7KC and Nat/PS7HD. QSL Manager is PS7HD.

CORRECT QSL ROUTE FOR V25A. Please take note that the current V25A QSL Manager is NOT W9NJB. The V25A callsign has been reassigned to KG2A in 2012, and he apparently only responds to direct QSL requests. W9NJB cannot handle these cards for 2012 and after.

POSTAL INCREASE (Italy). Gianni, I1HYW, informs OPDX that in 2013 an increase in Postal rate has reached a huge amount! He states, "Just to inform DXers of the new postal rate in force since Jan. 1st, 2013, in Italy. Within Italy the rate goes from 0.60 to 0.70 cents, within Europe, from 0.75 to 0.85 cents. From Italy to North & South America, Africa & Asia, the rate goes from 1.60 Euro to 2.00 Euro. From Italy to Australia & Oceania from 2.00 Euro to 2.50 Euro. The USDs is trading in Italy to the value of 1 Euro = 1.3056 USD or 1 USD = 0.7659 Euro; that means it is necessary for 3 USDs to cover postal expense to deliver a letter to North & South America, Africa & Asia and 4 USDs to Australia & Oceania. It□s embarrassing to say that, but this is unfortunately, the situation that affects not only this country but I think, the entire globe. As QSL Manager of quite a few different foreign callsigns, I am therefore sorry to say that if there isn't a sufficient postal coverage, I can't deliver your QSL cards direct, nor put them in the bureau as for that, I should pay an extra costs (ARI asks about 35 USD/year for each different foreign callsign managed by the Italian bureau). I trust, in your understanding, and I suggest eventually to join your friends and send a cumulative requests in one envelope to share the costs (at least when you QSL through I1HYW)."

LOTW UPDATE. The ARRL's Web page and Letter report: "The processing queue for Logbook of The World (LoTW) -- the ARRL's online log processing system -- has been shrinking steadily since Monday, January 7th, when the system was brought back online after the completion of previously announced maintenance involving the installation of a new database server equipped with solid state drives (SSDs). Since then, the system has been stable and, as expected, the SSDs are proving to be much faster. As of January 9th, the delay between a file being uploaded and processed is about 8 days and is dropping by one day approximately every 10 hours."

TIME TO UPDATE YOUR GS-IRC CHART. Bill, W9OL, states that this is the 15th year for his GS/IRC Chart and it's time to update the information/

data again. (U.S. Postage rates increase effective January 27, 2013)
Bill states, "Please take a look at the GS-IRC Chart and let me know
of any changes in postage for the country YOU reside in. There is a lot
of OLD data that I have NOT received updates on. If you live in or have
a friend who resides in these missing countries, please elicit his help
in obtaining the new information."
The current chart resides at:
http://www.qsl.net/w9ol/IRC_Chart.htm

ST, SUDAN. Lourens, ZS6AKB, is currently active as ST2/ZS6AKB when mobile
in the Darfur region of Sudan. The length of his stay is not known, but
he was heard on 20 meters January 10th - between 1600-1640z on 14181 kHz.
He used a FT857 with a Tarrheel 11 antenna. Lourens normally lives in a
small suburb (Eastvale) of a town called Springs approximately 70 Km
east of Johannesburg.

SU, EGYPT. Gerd, DJ5IW, will once again be active as SU/DJ5IW from El
Fardous between January 14th and February 8th. Activity will be limited
to his spare time and mainly on 40/20/17/15/12/10 meters CW only using
a IC-756 PRO with 100 watts. There will be no 80m, 30m and RTTY because
it is not allowed in Egypt. QSL via his home callsign.

TO1, FRENCH GUYANA. Herve, F5HRY, will be active as TO1A in the ARRL DX
SSB Contest (March 2-3rd) as a Single-Op/Single-Band (10m)/High-Power
entry. QSL via LoTW.

TRIATHLON DX CONTEST. Kostas, SV1DPI, Triathlon DX Contest's Manager,
is inviting everyone to participate in the "1st Triathlon DX Contest".
The Triathlon will take place the first full weekend of February every
year. This year it will be on Saturday, February 2nd. Kostas states,
"We are trying to simulate the original Triathlon athletic event. So we
involved 3 major ham radio modes, RTTY, SSB and CW. It will be a 24 hour
non-stop event divided in 3 sections, each one devoted to a different mode.
We start at 0000z on Saturday, February 2nd, with RTTY until 0759z.

After that we continue from 0800z with SSB until 1559z, and finally there is the CW part starting at 1600z until 2359z. The exchange is simple; just 59(9) and serial number... Multipliers are the DXCC entities in every mode and band plus the number of different Greek stations you will work during the entire contest. There are simple mode categories and mixed mode as well. Also you can make your own teams and participate in team contesting also. The best of all is that the winner will get a wonderful prize: 10 days all paid for 2 persons in Zakynthos Island (EU-052) in Greece, offer of Xenos Hotels Group. You can find more info as well as the complete rules in several languages at:
http://www.triathlon-dx-contest.gr
We are looking for your participation...
73... de Triathlon-DX-Contest team <dxtriathlon@...>"

VK9C, LORD HOWE ISLAND. Tomas, VK2CCC (aka LY1F), will once again be active as VK9LL between September 22-29th. Activity will be limited to his spare time with a focus on 160/80 meters. QSL via LoTW, and by the Bureau or direct via VK2CCC. For updates and possibly more details, watch the following Web pages: http://www.qrz.com/db/VK9LL
(Web page from his 2010 operation) http://www.qrz.lt/ly1df/vk9clh.htm

XV, VIETNAM (IOTA Op!). Just a reminder that operators Sei/JA7LU and Hiroo/JA2VWG will be active as XV4LU and XV4DDD, respectively, from Phu Quoc Island (AS-128) between January 12-16th (2013). Activity will be on 40/20/17/15/12/10 meters using SSB and RTTY. See QRZ.com for details on QSL information.

YN, NICARAGUA. Scott, K7ZO, will once again be active as YN5ZO during the ARRL DX SSB Contest (March 2-3nd) as a Single-Op/All-Band entry. He usually operates "Field Day Style" using a 5 band Spiderbeam and 40m dipole on a push up mast. The radio is a TS-590 driving a KPA-500 amp. QSL via LoTW and K7ZO, direct or by the Bureau. Look for Scott to be active before the contest as well.

Z8, SOUTH SUDAN. Ken, K4ZW, is currently active as Z81Z from Juba. His length of stay is unknown at this time, but some reports say a month. Activity will be 80-10 meters CW. He was heard this past week on 40/20/15 meters. QSL via his home callsign, direct or by LoTW.

ZF, CAYMAN ISLANDS. Dick, WN3R, will be once again active as ZF2RW from Grand Cayman Island (NA-016, WLOTA 1042) between February 20-26th. Activity will be on all HF bands and modes. QSL via his home callsign direct (see QRZ.com).

ZK3, TOKELAU (Update). Operators Hans/DL6JGN and Guenter/DL2AWG will be active as ZK3N from Nukunonu Atoll (OC-048) between April 23rd and May 8th. Activity will be on 80-10 meters using CW, SSB and the Digital modes. They will be using a TS590 with a Tokyo Hy-Power solid state amp; K3 with a 500 watt solid state amp; AV640 and Tripod Leg for 40-10 and GP for 80m. QSL via DL2AWG. Subject to a reliable Internet connection, they will upload their log to ClubLog on a daily basis. Otherwise, the complete log will be uploaded upon their return. There is a ZK3N Web page available at:

http://www.tokelau2013.de

From: VE1AL
Topic: 20322 Message: 20330

Not sure how to respond, Paul. Certainly an XV on 10M is good DX with a
big beam and a full gallon! And I haven't got one of those.

However, down to the wire I'd say a JT1 on 30 with just an inverted vee and
100W trumps the XV.

Perhaps others would like to settle this for us! :-)

I worked XV1X on 10M long path this morning. Does that beat a JT on
30M? :-)

The way the higher bands are acting today, working a W9 or VE3 on
10M is an achievement, but so is working Zone 23 from Zone 5 on 30M with
100 watts and a dipole. I'd say it's a draw!

I just worked VK3CWB on 20 CW LP, but VE9HF beat me the first
call, so I had to wait my turn . . . I also worked a VK3 up the band on
SSB a few minutes earlier so that path is good rite now.

Thanks, Paul. There used to be an 160m award called "The 40,000 Mile WAC" sponsored by the now defunct Low Band Monitor magazine. I still do it just for fun every year. Right now at just over 37,000 miles. I've got to find someone a lot deeper onto the Dark Continent!

73, Roger

From: ve1al@...
Topic: 20322 Message: 20333

WOW! That's amazing. I've suspected for years that there's a vast difference in propagation between Sydney and Halifax. Now I know.

I've had my beam SE all day, waiting for a LP opening on 20 or at least AF on 15 and 10. Nuttin', NADA!!! All I've heard other than EU are a few SA (watery at best) and on 20 just FK8DD who wasn't as strong as he was yesterday.

Mind you, I worked a JE8 on 30 yesterday around the same time of day as JT1CO but there was nothing on that path today. Also heard an HL (been a very long time since the last one) on 20M last evening but I couldn't break the pile-up because he seemed to be working west coast and central US only -- I was just too weak. :-(

Don't think anyone wants to get into our "contest" cause there've been no comments :-)

73,

Al, VE1AL

The way the higher bands are acting today, working a W9 or VE3 on 10M is an achievement, but so is working Zone 23 from Zone 5 on 30M with 100 watts and a dipole. I'd say it's a draw!

I just worked VK3CWB on 20 CW LP, but VE9HF beat me the first call,
so I had to wait my turn . . . I also worked a VK3 up the band on SSB a few
minutes earlier so that path is good rite now.

It depends on whether you already have zone 23 on 30m or 26 on 10m. I have 26 confirmed on 10, but am waiting for my JT1CO card on 30m so I would say that is the better catch. XV1X was S6 here on LP today but couldn't hear my small signal.

Not sure how to respond, Paul. Certainly an XV on 10M is good DX with a big beam and a full gallon! And I haven't got one of those.

However, down to the wire I'd say a JT1 on 30 with just an inverted vee and 100W trumps the XV.

Perhaps others would like to settle this for us! :-)

Not much to talk about, Al . . . no DXpeditions ongoing, flux is
up, 12/10 are not quite rocking yet because we are in the "January
lull", and LoTW is fixed. Nothing to complain about and not much on the
horizon to look forward to. Any DXpeditions of note in the next month
or two?

I made it up, but we are in a period where propagation tends to be poor even when the flux is up. The opposite of the spring and fall enhancements of the 6 weeks or so surrounding the spring and fall equinoxes. Regardless of the flux, the bands seem attenuated this time of year, and in mid summer. Especially the higher frequencies. Wait until March and 12/10 should be open worldwide most days . . . isn't happening now and we saw the flux > 170 this week.

Hi Paul,
Any reason why this happens? I see that the flux is pretty high, but not much activity on 12 or 10m. Did catch VU2RTS on 12m RTTY the other day on Long Path. I don't remember the lull during the last solar peak.

I remember reading in "The Complete DXer" that DXing generally isn't that good around high noon, except in the dead of winter. THat made me think that this time of year would actually improve DX conditions.

Al,

The FCC is run by bureaucrats and professional politicians who are, for the most part, lawyers or had a legal background. Not engineers or technically trained people.

In short, to call them jerks (or worse) is at best redundant. It goes without saying.

That said, the mistake was made in 1977, when the current callsign sequential allocation system was designed, and actually began in March 1978 when that system was implemented. So after 35 years. they must figure we're all used to it.

To say nothing of the fact that it would cost $$$ to reprogram the computer system. yeah, I know, it should only cost $, but this IS Government we're talking about.

I am not unsympathetic! Far from it. But, to put it bluntly, it ain't gettn' fixed. We all have only one choice: Deal with it.

Hi Ron,

Well, I accept all of what you have said. However, I suspect that if the ARRL, as the national organization in the US, were to take on this issue, something could, in fact, be done. What particularly depresses me is US-licensed stations from outside the CONUS (and that includes KLs who actually are in NA) are not mandated to append the suffix for the area from which they are operating. A KP4 operating from NYC, a KH2 in FL, a KP2 in NH, a KL7 in CO or a W6 in MA, an N6 in GA, N7 in NC...all of these, to me, are ethically wrong.

My views about W1s operating from FL, AZ and so on are well known to readers of this reflector. Yes, the current law is the law. That doesn't mean it is correct. And to me those guys who have moved to other areas of the US and don't change their calls to reflect that area or use a portable identifier are equally unethical.

On an entirely different note, I would like to see the FCC stop issuing US calls to non-resident citizens, even if they write an FCC exam. Like in most other nations, visitors to US soil should use their own nationally assigned calls with a prefix ID for the area from which they operate. So JH1xxx cannot obtain a KH0 call and would have to operate as KH0/JH1xxx unless he were to take up permanent residency on KH0. If I were to operate from FL during a two-week vacation, I should not be allowed to be anything but VE1AL/W4. Were I, however, to moved for 6-months a year to Orlando, I should be able to write the FCC exam and get a W4 call.

Just got all excited when I heard a WH6 on 17M far earlier in the day than I would have expected. Called him, got him and learned that he wasn't in Hawaii at all but in North Carolina. A**HOLE for not signing /W4. Once again, I blame the FCC for this inexcusable confusion. They created it and they can fix it. JERKS.

Hi Al,

I have to admit to a most sardonic smile at the moment, as this discussion brings back memories of a one-time owner of the predecessor of this list. A man most concerned (and rightly so) with the proliferation of "choice" Guam & Marianas calls to non-residents, and yet, ironically enough, a man who kept his Guam call when he moved to Florida.

But, OK, let's delve into it again.

First, you'd have to convince the ARRL leadership that this is an issue that needs addressing. I'm not sure if they would or not. Then you'd have to convince them to talk to the FCC, and that presumes that the FCC will be willing to listen. Considering that it appears that the FCC, or at least some of their staff, consider the Amateur service and (at least some of) it's licensees to be the equivalent of a boil on the buttocks.

That aside, if it were up to me, I'd find a way to craft the rules to require an Amateur who moves from the continental US call districts (1 - 10) to any of the AK / Caribbean / Pacific districts (11 - 13), or who moves from any one of those three "non-CONUS" districts to any other, to change calls. Or at the very least, mandate they sign a portable prefix to indicate where they are (W4/KH2D, for example). I'd even go so far as to make it so that if you move out of your call district and don't change your call, you'd have to sign portable, to be fair to all of us. I guess I'm just old-fashioned, as I remember all to well the days when you had to notify your local/district FCC engineer-in-charge if you were going to be operating away from home for more than 48 hours.

(And don't flame me for my opinion gang, after all, this is merely speculation, it's not going to happen)

I'd make other changes as well. if I could wave the magic wand.

But it's not going to happen. Fun to speculate though.

Hi Ron,

Well, I accept all of what you have said. However, I suspect that if the ARRL, as the national organization in the US, were to take on this issue, something could, in fact, be done. What particularly depresses me is US-licensed stations from outside the CONUS (and that includes KLs who actually are in NA) are not mandated to append the suffix for the area from which they are operating. A KP4 operating from NYC, a KH2 in FL, a KP2 in NH, a KL7 in CO or a W6 in MA, an N6 in GA, N7 in NC...all of these, to me, are ethically wrong.

My views about W1s operating from FL, AZ and so on are well known to readers of this reflector. Yes, the current law is the law. That doesn't mean it is correct. And to me those guys who have moved to other areas of the US and don't change their calls to reflect that area or use a portable identifier are equally unethical.

Al,

The FCC is run by bureaucrats and professional politicians who are, for the most part, lawyers or had a legal background. Not engineers or technically trained people.

In short, to call them jerks (or worse) is at best redundant. It goes without saying.

That said, the mistake was made in 1977, when the current callsign sequential allocation system was designed, and actually began in March 1978 when that system was implemented. So after 35 years. they must figure we're all used to it.

To say nothing of the fact that it would cost $$$ to reprogram the computer system. yeah, I know, it should only cost $, but this IS Government we're talking about.

I am not unsympathetic! Far from it. But, to put it bluntly, it ain't gettn' fixed. We all have only one choice: Deal with it.

On an entirely different note, I would like to see the FCC stop issuing US calls to non-resident citizens, even if they write an FCC exam. Like in most other nations, visitors to US soil should use their own nationally assigned calls with a prefix ID for the area from which they operate. So JH1xxx cannot obtain a KH0 call and would have to operate as KH0/JH1xxx unless he were to take up permanent residency on KH0. If I were to operate from FL during a two-week vacation, I should not be allowed to be anything but VE1AL/W4. Were I, however, to moved for 6-months a year to Orlando, I should be able to write the FCC exam and get a W4 call.

As a fellow user of DX Labs, I agree 100%. I have never wondered where a person is, at least with a US issued call. DX Labs takes care of it. It also takes care of the TO and TM confusion almost as easily. I am surprised other logging software doesn't as well.

I think it is unfair to call any operator an asshole for using the legal call given to them by their government. The problem goes beyond the FCC allowing Hams to keep their calls when they move between call areas. The problem is resistance to change. This isn't 1960 or 1970 or 2007. It is 2013. Technology and rules have changed. We may not like or agree with the changes, but we can either adapt to them or be constantly mad.

This is not directed at you specifically, Al. It is directed at all those who learned a set of rules when they were first licensed and expect they will remain static forever. I've only been licensed since 1987, and I seen a huge number of changes. I adapted with them, and didn't fight them and complain that things were better in 1987. I have personal views on all the changes and I don't necessarily agree all of them were good or made Ham radio better. However, I keep those views to myself, and I really tire of the old guys who try to tell others "The

only right way to do it is the way *I* do, because when I was licensed it was better."

Specifically, where does it say a WH6 living in South Carolina must sign /W4? If there is no regulation so stating, why is he an asshole? Why are the people at the FCC jerks? We are a shrinking subset of the population who are clinging to an ancient, obsolete method of communicating. With the exponential implementation of Internet circuits, cell phones and all sorts of other network attached devices as well as satellite communication and 100s if not 1000s of cable TV channels, etc. how can the FCC or any other country's communication agency hone and enforce rules and regulations for those of us who want to communicate using an ancient, obsolete technology? They are not jerks. They are trying to cope with the huge increase if data flow that came on like an avalanche from about 1990 onwards.

Everyone has at least one PC, one cell phone (I see kids on buses with 2-3 going at once), and I can get 400-500 TV channels if I want to. When I was licensed in 1987, I had 3 TV channels, and AM/FM radio and a land-line phone. The military, coast guard and commercial interests communicated via radio, be it CW or SSB. It's all changed. We can't cling to the past.

It ended. Have a look:

https://www.youtube.com/watch?v=2a4scmlC7tI

DA has gone QRT. Can you copy her? I can, but I bet only 1 in 10,000 in the general population can . . . if that.

Dang, hit the send key prematurely.

Ahem.

Al, a non-resident who is spouting a US call has done two things:

(1) Passed an FCC exam - somewhere

(2) Given the FCC a "permanent" mailing address somewhere within the jurisdiction of the US Postal Service

So, as far as the FCC knows, they are a "permanent" resident.

That many of these "permanent" addresses are merely mail drops, or a buddy's address, or a QSL manager's address. or worse. IIRC, at one time, many of the KH2 calls were using KG6DX's home address, without his permission.

In short, they figured out a way to "beat" the system.

Now. I don't like it any more than you or anyone else does. How do we fix it? Without creating a paperwork burden on the FCC?

.and I know that AE7Q, for one, has offered on many occasions to take over running the call system database management & do so on behalf of the FCC, at least for the Amateur service. But they've yet to take him up on his offer.

Sorry gents, but IMHO, everyone has missed the point, except for the"it ain't gonna happen" comment. The bottom line is that Amateur Radio is something that The FCC couldn't care less about. They have absolutely no interest in dealing with it, and haven't for some time. We do a fairly good job of behaving, and produce negligible revenue for the agency, and like every other bureaucratic entity, revenue is the driver.

In response to the address issue, I have sent mail/QSL cards to a number of these hams FCC addresses and they always and I mean
always come back as addressee unknown. Maybe it is time the FCC starts mandating proof of residency every few years. Nope that won't
happen either.

Another close topic, all of those people in Ethiopia were given US VE tests. Are they going to be licensed US hams even after never
setting foot in this country or was that just for them to get their own ET license because their government has no clue how to
license their own people?

On the KH0 front, if I remember correctly didn't a certain person sell 1 square inch of his land to those outside of the US so they
had the way around the licensing laws? And why is it that they get our licenses and operate under our callsigns yet they avoid
working the US (except west coast) like the plague?

Not to disagree with Al, because I don't, but how could we fix the problem?

The FCC could require anyone who is in another area to sign portable, and write this into Part 97. How is that going to be enforced? The FCC would have to constantly monitor the bands (which they don't do at all anymore) looking for violators.

Or they could require you to change your call when you move to a new district. That used to be done. However, there are so many ways around that if I want to keep my old call. I just have to get a PO box where I used to live, or use a friends/relative's address, etc.

You want to talk about really screwed up-I have a friend here in town with a NL7 call from when he lived in Alaska. A few years ago he decided to get a 2 x 1 5 land callsign thru the vanity program, so he did. He decided after a couple of months he didn't like it and applied for his NL7 call back, with a 5 land address on his application. The FCC gave it to him since he was a former callsign holder of it. So now, you don't even need to currently have a mailing address in a "special area" as long as you used to hold a call from there-whatever.

I am glad that I am not the only one who things the ET USA VE licensing things sure seems illegal also.

John AF5CC (actually in 5 land)

I also don't like the reverse, when a DXpedition goes to Kingman Reef, Navassa, Kure, or whereever, and then gets a 1 x 1 call so they don't have to sign /KH5K or /KP1. As a prefix collector I want those rare prefixes (have both KH5 and KP1, though). The 1 x 1 callsigs (as dumb as they are) are supposed to be used for special event stations. I spent the first few days of the last Kingman Reef DXpedition ignoring the K5K spots because I figured it was some special event station in Texas.

Alright, I have listened to all this petty $%^& and have said nothing, BUT,
when a fellow Amateur calls me ..."unethical"... , I draw the line.

As far as I am concerned, the Law of the Land says I am within my rights
and I don't need some outsider telling us our Laws are wrong.

If you don't like it, write your Congressman, if you are outside the USA,
you have no say in the matter.

73, Dick, W1KSZ
In Olde Arizona and staying here, with my W1 Call.

From: Bob
Topic: 20341 Message: 20360

Hi Al,

??????? That doesn't make him an A**HOLE.?? He may be under no legal obligation to sign anything other than his call.

????????? Many in the US like the present system.? If I move to Florida? I want to keep my call that I've had for many years.? Kind of like for 30 years I've been Sam but starting next week I'll be known as Fred.?? I do not know the answer but is the US alone, does DL 1 to 0 or F 1 to 0 make any difference? And are they required? to change...?

? ? ? ? ? ? "They created it and they can fix it".? First rule of maintenance is " If it ain't broke don't fix it".? You may not like it and it causes an inconvenience to you but it is not broken.

73,
Bob
K2TK ? EX KN2TKR (1956) & K2TKR

PS: ? My call is old enough that it is not considered a vanity call.? It was a long agonizing decision to go from K2TKR to K2TK.?? While considering the change I missed out on call signs that were my initials.

From: ve1al@...
Topic: 20341 Message: 20361

To those who have rightly pointed it out, I AM NOT AN AMERICAN CITIZEN. Do I, however, have the right to talk about this callsign issue? You can bet your sweet bippy I do.

As a DXer, I strongly disagree with the FCC's abandonment of the call area system. I point out to you that the USA, as one of the largest countries on the planet, used to have a logical system for indicating the relative location of its amateur radio operator's locations using ten districts. Everyone knew that W7 was near the left coast and that W1 was the northeast. So, in that respect, I am an OT. A KH6 was in Hawaii, a KL7 in Alaska, and each of the ten districts of CONUS indicated the QTH of the operator. I totally disagree with the policy of issuing 1x1 calls for DXpeditions and many SES operations. An N8 is in the 8th call area, not in the middle of the Pacific Ocean. A K4 operating from Puerto Rico ain't the way I would identify a KP4.

Do England, France and Germany have identifiable districts? Not an issue because each of them is miniscule compared to the USA. You know that a VE1 is in Nova Scotia (with few exceptions), that a VE6 is in Alberta and that Canadians operating in provinces other than their home location append an indicator of that other place or they get another call...just like I did when I operated VE3FRA while I lived in Ontario. Unless you use DXLabs to log (I don't and won't) you can't readily know. I'll stick with what I have for logging (I really like it) and hope that a new version will include a similar location finder.

US amateurs who follow the letter of the law are, in my estimation, being unethical because they know full well that they are not being truthful with the guy at the other end who expects that a W1 in Arizona isn't being forthwith. The guy might need Maine for WAS and what he gets is just another Arizonan. Likewise the guy who works an N7 in NC might have needed Nevada for WAS. Needless to say, I could go on and on.

Those guys just aren't being honest. They're not using common sense for us guys outside the US. However, without having given any thought to the chaos it would unleash, the FCC says you can do it, because like other government agencies in most other countries, they don't give a rat's ass about our hobby. But other large countries like Canada, Australia, China, Russia and Brazil have prefix systems that indicate where operators are. All I ask is: Why can't the USA re-introduce some sanity to their call-sign system?

So, we're given the task (I hate "tasked") of regulating ourselves. Don't be something you're not. Be ethical.

And yes, I did call WH6LE an a**hole and the FCC a bunch of jerks. I called the WH6 down because he would seem to know better and I feel the FCC made a horrible mistake. My own government has done some stupid things when it comes to ham radio. But nothing quite as moronic as this. And, as Ron said, most government agencies are run by less than logical people who just naturally fall into that category.

Few of you guys who operate with your original calls from locations outside that area will admit that what I'm saying is true. Of course, you have a vested interest in protecting your precious call. Me, I just don't plan to move again from VE1. I've got my dream call. Rest assured, however, that if I do, I will change my call to indicate my area of residency. Unless I retire to Florida or Arizona. Then I'll be VE1AL/W4 or VE1AL/W7. Our Japanese friends won't get excited.

Flame me as you will. However, I have every right to harp on this issue. Just as I have about wind power and the slaughter of whales.

Dang, hit the send key prematurely.

Ahem.

Al, a non-resident who is spouting a US call has done two things:

(1) Passed an FCC exam - somewhere

(2) Given the FCC a "permanent" mailing address somewhere within the jurisdiction of the US Postal Service

So, as far as the FCC knows, they are a "permanent" resident.

That many of these "permanent" addresses are merely mail drops, or a buddy's address, or a QSL manager's address. or worse. IIRC, at one time, many of the KH2 calls were using KG6DX's home address, without his permission.

In short, they figured out a way to "beat" the system.

Now. I don't like it any more than you or anyone else does. How do we fix it? Without creating a paperwork burden on the FCC?

.and I know that AE7Q, for one, has offered on many occasions to take over running the call system database management & do so on behalf of the FCC,

at least for the Amateur service. But they've yet to take him up on his offer.

On an entirely different note, I would like to see the FCC stop issuing US calls to non-resident citizens, even if they write an FCC exam. Like in most other nations, visitors to US soil should use their own nationally assigned calls with a prefix ID for the area from which they operate. So JH1xxx cannot obtain a KH0 call and would have to operate as KH0/JH1xxx unless he were to take up permanent residency on KH0. If I were to operate from FL during a two-week vacation, I should not be allowed to be anything but VE1AL/W4. Were I, however, to moved for 6-months a year to Orlando, I should be able to write the FCC exam and get a W4 call.

Hi Ron,

Well, I accept all of what you have said. However, I suspect that if the ARRL, as the national organization in the US, were to take on this issue, something could, in fact, be done. What particularly depresses me is US-licensed stations from outside the CONUS (and that includes KLs who actually are in NA) are not mandated to append the suffix for the area from which they are operating. A KP4 operating from NYC, a KH2 in FL, a KP2 in NH, a KL7 in CO or a W6 in MA, an N6 in GA, N7 in NC...all of these, to me, are ethically wrong.

My views about W1s operating from FL, AZ and so on are well known to readers of this reflector. Yes, the current law is the law. That doesn't mean it is correct. And to me those guys who have moved to other areas of the US and don't change their calls to reflect that area or use a portable identifier are equally unethical.

Al,

The FCC is run by bureaucrats and professional politicians who are, for the most part, lawyers or had a legal background. Not engineers or technically trained people.

In short, to call them jerks (or worse) is at best redundant. It goes without saying.

That said, the mistake was made in 1977, when the current callsign sequential allocation system was designed, and actually began in March 1978 when that system was implemented. So after 35 years. they must figure we're all used to it.

To say nothing of the fact that it would cost $$$ to reprogram the computer system. yeah, I know, it should only cost $, but this IS Government we're talking about.

I am not unsympathetic! Far from it. But, to put it bluntly, it ain't gettn' fixed. We all have only one choice: Deal with it.

From: Paul Stoetzer
Topic: 20341 Message: 20362

I have a big issue with being called unethical for following the laws of my country. The laws of this country are quite clear that the numerical district is only for the initial issuance of the callsign. My callsign was issued while I was a resident of the State of Michigan, part of the 8th Call Area. I currently live in Washington, DC, part of the 3rd Call Area.

You claim that I am unethical because someone who works me expects me to reside in Michigan, Ohio, or West Virginia and that I'm essentially lying? The problem with that argument is that nobody should ever assume that under the current system, because that is not the way the system works. The number in our prefix is essentially meaningless.

On an entirely different note, I would like to see the FCC stop issuing US calls to non-resident citizens, even if they write an FCC exam. Like in most other nations, visitors to US soil should use their own nationally assigned calls with a prefix ID for the area from which they operate. So JH1xxx cannot obtain a KH0 call and would have to operate as KH0/JH1xxx unless he were to take up permanent residency on KH0. If I were to operate from FL during a two-week vacation, I should not be allowed to be anything but VE1AL/W4. Were I, however, to moved for 6-months a year to Orlando, I should be able to write the FCC exam and get a W4 call.

Hi Ron,

Well, I accept all of what you have said. However, I suspect that if the ARRL, as the national organization in the US, were to take on this issue, something could, in fact, be done. What particularly depresses me is US-licensed stations from outside the CONUS (and that includes KLs who actually are in NA) are not mandated to append the suffix for the area from which they are operating. A KP4 operating from NYC, a KH2 in FL, a KP2 in NH, a KL7 in CO or a W6 in MA, an N6 in GA, N7 in NC...all of these, to me, are ethically wrong.

My views about W1s operating from FL, AZ and so on are well known to readers of this reflector. Yes, the current law is the law. That doesn't mean it is correct. And to me those guys who have moved to other areas of the US and don't change their calls to reflect that area or use a portable identifier are equally unethical.

Al,

The FCC is run by bureaucrats and professional politicians who are, for the most part, lawyers or had a legal background. Not engineers or technically trained people.

In short, to call them jerks (or worse) is at best redundant. It goes without saying.

That said, the mistake was made in 1977, when the current callsign sequential allocation system was designed, and actually began in March 1978 when that system was implemented. So after 35 years… they must figure we're all used to it.

To say nothing of the fact that it would cost $$$ to reprogram the computer system… yeah, I know, it should only cost $, but this IS Government we're talking about.

I am not unsympathetic! Far from it. But, to put it bluntly, it ain't gettn' fixed. We all have only one choice: Deal with it.

I have a big issue with being called unethical for following the laws of my country. The laws of this country are quite clear that
the numerical district is only for the initial issuance of the callsign. My callsign was issued while I was a resident of the State
of Michigan, part of the 8th Call Area. I currently live in Washington, DC, part of the 3rd Call Area.

You claim that I am unethical because someone who works me expects me to reside in Michigan, Ohio, or West Virginia and that I'm
essentially lying? The problem with that argument is that nobody should ever assume that under the current system, because that is
not the way the system works. The number in our prefix is essentially meaningless.

On 1/14/2013 4:30 PM, ve1al@... wrote:

To those who have rightly pointed it out, I AM NOT AN AMERICAN CITIZEN. Do I, however, have the right to talk about this callsign

issue? You can bet your sweet bippy I do.

As a DXer, I strongly disagree with the FCC's abandonment of the call area system. I point out to you that the USA, as one of the
largest countries on the planet, used to have a logical system for indicating the relative location of its amateur radio operator's
locations using ten districts. Everyone knew that W7 was near the left coast and that W1 was the northeast. So, in that respect, I
am an OT. A KH6 was in Hawaii, a KL7 in Alaska, and each of the ten districts of CONUS indicated the QTH of the operator. I
totally disagree with the policy of issuing 1x1 calls for DXpeditions and many SES operations. An N8 is in the 8th call area, not
in the middle of the Pacific Ocean. A K4 operating from Puerto Rico ain't the way I would identify a KP4.

Do England, France and Germany have identifiable districts? Not an issue because each of them is miniscule compared to the USA.
You know that a VE1 is in Nova Scotia (with few exceptions), that a VE6 is in Alberta and that Canadians operating in provinces
other than their home location append an indicator of that other place or they get another call...just like I did when I operated
VE3FRA while I lived in Ontario. Unless you use DXLabs to log (I don't and won't) you can't readily know. I'll stick with what I
have for logging (I really like it) and hope that a new version will include a similar location finder.

US amateurs who follow the letter of the law are, in my estimation, being unethical because they know full well that they are not
being truthful with the guy at the other end who expects that a W1 in Arizona isn't being forthwith. The guy might need Maine for
WAS and what he gets is just another Arizonan. Likewise the guy who works an N7 in NC might have needed Nevada for WAS. Needless
to say, I could go on and on.

Those guys just aren't being honest. They're not using common sense for us guys outside the US. However, without having given any
thought to the chaos it would unleash, the FCC says you can do it, because like other government agencies in most other countries,
they don't give a rat's ass about our hobby. But other large countries like Canada, Australia, China, Russia and Brazil have prefix
systems that indicate where operators are. All I ask is: Why can't the USA re-introduce some sanity to their call-sign system?

So, we're given the task (I hate "tasked") of regulating ourselves. Don't be something you're not. Be ethical.

And yes, I did call WH6LE an a**hole and the FCC a bunch of jerks. I called the WH6 down because he would seem to know better and I
feel the FCC made a horrible mistake. My own government has done some stupid things when it comes to ham radio. But nothing quite
as moronic as this. And, as Ron said, most government agencies are run by less than logical people who just naturally fall into

that category.

Few of you guys who operate with your original calls from locations outside that area will admit that what I'm saying is true. Of
course, you have a vested interest in protecting your precious call. Me, I just don't plan to move again from VE1. I've got my
dream call. Rest assured, however, that if I do, I will change my call to indicate my area of residency. Unless I retire to
Florida or Arizona. Then I'll be VE1AL/W4 or VE1AL/W7. Our Japanese friends won't get excited.

Flame me as you will. However, I have every right to harp on this issue. Just as I have about wind power and the slaughter of
whales.

Dang, hit the send key prematurely.

Ahem.

Al, a non-resident who is spouting a US call has done two things:

(1) Passed an FCC exam - somewhere

(2) Given the FCC a "permanent" mailing address somewhere within the jurisdiction of the US Postal Service

So, as far as the FCC knows, they are a "permanent" resident.

That many of these "permanent" addresses are merely mail drops, or a buddy's address, or a QSL manager's address. or worse. IIRC,
at one time, many of the KH2 calls were using KG6DX's home address, without his permission.

In short, they figured out a way to "beat" the system.

Now. I don't like it any more than you or anyone else does. How do we fix it? Without creating a paperwork burden on the FCC?

.and I know that AE7Q, for one, has offered on many occasions to take over running the call system database management & do so on
behalf of the FCC, at least for the Amateur service. But they've yet to take him up on his offer.

Hi Al,

I have a somewhat related question you can hopefully answer for me. I am not trying to fan the flames, I am asking out of curiousity. When I was first licensed, VE1 consisted on NB, NS and PEI. At some point NB became VE9 and PEI became VY2. Did hams in those provinces have to change their calls to the new prefix? If not, do you know if there are many VE1s still in NB or PEI?

Yes there are a few OTs who have kept their old VE1 calls. They're mostly the guys who chew the rag on 80. Mind you, there are at least two guys in NB who are heard on HF but I can't think of anyone from PEI who's an HF type using a VE1 call.

OTOH, the issuance of the VE9 and VY2 prefixes a is a whole other discussion.

Years ago I presented a logical plan of using all of the "V" prefixes we have in Canada to what was then the Canadian Amateur Radio Federation. It was dismissed by the executive -- all of whom, as I recall, were old farts in their mid to late 60s and 70s.

Hey, John, I'm all for change if it makes logical sense and serves a purpose. What the FCC did made no logical sense and helped no one.

Hi Al,

I have a somewhat related question you can hopefully answer for me. I am not trying to fan the flames, I am asking out of curiousity. When I was first licensed, VE1 consisted on NB, NS and PEI. At some point NB became VE9 and PEI became VY2. Did hams in those provinces have to change their calls to the new prefix? If not, do you know if there are many VE1s still in NB or PEI?

To those who have rightly pointed it out, I AM NOT AN AMERICAN CITIZEN. Do I, however, have the right to talk about this callsign issue? You can bet your sweet bippy I do.

As a DXer, I strongly disagree with the FCC's abandonment of the call area system. I point out to you that the USA, as one of the largest countries on the planet, used to have a logical system for indicating the relative location of its amateur radio operator's locations using ten districts. Everyone knew that W7 was near the left coast and that W1 was the northeast. So, in that respect, I am an OT. A KH6 was in Hawaii, a KL7 in Alaska, and each of the ten districts of CONUS indicated the QTH of the operator. I totally disagree with the policy of issuing 1x1 calls for DXpeditions and many SES operations. An N8 is in the 8th call area, not in the middle of the Pacific Ocean. A K4 operating from Puerto Rico ain't the way I would identify a KP4.

Do England, France and Germany have identifiable districts? Not an issue because each of them is miniscule compared to the USA. You know that a VE1 is in Nova Scotia (with few exceptions), that a VE6 is in Alberta and that Canadians operating in provinces other than their home location append an indicator of that other place or they get another call...just like I did when I operated VE3FRA while I lived in Ontario. Unless you use DXLabs to log (I don't and won't) you can't readily know. I'll stick with what I have for logging (I really like it) and hope that a new version will include a similar location finder.

US amateurs who follow the letter of the law are, in my estimation, being unethical because they know full well that they are not being truthful with the guy at the other end who expects that a W1 in Arizona isn't being forthwith. The guy might need Maine for WAS and what he gets is just another Arizonan. Likewise the guy who works an N7 in NC might have needed Nevada for WAS. Needless to say, I could go on and on.

Those guys just aren't being honest. They're not using common sense for us guys outside the US. However, without having given any thought to the chaos it would unleash, the FCC says you can do it, because like other government agencies in most other countries, they don't give a rat's ass about our hobby. But other large countries like Canada, Australia, China, Russia and Brazil have prefix systems that indicate where operators are. All I ask is: Why can't the USA re-introduce some sanity to their call-sign system?

So, we're given the task (I hate "tasked") of regulating ourselves. Don't be something you're not. Be ethical.

And yes, I did call WH6LE an a**hole and the FCC a bunch of jerks. I called the WH6 down because he would seem to know better and I feel the FCC made a horrible mistake. My own government has done some stupid things when it comes to ham radio. But nothing quite as moronic as this. And, as Ron said, most government agencies are run by less than logical people who just naturally fall into that category.

Few of you guys who operate with your original calls from locations outside that area will admit that what I'm saying is true. Of course, you have a vested interest in protecting your precious call. Me, I just don't plan to move again from VE1. I've got my dream call. Rest assured, however, that if I do, I will change my call to indicate my area of residency. Unless I

retire to Florida or Arizona. Then I'll be VE1AL/W4 or VE1AL/W7. Our Japanese friends won't get excited.

Flame me as you will. However, I have every right to harp on this issue. Just as I have about wind power and the slaughter of whales.

I listened to P5/4L4FN work W1 and W2 for more than 30 minutes on 2/23/2002. Then he called for W1 or W2 with no response (probably because there was no propagation to W1 or W2 because he was close to S-9 in the ninth call area), the third time he asked for W1 or W2, I used N1 Sugar Fox (I'm the N1SF license trustee) at 1500W to my TH7 at 50' and he came back with a report. At that point I knew I could work him from my station IF the propagation was favorable and if competition wasn't too bad.

I fretted while Ed worked his way to the ninth call area as I watched his signal drop as we lost propagation. When he did open for W9 he was less than S3 and by that time he was only taking five or six calls per area. I squeaked through as the last W9 that day at 21:56 UTC with my call as AB9M.

Both QSOs were made from the same location, by the same operator, honoring the DX operator's expectation for the entity and call area. Both QSOs met FCC and DX desk requirements. Only the latter satisfies MY requirements.

As I recall there were more than a few stations which operated portable when P5/4L4FN was active. Some of those portable were very portable, like W4 for ten minutes and then W7 for ten minutes, etc.

We can debate what's legal, right, or ethical, but ultimately it's just the man in the mirror we have to satisfy. Our peers may have their say, but in the end, the man in the mirror knows if he is satisfied as to how he played the game.

I have a big issue with being called unethical for following the laws of my country. The laws of this country are quite clear that the numerical district is only for the initial issuance of the callsign. My callsign was issued while I was a resident of the State of Michigan, part of the 8th Call Area. I currently live in Washington, DC, part of the 3rd Call Area.

You claim that I am unethical because someone who works me expects me to reside in Michigan, Ohio, or West Virginia and that I'm essentially lying? The problem with that argument is that nobody should ever assume that under the current system, because that is not the way the system works. The number in our prefix is essentially meaningless.

I know that VE0 is for MM stations, but how often are those issued? Would love to have one of those in my collection. How different was your idea from what is currently in place for Canada?

Yes there are a few OTs who have kept their old VE1 calls. They're mostly the guys who chew the rag on 80. Mind you, there are at least two guys in NB who are heard on HF but I can't think of anyone from PEI who's an HF type using a VE1 call.

OTOH, the issuance of the VE9 and VY2 prefixes a is a whole other discussion.

Years ago I presented a logical plan of using all of the "V" prefixes we have in Canada to what was then the Canadian Amateur Radio Federation. It was dismissed by the executive -- all of whom, as I recall, were old farts in their mid to late 60s and 70s.

Hey, John, I'm all for change if it makes logical sense and serves a purpose. What the FCC did made no logical sense and helped no one.

Hi Al,

I have a somewhat related question you can hopefully answer for me. I am not trying to fan the flames, I am asking out of curiousity. When I was first licensed, VE1 consisted on NB, NS and PEI. At some point NB became VE9 and PEI became VY2. Did hams in those provinces have to change their calls to the new prefix? If not, do you know if there are many VE1s still in NB or PEI?

Subject: [SPAM]RE: [DX-IS] YUK

To those who have rightly pointed it out, I AM NOT AN AMERICAN CITIZEN. Do I, however, have the right to talk about this callsign issue? You can bet your sweet bippy I do.

As a DXer, I strongly disagree with the FCC's abandonment of the call area system. I point out to you that the USA, as one of the largest countries on the planet, used to have a logical system for indicating the relative location of its amateur radio operator's locations using ten districts. Everyone knew that W7 was near the left coast and that W1 was the northeast. So, in that respect, I am an OT. A KH6 was in Hawaii, a KL7 in Alaska, and each of the ten districts of CONUS indicated the QTH of the operator. I totally disagree with the policy of issuing 1x1 calls for DXpeditions and many SES operations. An N8 is in the 8th call area, not in the middle of the Pacific Ocean. A K4 operating from Puerto Rico ain't the way I would identify a KP4.

Do England, France and Germany have identifiable districts? Not an issue because each of them is miniscule compared to the USA. You know that a VE1 is in Nova Scotia (with few exceptions), that a VE6 is in Alberta and that Canadians operating in provinces other than their home location append an indicator of that other place or they get another call...just like I did when I operated VE3FRA while I lived in Ontario. Unless you use DXLabs to log (I don't and won't) you can't readily know. I'll stick with what I have for logging (I really like it) and hope that a new version will include a similar location finder.

US amateurs who follow the letter of the law are, in my estimation, being unethical because they know full well that they are not being truthful with the guy at the other end who expects that a W1 in Arizona isn't being forthwith. The guy might need Maine for WAS and what he gets is just another Arizonan. Likewise the guy who works an N7 in NC might have needed Nevada for WAS. Needless to say, I could go on and on.

Those guys just aren't being honest. They're not using common sense for us guys outside the US. However, without having given any thought to the chaos it would unleash, the FCC says you can do it, because like other government agencies in most other countries, they don't give a rat's ass about our hobby. But other large countries like Canada, Australia, China, Russia and Brazil have prefix systems that indicate where operators are. All I ask is: Why can't the USA re-introduce some sanity to their call-sign system?

So, we're given the task (I hate "tasked") of regulating ourselves. Don't be something you're not. Be ethical.

And yes, I did call WH6LE an a**hole and the FCC a bunch of jerks. I called the WH6 down because he would seem to know better and I feel the FCC made a horrible mistake. My own government has done some stupid things when it comes to ham radio. But nothing quite as moronic as this. And, as Ron said, most government agencies are run by less than logical people who just naturally fall into that category.

Few of you guys who operate with your original calls from locations outside that area will admit that what I'm saying is true. Of course, you have a vested interest in protecting your precious call. Me, I just don't plan to move again from VE1. I've got my dream call. Rest assured, however, that if I do, I will change my call to indicate my area of residency. Unless I retire to Florida or Arizona. Then I'll be VE1AL/W4 or VE1AL/W7. Our Japanese friends won't get excited.

Flame me as you will. However, I have every right to harp on this issue. Just as I have about wind power and the slaughter of whales.

Dang, hit the send key prematurely.

Ahem.

Al, a non-resident who is spouting a US call has done two things:

(1) Passed an FCC exam - somewhere

(2) Given the FCC a "permanent" mailing address somewhere within the jurisdiction of the US Postal Service

So, as far as the FCC knows, they are a "permanent" resident.

That many of these "permanent" addresses are merely mail drops, or a buddy's address, or a QSL manager's address. or worse. IIRC, at one time, many of the KH2 calls were using KG6DX's home address, without his permission.

In short, they figured out a way to "beat" the system.

Now. I don't like it any more than you or anyone else does. How do we fix it? Without creating a paperwork burden on the FCC?

.and I know that AE7Q, for one, has offered on many occasions to take over running the call system database management & do so on behalf of the FCC, at least for the Amateur service. But they've yet to take him up on his offer.

On an entirely different note, I would like to see the FCC stop issuing US calls to non-resident citizens, even if they write an FCC exam. Like in most other nations, visitors to US soil should use their own nationally assigned calls with a prefix ID for the area from which they operate. So JH1xxx cannot obtain a KH0 call and would have to operate as KH0/JH1xxx unless he were to take up permanent residency on KH0. If I were to operate from FL during a two-week vacation, I should not be allowed to be anything but VE1AL/W4. Were I,

however, to moved for 6-months a year to Orlando, I should be able to write the FCC exam and get a W4 call.

Hi Ron,

Well, I accept all of what you have said. However, I suspect that if the ARRL, as the national organization in the US, were to take on this issue, something could, in fact, be done. What particularly depresses me is US-licensed stations from outside the CONUS (and that includes KLs who actually are in NA) are not mandated to append the suffix for the area from which they are operating. A KP4 operating from NYC, a KH2 in FL, a KP2 in NH, a KL7 in CO or a W6 in MA, an N6 in GA, N7 in NC...all of these, to me, are ethically wrong.

My views about W1s operating from FL, AZ and so on are well known to readers of this reflector. Yes, the current law is the law. That doesn't mean it is correct. And to me those guys who have moved to other areas of the US and don't change their calls to reflect that area or use a portable identifier are equally unethical.

Subject: Re: [DX-IS] YUK

I listened to P5/4L4FN work W1 and W2 for more than 30 minutes on 2/23/2002. Then he called for W1 or W2 with no response (probably because there was no propagation to W1 or W2 because he was close to S-9 in the ninth call area), the third time he asked for W1 or W2, I used N1 Sugar Fox (I'm the N1SF license trustee) at 1500W to my TH7 at 50' and he came back with a report. At that point I knew I could work him from my station IF the propagation was favorable and if competition wasn't too bad.

I fretted while Ed worked his way to the ninth call area as I watched his signal drop as we lost propagation. When he did open for W9 he was less than S3 and by that time he was only taking five or six calls per area. I squeaked through as the last W9 that day at 21:56 UTC with my call as AB9M.

Both QSOs were made from the same location, by the same operator, honoring the DX operator's expectation for the entity and call area. Both QSOs met FCC and DX desk requirements. Only the latter satisfies MY requirements.

As I recall there were more than a few stations which operated portable when P5/4L4FN was active. Some of those portable were very portable, like W4 for ten minutes and then W7 for ten minutes, etc.

We can debate what's legal, right, or ethical, but ultimately it's just the man in the mirror we have to satisfy. Our peers may have their say, but in the end, the man in the mirror knows if he is satisfied as to how he played the game.

I have a big issue with being called unethical for following the laws of my country. The laws of this country are quite clear that the numerical district is only for the initial issuance of the callsign. My callsign was issued while I was a resident of the State of Michigan, part of the 8th Call Area. I currently live in Washington, DC, part of the 3rd Call Area.

You claim that I am unethical because someone who works me expects me to reside in Michigan, Ohio, or West Virginia and that I'm essentially lying? The problem with that argument is that nobody should ever assume that under the current system, because that is not the way the system works. The number in our prefix is essentially meaningless.

I haven't heard a VE0 for a very long time, John. I know there are some shipboard stations active but they're always on SSB and I don't work much of that mode.

My plan would have used all the V prefixes from VA1A-VG0ZZZ, VO1A-VO0ZZZ, VX1A-VY0ZZZ. That would have left the CF1A-CK0ZZZ, CY9A-CY0ZZZ and the XJ1A-XO0ZZZ blocks for SES operations. I even suggested at that time (back in the early 80s) that individuals be allowed to permanently hold single-letter suffixes for contest and DX activity. Two and three-letter suffixes would have supplied Canada until...well, forever. Today I'd add a foundation-type of license in which the applicant's callsign would include an "F" like in Australia.

To those who have rightly pointed it out, I AM NOT AN AMERICAN CITIZEN. Do I, however, have the right to talk about this callsign issue? You can bet your sweet bippy I do.

As a DXer, I strongly disagree with the FCC's abandonment of the call area system. I point out to you that the USA, as one of the largest countries on the planet, used to have a logical system for indicating the relative location of its amateur radio operator's locations using ten districts. Everyone knew that W7 was near the left coast and that W1 was the northeast. So, in that respect, I am an OT. A KH6 was in Hawaii, a KL7 in Alaska, and each of the ten districts of CONUS indicated the QTH of the operator. I totally disagree with the policy of issuing 1x1 calls for DXpeditions and many SES operations. An N8 is in the 8th call area, not in the middle of the Pacific Ocean. A K4 operating from Puerto Rico ain't the way I would identify a KP4.

Do England, France and Germany have identifiable districts? Not an issue because each of them is miniscule compared to the USA. You know that a VE1 is in Nova Scotia (with few exceptions), that a VE6 is in Alberta and that

Canadians operating in provinces other than their home location append an indicator of that other place or they get another call...just like I did when I operated VE3FRA while I lived in Ontario. Unless you use DXLabs to log (I don't and won't) you can't readily know. I'll stick with what I have for logging (I really like it) and hope that a new version will include a similar location finder.

US amateurs who follow the letter of the law are, in my estimation, being unethical because they know full well that they are not being truthful with the guy at the other end who expects that a W1 in Arizona isn't being forthwith. The guy might need Maine for WAS and what he gets is just another Arizonan. Likewise the guy who works an N7 in NC might have needed Nevada for WAS. Needless to say, I could go on and on.

Those guys just aren't being honest. They're not using common sense for us guys outside the US. However, without having given any thought to the chaos it would unleash, the FCC says you can do it, because like other government agencies in most other countries, they don't give a rat's ass about our hobby. But other large countries like Canada, Australia, China, Russia and Brazil have prefix systems that indicate where operators are. All I ask is: Why can't the USA re-introduce some sanity to their call-sign system?

So, we're given the task (I hate "tasked") of regulating ourselves. Don't be something you're not. Be ethical.

And yes, I did call WH6LE an a**hole and the FCC a bunch of jerks. I called the WH6 down because he would seem to know better and I feel the FCC made a horrible mistake. My own government has done some stupid things when it comes to ham radio. But nothing quite as moronic as this. And, as Ron said, most government agencies are run by less than logical people who just naturally fall into that category.

Few of you guys who operate with your original calls from locations outside that area will admit that what I'm saying is true. Of course, you have a vested interest in protecting your precious call. Me, I just don't plan to move again from VE1. I've got my dream call. Rest assured, however, that if I do, I will change my call to indicate my area of residency. Unless I retire to Florida or Arizona. Then I'll be VE1AL/W4 or VE1AL/W7. Our Japanese friends won't get excited.

Flame me as you will. However, I have every right to harp on this issue. Just as I have about wind power and the slaughter of whales.

On an entirely different note, I would like to see the FCC stop issuing US calls to non-resident citizens, even if they write an FCC exam. Like in most other nations, visitors to US soil should use their own nationally assigned calls with a prefix ID for the area from which they operate. So JH1xxx cannot obtain a KH0 call and would have to operate as KH0/JH1xxx unless he were to take up permanent residency on KH0. If I were to operate from FL during a two-week vacation, I should not be allowed to be anything but VE1AL/W4. Were I, however, to moved for 6-months a year to Orlando, I should be able to write the FCC exam and get a W4 call.

Hi Ron,

Well, I accept all of what you have said. However, I suspect that if the ARRL, as the national organization in the US, were to take on this issue, something could, in fact, be done. What particularly depresses me is US-licensed stations from outside the CONUS (and that includes KLs who actually are in NA) are not mandated to append the suffix for the area from which they are operating. A KP4 operating from NYC, a KH2 in FL, a KP2 in NH, a KL7 in CO or a W6 in MA, an N6 in GA, N7 in NC...all of these, to me, are ethically wrong.

My views about W1s operating from FL, AZ and so on are well known to readers of this reflector. Yes, the current law is the law. That doesn't mean it is correct. And to me those guys who have moved to other areas of the US and don't change their calls to reflect that area or use a portable identifier are equally unethical.

Al,

The FCC is run by bureaucrats and professional politicians who are, for the most part, lawyers or had a legal background. Not engineers or technically trained people.

In short, to call them jerks (or worse) is at best redundant. It goes without saying.

That said, the mistake was made in 1977, when the current callsign sequential allocation system was designed, and actually began in March 1978 when that system was implemented. So after 35 years. they must figure we're all used to it.

To say nothing of the fact that it would cost $$$ to reprogram the computer system. yeah, I know, it should only cost $, but this IS Government we're talking about.

I am not unsympathetic! Far from it. But, to put it bluntly, it ain't gettn' fixed. We all have only one choice: Deal with it.

The difference in using 2 different callsigns is that whatever is worked on one is not good for awards for the other. So working with N1SF doesn't count for AB9M but then IMHO the N1SF call should only have been used when he was on 9's since that is where the QSO was made from. But again we will hear from those legal purists that it is not against the rules to do that which is rue but as was said before you are only cheating yourself.

A strange answer! What does being the trustee have to do with being
the same station? I think we've been down this road before and I
think you know what I'm going to say.

Since the FCC stopped enforcing the rules, there has been all sorts
of shenanegins about "borrowing" callsigns, etc. If N1SV is a separate
station, then you were in violation when you used it's callsign from
your own station. See 97.119

"No station may transmit unidentified communications or signals, or
transmit as the station call sign, any call sign not authorized to
the station."

And if there was no physical HF station for the N1SF Radio Club, is the trustee of the radio club unable to use the call? Perhaps you should look up N1SF on QRZ.com and note the license address is my home as is AB9M.

I guess there are some other opinions in this matter, but in the end I just logged the P5/4L4FN contact as made using N1SF in my log and never even requested a QSL. It was no shenanigan, it wasn’t borrowed, and in my role as control operator / trustee it was a valid contact as my only interest was to determine if I could work Ed from my station with my call IF I got the chance.

There's nothing in part 97 that restricts where a station is located
(i.e. it doesn't have to be on real estate that I own, or anything
like that). I can designate my neighbour's station to be my station
when I want to operate from there, without violating any part 97
rules. I could also designate it as my station and authorise him (or
anyone else, with the appropriate license class) to operate there,
using my callsign, if I so-desired. The DXCC rules necessarily state
that contacts must either be made by the licensee, or from the station
normally operated by the licencee, to get around this - i.e. it would
not violate part 97 if I had my friend work some rare DX from his
station using my callsign, but that contact would not be valid for
DXCC.

20377. Re: [SPAM]RE: [SPAM]RE: [SPAM]RE: [DX-IS] YUK

Yahoo group: DX-IS (2013)
Date: 2013-01-15 05:02:24 UTC
From: John G.
Topic: 20377 Message: 20377

The one good thing the FCC did regarding callsigns (now here is a sign of the apocolypse-I agreed with an FCC decision) was to designate special prefixes for Kure Is and Desecheo. Before that, Kure was just another KH6 and Desecheo was a KP4. Navassa Island used to be KC4-the same prefix as Antarctica! I bet there was some confusion back in those days.

Of course more recently the FCC raided the Kure Island prefix to give Hawaii more 2 x 1 and 2 x 2 callsigns, and they probably will do the same to KP5 once Puerto Rico uses up the KP3 prefixes.

I wish they could come up with special prefixes for Kingman Reef, Swains Island, and Kure again. How about KP6 for Kingman (its old prefix), KP7 for Kure (similar to KH7) and KP8 for Swains (similar to KH8). I don't see the US getting any additional Carribean Territories in the near future to save the KP prefixes for, but I guess one never knows.

One of my prized possessions is a KH7AA QSL from Kure, the first (and probably only) Kure Island callsign to be issued.

Other than using CY9 and CY0 for the Atlantic territories which count for separate DXCC countries, it sounds like Canada doesn't do things much differently than you proposed Al. Any idea why they chose to use VY2 for PEI?

I haven't heard a VE0 for a very long time, John. I know there are some shipboard stations active but they're always on SSB and I don't work much of that mode.

My plan would have used all the V prefixes from VA1A-VG0ZZZ, VO1A-VO0ZZZ, VX1A-VY0ZZZ. That would have left the CF1A-CK0ZZZ, CY9A-CY0ZZZ and the XJ1A-XO0ZZZ blocks for SES operations. I even suggested at that time (back in the early 80s) that individuals be allowed to permanently hold single-letter suffixes for contest and DX activity. Two and three-letter suffixes would have supplied Canada until...well, forever. Today I'd add a foundation-type of license in which the applicant's callsign would include an "F" like in Australia.

Yes there are a few OTs who have kept their old VE1 calls. They're mostly the guys who chew the rag on 80. Mind you, there are at least two guys in NB who are heard on HF but I can't think of anyone from PEI who's an HF type using a VE1 call.

OTOH, the issuance of the VE9 and VY2 prefixes a is a whole other discussion.

Years ago I presented a logical plan of using all of the "V" prefixes we have in Canada to what was then the Canadian Amateur Radio Federation. It was dismissed by the executive -- all of whom, as I recall, were old farts in their mid to late 60s and 70s.

Hey, John, I'm all for change if it makes logical sense and serves a purpose. What the FCC did made no logical sense and helped no one.

Hi Al,

I have a somewhat related question you can hopefully answer for me. I am not trying to fan the flames, I am asking out of curiousity. When I was first licensed, VE1 consisted on NB, NS and PEI. At some point NB became VE9 and PEI became VY2. Did hams in those provinces have to change their calls to the new prefix? If not, do you know if there are many VE1s still in NB or PEI?

On an entirely different note, I would like to see the FCC stop issuing US calls to non-resident citizens, even if they write an FCC exam. Like in most other nations, visitors to US soil should use their own nationally assigned calls with a prefix ID for the area from which they operate. So JH1xxx cannot obtain a KH0 call and would have to operate as KH0/JH1xxx unless he were to take up permanent residency on KH0. If I were to operate from FL during a two-week vacation, I should not be allowed to be anything but VE1AL/W4. Were I, however, to moved for 6-months a year to Orlando, I should be able to write the FCC exam and get a W4 call.

Hi Ron,

Well, I accept all of what you have said. However, I suspect that if the ARRL, as the national organization in the US, were to take on this issue, something could, in fact, be done. What particularly depresses me is US-licensed stations from outside the CONUS (and that includes KLs who actually are in NA) are not mandated to append the suffix for the area from which they are operating. A KP4 operating from NYC, a KH2 in FL, a KP2 in NH, a KL7 in CO or a W6 in MA, an N6 in GA, N7 in NC...all of these, to me, are ethically wrong.

My views about W1s operating from FL, AZ and so on are well known to readers of this reflector. Yes, the current law is the law. That doesn't mean it is correct. And to me those guys who have moved to other areas of the US and don't change their calls to reflect that area or use a portable identifier are equally unethical.

If I remember correctly, no personal calls were ever issued for the Antarctic bases. Most of the bases had club stations like KC4USx although I seem to also recall KC4AAA. Perhaps there were others.

And I think, when there were operations from KC4 Navassa they were all either stateside calls with a /KC4, like the 1971 QSL I have for W0EXD/KC4. All of the other Navassa cards I have are KP1/N0xx. I'm sure there were a few KC4xx calls issued but I don't have proof of that. However, they would have been two-letter suffixes as opposed to the three-letter suffixes issued for Antarctica.

All I'm concerned about is the issuance of definitive prefixes for definitive areas. So an N7 operating from NC is required to indicate he's in the 4th US call district. Just like an N6 operating from MA is required indicate his location in W1.

All of the 1x1 SES operations should be stopped as well.

I don't think that too much to ask from the most sophisticated nation on earth.

Now it is time for bed.

The one good thing the FCC did regarding callsigns (now here is a sign of the apocolypse-I agreed with an FCC decision) was to designate special prefixes for Kure Is and Desecheo. Before that, Kure was just another KH6 and Desecheo was a KP4. Navassa Island used to be KC4-the same prefix as Antarctica! I bet there was some confusion back in those days.

Of course more recently the FCC raided the Kure Island prefix to give Hawaii more 2 x 1 and 2 x 2 callsigns, and they probably will do the same to KP5 once Puerto Rico uses up the KP3 prefixes.

I wish they could come up with special prefixes for Kingman Reef, Swains Island, and Kure again. How about KP6 for Kingman (its old prefix), KP7 for Kure (similar to KH7) and KP8 for Swains (similar to KH8). I don't see the US getting any additional Carribean Territories in the near future to save the KP prefixes for, but I guess one never knows.

One of my prized possessions is a KH7AA QSL from Kure, the first (and probably only) Kure Island callsign to be issued.

Other than using CY9 and CY0 for the Atlantic territories which count for separate DXCC countries, it sounds like Canada doesn't do things much differently than you proposed Al. Any idea why they chose to use VY2 for PEI?

I haven't heard a VE0 for a very long time, John. I know there are some shipboard stations active but they're always on SSB and I don't work much of that mode.

My plan would have used all the V prefixes from VA1A-VG0ZZZ, VO1A-VO0ZZZ, VX1A-VY0ZZZ. That would have left the CF1A-CK0ZZZ, CY9A-CY0ZZZ and the XJ1A-XO0ZZZ blocks for SES operations. I even suggested at that time (back in the early 80s) that individuals be allowed to permanently hold single-letter suffixes for contest and DX activity. Two and three-letter suffixes would have supplied Canada until...well, forever. Today I'd add a foundation-type of license in which the applicant's callsign would include an "F" like in Australia.

Yes there are a few OTs who have kept their old VE1 calls. They're mostly the guys who chew the rag on 80. Mind you, there are at least two guys in NB who are heard on HF but I can't think of anyone from PEI who's an HF type using a VE1 call.

OTOH, the issuance of the VE9 and VY2 prefixes a is a whole other discussion.

Years ago I presented a logical plan of using all of the "V" prefixes we have in Canada to what was then the Canadian Amateur Radio Federation. It was dismissed by the executive -- all of whom, as I recall, were old farts in their mid to late 60s and 70s.

Hey, John, I'm all for change if it makes logical sense and serves a purpose. What the FCC did made no logical sense and helped no one.

Hi Al,

I have a somewhat related question you can hopefully answer for me. I am not trying to fan the flames, I am asking out of curiousity. When I was first licensed, VE1 consisted on NB, NS and PEI. At some point NB became VE9 and PEI became VY2. Did hams in those provinces have to change their calls to the new prefix? If not, do you know if there are many VE1s still in NB or PEI?

To those who have rightly pointed it out, I AM NOT AN AMERICAN CITIZEN. Do I, however, have the right to talk about this callsign issue? You can bet your sweet bippy I do.

As a DXer, I strongly disagree with the FCC's abandonment of the call area system. I point out to you that the USA, as one of the largest countries on the planet, used to have a logical system for indicating the relative location of its amateur radio operator's locations using ten districts. Everyone knew that W7 was near the left coast and that W1 was the northeast. So, in that respect, I am an OT. A KH6 was in Hawaii, a KL7 in Alaska, and each of the ten districts of CONUS indicated the QTH of the operator. I totally disagree with the policy of issuing 1x1 calls for DXpeditions and many SES operations. An N8 is in the 8th call area, not in the middle of the Pacific Ocean. A K4 operating from Puerto Rico ain't the way I would identify a KP4.

Do England, France and Germany have identifiable districts? Not an issue because each of them is miniscule compared to the USA. You know that a VE1 is in Nova Scotia (with few exceptions), that a VE6 is in Alberta and that Canadians operating in provinces other than their home location append an indicator of that other place or they get another call...just like I did when I operated VE3FRA while I lived in Ontario. Unless you use DXLabs to log (I don't and won't) you can't readily know. I'll stick with what I have for logging (I really like it) and hope that a new version will include a similar location finder.

US amateurs who follow the letter of the law are, in my estimation, being unethical because they know full well that they are not being truthful with the guy at the other end who expects that a W1 in Arizona isn't being forthwith. The guy might need Maine for WAS and what he gets is just another Arizonan. Likewise the guy who works an N7 in NC might have needed Nevada for WAS. Needless to say, I could go on and on.

Those guys just aren't being honest. They're not using common sense for us guys outside the US. However, without having given any thought to the chaos it would unleash, the FCC says you can do it, because like other government agencies in most other countries, they don't give a rat's ass about our hobby. But other large countries like Canada, Australia, China, Russia and Brazil have prefix systems that indicate where operators are. All I ask is: Why can't the USA re-introduce some sanity to their call-sign system?

So, we're given the task (I hate "tasked") of regulating ourselves. Don't be something you're not. Be ethical.

And yes, I did call WH6LE an a**hole and the FCC a bunch of jerks. I called the WH6 down because he would seem to know better and I feel the FCC made a horrible mistake. My own government has done some stupid things when it comes to ham radio. But nothing quite as moronic as this. And, as Ron said, most government agencies are run by less than logical people who just naturally fall into that category.

Few of you guys who operate with your original calls from locations outside that area will admit that what I'm saying is true. Of course, you have a vested interest in protecting your precious call. Me, I just don't plan to move again from VE1. I've got my dream call. Rest assured, however, that if I do, I will change my call to indicate my area of residency. Unless I

retire to Florida or Arizona. Then I'll be VE1AL/W4 or VE1AL/W7. Our Japanese friends won't get excited.

Flame me as you will. However, I have every right to harp on this issue. Just as I have about wind power and the slaughter of whales.

Dang, hit the send key prematurely.

Ahem.

Al, a non-resident who is spouting a US call has done two things:

(1) Passed an FCC exam - somewhere

(2) Given the FCC a "permanent" mailing address somewhere within the jurisdiction of the US Postal Service

So, as far as the FCC knows, they are a "permanent" resident.

That many of these "permanent" addresses are merely mail drops, or a buddy's address, or a QSL manager's address. or worse. IIRC, at one time, many of the KH2 calls were using KG6DX's home address, without his permission.

In short, they figured out a way to "beat" the system.

Now. I don't like it any more than you or anyone else does. How do we fix it? Without creating a paperwork burden on the FCC?

So what you're saying is that there is really no State Farm club station.
It's actually your own station at your home. This little fiction allows
you to obtain another call for your own personal use. perhaps not illegal
but it does strike me as being selfish as it deprives anyone here in 1 land
from obtaining that call.

I am as guilty as everyone else (I used the term a**hole without the ** yesterday.) However, we are now starting to get into ad hominem remarks. We had one person unsubscribe this morning. He gave no explanation why, but the bickering over the FCC's regulations and nit-picking over the difference between legal, ethical and moral operating might be a factor. No one cares who worked P5/4L4FN, or how they did it. It was 11 years ago.

Let's try to keep it DX related here. A good place to fight is the QRZ.COM forums. Ifthat is still too tame, find a usenet group. That's the wild west of the Internet and anything goes there! :-)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W2VU and W6SZN for the following DX information.

CQ NEWS (Ron Ochu, KO0Z, Named CQ Beginners Editor). Richard, W2VU, Editor of CQ Amateur Radio, sent out the following:
FOR IMMEDIATE RELEASE: January 14, 2013

Ron Ochu, KO0Z, Named CQ Magazine Beginners Editor

(Hicksville, NY January 14, 2013) ☐ Ron Ochu, KO0Z, of Girard, Illinois, has been named Beginners Editor of CQ Amateur Radio magazine, Editor Rich Moseson, W2VU, announced today. He will begin writing the "Learning Curve" column as of the April 2013 issue. Ochu succeeds Rich Arland, K7SZ, who stepped down after a decade of writing various columns for several CQ Communications magazines.

Ochu is a recently-retired high school English teacher and ham radio license instructor. A ham since 1974, he has held an Extra Class license since 1982. His ham radio interests include DXing, antennas, VHF/UHF/SHF, RTTY and contesting, but notes that "nothing beats a good, down to earth ragchew with a fellow ham." In addition to ham radio, Ron enjoys photography, reading and spending time with his grandchildren. His wife, Debbie, is KC9ULA.

CQ Editor Rich Moseson said, "I am looking forward to working with Ron. His wide-ranging interests and experience both as a teacher and in working with new hams should be just the right formula for the 'Learning Curve' column, which is aimed both at new hams and at more experienced hams learning new aspects of the hobby."

"My hope is to encourage readers to discover and to experience, first hand, the many many avenues for growth and personal satisfaction that our hobby makes available," said Ochu. "I hope that my passion will be evident and perhaps even a little contagious!"

YASME NEWS (Press Release--Revised). Kip, W6SZN, sent out the revised press release that clarifies some statements made in our December 7, 2012 press release:
FOR IMMEDIATE RELEASE
(Revision to December 7, 2012 Press Release)

January 14, 2013
Temple Hills, Maryland

[The following revision of our original award announcement clarifies the relative contributions of award recipients G3PLX and SP9VRC. The Yasme Foundation apologizes for creating any confusion about the origins of PSK31.]

YASME EXCELLENCE AWARDS AND SUPPORTING GRANTS

The Yasme Excellence Award is awarded to individuals who through their own service, creativity, effort and dedication have made a significant contribution to amateur radio. The contribution may be in recognition of technical, operating or organizational achievement, as all three are necessary for amateur radio to grow and prosper. The Yasme Excellence Award is in the form of a cash grant and an individually-engraved crystal globe.

The Board of Directors of The Yasme Foundation is pleased to announce the award of the Yasme Excellence Award to the following individuals:

- George Fremin, K5TR; Tree Tyree, N6TR; Trey Garlough, N5KO; and Scott Neader, KA9FOX for their contributions to many infrastructure projects that benefit the ham community at large
- Mark Spencer, WA8SME for his instrumental work in the ARRL Teachers Institute and other training efforts, development of PIC microcontroller projects and books for amateurs, and work with leaders in student and scientific teams applying amateur radio to scientific projects and experiments
- Champ Muangamphun, E21EIC, and Pornchai Semjang, HS2JFW, for leadership in the Thai amateur community, especially during the recent flooding which helped open the door to the new Thai HF licensing and enhanced the stature of amateur radio with the Thai government
- Tomas Hood, NW7US, and Carl Luetzelschwab, K9LA, for sustained education of the amateur community regarding propagation, solar and geomagnetic physics
- David Freese, W1HKJ, for creating and maintaining the freeware software package FLDIGI, probably the most widely used digital communication software in ham radio and a frequent gateway for new hams who are more familiar with computer-based communications
- Dean Straw, N6BV, for his contributions to amateur antenna system design and the development of software tools such as HFTA to optimize system design
- Peter Martinez, G3PLX, and Pawel Jalocha, SP9VRC, for their individual and distinct contributions to digital communications technology. Peter Martinez is recognized for his invention of PSK31, a widely used digital mode that enables many amateurs to successfully communicate on HF with very modest stations. Pawel Jalocha, SP9VRC is recognized for his

contributions to the field of digital signal processing as applied to communications systems that are used by amateurs, such as the mode Olivia.
- Arie Kleingeld, PA3A; Ad Van Ginneken, PA8AD; and Arie, PA3AN for their sustained contributions to the Mercy Ships Project

Thank you for your fine work and congratulations to you all!

Our local club has a callsign. We use it for a repeater. Other than that, it gets used on Field Day each year. That's about it. Another local club has a callsign. The club trustee sometimes uses it from home but it also roves around - various members have used it in contests now and then. Neither have a club station.

In fact, a majority of club calls I know of have been assigned to trustees who do not have a separate club station location from which to operate. That doesn't mean there isn't a club. Gary never said there isn't a State Farm Radio Club.

I know of quite a few clubs that only exist on paper so the trustee can get another callsign to use. For quite a while, the FCC didn't issue club licenses and radio clubs got along just fine without them. I think we might need to return to that point. If a club wants to get up a repeater or a FD station, use one of the member's calls on it.

After a WPX contest, go thru QRZ and check out how many 2 x 1 calls actually belonged to "clubs", many who have as a trustee a well known contester.

Roger, I think you've already made up your mind. The N1SF Club exists today as it did back in 2002 and before; we have members and we have a fair amount of HF equipment, but no permanent HF station location unless storage cabinets count. The VHF station is a separate matter but nonetheless the FCC assigns the trustee's primary license address as the club station address. In fact I listed the VHF station's address for the N1SF Radio Club and it still was issued to my home address.

So let's return the thread to disparaging remarks towards the regulatory agencies rather than telling stories of DX and propagation.... I tried to talk about P5 but became the target of those who would question my ethics.

Game on, the puck has been dropped!

So what you're saying is that there is really no State Farm club station.
It's actually your own station at your home. This little fiction allows
you to obtain another call for your own personal use. perhaps not illegal
but it does strike me as being selfish as it deprives anyone here in 1 land
from obtaining that call.

I guess some folks just don't know how the Club Call Sign is assigned or what the regs are.

There are many Club Call Signs that are assigned to Clubs that have no physical facilities.
That means any Club Member can use the call as long as the Trustee is aware of who
does what when. Typically, the address of the Club Call is the Trustees address.

I agree, let's get back to DX and stop the name calling and the personal insults. Most
of us are above such tactics.

I recently disparaged Iain, N6ML, on this forum so it's only right that I apologize to him here also. It appears that the FCC has changed their rule sohat amateur stations are not required to have a designated location. It also appears that they failed to change 97.119 (station identification) to match. I guess they weren't satisfied with just screwing up the callsign allocation system!

I'm sorry Iain! Time to go eat my crow.

Hi Al (my Canadian friend in Canada),

Well anything can be fixed, the USA has been credited with some marvellous achievements in history, not being the least put a man on the moon and in fact 12 men on the moon!

All that is needed is the desire, who cares about the cost and money (moon missions aren't cheap either). Not everyone is going to be happy over there though. We all get very fond and possessive of our calls and when you tell e.g. K1XX in California who moved from Connecticut many years ago that he is going to have to change his call (to something like K6XX) I don't think he will be too pleased. However if the benefit is sold properly and the situation is explained correctly, surely some common sense will prevail.

If the FCC aren't going to do it, the ARRL could take leadership on this and who knows perhaps France will follow on.

From: DX-IS@yahoogroups.com [mailto:DX-IS@yahoogroups.com] On Behalf Of ve1al@...
Sent: Tuesday, 15 January 2013 5:31 AM
To: DX-IS@yahoogroups.com
Subject: RE: [DX-IS] YUK

To those who have rightly pointed it out, I AM NOT AN AMERICAN CITIZEN. Do I, however, have the right to talk about this callsign issue? You can bet your sweet bippy I do.

As a DXer, I strongly disagree with the FCC's abandonment of the call area system. I point out to you that the USA, as one of the largest countries on the planet, used to have a logical system for indicating the relative location of its amateur radio operator's locations using ten districts. Everyone knew that W7 was near the left coast and that W1 was the northeast. So, in that respect, I am an OT. A KH6 was in Hawaii, a KL7 in Alaska, and each of the ten districts of CONUS indicated the QTH of the operator. I totally disagree with the policy of issuing 1x1 calls for DXpeditions and many SES operations. An N8 is in the 8th call area, not in the middle of the Pacific Ocean. A K4 operating from Puerto Rico ain't the way I would identify a KP4.

Do England, France and Germany have identifiable districts? Not an issue because each of them is miniscule compared to the USA. You know that a VE1 is in Nova Scotia (with few exceptions), that a VE6 is in Alberta and that Canadians operating in provinces other than their home location append an indicator of that other place or they get another call...just like I did when I operated VE3FRA while I lived in Ontario. Unless you use DXLabs to log (I don't and won't) you can't readily know. I'll stick with what I have for logging (I really like it) and hope that a new version will include a similar location finder.

US amateurs who follow the letter of the law are, in my estimation, being unethical because they know full well that they are not being truthful with the guy at the other end who expects that a W1 in Arizona isn't being forthwith. The guy might need Maine for WAS and what he gets is just another Arizonan. Likewise the guy who works an N7 in NC might have

needed Nevada for WAS. Needless to say, I could go on and on.

Those guys just aren't being honest. They're not using common sense for us guys outside the US. However, without having given any thought to the chaos it would unleash, the FCC says you can do it, because like other government agencies in most other countries, they don't give a rat's ass about our hobby. But other large countries like Canada, Australia, China, Russia and Brazil have prefix systems that indicate where operators are. All I ask is: Why can't the USA re-introduce some sanity to their call-sign system?

So, we're given the task (I hate "tasked") of regulating ourselves. Don't be something you're not. Be ethical.

And yes, I did call WH6LE an a**hole and the FCC a bunch of jerks. I called the WH6 down because he would seem to know better and I feel the FCC made a horrible mistake. My own government has done some stupid things when it comes to ham radio. But nothing quite as moronic as this. And, as Ron said, most government agencies are run by less than logical people who just naturally fall into that category.

Few of you guys who operate with your original calls from locations outside that area will admit that what I'm saying is true. Of course, you have a vested interest in protecting your precious call. Me, I just don't plan to move again from VE1. I've got my dream call. Rest assured, however, that if I do, I will change my call to indicate my area of residency. Unless I retire to Florida or Arizona. Then I'll be VE1AL/W4 or VE1AL/W7. Our Japanese friends won't get excited.

Flame me as you will. However, I have every right to harp on this issue. Just as I have about wind power and the slaughter of whales.

Subject: RE: [DX-IS] YUK

Dang, hit the send key prematurely...

Ahem.

Al, a non-resident who is spouting a US call has done two things:

(1) Passed an FCC exam - somewhere
(2) Given the FCC a "permanent" mailing address somewhere within the jurisdiction of the US Postal Service

So, as far as the FCC knows, they are a "permanent" resident.

That many of these "permanent" addresses are merely mail drops, or a buddy's address, or a QSL manager's address... or worse. IIRC, at one time, many of the KH2 calls were using KG6DX's home address, without his permission.

In short, they figured out a way to "beat" the system.

Now... I don't like it any more than you or anyone else does. How do we fix it? Without creating a paperwork burden on the FCC?

...and I know that AE7Q, for one, has offered on many occasions to take over running the call system database management & do so on behalf of the FCC, at least for the Amateur service. But they've yet to take him up on his offer.

On an entirely different note, I would like to see the FCC stop issuing US calls to non-resident citizens, even if they write an FCC exam. Like in most other nations, visitors to US soil should use their own nationally assigned calls with a prefix ID for the area from which they operate. So JH1xxx cannot obtain a KH0 call and would have to operate as KH0/JH1xxx unless he were to take up permanent residency on KH0. If I were to operate from FL during a two-week vacation, I should not be allowed to be anything but VE1AL/W4. Were I, however, to moved for 6-months a year to Orlando, I should be able to write the FCC exam and get a W4 call.

Hi Ron,

Well, I accept all of what you have said. However, I suspect that if the ARRL, as the national organization in the US, were to take on this issue, something could, in fact, be done. What particularly depresses me is US-licensed stations from outside the CONUS (and that includes KLs who actually are in NA) are not mandated to append the suffix for the area from which they are operating. A KP4 operating from NYC, a KH2 in FL, a KP2 in NH, a KL7 in CO or a W6 in MA, an N6 in GA, N7 in NC...all of these, to me, are ethically wrong.

My views about W1s operating from FL, AZ and so on are well known to readers of this reflector. Yes, the current law is the law. That doesn't mean it is correct. And to me those guys who have moved to other areas of the US and don't change their calls to reflect that area or use a portable identifier are equally unethical.

Al,

The FCC is run by bureaucrats and professional politicians who are, for the most part, lawyers or had a legal background. Not engineers or technically trained people.

In short, to call them jerks (or worse) is at best redundant. It goes without saying.

That said, the mistake was made in 1977, when the current callsign sequential allocation system was designed, and actually began in March 1978 when that system was implemented. So after 35 years... they must figure we're all used to it.

To say nothing of the fact that it would cost $$$ to reprogram the computer system... yeah, I know, it should only cost $, but this IS Government we're talking about.

I am not unsympathetic! Far from it. But, to put it bluntly, it ain't gettn' fixed. We all have only one choice: Deal with it.

73, ron w3wn

Just got all excited when I heard a WH6 on 17M far earlier in the day than I would have expected. Called him, got him and learned that he wasn't in Hawaii at all but in North Carolina. A**HOLE for not signing /W4. Once again, I blame the FCC for this inexcusable confusion. They created it and they can fix it. JERKS.

#-----------------------------------------------------------------#
SIDC URSIGRAM 30117
SIDC SOLAR BULLETIN 17 Jan 2013, 1146UT
SIDC FORECAST (valid from 1230UT, 17 Jan 2013 until 19 Jan 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 17 Jan 2013 10CM FLUX: 132 / AP: 010
PREDICTIONS FOR 18 Jan 2013 10CM FLUX: 129 / AP: 003
PREDICTIONS FOR 19 Jan 2013 10CM FLUX: 125 / AP: 001
COMMENT: Solar activity has been quiet with one isolated C2.2 flare
originating from AR NOAA 1650. Conditions are expected to be rather
quiet, but an isolated C flare or M flare is possible especially from AR
NOAA 1654.
A partial HALO CME has been detected by LASCO C2 at January 16th 2013
19:12 UT and confirmed in STEREO A C2. The source region seems to be
NOAA 1650 on the southwest limb based on the SWAP images of Proba2.
CACTUS indicates a velocity of around 680 km/s and an angular width of
122 degrees. There is a small chance that this CME might reach Earth
around January 20th 2013 01:30 UT and become geo-effective.
The interplanetary magnetic field increased slightly to 10 nT with a
positive Bz component. Geomagnetic conditions are quiet and expected to
remain so for the next 48 hours.

I'm getting personal emails complaining about the "Yuk" thread.
Some people have ignored my first request to tone it down. I think
everything that needs to be said about call signs and call areas has
been re-hashed several times.

No one likes tosee the list silent, but haven't we beat this one
into the ground? When I see insults and apologies, it tells me that we
have gone too far on a topic.

Doesn't anyone have anything DX related to discuss? What about the
lousy solar cycle? Any DXpeditions upcoming? Why couldn't I hear the
5W on 17M today? Anyone get new radios for Xmas? What's your turn
around time getting your LoTW uploads processed? Does Otto in 9Q land
count for DXCC? What's the optimum number of radials for a vertical if
you want long haul performance?

73, Paul VE1DX (co-owner of the DX IS! list)

You raise two questions I'd like answered, Paul.

1. Why indeed could you not hear the 5W?

1a. Why couldn't I hear the FK8 you worked on 17 today?

1b. Why couldn't I hear the same FK8 on LP on 20 a little while later?

2. Why would 9Q6AL not count for DXCC? I have bunches of cards from him and from his previous 9Q/DK3MO operation and don't recall any problems. Certainly Club Log hasn't rejected them.

Rumour has it that 9Q6AL is not a valid license. Rumour aside, it was stated by NC1L, on Jan 8th 2013, that documentation has not been received for for 9Q6AL, so it is "on hold", as far as DXCC is concerned.

9Q/DK3MO was on hold for a long time, but finally was approved for DXCC credit in Dec 2010...

(1) Because he was 3X2 at best and it got so I couldn't tell who he was coming back to, and those who did get his attention from the mid to west coast were exchanging 59+ reports with him. I was out-gunned. I could initially hear him, but he was never workable and finally faded away bit lots of west coast were still working him. Then I saw a spot comment saying he went QRT.

(2) Probably because he was dishwater weak here and the K = 5, so any auroral attenuation would attenuate your path more than mine.

(3) I don't know. I head rumors it was "iffy." Some stations that come and go from Africa seem to be bounced by the league. I just got to 9Q6AL cards in the buro, and I wondered if they were counters. I had some TT8PK ones a few years ago that about half counted -- an email exchange with the league indicated he's been there a number of times and only sent in documentation for some of the trips. It's just a feeling. I don't need it so I won't be sending in the cards. Acceptance by Club Log is a good indication they are OK for DXCC, but not a guarantee.

Paul, Al, and the List

How about comments on this subject if anyone has a source: Ionosphere Drops To <http://wattsupwiththat.com/2008/12/16/earths-ionosphere-drops-to-a-new-low/> A New Low .

As best I remember at first it was believed the lowering of the ionosphere was the case only near the equator, but it was later found to be widespread. I saw some later Indian data which suggested the ionosphere was lower in some areas and higher in others. As best I can find out, CINDI ended in 2010 but I never saw any later data. Queries to the former program manager have yielded no response. If the lowered ionosphere has continued it would have implications for propagation. It is clear to me that in "olden times," indices such as we are seeing now might not have been considered great but would have produced decent propagation. Also, I am astounded to go into the shack on a winter night and hear so little DX on 160m and 80m. The HK had a good signal on 160m last night for hours, but not much other activity was audible by 10PM or so. How many Japanese dawn openings on 160m have there been this year? In any event I suspect the "circuit" data which produced all the ancient propagation charts could be obsolete and propagation programs based on that data for path probability could be way off with a lower ionosphere. Anyone have later info than the first CINDI data?

From: GARY HUBER
Topic: 20398 Message: 20411

I've been experimenting with Weak Signal Reporting System 2.11 software using the Meinberg NTP time server software, my FLEX-1500 and K9AY Loop System receiving antennas. So far the weakest signal recorded at −33 db below the −110 dBm noise floor was a W1 running +37 dBm output on 40M. The furthest signal spotted (on 40m) was a VK1 also running 5W! Additional information at http://wsprnet.org/drupal/

73 ES DX,
Gary – AB9M

PS; I did not see a 1st warning but I do regret anything I might have said to incite an uncivilized exchange here. Anyone who believes my exchanges are less than acceptable should feel free to email me directly with their complaint.

Paul, Al, and the List

How about comments on this subject if anyone has a source: Ionosphere Drops To A New Low .

As best I remember at first it was believed the lowering of the ionosphere was the case only near the equator, but it was later found to be widespread. I saw some later Indian data which suggested the ionosphere was lower in some areas and higher in others. As best I can find out, CINDI ended in 2010 but I never saw any later data. Queries to the former program manager have yielded no response. If the lowered ionosphere has continued it would have implications for propagation. It is clear to me that in "olden times," indices such as we are seeing now might not have been considered great but would have produced decent propagation. Also, I am astounded to go into the shack on a winter night and hear so little DX on 160m and 80m. The HK had a good signal on 160m last night for hours, but not much other activity was audible by 10PM or so. How many Japanese dawn openings on 160m have there been this year? In any event I suspect the "circuit" data which produced all the ancient propagation charts could be obsolete and propagation programs based on that data for path probability could be way off with a lower ionosphere. Anyone have later info than the first CINDI data?

DX Bulletin 3 ARLD003
>From ARRL Headquarters
Newington CT January 17, 2013
To all radio amateurs

SB DX ARL ARLD003
ARLD003 DX news

This week's bulletin was made possible with information provided by NC1L, PS7DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TANZANIA, 5H. Sam, F6AML will be QRV as 5H1Z from Zanzibar Island, IOTA AF-032, from January 20 to February 28. Activity will be in his free time on 40 to 10 meters using CW and SSB. This may include visits to IOTAs AF-054, AF-063 and AF-075. QSL via bureau to home call.

SAMOA, 5W. Ralph is QRV as 5W0W from Apia until March. QSL via NR6M.

BAHAMAS, C6. Operators W4BUW, W8GEX, W8CAA and AA4NN plan to be QRV as C6AGH and C6DX from Great Exuma Island, IOTA NA-001, from January 20 to 27. Activity will be on 160 to 10 meters using CW, SSB and RTTY with three stations. QSL C6AGH via W4BUW and C6DX via W8GEX.

CHILE, CE. Jose, CE8DMT is QRV from Puerto Williams on Navarino Island, IOTA SA-050. Activity is on 40 and 15 meters using SSB. His length of stay is unknown. QSL to home call.

ARMENIA, EK. Aram, EK6LP has been active on 12 meters around 1415z. QSL direct via RN4LP.

REUNION ISLAND, FR. Operators F8APV and F8EOI will be QRV as FR/home calls from January 21 to February 8. Activity will be on 40 to 10 meters using CW and SSB with a focus on 30 meter CW and 20 meter SSB. QSL to home calls.

ENGLAND, G. A group of operators will be QRV as GB6WLB from January 19 to 27 as part of the RNLI SOS Radio week. Activity will be on most of the HF bands. QSL via G6XOU.

COLOMBIA, HK. Lothar, DK8LRF is QRV as HK3JCL from Restrepo until March 31. Activity is on 40, 20, 17, 15 and 10 meters using SSB. QSL to home call.

DOMINICA, J7. Operators Bernie, W3UR and Tony, N3ME will be QRV as J77A and J76A, respectively, from January 22 to February 1 and January 22 to February 11, respectively. Activity will be during their spare time on 160 to 6 meters using CW, SSB and RTTY. QSL to home calls.

MINAMI TORISHIMA, JD1. Take, JG8NQJ is QRV as JG8NQJ/JD1 from Marcus Island, IOTA OC-073, until mid April while on work assignment with the island's weather station. Activity will be mainly on 17 to 10 meters using CW. QSL to home call.

ANTARCTICA. Robert is QRV as LU1ZG from the Ejercito General Belgrano II Base. Of late he has been active on 20 meters using SSB between 0425 and 0510z. QSL via LU4DXU.

BRAZIL, PY. Members of the Natal Digital Group are QRV as special event station PW7F until January 20 to celebrate the 413th anniversary of Fortaleza dos Reis Magos located in the city of Natal. Activity is on 160 to 10 meters using CW, SSB and digital modes. QSL via PS7HD.

SUDAN, ST. Lourens, ZS6AKB is QRV as ST2/ZS6AKB in Kutum in the Darfur region of Sudan until June while on work assignment. Activity is in his spare time on 40, 30 and 20 meters. QSL to home call.

EGYPT, SU. Gerd, DJ5IW is QRV as SU/DJ5IW from El Fardous until February 8. Activity is on 40 to 10 meters using CW only in his spare time. QSL to home call.

INDIA, VU. Gwalior, VU2JAU is QRV as ATS150 until January 20 to commemorate the 150th birthday of orator and philosopher Swami Vivekanada. Activity of late has been on 20 meters using SSB. QSL via operator's instructions.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC Credit: Republic of South Sudan, Z81Z, current operation commencing January 8, 2013.

THIS WEEKEND ON THE RADIO. The ARRL January VHF Contest, North American SSB QSO Party, AWA Linc Cundall Memorial CW Contest, QRP CW Fox Hunt, NCCC Sprint CW Ladder, Feld Hell Sprint, LZ Open CW Contest, YL-ISSB SSB QSO Party and Hungarian DX Contest are all on tap for this upcoming weekend. The Run for the Bacon QRP CW Contest is scheduled for January 21. The SKCC CW Sprint, CWops Mini-CWT Test and QRP CW Fox Hunt are scheduled for January 23. Please see January 2013 QST, page 87, and the ARRL and WA7BNM Contest websites for details.

Rumours also had indicated that 9Q/DK3MO was not valid. It is. So why would 9Q6AL (same operator) not be valid?

Where in that release does it say anything about 9Q6AL? And who said 9Q6AL wasn't valid?

73

Subject: Re: [DX-IS] 2nd reminder

Rumour has it that 9Q6AL is not a valid license. Rumour aside, it was stated by NC1L, on Jan 8th 2013, that documentation has not been received for for 9Q6AL, so it is "on hold", as far as DXCC is concerned.

9Q/DK3MO was on hold for a long time, but finally was approved for DXCC credit in Dec 2010...

Ridiculous! Get over it guys!

The US is a highly mobile country.

Case in point...I have lived in 7 states from CA to ME, and have had temporary residence in another 4.

Presently I reside in 3 states.

The FCC & ARRL is dealing with the USA license base in the only way it can without having to issue a callsign of the month.

Might have a case for DX countries but its just a matter of time.

Use the computer resourses at your disposal.

I didn't say the 9Q6AL was invalid .. I said that it was "on hold" for
DXCC approval, pending receipt of documentation. It's been that way
for many months. DX stations must submit proof of their *authorised*
activities to the ARRL DXCC desk before they can be approved for DXCC
credit. Presumably DK3MO sent in docs for his 9Q/ license, but has not
sent in docs for 9Q6AL.

Well, here for one:

http://www.eham.net/ehamforum/smf/index.php?topic=86725.0

And here for another:

http://www.dxmarathon.com/Pirates/index.htm

And here for a third:

http://dxfor.me/?_s=9Q6AL

I have no direct knowledge, but these links suggest no
documentation has been sent in to the DXCC desk for 9Q6AL. In
particular the 2nd one is telling because CQ tends to be more lenient
than the DXCC Desk in some areas . . .

Instead of us proving 9Q6AL doesn't count, do you have any evidence
that it does count?

Hi Guys,

I just wanted to thank J67ZF and J8/W6HGF for their patience recently in standing by for VK6.

Most of the Caribbean is direct polar path for us and even though there are lots visiting these isles, many of the ops. just work piles of NA, EU, JA, (which is understandable). It's greatly appreciated though when some of the other locations in the world are considered.

Good job guys and thank you again!

Nope. It was (and is) my belief that 9Q6AL is as "valid" as 9Q/DK3MO. And I reiterate that Club Log has not rejected my claims for 9Q6AL. So, in fact, who knows?

In the end, it doesn't matter much to me.

Actually, Bob, Lance has simply cemented my argument. When you're somewhere your call doesn't say you are, simply append the proper identifier so us poor suckers outside the US can have an idea where you really are located.

It isn't an unreasonable request and the FCC should simply mandate it.

From: John G.
Topic: 20422 Message: 20427

Congrats on the J8 Lance! I have been trying to get him also for a new RTTY country, but never have very good copy on him when he is on the high bands for some reason. Guess he is 1 1/2 hops away from me or something. Is VK6 antipodal to any area in NA?

Subject: [DX-IS] Caribbean

Hi Guys,

I just wanted to thank J67ZF and J8/W6HGF for their patience recently in standing by for VK6.

Most of the Caribbean is direct polar path for us and even though there are lots visiting these isles, many of the ops. just work piles of NA, EU, JA, (which is understandable). It's greatly appreciated though when some of the other locations in the world are considered.

Good job guys and thank you again!

73, Lance - VK6DU

From: ve1al@...
Topic: 20398 Message: 20428

It isn't a topic I have researched, Bob. I'm personally at that stage in DXing that I turn on the radio, take what I can hear for a particular day and go away. My days of trying to figure out what's happening with propagation have become fewer. With only P5 to work and confirm, I just live in hope the propagation god will smile on me.

Seriously, I'll delve into the topic but at this moment have nothing to offer.

Paul, Al, and the List

How about comments on this subject if anyone has a source: Ionosphere <http://wattsupwiththat.com/2008/12/16/earths-ionosphere-drops-to-a-new-low /> Drops To A New Low .

As best I remember at first it was believed the lowering of the ionosphere was the case only near the equator, but it was later found to be widespread. I saw some later Indian data which suggested the ionosphere was lower in some areas and higher in others. As best I can find out, CINDI ended in 2010 but I never saw any later data. Queries to the former program manager have yielded no response. If the lowered ionosphere has continued it would have implications for propagation. It is clear to me that in "olden times," indices such as we are seeing now might not have been considered great but would have produced decent propagation. Also, I am astounded to go into the shack on a winter night and hear so little DX on 160m and 80m. The HK had a good signal on 160m last night for hours, but not much other activity was audible by 10PM or so. How many Japanese dawn openings on 160m have there been this year? In any event I suspect the "circuit" data which produced all the ancient propagation charts could be obsolete and propagation programs based on that data for path probability could be way off with a lower ionosphere. Anyone have later info than the first CINDI data?

From: Lance Martin
Topic: 20422 Message: 20431

Hi John,

Yes, the closest antipodal point to Perth is Bermuda. On a great circle map the island is a big line that spans either side of the north pole.
Which makes it interesting when I hear a VP9 on, I never really know exactly where to beam!

Made the J8 QSO on 17m, would love to get him on the higher bands too.

The only way a list owner or moderator can force a person to stop
is to put them in "moderated" status or remove them from the list
completely. My two requests to everyone to stop this thread were
because it had degraded to some direct or implied remarks at other
members, one person unsubscribed, and I received several private emails
asking that I put a stop to it.

From the subscribe header:

"Sales by amateurs of personal equipment is not permitted. Nor do
we welcome political statements. Please ask yourself the following
question before you click send, "Would I give my callsign, and then send
this on HF?" If the answer is no, don't click!"

That is sent to all members when they join. As adults, Hams and
DXers, I (and N1DG, the co-owner) expect members to respect it. It's
rare we have to intervene. It is my hope we all can sleep on the
discussions of the past day or two and put them to rest. The last thing
Don or I have time to do is moderate and approve messages from members,
and we don't want to unsubscribe anyone.

I just had to rebuild the VE1DXI DX Cluster node after a
motherboard meltdown. This took 15 hours of my time and cost me
~$800. N1DG routinely goes on mega-DXpeditions, the last one (VP8ORK)
costing the team over $350,000. We are both giving back to the hobby in
different ways to the best of our ability. This list us another small
contribution. I can't speak for N1DG, but I'm sorry if I have not lived
up to everyone's expectations.

The thread is dead. Finished. No more posts on it. If it
doesn't, there is one other option. The list can be deleted by a single
mouse click. That singles no one out, and solves the problem for everyone.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th-December, through Sunday, 6th-January there were 219 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5R, 5T, 5U, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

8P, BARBADOS. Members of the "Buddies in the Caribbean" suitcase mini-DXpedition group which specializes in 100 watt or less low power radios and Buddipole portable antenna systems is going to Barbados (NA-021) and will be active between January 29th and February 6th. Operators mentioned

are Mike/KC4VG (8P9VG), Weymouth/K8EAB (8P9EA), Paul/KB9AVO (8P9DG), Daniel/WZ1P (8P9WZ), Budd/W3FF (8P9FF), Chris/W6HFP (8P9HF), Guy/N7UN (8P9UN) and Steve/WG0AT (8P9RT). There will be 3 villa stations during the operation on 160-10 meters using CW, SSB, and RTTY or PSK. The equipment used this year will be four Elecraft KX3, two Yaesu 857-D and two Icom IC-7000 transceivers. All members will use Buddipole portable HF/VHF antennas in both horizontal and vertical configurations at 100 watts or less. At the same time, several teams will be battery-only, field portable either from Barbados beaches or scenic mountain tops and will sign call/p. They state, "Our goal is to demonstrate 'ultralite' DXpeditioning into magnificent 'vista' locations, operating field portable battery-only radios with backpackable, lightweight antennas and most of all 'having fun' with a number of local operators from a 5-star Villa near the ocean." QSL via LoTW or to the operator□s home callsign (w/SASE).

9X, RWANDA. Carl, SM6CPY, will be active as 9X0PY from Rwanda between January 15-31st. Activity will be holiday style on all bands, if possible depending on antenna possibilities, using mainly CW listening up 25 kHz and operating with 100 watts. QSL via his home callsign, direct or by the Bureau.

AFRICAN TOUR. Operators Steve/HA0DU and Laci/HA0NAR plan to be on an African tour to Guinea Bissau (J5) and Senegal (6V) starting next month and to be active as J5NAR and 6V2R. They will start their journey in Cabrousse (South-Senegal). From there they will drive to Guinea-Bissau and expect to be on the air around February 9th. Additionally, they also plan to activate (in February) Carabane Island (AF-078) with the callsign 6V2R/P and Jeta Island (AF-093) with J5NAR/P. On their QRZ.com page they state, "We would like to remind you that the entire trip and stay on islands is paid in full by each of the operators and that any contribution/support will help us to reduce the high logistical costs." Their PayPal account is <ha0nar@...>. QSL for both J5NAR and 6V2R go to Laci, HA0NAR (direct or by the Bureau). For details and updates, watch the Web page at: http://www.ha0nar.hu

ARCTIC/ANTARCTIC INFO NEEDED! John, KL7JR, is requesting that if you or any of your radio friends, SWL or Ham operator, has worked or heard any Arctic or Antarctic stations, he would love to hear from you for his monthly Arctic and Antarctic DX column which goes to CIDX (Canadian Int'l. DX Club) for publication in the monthly Messenger. Scanned copies of QSLs or reception reports from anywhere north of 60 degrees or the Antarctica are also welcomed. You can receive a sample of his column by E-mailing him at: KL7JR@yahoo.com

CS8/CT8, AZORES. Operators Dervin/PD9DX and Derk/PD9DX will be active as CS8/PD9DX (or with a CU callsign) and CT8/PA4N from Sao Miguel Island (EU-003) in the Azores between March 26th and April 3rd. Activity will be on all HF bands using CW and SSB. Rigs will be a Kenwood TS590 and an Elecraft K3. Power will be 100 watts for both radios. Antennas will consist of a multiband doublet (inverted vee-style), a multiband vertical and an FD4 off-center fed antenna. They mention, "As we will be on the

west side of the Sete Cidades volcanic mountain, propagation to the Americas will be much easier than propagation to Europa and Asia." Read QRZ.com for QSL info on each operator.

CT9, MADERIA. Mathieu, MJ0ASP, will be active as CT9/MJ0ASP from Madeira between January 4-9th. Activity will be on 40-10 meters using CW only. The log will be uploaded to LoTW and Clublog on January 10th. QSL via his home callsign, direct or by the Bureau.

DAYTON HAMVENTION NEWS. From Bill Salyers, AJ8B, <AJ8B@...> --
FOR IMMEDIATE RELEASE - "The SouthWest Ohio DX Association (SWODXA) is pleased to announce that we will again sponsor the DX Dinner ☐, held in conjunction with the 2013 Dayton Hamvention®. This, our 28th annual dinner, will be on Friday, May 17th, 2013, at the Dayton Marriott, 1414 S. Patterson Blvd., Dayton, OH 45409.
There will be a cash bar starting at 5:30 p.m., with dinner served at 7:00. Following the meal, there will be a separate room and cash bar available for more fellowship. This is an excellent opportunity to meet new hams, and renew old acquaintances, as well as learn about past DXpeditions and those in the planning stages.
The Marriott is very accommodating to a group our size. The dining room is on the ground floor so there are no steps, the dining room is very large, and there is ample free, on-site parking.
This dinner is always well attended by some of the most avid DXers in the world. As in the past, there will be some major door prizes, and there is always great anticipation as to who will be named the 'DXpedition of the Year'.
The Marriott is a large hotel with many room choices. Should you need accommodations, their website is
http://www.marriott.com/hotels/travel/dayoh-dayton-marriott
and their phone number is 937 223-1000.
Details and dinner reservation information can be found on the SWODXA Events website <www.swodxaevents.org>. From there, click on the DX Dinner icon. You can print the reservation form and submit it with your personal check or money order. We are also accepting PayPal and credit card payments. Program details and a list of the prizes will be on the website as they become available and updates will be sent out regularly via Twitter. Check out our Facebook page at 'Southwest Ohio DX Association', or follow us on Twitter - @SWODXA"

FY, GUYANA. Christian, F5UII, will be active as FY/F5UII from the FY5KE Radio Club of Kourou between January 13-30th. Activity will be limited to SSB between 2200-1200z during the weekdays. He is there on a business trip but has plans to activate Salut Islands (SA-020, WLOTA 0911) on this trip, January 19-20th. His precise location is on the main island called Royal Island (Ile Royale), which is part of the group of islands with Devil's Island (Ile du Diable) and St. Joseph Island (Ile Saint Joseph). Activity will be on 40/20/17/15/10 meters using 100 watts into as GPA-030 vertical and dipoles for 40/17m. Updates will be available on his Twitter page and Web page at: http://www.f5uii.net

https://twitter.com/f5uii
QSL via his home callsign, direct or by the Bureau.

HR, HONDURAS. After his trip in Uganda with the F6KOP gang, Gerard, F2JD, will be back in Honduras from around February 25th for 3 months. As usual, he will be active as HR5/F2JD, but he needs to repair his tower which was destroyed by the very strong wind last autumn. QSL via F6AJA. The log will be online at: http://lesnouvellesdx.fr/voirlogs.php

IOTA NEWS.....
OC-261. Craig, VK5CE, will be active as VK5CE/p from Flinders Island later in the new year between August 15-21st. Activity will be on 80-10 meters, with most of the operations being on 40/20/15m, using SSB and PSK. QSL via his home callsign. For more details and updates, watch Craig's Blog page at: http://oc261.blogspot.co.uk

SA-022. (Update) Members of the Bahia Blanca DX Group (GDXBB) will be active as L22D from Gama Island between January 24-27th, after being off the air for 10 years. Operators mentioned are Osmar/ LU8DWR (Team Leader), Carlos/LU7DSY, Eduardo/LU5DEM, Carlos/ LU4ETN, Hugo/LW9EVA, Carlos/LW2EHD, Willy/LU4DBT, Marcos/ LU7DKO, Edgar/LU5VAT, Daniel/LU9VS, Federico/LU1WJF and Pedro/ LU7WW. The Camp Manager is Damian, LU5VDG. Activity will be on 160-10 meters, including the 17/12 meter, and using CW, SSB and PSK31. They will have 4 stations on the air with various mono-banders and dipoles. QSL via Carlos Almirón, LU7DSY: P.O.Box 709, 8000 BAHIA BLANCA, ARGENTINA. Direct with SASE + 3 dollars or 2 IRCs. Sorry not Paypal. Also, watch the following Web page for updates at: http://lu6evd.wordpress.com/2012/12/07/activacion-isla-gama-iota-sa-022

IOTA TOUR. Operators Vincent/F4BKV and Col/MM0NDX plan to activate nine islands starting January 10th for three days. Look for the following callsigns from the following Danish, German and Polish IOTAs:
EU-029 ☐ operating from Sjaelland, Elleore, Gavno, Masnedo, Fallster, Lolland, Sprogo and Amager (OZ/F4BKV & OZ/MM0NDX)
EU-128 - operating from Fehmarn (DL/F4BKV and DL/MM0NDX)
EU-057 - operating from Ruden (DL/F4BKV and DL/MM0NDX)
EU-129 ☐ operating from Usedom (DL/F4BKV and DL/MM0NDX)
EU-132 ☐ operating from Wolin (SP/F4BKV and SP/MM0NDX)
EU-042 ☐ operating from Sylt (DL/F4BKV and DL/MM0NDX)
EU-125 ☐ operating from Romo (OZ/F4BKV and OZ/MM0NDX)
EU-172 ☐ operating from Fyn (OZ/F4BKV and OZ/MM0NDX)
EU-171 ☐ operating from Jegindo (OZ/F4BKV and OZ/MM0NDX)

Their full itinerary can be found at: http://t.co/nLV0UopH
Activity will be on 40/20/17/15 meters SSB. Operators will be using Twitter to follow their progress <https://twitter.com/IOTA_Trip>. For Bureau cards, QSL via their home callsigns. For direct cards, QSL both via F4BKV, preferably via the OQRS Web Page at: http://www.f4bkv.net/oqrs

KP2, U.S. VIRGIN ISLANDS. Three JA operators will be active from the KP2M
Radio Reef Contest Station (rental shack) on St. Croix (NA-106) between
April 3-9th. Look for the following:
Yoshi, K1HP/KP2 via JE2EHP
Taka, KP2/JF1BVG via JF1BVG
Toshi, WH7P/KP2 via JP1IOF
Activity will be on all bands and modes. Both Bureau and direct cards are
accepted via the JA home callsign. LoTW and OQRS will also be available.
For more details about the KP2M station, see: http://www.radioreef.com

KP4, PUERTO RICO (W1AW GOES DX!). The Puerto Rico Amateur Radio League
and the Caribbean Amateur Radio Group, sponsors of the American Radio
Relay League Puerto Rico State Convention to be held in the city of
Hatillo, Puerto Rico, on January 26th and 27th, are proud to announce
that the official ARRL Amateur Radio station, W1AW, will be on the air
as W1AW/KP4. It is of historical significance being the first time the
callsign is used outside the United States. Those amateurs who would
like to operate the station can contact Wilfredo Avilés ☐ KP4ARN at
<wavilesjr@...> for scheduling. Before that, between January
11-25th the callsign N4D will also be on the air to commemorate this
event. For more info, go to: http://www.arrlpr.org

P2, PAPUA NEW GUINEA. Nao, JA2VQP, who is now living in PNG for the next
two years, is a volunteer of JICA (Japanese ODA) teaching mathematics
at the Divine Word University in Wewak, East Sepic Province (north coast
of PNG main land). He states that he has received a PNG license and
planned to bring radio equipment from Japan during the month December
(2012), so begin looking for P29NO in the coming months. Watch QRZ.com
for updates.

5W0W QSL STATUS. Rex, NR6M, reported on January 2nd: "I received the QSL cards from the printer today for 5W0W. All requests that I have received thru today will be in tomorrow's outgoing mail."

CY0 QSL STATUS. Sable QSL cards scheduled to be sent between December 26th (2012) and January 31st, 2013.

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone to visit the Les Nouvelles DX (LNDX) Web page to see more than 10500 old QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2011) with more than 300 QSLs
- At least one card for each 60 deleted DXCC countries (more than 1400+ QSLs)
- Nearest the totality of current prefixes, disappeared now (more than 3700+ QSLs)
- Album for stations from North Africa 1945-1962 (400+ QSLs)
- More than 850 QSLs from the Antarctic bases.
- Nearly 270 QSLs from the TAAF (Terres Australes and Antarctiques Francaises).
- More than 300 QSLs for the rare French Pacific Islands such as FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
- The FG, FM, FP, FS, FY stations from 1945 to 1970
- More than 1500 cards for the old timer with more than 130 countries before 1945.
- Cards from the French Department before 1945.
- At least one card from each of the states in the U.S. before 1945.
The URL address for the Web site is: http://LesNouvellesDX.free.fr
Some cards are still needed for the collection, and your particip-ation is welcome. Please visit their site and give them your comments by sending an E-mail to: LesNouvellesDX@...

SU9VB AND LOTW. Vlad, SU9VB, says, "I have currently indefinitely totally discontinued uploading any newer latest QSOs to LoTW until the system is slightly more manageable and more user logical and friendly."

QSL RECEIVED VIA LoTW: 9L0W, C6AKQ, CW5W, E7DX, EA1PO, EA3NE, ED3X, EI7M, F6HRP, GI7AXB, HC2UB, HI8PLE, KH6GMP, OH0X, OH0X, PJ2/K3ND, RT0Q, RV3FT, SM4RGD, SP5GRM, UT5EPP, VA7ST, VE7JH, VU2PAI, WP3A, ZF1A and ZL9HR

QSLS RECEIVED VIA MAIL: 1A0C, 3D2C, 4O7VB, 7X4AN, 7Z7AB, 9A8OK, 9A8VB, A71CT, AA4VK/CY0, AH0/N0AT, C6AXY, CP4DR, E20VB, EL2LF, ES5Q, JW7QIA, JY8VB, GO3TXF, JW7QIA, KL7RRC/P, LA2S, NH8S, P29VCX, SU9VB, T6LG, TR8CA, VP2MGZ, V85TL, VP2MDD, VP2MYL, WA4DAN/CY0, XX9THX and ZL7A

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED FOR THIS WEEK!

S7, SEYCHELLES. Nobby, G0VJG, will be active (callsign not issued yet) from the Seychelles (AF-024) between April 4-16th. Activity will be on the 40-10 meters using SSB only and HF verticals on the beach (QRO). QSL via G4DFI.

ST2, SUDAN. Samual, K0YAK (ex-9N7AK), will be active as ST2SF from Khartoum beginning late January and continuing through at least mid-April. Activity will be on 40-10 meters using CW, SSB and the Digital modes. There may also be 80 and 6 meter operations. QSL via K0YAK or LoTW. More details will be forthcoming.

T6, AFGHANISTAN (Update). Ilian, LZ1CNN (ex-YI9LZ), has been active as T6LG from Kandahar and will be there until the end of February. Activity over the past week has been on CW, the lower bands and 20/10 meters. Ilian states, "I will keep trying low bands daily within the next 2 months. In the beginning of March I will remove all antennas and leave. It was a good DXpedition, but hope to do a bit more on low bands especially. Did not have so good setup and opportunity to install many antennas when I was in Iraq as YI9LZ. Listen for me on top band, I will do my best!" QSL Manager is LZ1ZF. Postal address since September 1st, 2012, for LZ1ZF is: G. Vodenicharov, P.O. Box 25, 3600 Lom, BULGARIA. All QSOs will be uploaded to LoTW.

T8, PALAU. Just a reminder that operators Mike/JA6EGL, Yasu/JA6UBY and Yu/JE6DND will once again be active as T88SM, T88CP, and T88HK, respectively, from Koror Island (OC-009) between January 9-14th. Activity will be 80-10 meters using CW and SSB. QSL via their home callsigns (direct only).

V6, MICRONESIA. Haru, JA1XGI, will once again be active as V63XG from Pohnpei Island (OC-010) between April 3-11th. Activity will be on 160-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. Also JT65. Suggested frequencies are (no 80m):
CW - 1823, 7025, 10105, 14010, 18075, 21010, 24895 and 28010 kHz
SSB - 7125, 14175, 18135, 21260, 24940 and 28450 kHz
RTTY - 10140, 14088, 18120, 21088, 24910 and 28088 kHz
JT65 - 7076, 10138, 14076, 18102, 21076, 24920 and 28076 kHz
6m - 50110/CW, 50150/SSB, 50090/RTTY and 50330/JT65

He will use an IC-7000 into a two element yagi for 17/12m and a fishing rod (only 5m long) antenna. QSL via JA1XGI, direct or by the Bureau. QSOs

will be uploaded to LoTW. Look for updates and details on Haru new Web page or Blog page at: http://island.geocities.jp/v63xg/index.htm http://ja1xgidxvacation.blogspot.com

VK9/N, NORFOLK ISLAND. Lee, VK3GK, will be active as VK3GK/9 from the Governor's Lodge on Norfolk Island (OC-005) between January 11-15th. Activity will be holiday style as Lee is celebrating his 21st wedding anniversary, so look for operations on 80-10 meters, mainly SSB, with CW possible and using IC-7000 into a Multi-band vertical and 80-10m OCF dipole.

YS, EL SALVADOR. Roberto, I2JIN, will be active as YS3CW from Corinth between January 11-31st. Activity will be on 80-10 meters using mainly CW. QSL via I2JIN, direct or by the Bureau. Log will be uploaded LoTW.

ZL7, CHATHAM ISLANDS (Update). Jim, ZL1LC, informs OPDX that he has booked airlines and accommodations to allow him to run as ZL7LC from Chatham Island between March 14-20th. He adds that all other preparations are going well, and this is a micro DXpedition which includes himself and his XYL with limited gear. Jim will be running PSK31 only. The rigs will be Icom 7000 and 7200 units, and the antennas will be verticals on 10, 15, 20 and 40 meters. The QTH is within 100 meters of the sea, so DX should be hot. The frequencies will be the standard PSK frequencies of 7035, 14070, 21070 and 28120 kHz. Jim states [edited], "I'll normally be operating on the highest working frequency. If/when a pileup develops, callers will be asked to work SPLIT and transmit 100 - 400Hz higher. For ZL contacts, there is a chance of SSB on 3677 kHz between 0700-0800z, but it depends upon the PSK activity. The IOTA is OC-038, the grid locator AE16ug and the nearby lighthouse (1km away) is CHA009. ClubLog will be uploaded about 24 hours later, as there is no internet at the QTH. All QSLs are direct to ZL1LC and further updates will be on the ZL7LC QRZ.com page."

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30118
SIDC SOLAR BULLETIN 18 Jan 2013, 1146UT
SIDC FORECAST (valid from 1230UT, 18 Jan 2013 until 20 Jan 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 18 Jan 2013 10CM FLUX: 120 / AP: 007
PREDICTIONS FOR 19 Jan 2013 10CM FLUX: 119 / AP: 007
PREDICTIONS FOR 20 Jan 2013 10CM FLUX: 115 / AP: 016
COMMENT: Solar activity has been quiet with only two small C flares
with the largest one a C2.5 flare originating from NOAA 1652. Solar
activity is expected to remain quiet with possibly an isolated C flare.
Geomagnetic activity reached storm level on January 17th between 15:00
UT and 18:00 UT. Ace IMF data of this period shows a jump of the
magnetic field strength from 5 nT to 15 nT with a negative Bz component.
There was no shock detected in the ACE solar wind data. This geomagnetic
activity is likely related to the slow CME of Sunday January 13th 13:00
UT (as seen in LASCO C2). Geomagnetic activity is possible to rise in
the night of January 19th- 20th due to the CME of January 16th 19:12 UT
(as seen in LASCO C2).

TODAY'S ESTIMATED ISN : 028, BASED ON 03 STATIONS.

From: jjreisert@...
Topic: 8898 Message: 20436

SB PROP @ ARL $ARLP003
ARLP003 Propagation de K7RA

ZCZC AP03
QST de W1AW
Propagation Forecast Bulletin 3 ARLP003
>From Tad Cook, K7RA
Seattle, WA January 18, 2013
To all radio amateurs

SB PROP ARL ARLP003
ARLP003 Propagation de K7RA

Solar activity pulled back over the past week, following a stellar performance in the week prior. Average daily sunspot numbers were down 34.3 points to 129, but average daily solar flux actually rose 9.7 points to 157.4. This was because solar flux values seemed to lag behind last week's activity, raising this week's average in the first few days of the current week.

The current prediction is for solar flux at 125 on January 18-20, 120 on January 21-22, 115 on January 23-24, 130 on January 25, 135 on January 26-28, 130 and 135 on January 29-30, 140 on January 31 through February 1, 150 on February 2, 155 on February 3-4, 150 on February 5-11, then 145, 140, 135, 140 and 145 on February 12-16.

The predicted planetary A index is 10, 15 and 18 on January 18-20, 8 on January 21-22, 5 on January 23 through February 4, 8 on February 5, 5 on February 6-8, 8 on February 9-10, and 5 on February 11 through the beginning of March.

The most active geomagnetic day was January 13, but only in relation to very, very quiet recent conditions. The mid-latitude A index was 10, and the K index only reached 4 in one three-hour period. The college A index (from Fairbanks, Alaska) was 11 and 12 on January 13-14, with the K index reaching 4 in two 3-hour periods on February 13 and 5 in one 3-hour period on February 14. The reading before that K index of 5 had a K index of 0.

There is a possibility of aurora on Sunday, January 20. NOAA reports the geomagnetic field is expected to be at minor storm levels today (January 18), active levels on January 19, and minor storm levels again on January 20.

A strong solar wind on January 17 was from the waning effects of a CME (coronal mass ejection) on January 13. On January 19 solar wind may rise again as the result of a coronal hole rotating into

geo-effective position. A January 16 CME could cause a rise in geomagnetic activity on January 20. Effects should decrease into background levels by mid-day (UTC) on January 20.

The Australian Space Forecast Centre issued a warning at 2335Z on January 17 about increased geomagnetic activity January 19-20 due to a CME. For January 19 they predict quiet to unsettled conditions, but with active to minor storm periods after 1200Z. For January 20 they predict unsettled to active conditions, with minor storm levels possible.

OK1HH predicts geomagnetic activity will be quiet on January 18-19, mostly quiet on January 20-21, quiet to unsettled January 22-23, mostly quiet January 24-26, quiet January 27 through February 1, mostly quiet February 2-3, quiet to active February 4-5, quiet February 6-7, quiet to unsettled February 8-9, active to disturbed February 10-11.

Jon Utley, K7CO reports that on January 11 he was in the state of New York, and using a 5 element monoband Yagi at 100 feet he worked XV1X at 1334Z and XW4XR at 1600Z on 10 meter CW long path.

Also on January 11, Jeff Hartley, N8II in West Virginia reported, "I have operated every evening this week with poorer than expected results. Before Thursday January 10, 12 and 10 meters were closed here very shortly after sunset to all areas. A45XR was S9 on 10 meter long path Sunday morning January 6, but the band was never open well to Europe unless I rechecked it a bit late. VR2XMT was about S5-7 on 12 meter SSB long path as well Sunday. All of the higher bands still seem to close pretty early including 20 meters both west and north by 0200Z, but I expect by today things are better. On 10 meters Thursday, KH6 was heard until past 2250Z and there were west coast and South American stations on 10 until around 2230Z. I have been looking for Asia long path QSOs on 20 and 30 meters without much luck, but did manage to catch UK8OM on 30 meters short path around 0100Z."

Rick Radke, W9WS of Balsam Lake, Wisconsin wrote: "Just wanted to share an experience I had on Wednesday January 9. I was checking the bands for DX. As usual, I start on 10 and work on down to 20 to see what's open. Nothing was 'happening,' in fact there were very few signals at all. So I went to 40 just looking for a ragchew and out of nowhere there was ER4DX calling CQ with a big signal. We exchanged 59 reports and went our ways. This was 1400 local (2000Z) on a sunny afternoon in northern Wisconsin, a good three hours before grayline on this end. In almost 50 years of hamming I've never seen 5K+ miles of 40 meter propagation mid-day. Nothing special here, running 1 kW to a vertical with a bunch of radials."

That is an interesting time to work Moldova. ER4DX is Vasily Romanyuk, and just doing an internet search with his callsign yields some clues that he operates a pretty serious big gun station. For

instance, using a popular search engine to search that callsign, then hitting the Images option leads to many photos of big antennas.

W6ELprop indicates that between ER4DX and W9WS on 40 meters on that date signals may have taken a 10 dB jump from 2000-2030Z, and another 10 dB by 2230Z. I used 45.456 deg N, 92.42 deg W for Rick's location, and using the grid locator from an image of a ER4DX QSL card (KN38vk), the AMSAT tool at http://www.amsat.org/amsat/toys/gridconv.html shows 48.438 deg N, 27.792 deg E. at the other end. W6ELprop shows this is a 5,016 mile or 8,073 km path, and about 6 hours after sunset at 2030Z in Moldova. So conditions were probably favorable, and ER4DX was probably putting out a big signal, perhaps with a large 40 meter Yagi.

Using today's date (January 18) shows that first 10 dB bump moving out by 30 minutes, to happen around 2030-2100Z instead of 2000-2030Z.

Reg Beck, VE7IG of Williams Lake, British Columbia on January 12 wrote: "I had the long path openings on 10 and 12 meters for 3 days here before they petered out. I still saw W6 stations working long path after it closed for me after the 3 days. A4, A6, A9 and 7Z1 were worked on 10 meters; A4, A6, A7 were worked on 12 meters. What was very surprising to me was the immediate resurgence of 160 meter propagation right after the 10 meter long path propagation stopped. Europeans all over the band and easily worked just like during the sunspot minimum with relatively low noise levels. Pretty amazing propagation up here in the northern end of the Pacific Northwest."

Reg is way up north in British Columbia, not down near the border. Seattle is 47.7 degrees north latitude, Vancouver BC is 49.2 degrees, and VE7IG is just north of 52 degrees in Williams Lake.

Oleh Kernytskyy, KD7WPJ in Salt Lake City, Utah wrote: "Solar flux was 170 on January 12. I called CQ with 5 watts and an indoor dipole on 28.060 MHz from Salt Lake City, and immediately received a response from Fred, N3FLL in West Chester, PA. He also operated QRP - 5 watts and used a dipole. I was impressed with this contact, because the eastern direction is blocked by the Wasatch Mountains."

In another email, Oleh wrote: "We had solar flux 158 and K=2 on January 13. It produced a short opening on 28 MHz. I had a QSO with CE2AWW, using 5 watts and indoor dipole. The distance between our stations was 5707 miles."

Jon Jones, N0JK wrote with 6 meter E-skip news from Kansas: "Heard the WR7NV/b DM25 and K0YW DM69 on Es around 0130 UTC on January 14 while I was mobile near El Dorado, Kansas EM17. The Nevada beacon was in for over 30 minutes."

And finally, in last week's Propagation Forecast Bulletin ARLP002 we mistakenly put Carl, K9LA in Indianapolis. Carl is in Fort Wayne, Indiana.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for January 10 through 16 were 145, 166, 156, 126, 128, 120, and 62, with a mean of 129. 10.7 cm flux was 173.9, 172.3, 168.5, 156.4, 154.1, 139.7, and 137.1, with a mean of 157.4. Estimated planetary A indices were 3, 2, 3, 9, 8, 4, and 5, with a mean of 4.9. Estimated mid-latitude A indices were 2, 3, 2, 10, 6, 4, and 3, with a mean of 4.3.

19 January 2013 A.R.I. DX Bulletin
No 1133
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5H - Sam, F6AML will be active as 5H1Z from Zanzibar Island (AF-032)
from 20 January to 28 February. He will operate CW and SSB on
40-10 metres in his spare time. Side trips to IOTA groups AF-054,
AF-063 and AF-075 are being considered. QSL via F6AML, direct or
bureau. [TNX DX Coffee]
5X - Announced frequencies for the 6-18 February 5X8C DXpedition to
Uganda [425DXN 1123] are:
CW 1826.5 3524 7024 10104 14024 18074 21024 24892 28024
SSB 1850 3785 7075 14145 18140 21295 24960 28480
RTTY 1842 3585 7042 10142 14082-90 18102 21082 24922 28082
PSK 3570 7040 10140 14072 18100 21072 24920 28122
RX frequencies on 160m CW will be 1834.5 for EU/NA and 1821.5 for
AS/OC. A large multi-national team (DF1LON, DJ7JC, DL1YFF, DL8OBF,
EI9FBB, F2DX, F2JD, F2VX, F5CWU, F5EOT, F5NHJ, F5NKX, F5UFX, F5UOW,
F5VHQ, F6ENO, F8BJI, F8IXZ, F9IE, FM5CD, K4SV, ON4LO, ON7RN, RG8K
and UA9KGH/1) will be active with six stations and a focus on the
low bands; operations are expected to start on 8 February around
noon. F4TTR and V51B will be the pilot stations. QSL via F1NGP,
direct or bureau (OQRS provided by Club Log), and LoTW. Further
information at www.5x2013.com. [TNX F5NQL]
6W - Jean-Claude, F6IRS will be active holiday style as 6W/F6IRS from
Senegal from 21 January to 7 February. He plans to be QRV on all
bands SSB, typically in his late afternoon-early evening hours.
QSL via bureau. [TNX F8REF]
A3 - Werner, DJ9KH [425DXN 1131] will not be able to collect his
licence (hopefully A35WH or A31WH) until he arrives in Tonga. He
will be active from Tongatapu (OC-049) on 13-23 February and from
Vava'u (OC-064) from 24 February to 2 March, with activity on
160-10 metres CW, SSB and RTTY. QSL via home call, direct or
bureau. He plans to post updates to http://www.qrz.com/db/A31WH on
a regular basis while on the islands.
CT8 - Rudi, HB9CQL and Hermann, HB9CRV will be active as CT8/HB9CQL and
CT8/CT3FN from Flores Island (EU-089), Azores on 22-25 January.
They will team with Antonio, CU8AS and Toze, CT1GFK and
participate in the CQ WW 160M Contest (CW) as CR2W. After the
contest expect them to be signing CR2V until 8 February, with a

focus on the low bands and an entry in the Mexico International RTTY Contest (2-3 February). QSL CR2W and CR2V via HB9CRV, direct and bureau, and LoTW.
FT - Gildas, TU5KG is leaving on a new fishing campaign in the Southern Indian Ocean. He will be sailing in the Kerguelen and Crozet areas; when on land he will use his new callsigns, FT5XT (Kerguelen) and FT5WQ (Crozet), otherwise he will be signing /mm. QSL via F4DXW, direct only. [TNX DX World]
HK - Once again Lothar, DK8LRF will be active as HK3JCL from Colombia between 18 January and 1 April. He will operate SSB on 40-10 metres. QSL via home call, bureau preferred.
JA - Nobu, JP1EWY will be active as JP1EWY/1 from Hachijo Island (AS-043) on 19-21 January. He will operate mainly CW with some SSB on 40-10 metres. QSL via home call, direct or bureau. [TNX JN6RZM]
PY - Ed PS7DX, Nazareno PS7NN, Mac PS7GL, Carlos PS7KC and Nat PS7HD will be active as PW7F on 18-20 January to celebrate the 415th anniversary of the Fortaleza does Reis Magos, located in the city of Natal. They will operate SSB, CW and digital modes on 160-10 metres. QSL via PS7HD, direct or bureau, plues LoTW and eQSL.
S7 - Bert, CX3AN will be active as S79AN from Mahe (AF-024), Seychelles on 4-11 February. He will operate mainly SSB and CW on 80-6 metres. QSL via CX3AN. [TNX CX3AN]
SM - Raf ON5RZ, Dirk ON7DS and Jean ON4JW will be active from SI9AM (the King Chulalongkorn Memorial Amateur Radio Society, www.si9am.se) in Ragunda on 23-28 January, including an entry in the UBA DX Contest (26-27 January). Outside the contest they will be on 160-10 metres CW and SSB. QSL via SM3CVM, direct or bureau. [TNX SM3CVM]
TA - The TC Special Wireless Activity Team will be active as TC150RC until 31 January and again on 1-31 July to celebrate the 150th anniversary of Robert College of Istanbul, the oldest American school still in existence in its original location outside the US. All of the QSOs will be confirmed automatically via the bureau. TCSWAT's activity calendar for 2013 can be found at www.tcswat.org [TNX I3TGW]
VK - Look for VK4NM/p to be active from Fraser Island (OC-142) on 15-18 February. Two operators (Andrew, VK4NM and Peter, VK4LAT) plan to be QRV on 80-10 metres, with an emphasis on the higher bands. QSL via M0OXO. [TNX rsgbiota.org]
VK9C - Chris, GM3WOJ and Keith, GM4YXI will be active as VK9C/GM2MP from the Cocos-Keeling Islands (OC-003) from 30 March to 13 April. They will operate SSB and CW, with some RTTY. They hope to have a real-time logging system and daily LoTW uploads if possible. More details are expected in due course. [TNX GM3WOJ]
ZF - Ted, K8AQM will be active as ZF2TA from the Cayman Islands (NA-016) from 26 January to 2 February. He will operate holiday style on 20-10 metres SSB and CW. QSL via K8AQM. [TNX The Daily DX]
ZS8 - David, ZS1BCE has been appointed as the new radio technician for Marion Island (AF-021). He will depart Cape Town on 15 April, and expects to be QRV about four weeks later until May 2014. He will

operate SSB only on most HF bands (callsign still to be applied
for). QSL via ZS1HF. [TNX DX World]

Direttore Responsabile I2VGW

DAYTON TOPBAND DINNER ---> The 24th Annual Dayton Topband dinner will be held on 17 May at the Crowne Plaza Hotel. Deatils and tickets are now available on http://topbanddinner.com

DXCC NEWS ---> Z81Z (Republic of South Sudan, current operation commencing 8 January 2013) has been approved for DXCC credit. [TNX NC1L]

LU6W ---> The German DX Foundation (www.gdxf.de) is collecting donations to help the LU6W team replacing the equipment they lost during their recent operation from Isla Escondida (SA-096, read about their trials and tribulations at http://lu6w.yolasite.com/).

QSL V25A ---> Jack, W9NJB is the QSL manager for V25A prior to 23 December 2012 (QSOs made by K9MDO). As of 23 December 2012, the call has been re-assigned to KG2A. [TNX N9LAH]

SOS RADIO WEEK ---> Some forty stations in the United Kingdom have registered to take part in the SOS Radio Week, a fund raising event in aid of the Royal National Lifeboat Institution that will run from 19 to 27 January. Details on registered stations and the awards (free of charge) for contacting them can be found at www.sosradioweek.org.uk [TNX VA3RJ]

TRIATHLON DX CONTEST ---> The Triathlon DX Contest is a competition that combines the main operating modes into one single non-stop event to be held on 2 February, from 00.00 UTC to 23.59 UTC, with 8 hours of operation on each mode (RTTY, Phone and CW). Complete details (look at the first prize!) can be found on www.triathlon-dx-contest.gr [TNX SV8CYV]

QSLs received direct or through managers: 1A0C, 3B9SP, 3D2C, 3V8BB, 4L8A, 4O3A, 4O7VB, 5C2P, 5H2DK, 5N7M, 5T0SP, 5T5BV, 5U5U, 5V7TH, 7P8CC, 7Q7GM, 7X4AN, 7Z7AB (AS-190), 8P5A, 9A8OK, 9A8VB, 9G5TT, 9H3PP, 9H9BH, 9M4SLL, 9Y4/DL7VOG, 9Y4LAS, A45XR, A60WSW, A71CT, AA4VK/CY0, AH0/N0AT, BA4TB/4 (AS-136), BM0LF, BY1CQ (AS-158), BY1WXD/0, C37NL, C50C, C5A, C6AUM, C6AXY, C6AZZ, CA7FKG (SA-018), CN2R, CP4DR, CQ8X, CR2X, E20VB, E51AIU, EA6QY, EA6UN, EI9JU, EL2A, EL2DT, EL2ES, EL2LF, EL2MF, ES5Q, FG5FR, GO3TXF, HC2/W7SE, HH2/EK6KB, HK0NA, J75Z, J79WE, JU850DN, JW2US (EU-027), JW7QIA, JX5O, JY8VB, KH2/N2NL, KL7RRC/p, LT0X (SA-087), NH8S, NP2KW, OJ0X, OX8MM, P29NI (OC-099), P29VCX (OC-025, OC-103, OC-135, OC-240), P29VPB (OC-069), P3EU, PJ2/K2PLF, RI0K (AS-061), RI1ANF, SU9VB, SV2ASP/A, T6LG, T88UE, T8XX, TF/VE3IKV, TG9IDX, TI8M, TR8CA, TT8TT, TX5EG (OC-067), TZ6VV, V31NO, V63PR,

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30119
SIDC SOLAR BULLETIN 19 Jan 2013, 1152UT
SIDC FORECAST (valid from 1230UT, 19 Jan 2013 until 21 Jan 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Minor geomagnetic storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 19 Jan 2013 10CM FLUX: 109 / AP: 011
PREDICTIONS FOR 20 Jan 2013 10CM FLUX: 100 / AP: 016
PREDICTIONS FOR 21 Jan 2013 10CM FLUX: 098 / AP: 004
COMMENT: Solar conditions where quiet featuring some small C flares and
one C5.8 flare originating from AR NOAA 1654. Quiet conditions are
expected to continue for the next 24 hours.
Geomagnetic conditions where moderate with K values between 2 and 4,
but are expected to increase with the expected arrival of the CME of
wednesday January 16th 19:12 UT as seen in LASCO C2. Geomagnetic
conditions are expected to return to quiet conditions on Sunday January
20th.

TODAY'S ESTIMATED ISN : 032, BASED ON 04 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30120
SIDC SOLAR BULLETIN 20 Jan 2013, 0920UT
SIDC FORECAST (valid from 1230UT, 20 Jan 2013 until 22 Jan 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Jan 2013 10CM FLUX: 100 / AP: 008
PREDICTIONS FOR 21 Jan 2013 10CM FLUX: 096 / AP: 004
PREDICTIONS FOR 22 Jan 2013 10CM FLUX: 095 / AP: 004
COMMENT: Solar activity has been very low and is expected to remain so
for the next 24 hours.
The CME of Wednesday January 16th arrived on Saturday evening January
19th, but caused only active geomagnetic conditions (K=4). There was
only a minor jump in the solar wind speed, density and temperature.
Geomagnetic conditions are quiet and are expected to remain so for the
next 24 hours.

TODAY'S ESTIMATED ISN : 043, BASED ON 03 STATIONS.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1096
BID: $OPDX.1096
January 21, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1DX, K1XN & GoList, NC1L, NJ1Q & W1AW, W2GB, W2IRT, K3LR, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, W9OL, AT International, CX3AN, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, F8DVD, GM3WOJ, GW0ANA, HP1AC, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK1SOW, IW5EFX, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SM3CVM, TA1HZ, TA2RX, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th-January, through Sunday, 20th-January there were 215 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TK, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9L, VP2E, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5H, TANZANIA. Serge, F6AML, will be active as 5H1Z from Zanzibar (AF-032) between January 20th and February 28th. Activity will be on 40-10 meters using CW and SSB. During his time there, he may be active from Mafia Island (AF-054), Pemba Island (AF-063) and an island in the AF-075 IOTA

group. His equipment is a FT857D with a 400w amp into a HF6V with 8 radials. QSL via his home callsign, direct (see QRZ.com) or by the Bureau (he suggests Bureau E-mail request <qsldxped@...>).

5X, UGANDA (Update). Members of the F6KOP team are expected to be active as 5X8C between February 6-18th, from a location some 20 Km from Entebbe airport. The latest report states that the team is now complete with the last operators Jean-Louis/F5NHJ and David/EI9FBB. Unfortunately, Frank, F4AJQ, will not be able to operate from 5X and is now the team leader of the "Back Office" in France. Operators Seb/F5UFX and Alain/F6ENO are now team leaders of the DXpedition to 5X. Mode leaders are Bernard/F9IE (CW), Flo/F5CWU (SSB) and Jean-Paul/F8BJI (RTTY). The current DXpedition team is as follows:
CW Team #1: Seb/F5UFX, Dave/K4SV, Patrick/F2DX and Norbert/DJ7JC
CW Team #2: Alain/F6ENO, Jean-Marc/F8IXZ, Stephane/F5UOW and Jean-Jacques/F5NKX
SSB Team #1: Gerard/F2JD, Gerard/F2VX, Eric/ON7RN and François/ON4LO
SSB Team #2: Michel/FM5CD, Lars/DF1LON, Uwe/DL8OBF and David/EI9FBB
RTTY Team: Jean-Paul/F8BJI, Hans/DL1YFF, Jean-Louis/F5NHJ and Michel/F5EOT
Mixed Mode Team: Flo/F5CWU, Valery/RG8K, Mike/UA9KGH/1 and Bernard/F9IE

John, F5VHQ, will join the team on February 13th, which will complete the 25. The two pilots stations are: Thierry/F4TTR for the French speaking people and Andre/V51B, for the English speaking Hams. All the matters are booked and papers are in hand. Look for the first signals expected on February 8th, around noon. The main focus will be on the low bands, with two dedicated K3 radios. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. Suggested frequencies were published in OPDX.1081. The last hand to control the gear and finish the packaging is scheduled at the F6KOP QTH on January 26-27th. The group is still looking for donations/ funds, and they would like to "thank a lot firms, sellers, DX Bulletins editors, associations, hams and all of you who helped" them in this new F6KOP adventure. Those who want help them can go to their donors page at: http://www.5x2013.com/index.php/help-us
Also, don't forget to sign their Guest book at:
http://www.5x2013.com/index.php/guestbook
You can subscribe to the mail diary at: f5nql@...
Yann, F1NGP, will be their QSL Manager (100% OK Direct, ClubLog's OQRS, Bureau and LoTW). For more details and updates, see:
http://www.5x2013.com

60 METER NEWS.....
* Johan, SM0TSC, has been given an experimental license for six months to put Sweden on 60 meters (5 MHz). He is allowed to operate on 5310, 5320, 5380 and 5390 center frequency plus 1.5 KHz, maximum of 3 kHz bandwidth and 100 watts. For skeds on any mode, E-mail him at:
sm0tsc@...

* Peter, OX3XR, reports that Greenland has now gotten the following frequency band for 5 MHz: 5250-5450 kHz. He will soon be active using a dipole on 5 MHz.

9G, GHANA. Marcel, AI6MS, reports [edited]: "I will be operating portable from January-May 2013 in Ghana, West Africa, as 9G5MS with my Yaesu FT-857D. Anyone is welcome to make a contact, though priority will be given to schools, universities, and prescheduled contacts. I am volunteering with a non-profit called 'Medicine on the Move' and will be using amateur radio in the classroom for the students from the 'AvTech Academy' in Kpong, Ghana. QSL cards are tentatively planned and can be expected in the 2nd half of 2013 if requested. I hope to be operating during the ARRL School Club Roundup as well."

9Y, TRINIDAD AND TOBAGO (Cancelled). Jim, N6TJ, has cancelled his activity as 9Y4W from Scarborough, Tobago Island (SA-009, WLOTA 0412), for the ARRL DX CW Contest (February 16-17th). His host on Tobago has a broken tower and there is no time to fix it before the contest.

A3, TONGA (Update). Werner, DJ9KH, will be active from Tongatapu Island (OC-049) between February 13-23rd, and Vava'u Island (OC-064) between February 24th and March 2nd. His callsigns will be A31WH (OC-049) and A31WH/p (OC-064). He will pick up his license as soon as he arrives in Tonga. His equipment will be a K3 with 100 watts and wire-antennas (loops and verticals). Activity will be on the HF bands, depending on propagation. Suggested frequencies are:
CW - 1826.5, 3505, 7020, 10105, 14024, 18080, 21024, 24894 and 28024 kHz
SSB - 3799, 7070, 14190, 18145, 21290, 24950 and 28490 kHz
RTTY - 10140, 14080, 18110, 21080, 24920 and 28080 kHz

QSL via his home callsign, direct or by the DARC Bureau. He plans to update on <http://www.tonga2013.de/> every day and give information about planned activities, modes and frequencies. He doesn☐t use an online-log, LoTW and e-QSL.

DAYTON HAMVENTION NEWS. Tim, K3LR, reports that the 2013 Dayton TopBand dinner will be held on Friday evening May 17th, at the Crowne Plaza in the Presidential Ballroom - downtown Dayton, Ohio. Top Band Social hour is at 6:15 PM and Dinner starts at 7:15 PM. Noted Top Band enthusiast - Larry "Tree" Tyree, N6TR will give a program. Reservations are available online with credit cards and PayPal. Use the "contact us" information if you need to make other arrangements. All of the details are available here: http://topbanddinner.com
Scroll down to make your reservations. Four nights of great hospitality are also at the Crowne Plaza Contest Super Suite. Details are here: http://contestsupersuite.com

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting the following operation for DXCC credit:
Z81Z ☐ Republic of South Sudan; Current operation commencing January 8, 2013

FRENCH SOUTHERN INDIAN OCEAN TOUR. Gildas, TU5KG, is once again traveling through the South Indian Ocean on a fishing boat. As in past years, he will be sailing in both the Kerguelen and Crozet Island regions, and may activate the islands (if he goes ashore) using his new callsigns - FT5XT

(Kerguelen) and FT5WQ (Crozet). When at sea, he will sign as callsign/mm. QSL via F4DXW, direct only. View his QSL card on QRZ.com.

H40, TEMOTU PROVINCE. Sigi, DK9FN, will once again return to the Temotu Province for a fifth time and be active as H40FN, but this time from Lata, Nendo Island (OC-100) between December 21st and January 6th (2014). QSL via HA8DD, direct only. More details will be forthcoming. Watch the QRZ.com Web site at: http://www.qrz.com/db/H40FN

IO5, ITALY (Special Event/AAW Week). Leo, IW5EFX, informs OPDX that he will be active as IO5SP during the month of February and 10th Antarctic Activity Week (AAW). The suffix stands for "South Pole". A special QSL will be sent 100% via the Bureau. See info on QRZ.com. He also mentions to look for IO5ANT during the AAWeek from National Antarctic Museum in Siena, Italy. QSL will be sent 100% via the Bureau.

IOTA NEWS.....
EU-006. Members of the Westnet DX Group will once again be active as EJ7NET from the Aran Islands between May 10-15th. Operators mentioned are Declan/EI6FR, Tony/EI3HA, Tony/EI2GX, Liam/EI7DSB, Dermot/EI5IQ, Tony/EI2KC, Bernhard/HB9ASZ, Rolf/HB9DGV, Gordon/ MM0BIM, Barry/GM3YEH, John/GM0DJG and Allan/GM3OZB. Activity will be on all HF bands and modes. QSL via LoTW, or direct to Declan, EI6FR. NO eQSL or Bureau QSLs.

EU-016. Operators ON2AV, Danny/ON4CEZ and Jan/ON7JA will active as 9A/OO7T/p from Brac Island (ACIA IC-657, CIA-04, IOCA CI-010, MIA MC-042, WLOTA 0416), Croatia, between July 24th and August 2nd. Activity will be on all bands and modes. They will also be an entry in the RSGB IOTA Contest (July 27-28th). QSL is 100% via the Bureau. No e-QSL.

EU-123. Operators Ken/G0ORH and David/G3KLH will be active as MM3I from Arran Island (IOSA CL01, SCOTIA CS14), in the Clyde Islands IOTA group between July 22-30th. Activity will include an entry in the RSGB IOTA Contest (July 27-28th). Look for activity on 30/17/12 meters outside of the contest. They also plan some activity on 60 meters (5 MHz). QSL via G0ORH.

OC-285. Ralph, H44RK (aka 5W0W), is going to activate Sikaiana Atoll. Dates have not been provided. Ralph is currently active from Apia, Somoa, until March 3rd. He is looking for 2-3 operators, but 1 operator must be CW POC. If interested, contact Ralph at <ralph.honiara@...> or NR6M at <turvin2009@yahoo.com>.

SA-096. (Correction) In OPDX.1095, the Web page for the LU6W DXpedition was listed wrong which could have an impact on donations. It should have been: http://lu6w.yosalite.com

J5, GUINEA BISSAU. Members of Verona DX Team will once again return to Cumura to help with the mission work and be active as J52HF between February 10th and March 2nd. In their spare time, they will be on air

on the HF bands and 50 MHz, SSB only. Operators mentioned are Livio/IZ3BUR, Libero/IK3RBE, Enzo/IK3VVD, Ilario/IZ3STA and Milena/IK3VZJ. QSL via I3LDP. More details should be forthcoming, but you can view details and pictures from their 2012 DXpedition at: http://www.ari.verona.it/veronadxteam/en

NH0, MARIANA ISLANDS. Joe, JA1LZR, will be active as NH0Z during the CQ 160 Meter CW Contest (January 25-27th) as a Single-Op entry. Activity will be from Tinian Island (OC-086, USI NI003S, WLOTA 3108). QSL via JJ2VLY (see QRZ.com).

P4, ARUBA. Helmut, DF7ZS, will once again be active (possibly as P41P) from Aruba (SA-036) between March 26th and April 3rd. Activity will include the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band entry. Some casual operations will take place before and after the contest on 17/12 meters. The callsign for the WPX contest is still tentative. QSL via his home callsign. Watch his home page at: http://www.df7zs.de

PF100, THE NETHERLANDS (Special Event). Operator Fred, PA0FAW, (ISWL Member PA-11092, FISTS #9858), will be operating with the special call-sign PF100ZOO between February 1-28th. Activity is to commemorate the 100th anniversary of the very well known Arnhem Zoo (Official name is Burgers Zoo). Operations will mainly be CW and SSB, with some Digital modes. Fred will once again be active from the De Hoge Veluwe National Park (WFF PAFF-005) and from Grid Locator Squares: JO21WX, JO22VA and JO32AA. QSL via PA0FAW, by the Bureau, direct and eQSL.cc. (No LOTW). SWL reports are always welcome and appreciated. See QRZ.com.

PJ2, CURACAO. Operators Mike/W1USN, Bob/AA1M and Scott/W1SSR will be active as PJ2/homecall from Curacao (SA-099, WLOTA LH-0942) between March 8-22th. Activity will be on all bands 160-10 meters using CW, SSB, PSK and RTTY. QSL via their home callsign, direct CBA or by the Bureau.

2O12W QSL STATUS. Glyn, GW0ANA, reports: "I would advise that all direct QSL cards have now been sent out, also log uploaded to LoTW and eQSL. The direct QSLs were delayed due to problems on design due to Olympic Logo authorization having to go to Olympic committee. All logos now approved and cards printed and gone out."

TIME TO UPDATE YOUR GS-IRC CHART (Update). Bill, W9OL, informs OPDX that he has made many updates to his GS/IRC Chart. He states, "It's the New Year and many countries are raising their postal prices, and it's time to update the cost of QSLing. Please take a look at the GS-IRC Chart and let me know of any changes in postage for the country YOU reside in. There is a lot of OLD data that I have NOT received updates on. If you live in or have a friend who resides in these missing countries, please elicit his help in obtaining the new information.
The current chart resides at:
http://www.qsl.net/w9ol/IRC_Chart.htm
If you wish to download the whole file, go to:
http://www.qsl.net/w9ol/IRC_Chart.xls

QSL RECEIVED VIA LoTW: 4L8A, 5B4AIF, 5V7TH, 5X1RO, 6K2DFG, 7P8D, 9L0W, 9V1YC, A61BK, BG2AUE, C6AUM, CE3EEA, CP4BT, CT7ACG, CU3AK, D4C, DL3MDJ, DO4DXA, EA1HFI, EK3GM, EX2B, F6AUS, FK8DD, FM/KL7WA, FS/K9EL, GJ2A, HA3NU, HC2UB, HC6EP, HI8PLE, HS0ZIA, J68UN, J6/N7QT, JM1XCW, K1GI/VP9,

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!!!!

S7, SEYCHELLES. Operators of the Uruguay DX Group (Mario/CX4CR and Bert/CX3AN) plan a 2013 DXpedition to the Seychelles. However, Mario had developed some health problem and ended up with a triple by-pass. At the moment he is recovering 100% and again on the bands. Bert will go ahead with the plans, but alone for this year's DXpedition. Look for him to be active as S79AN from Pointe Larue on Mahe Island (AF-024) between February 4-11th. Activity will be holiday style on 80-6 meters, including 30/17/12 meters, using CW and SSB. He will try to operate as much as he can. QSL via CX3AN direct only (see QRZ.com). NO Bureau or eQSL.

SI9, SWEDEN. Operators Raf/ON5RZ, Dirk/ON7DS and Jean/ON4JW will operate as SI9AM between January 23-28th, from the "King Chulalongkorn Memorial" the largest Thai Pavilion in the world outside Thailand in Raganda, Sweden. The trio plan to be an entry in the UBA DX Contest (January 26-27th). Outside of the contest, they will be active on 160-10 meters using CW, SSB and FM. Suggested frequencies are:
CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
FM - 145.550 MHz and repeater RV49 - 145.612 MHz
QSL via SM3CVM, direct or by the Bureau. Bureau cards can be requested by E-mail at: info(at)si9am.se
Visit the SI9AM Web page at: http://www.si9am.se
Look at their special page at: http://www.si9am.tk

TC16, TURKEY (Special Event). Members of the Turkish Radio Amateur Club (TRAC) from the Bursa Branch (the YM3KB team) are currently activating the special callsign TC16BURSA as of January 10th through March 10th. Activity will be on all the bands under the terms of propagation, using CW, SSB, PSK snd ROS modes. Station information about actively working bands, frequencies and modes will be announced online on their Facebook page <https://www.facebook.com/trac.bursasubesi> and their QRZ.com page <http://www.qrz.com/db/TC16BURSA>. QSL direct to POB 76, Gencosman, BURSA, 16105 Turkey.

TCSWAT 2013 ACTIVITIES ANNOUNCED. Bekir, TA2RX, informs OPDX that the members of the "TC Special Wireless Activity Team" (TCSWAT) have announced their activities for 2013 to activate several special callsigns in memory

of those who lost their lives in WWI and some other upcoming anniversaries. The "Giresun Radio Amateurs and Nature Sports Club" (GITRAD) will also join them on two more such activities listed below. The TCSWAT might be organizing some foreign DXpeditions again, if they can get the permissions. The current agenda and callsigns are as follows:
January 15-31st - TC150RC; 150th Year of Robert College
February 1-28th - TC1BW; In memory of TA1BW (SK) - Asil Feri
March 16-18th - TC18M; In memory of the Naval Victory of March 18, 1915
April 1-15th - TC47A; In memory of the 47th Giresun Volunteer Regiment
April 20-25th - TC57A; Scouts Camp in "Memory of Martyrs", Çanakkale
June 28-30th - Friedrichshafen HamFest (TCSWAT hopes to see you there)
July 1-31st - TC150RC; 150th Year of Robert College
August 26-31st - TC42A; In Memory of the 42th Giresun Volunteer Regiment
October 14-30th - TC90TC; 90th Anniversary of the Turkish Republic
November 1-17th - TC301B; 30th Anniversary of the Turkish Republic of Northern Cyprus
December 20-25th- TC9SAM; Scouts Camp in Memory of Martyrs, Erzurum
** Also look for TC0C and TC2C to be in various contests. TC2C was active this past weekend from YM2SFT club station during the HA DX Contest as Multi-Op/Single-Transmitter/Low-Power entry. Look for more activities that might be announced as they come along.

TM10, FRANCE (AAW Special Event). Look for special event station TM10AAW to be on air on February 2-3th, 8-10th and 15-24th. Activity is to celebrate the 10th Antarctic Activity Week (AAW). Operations will be made by François, F8DVD, from his QTH in Mâcon, in the eastern part of France, 60 km north of Lyon. The reference for the WAP program is 235. Operations will be on 40-10 meters, mostly SSB. QSL via F8DVD, direct (SAE + 1 IRC or 2 USDs) or by the Bureau.

TO22, GUADELOUPE. French operators Michel/F6GWV and Gildas/F6HMQ will be active as TO22C from Guadeloupe between February 17th and March 3rd. Activity will be on all bands, but with a focus on 160 meters. QSL via F6HMQ.

UN, KAZAKHSTAN. Tony, RT9T (ex-RX9TL), will be active as UN/RT9T during the CQ 160 Meter CW Contest (January 25-27th). QSL via his home callsign. Look for activity before the contest.

VK9C, COCOS KEELING ISLANDS. Operators Chris/GM3WOJ (ZK2V) and Keith/GM4YXI (ZK2X) will be active signing VK9C/GM2MP from Cocos Keeling Island (OC-003) between March 30th and April 13th. Activity will be on SSB and CW, with some RTTY. It is hoped to have a real-time logging system and daily LoTW uploads if possible. More details to follow ...

VK9N, NORFOLK ISLAND. Ten operators and members of the Oceania DX Group (ODXG) will be active as VK9NT from Norfolk Island (OC-005) between May 3-13th. Planning is now well underway with accommodations and air travel booked. The group plans to have 4 stations covering all bands 80-10 meters on CW, SSB and RTTY. Operators mentioned are Chris/VK3QB (Team Leader), Luke/VK3HJ, Lee/VK3GK, Benton/VK3CBV, Allan/VK2CA (QSL Manager/Webmaster),

Catherine/VK4GH, John/VK4IO, Roy/VK3GB, Peter/VK3IJ and Graeme/VK3GL.
An "Online QSL Request Service" will be available for Bureau, and direct
cards on ClubLog which is the PREFERRED method. If for some reason you
cannot use the OQRS or LoTW, QSL can go direct to VK2CA. For more details
and updates, visit the VK9NT Web page at: http://vk9nt.odxg.org

VP5, TURKS AND CAICOS ISLANDS. Jeff, K0UU (ex-WV3B), will be active as
VP5/K0UU from Grand Turk Island (NA-003) between February 13-21st. Activity
will be focused on the 30/17/12 meters and the ARRL DX CW Contest (February
16-17th) signing with the special callsign VQ5RP. QSL via LoTW or K0UU,
(direct or by the Bureau).

Z6, KOSOVO. Marijan, S56A, will be active as Z6/S56A from Batlava Lake
during the CQ 160 Meter CW Contest (January 25-27th) as a Low-Power
entry. QSL via S56A.

ZS8, MARION ISLAND. Reports indicate that David, ZS1BCE, has been appointed
to be the new radio technician on Marion Island (AF-021) for one year
between April and May (2014). David is expected to depart from Cape Town
on April 15th, and radio activity will start about four weeks later.
Operations will only be on SSB and on most HF bands. Currently, he does
not have a ZS8 callsign, but he plans to applied for ZS8D. QSL via Pierre,
ZS1HF, who was the last operator from Marion as ZS8M.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30121
SIDC SOLAR BULLETIN 21 Jan 2013, 1232UT
SIDC FORECAST (valid from 1230UT, 21 Jan 2013 until 23 Jan 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 21 Jan 2013 10CM FLUX: 106 / AP: 003
PREDICTIONS FOR 22 Jan 2013 10CM FLUX: 105 / AP: 004
PREDICTIONS FOR 23 Jan 2013 10CM FLUX: 107 / AP: 003
COMMENT: Three sunspot groups are reported by NOAA today: NOAA ARs
1654, 1658 (Catania numbers 64 and 69 respectively), and 1660 (no
Catania number yet). A C-class flare is possible in the newly emerged
NOAA AR 1660. The Earth is currently inside a slow (around 350 km/s)
solar wind flow with weak to average (3-4 nT) interplanetary magnetic
field magnitude. We expect quiet geomagnetic conditions.

TODAY'S ESTIMATED ISN : 035, BASED ON 03 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30122
SIDC SOLAR BULLETIN 22 Jan 2013, 1236UT
SIDC FORECAST (valid from 1230UT, 22 Jan 2013 until 24 Jan 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 22 Jan 2013 10CM FLUX: 109 / AP: 002
PREDICTIONS FOR 23 Jan 2013 10CM FLUX: 110 / AP: 003
PREDICTIONS FOR 24 Jan 2013 10CM FLUX: 113 / AP: 003
COMMENT: NOAA AR 1660 (Catania sunspot groups 70 and 71) continues to
to grow and develop magnetic complexity (currently beta-gamma
configuration of its photospheric magnetic field). We expect C-class
flares from this active region. A low-latitude coronal hole in the
southern hemisphere reached solar central meridian. The corresponding
fast solar wind stream will probably arrive at the Earth on January 25,
possibly resulting in active geomagnetic conditions. The Earth is
currently inside a slow (around 320 km/s) solar wind flow with weak
(around 3 nT) interplanetary magnetic field magnitude. We expect quiet
geomagnetic conditions in the coming hours.

TODAY'S ESTIMATED ISN : 035, BASED ON 08 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30123
SIDC SOLAR BULLETIN 23 Jan 2013, 1216UT
SIDC FORECAST (valid from 1230UT, 23 Jan 2013 until 25 Jan 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 23 Jan 2013 10CM FLUX: 112 / AP: 003
PREDICTIONS FOR 24 Jan 2013 10CM FLUX: 114 / AP: 003
PREDICTIONS FOR 25 Jan 2013 10CM FLUX: 116 / AP: 014
COMMENT: Catania sunspot group 70 (NOAA AR 1660) still has the
potential to produce a C-class flare. A B5.4 flare peaking around 03:31
UT in this group was accompanied by coronal dimmings and a post-eruption
arcade, but with only a weak and narrow CME (according to STEREO COR2
data) that is not expected to arrive at the Earth. The Earth is
currently inside a slow (around 290 km/s) solar wind flow with weak
(around 1-2 nT) interplanetary magnetic field magnitude. We expect quiet
geomagnetic conditions in the coming hours. On January 25 we expect the
arrival of a fast solar wind stream emanating from a low-latitude
coronal hole in the southern hemisphere, possibly resulting in active
geomagnetic conditions.

To all radio amateurs

SB DX ARL ARLD004
ARLD004 DX news

This week's bulletin was made possible with information provided by K1SFA, NC1L, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SENEGAL, 6W. Jean-Claude, F6IRS is QRV as 6W/F6IRS until February 7. Activity is holiday style on all HF bands using mostly SSB during his late afternoons into early evening. QSL to home call.

GHANA, 9G. Marcel, AI6MS is QRV as 9G5MS until May 2013 while working as a volunteer with Medicine on the Move. This includes being active in the upcoming ARRL School Club Roundup. QSL to home call.

FRANCE, F. Gil, F4FET/p is QRV from the Lighthouse Boulogne sur mer, ARLHS FRA-089, until January 31. Activity is on the HF bands using SSB. QSL to home call.

REUNION ISLAND, FR. Pierre, F8APV and Stephane, F8EOI are QRV as FR/home calls until February 9. Activity is on 40 to 10 meters with an emphasis on 30 meters CW and 20 meters using SSB. QSL to home calls.

THAILAND, HS. Eddy, ON4AFU is QRV as HS0ZJF/8 from Koh Samui, IOTA AS-101, until February 18. Activity is on 40 to 10 meters using CW only. He plans to be active from IOTA group AS-126. QSL to home call.

GUINEA-BISSAU, J5. Peter, HA3AUI is QRV as J5UAP until March 10. Activity is on 40 to 10 meters using mainly CW and digital modes. QSL direct to home call.

MARIANA ISLANDS, KH0. Joe, JA1LZR is QRV as NH0Z until January 28. This includes an entry in the CQ 160 Meter CW contest. QSL via

JJ2VLY.

NETHERLANDS, PA. Special event station PH00ZWAT is QRV until January 27 from the former Radio Nederland Wereldomroep antenna park in Zeewolde. QSL via operator's instructions.

SWEDEN, SM. A group of operators are QRV as SI9AM from the King Chulalongkorn Memorial Amateur Radio Society station in Ragunda until January 28. Activity is on 160 to 10 meters using CW and SSB. This includes an entry in the UBA DX contest. QSL via SM3CVM.

EGYPT, SU. Gerd, DJ5IW is QRV as SU/DJ5IW from El Fardous until February 8. Activity is on 20 meters and above. QSL to home call.

TURKEY, TA. Members of the Turkish Radio Amateur Club from the Bursa Branch are QRV using special callsign TC16BURSA until March 10. Activity is on all bands using CW, SSB, PSK and ROS modes. QSL via operators' instructions.

CHAD, TT. Sergiy, US3EZ is QRV as TT8/US3EZ until March. QSL to home call.

KAZAKHSTAN, UN. Tony, RT9T is QRV as UN/RT9T. This includes an entry in the CQ 160 Meter CW contest. QSL to home call.

ANTARCTICA. Craig, VK6JJJ is a member of the Antarctica Australian National Antarctic Research Expedition 2013/14 and is QRV as VK0JJJ from Mawson Base in the Mac Robertson Land until January 2014. Activity is on 160 to 6 meters using SSB and digital modes. QSL via K7CO.

AUSTRALIA, VK. Radio amateurs in Australia may substitute their normal VK prefix for AX on January 26 in commemoration of Australia Day.

MEXICO, XE. Dario, LU3DR is QRV as XE3/LU3DR from the Quintana Roo State until January 28. He is active using SSB on 20, 17, 15 and 10 meters. QSL to home call.

SERBIA, YU. Members of the Old Timers Club of the Amateur Radio Union of Serbia are QRV as YU15OTC during 2013 in celebration of its 15th anniversary. Activity is on all bands and modes. QSL via YU6A.

CAYMAN ISLANDS, ZF. Ted, K8AQM will be QRV as ZF2TA from January 26 to February 2. Activity will be holiday style on 20 to 10 meters using CW and SSB. QSL to home call.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC Credit: Laos, XWPA, 2010 to 2011 operation; Laos, XW4XR, current operations.

THIS WEEKEND ON THE RADIO. The CQ 160-Meter CW Contest, BARTG RTTY Sprint, NAQCC Straight Key/Bug CW Sprint, QRP CW Fox Hunt, NCCC Sprint CW Ladder, REF CW Contest, UBA DX SSB Contest, SPAR Winter Field Day, WAB 1.8 MHz Phone Contest and the QRP ARCI Fireside SSB Sprint are all on tap for this upcoming weekend. The Classic CW Exchange is scheduled for January 28. The QRP CW Fox Hunt is scheduled for January 30. Please see January 2013 QST, page 87, and the ARRL and WA7BNM Contest websites for details.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30125
SIDC SOLAR BULLETIN 25 Jan 2013, 1214UT
SIDC FORECAST (valid from 1230UT, 25 Jan 2013 until 27 Jan 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 25 Jan 2013 10CM FLUX: 103 / AP: 005
PREDICTIONS FOR 26 Jan 2013 10CM FLUX: 101 / AP: 007
PREDICTIONS FOR 27 Jan 2013 10CM FLUX: 098 / AP: 013
COMMENT: The solar activity is very low, there were no C-class flares
reported during last 5 days. The C-class flares are still possible but
not very probable. A partial halo CME was detected by SOHO/LASCO on
January 23. The CME was first observed in the SOHO/LASCO C2 field of
view at about 14:00 UT, had angular width of about 240 degrees and
projected speed around 500 km/s. It was associated with a prominence
eruption and EIT wave, situated at that moment on the North-East
quadrant of the Sun. It seems that the CME was directed somewhat
northward of the Sun-Earth line. Therefore, we expect the arrival of
only a CME-driven shock at the Earth, probably late on January 26 or
early on January 27. It might result in active geomagnetic conditions.
The solar wind speed is currently about 400 km/s and slowly increasing
what is probably indication of the arrival of the fast solar wind stream
from a low-latitude coronal hole in the southern hemisphere. The Bz
component of the interplanetary magnetic field is fluctuating, with
occasional intervals of negative values (up to -5 nT). We expect quiet
to possibly active geomagnetic conditions in the next 24 hours.

Seems to work fine here, Tim. Since the recent hardware upgrade, my uploads are processed in minutes. In the past week it's not unusual to upload a file after a day's DXing and then check 30-40 minutes later to find several matches, indicating my file and that of my QSO partners have been all processed.

73, Paul VE1DX

Thanks Paul and Arne. I don't get the normal offline page I just can't connect but if they are supposed to be down then I am OK. Lol

Paul, I didn't mean about speed. Yes, it is extremely fast now. Kudo's for the hardware upgrade.

Subject: [DX-IS] LOTW again.

Every day I have trouble connecting to LOTW. I get a connection timeout error. Is anyone else experiencing this or is my connection
that flaky. I have no problem with any other site, email games, IM, so..

While I have not had any time out issues before, I checked LoTW a few moments ago and that's exactly what I got: A "timed out" message. I'm sure the problem will be fixed shortly.

ARLP004 Propagation de K7RA

ZCZC AP04
QST de W1AW
Propagation Forecast Bulletin 4 ARLP004
>From Tad Cook, K7RA
Seattle, WA January 25, 2013
To all radio amateurs

SB PROP ARL ARLP004
ARLP004 Propagation de K7RA

Average daily sunspot numbers over the past week were less than half the value for the previous week, dropping nearly 73 points to 56.4. Average daily solar flux declined as well, nearly 47 points to 110.7. Average geomagnetic indices were up about 50%, but still very quiet. The higher average was due to events on January 17, when the planetary A index was 13, higher than recent measures, but still moderate. The cause of the mild disturbance was the arrival of a CME, or Coronal Mass Ejection.

Predicted solar flux from the January 24 forecast from NOAA and USAF has 10.7 cm flux values at 100 on January 25-26, 95 on January 27-30, 100 on January 31 through February 1, 110 on February 2, 120 on February 3-4, 125 on February 5-8, 120 on February 9-14, 115 and 110 on February 15-16, and 105 on February 17-18.

It doesn't look like a return to solar flux values around 170 (where it was on January 9-12) is expected any time soon. But those high levels earlier in the month weren't predicted either.

Looking back, a flux reading of 135 was predicted for January 9 in the November 25 through December 9 daily forecasts, then downgraded to 110 on December 10-16, then increased to 115 on December 17-30, downgraded to 105 on December 31 through January 2, increased to 115 on January 3, 135 on January 4, 130 on January 5-6, 145 on January 7, and 150 on January 8. The final result? 169.3 on January 9, far above any predictions over the previous 45 days, which were revised eight times.

The forecasts are issued daily, usually after 2100 UTC and posted at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html.

The predicted planetary A index from the same January 24 forecast is 8, 15, 20 and 12 on January 25-28, 5 on January 29 through February 8, 8 on February 9-10, 5 on February 11-18 and 8 on February 19. The

January 25-28 levels are higher then predicted a day earlier, on January 23. In that earlier forecast, planetary A index for those same four days was 8, 8, 5 and 5.

F.K. Janda, OK1HH of the Czech Republic expects the geomagnetic field will be quiet to unsettled on January 25-26, quiet January 27-28, mostly quiet January 29, quiet on January 30-31, mostly quiet February 1-2, quiet on February 3, mostly quiet February 4, quiet on February 5-6, quiet to unsettled February 7-8, quiet to active February 9-10, mostly quiet February 11-12, quiet to active February 13-14, active to disturbed on February 15, and quiet to unsettled February 16.

Jeff Hartley, N8II of Shepherdstown, West Virginia wrote, "It has been a pretty boring winter for DX. I did work four VK3s in a row from 2225-2255Z including one mobile who was S6 and a QRP 5 W to 1/2 wave vertical who was S5 with QSB on 20M SSB long path Thursday (January 24), so that path was very good. 12 and 10 seemed dead at that time and only South America was heard on 15. No European signals were heard on 160 around then and again at 0050Z (nothing on 80 also at 0050Z). But, if the K stays low, the lower flux should help the CQWW 160 contest this weekend."

Unfortunately, the forecast for this weekend has some geomagnetic activity, with the planetary A index on February 25-27 at 8, 15 and 20.

The 160 meter contest Jeff referred to is the CW weekend of the CQ World Wide 160-Meter Contest. The contest page at http://www.cq160.com/) says it runs from 2200 GMT today (Friday, January 25) to 2200 GMT Sunday. By the way, 2200 GMT (Greenwich Mean Time) for our purposes is the same as 2200Z or 2200 UTC. On the West Coast, this is long before sunset, at 2:00 PM PST.

On January 19, Jeff wrote: "Friday morning January 18 I had a chance to operate and had some very strong signals on 10 phone from the UK with small stations mostly S7-9. Even 5 and 10 watt stations were good copy. This was starting about 1330Z and the EU opening ended after 1600Z. Countries worked in EU started with SP, DL, EI, G, GM then later PA, ON, F and the DLs were about the only ones left at 1610Z. Friday evening was noticeably better than all this past week, but did not get to the radio until 0040Z. At that time 15 was in good shape to JA with the loudest, JH1GEX S9. BW2AK was heard and 9V1YC who was about S3-4 was worked easily thru a pile up. 15 was still open to JA at 0115Z, normally by 24Z, 15 seems closed to everywhere. 17 was also quite good into JA around 0100-0130Z with JA9YYY S9 on SSB.

The HA DX contest started at 12Z Saturday with lots of EU and Russian activity. Russians are usually only easy to work very early in the day on 20 and about nil on 15 and higher. At 1315Z when I started thru 1430Z, Russians had good signals on 20 CW but there was

deep rapid QSB making copying dits and sometimes whole letters/numbers very difficult. I worked about three Ural mountain area UA9s and found UN2E about S3 plus quite a few from UA3, about four from UA4 and some loud ones near St Petersburg from UA1. The deep QSB was even a problem on signals as close as Germany as well as the Hungarians. YE1ZAT called in around 1545Z with a good signal. 15 was open pretty well to EU, but 10 was barely open at all to very southern EU, I heard T77BL working AA3B.

"In the afternoon, I briefly operated in the NAQP phone contest before heading off to work. At 1835-1900Z, 10M had a good number of loud signals with one VE6 hitting 30 dB over S9. Many UT stations were worked along with stations from CO, AZ, WA, ID, MT and NM; only W6TA and K6LA who was weak were worked in CA. 15 was wide open to TX and was a bit of a struggle to work west coast stations with Midwest stations beating me out consistently."

In a January 18 email titled "Outstanding 160M propagation Jan 11-12 in Ohio," Robert Elek, W3HKK of Johnstown, Ohio wrote: "Worked more Europeans than ever around their sunrise on Jan 11 and 12, plus KL7 and VP2 earlier in the night. Huge signals! Received my first 599 reports from Europe (two of them!) as well as two SWL cards from Russia for that activity. The rig: 100w to quarter wave 40 ft vertical inverted L with 22x65 ft radials.)

"I was excited for the weekend conditions but Jan 13-14-15 turned out to be stinko for DX. Amazing how things change on Top Band. Gotta get 'em while you can."

Thanks, Robert.

Don't miss "The Penticton Solar Flux Receiver," an article on pages 39-46 in the February 2013 issue of QST. This gives a great explanation about where the solar flux numbers in our bulletin originate. It answered questions I had about the process, such as how they handle readings that go off the scale during a space weather event.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for January 17 through 23 were 74, 56, 46, 48, 50, 53, and 68, with a mean of 56.4. 10.7 cm flux was 122.7, 115.2, 106.7, 106.6, 108.3, 110.3, and 104.9, with a mean of 110.7. Estimated planetary A indices were 13, 9, 7, 9, 4, 1, and 1, with a mean of 6.3. Estimated mid-latitude A indices were 12, 7, 9, 8, 4, 1, and 1, with a mean of 6.

26 January 2013 A.R.I. DX Bulletin
No 1134
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2 - Bob, W7YAQ and Bill, N7OU will be active as 3D2NB (W7YAQ) and 3D2OU (N7OU) from Nadi (OC-016), Fiji on 2-7 February, and as 3D2RX (W7YAQ) and 3D2RO (N7OU) from Rotuma (OC-060) on 8-21 February. They will operate mostly CW, with some RTTY and SSB, on 160-10 metres, using at both QTHs vertical antennas next to saltwater on a north-facing shore. During the ARRL CW DX Contest they will make a multi-single entry from Rotuma as 3D2RX. QSL via home calls. They will upload their logs to LoTW as soon as they get back to the USA. [TNX NG3K]
8P - The Buddies in the Caribbean DXpedition group, which specializes in 100 watt or less low power radios and the Buddipole portable antenna systems, will be active from Barbados (NA-021) from 29 January to 6 February. The eight operators will be 8P9FF (W3FF), 8P9HF (W6HFP), 8P9WZ (WZ1P), 8P9RT (WG0AT), 8P9VG (KC4VG), 8P9DG (KB9AVO), 8P9EA (K8EAB) and 8P9UN (N7UN). There will be fixed operations on 160-10m using CW, SSB, and RTTY or PSK from a villa, and portable operations from various points on the island. QSL via home calls and LoTW. [TNX N7UN]
9G - Marcel, AI6MS will be active as 9G5MS from Ghana until May. "Anyone is welcome to make a contact", he says, "though priority will be given to schools, universities, and prescheduled contacts". Marcel is volunteering with 'Medicine on the Move', and will use amateur radio with the students at the Aviation and Technology Academy in Kpong. QSL via home call.
CT9 - Dirk, DO7DP will be active as CS9/DO7DP from Madeira (AF-014) from 26 January to 9 February. He will operate SSB and PSK31 on 80, 40, 20, 15 and 10 metres. QSL via DO7DP, bureau preferred. [TNX DX Newsletter]
FG - Jean-Pierre, F6ITD will be active again as FG/F6ITD from Guadeloupe (NA-102) in February and March. He will operate from Basse Terre on 1-8 February and from La Desirade on 9 February-25 March. QSL via home call and LoTW; logsearch on Club Log.
FK - Oku, JK1KSB will be active holiday style as FK/JK1KSB from New Caledonia from 29 January to 3 February. He will operate CW, RTTY and PSK31 on 80-10 metres. During the first days his operating time will be limited to 13-18.30 UTC. QSL via home call. [TNX

JK1KSB]
G - Members of the UK HQ team (GR2HQ) will be active as G100C (or, depending on the station location, GM100C, GW100C, GJ100C etc) during the weekends throughout 2013. This callsign is partly to provide essential pile-up training for the national team and partly to celebrate the 100th anniversary of RSGB. All QSOs will be uploaded to LoTW, e QSL and Clublog as quick as possible after each weekend. Traditional QSL cards via M0OXO (please use his OQRS at www.m0oxo.com). Further information will be available at www.gr2hq.com/g_100c.htm
PA - Special callsign PH00ZWAT will be used on 25-27 January from the former Radio Netherlands Worldwide's antenna park at Zeewolde Operations will start around 8 UTC on Friday and end at 13 UTC on Sunday. QSL bureau to PD2RKG.
PA - Fred, PA0FAW will be active as PF100ZOO on 1-28 February to celebrate the 100th anniversary of Burgers' Zoo in Arnhem. He will operate CW and SSB, with some digital modes. QSL via PA0FAW.
PY - Look for PY2CDR/m to operate SSB and digital modes on 40, 15 and 10 metres during the "first Brazilian Bicycle/Mobile DXpedition". The 490km ride will start on 28 January from Bertioga and end on 3 February in Rio de Janeiro. All QSOs will be confirmed automatically via the bureau. Further information at http://grupocdr.com.br/dxp_en.htm [TNX PY2LCD]
VE - Rick, VE3ZUP will be active as VE3COLD during the Winter Field Day organized by the Society for the Preservation of Amateur Radio (www.spar-hams.org), from 17 UTC on 26 January through 17 UTC on the 27th. QSL via VE3ZUP.
VP8_sg - The RRS "James Clark Ross" is expected to arrive at King Edward Point, South Georgia on 26 January. "Due to the limited time that we will be at KEP", Mike VP8CMH (GM0HCQ) says, "I don't think I will be active as VP8SGK. Should that change I won't actually know until I am ashore. If I can operate it will most likely be CW and I will post some spots on the cluster". Bookmark www.gm0hcq.com.
YB - Look for Imam, YB4IR to be active as YB4IR/5 from Batam Island (OC-075) starting around 8 UTC on 25 January until the UTC midnight on the 28th. QSL via home call (OQRS on Clublog) and LoTW. [TNX DX World]
YI - Razi, YI1RZ is currently active as YI1RZ/2 from Bacuba until 4 February. He is running 10 watts only. QSL via IK2DUW.

CQ WW 160-METER CONTEST (CW) ---> Objective of the contest is for amateurs around the world to work as many US States, Canadian provinces and countries as possible on 160 metres CW (http://cq160.com/rules.htm). The following stations have announced their participation in this year's event (from 22.00 UTC on 25 January through 22.00 UTC on the 27th):

Direttore Responsabile I2VGW

CQ MAGAZINE ---> Editor Rich Moseson (W2VU) announced on 22 January that CQ DX Hall of Famer Wayne Mills (N7NG) has been named CQ magazine's DX Editor. A renowned DXer, DXpeditioner and contester, he succeeds Carl Smith (N4AA), who has stepped down after writing the magazine's DX column for 13 years. Wayne will begin writing the CQ DX column as of the magazine's April 2013 issue.

DXCC NEWS ---> 5V7TH (Togo, 2012 operation), S07EA (Western Sahara, 2006-2007 operstion), XWPA (Laos, 2010-2011 operation) and XW4XR (Laos, current operations) have been approved for DXCC credit.

QSL A92IO ---> Dave, A92IO is now preparing to leave Bahrain. Until 1 June, direct cards can be sent to Dave Court, P.O. Box 31183, Budaiya, Bahrain. After 1 June, direct cards must be sent to Dave Court, Connogue, River Lane, Shankill, Co. Dublin, Ireland. All bureau cards must be sent via EI3IO. "Do not expect a quick answer to QSLs in the period September to December 2013", Dave says, as "I will be moving house in September". A92IO uploads his logs to eQSL and LoTW.

QSL TF4M & TF4X ---> Phil, G3SWH has been appointed as QSL manager for Thor, TF4M's operations from September 2004 to the present. Thor has

recently joined RSGB which means that cards for TF4M and TF4X can now be sent and received via the RSGB bureau. Logsearch for both calls at www.g3swh.org.uk [TNX G3SWH]

+ SILENT KEY + Silvano Fabbri, C91A (IK4GRJ) lost his life on 20 January in a motocross accident near Maputo. He was 60 and for thirty years he had lived in Mozambique, where he had founded a prominent telecommunication company.

20461. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-01-26 14:01:05 UTC
From: Paul Dunphy
Topic: 19749 Message: 20461

```
:Issued: 2013 Jan 26 1315 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30126
SIDC SOLAR BULLETIN 26 Jan 2013, 1253UT
SIDC FORECAST (valid from 1230UT, 26 Jan 2013 until 28 Jan 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 26 Jan 2013 10CM FLUX: 099 / AP: 013
PREDICTIONS FOR 27 Jan 2013 10CM FLUX: 097 / AP: 017
PREDICTIONS FOR 28 Jan 2013 10CM FLUX: 099 / AP: 005
COMMENT: Catania sunspot groups 70 and 72 (NOAA ARs 1660 and 1661
respectively), as well as yet unnumbered sunspot group that emerged
close to the east limb yesterday evening, have a potential to produce a
C-class flare. Three flares stronger than B5 were produced in Catania
sunspot groups 70 and 72 during the last 24 hours. A C-class flare is
therefore possible. The Earth is currently inside a fast (around 500
km/s) solar wind flow with elevated (around 10 nT) interplanetary
magnetic field magnitude. Active geomagnetic conditions (K = 4) were
reported by NOAA and IZMIRAN, and unsettled conditions (K = 3) were
reported by Dourbes. More intervals of active geomagnetic conditions are
possible, especially after the arrival of the ICME-driven shock that is
expected late today - early tomorrow.

TODAY'S ESTIMATED ISN : 042, BASED ON 07 STATIONS.

SOLAR INDICES FOR 25 Jan 2013
WOLF NUMBER CATANIA : ///

20462. Report SIDC Ursigram

Yahoo group: DX-IS (2013)
Date: 2013-01-27 14:01:04 UTC
From: Paul Dunphy
Topic: 19749 Message: 20462

```
:Issued: 2013 Jan 27 1257 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30127
SIDC SOLAR BULLETIN 27 Jan 2013, 1246UT
SIDC FORECAST (valid from 1230UT, 27 Jan 2013 until 29 Jan 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 27 Jan 2013 10CM FLUX: 097 / AP: 011
PREDICTIONS FOR 28 Jan 2013 10CM FLUX: 095 / AP: 004
PREDICTIONS FOR 29 Jan 2013 10CM FLUX: 093 / AP: 004
COMMENT: Despite the emergence of several small sunspot groups (yet
unreported by Catania or NOAA), the flaring activity of the Sun is below
the C-level. An isolated C-class flare is nevertheless possible,
although unlikely. The fast solar wind flow that yesterday produced K =
5 (as reported by Dourbes and IZMIRAN) and K = 4 (as reported by NOAA)
is finishing. Currently the solar wind speed around the Earth is close
to 450 km/s and the interplanetary magnetic field is around 3-4 nT. We
expect quiet geomagnetic conditions in the coming hours. The arrival of
the interplanetary shock wave driven by the ICME corresponding to the
partial halo CME observed on the Sun on January 23 is still possible,
although unlikely.

TODAY'S ESTIMATED ISN : 049, BASED ON 02 STATIONS.

SOLAR INDICES FOR 26 Jan 2013

DX Bulletin No. 1097
BID: $OPDX.1097
January 28, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, W2GB, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K5KV, KH6BZF, N7OU, K8GI, K8YSE, NE8Z/HC1MD, W8GEX & 60m News, W9ILY, AT International, ES1CW, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, F8AEJ, HP1AC, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, JK1KSB, JQ2GYU, OH2BH, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PY2LCD, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th-January, through Sunday, 27th-January there were 220 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9X, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H40, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP8/s, VP9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5V, TOGO. Jackie, F8AEJ, will be active as 5V7JD from Lome between February 4th and March 15th. Activity will be holiday style (visiting his son), using a FT897D with a "AT-897 Plus Tuner" into a 6 band Conrad windom antenna (used at CN2CDJ; see QRZ.com). He informs OPDX that he will do

mostly digital modes. QSL via his home callsign, direct or eQSL. Log will be posted on ClubLog.

6V, SENEGAL. Vladimir "Vlad", RK4FF, will once again be active as 6V7S from Le Calao in Ngaparou at least four times during 2013. His schedule is as follows: February 11th-April 3rd, May 13th-May 30th, July 1-16th and October 22nd-November 27th. Activity will probably be on 80/40/20/15/10 meters using CW, SSB and RTTY. QSL via RK4FF.

C6, BAHAMAS. Look for operators Tom/N1GN and William/NE1B to be active as C6ANM from Nassau (NA-001, FL15) during the CQ 160 Meter SSB Contest (February 22-24th) as a Multi-Single entry. QSL via LoTW. They will also be active before and after the contest. Also, operators Tom/N1GN, William/NE1B, Mike/N1IW and Paul/K1VK will be active as C6ANM during the ARRL DX SSB Contest (March 2-3rd) as a Multi-Multi entry. QSL via LoTW and look for operations on all bands and modes before contest.

CQ NEWS (Wayne Mills, N7NG, Named CQ DX Editor). Richard, W2VU, Editor of CQ Amateur Radio, reported on January 22nd: "Renowned DXer, DXpeditioner and contester Wayne Mills, N7NG, of Jackson, Wyoming, has been named CQ magazine's DX Editor, magazine Editor Rich Moseson, W2VU, announced today. Mills - a 1999 inductee into the CQ DX Hall of Fame - succeeds Carl Smith, N4AA, who has stepped down after writing the magazine's DX column for 13 years.
Licensed in 1953 at age 11, Wayne began DXing in 1956 and went on his first DXpedition in 1985. He was part of the ZA1A team that reintroduced amateur radio to Albania in 1991, and the inaugural operation from the newly-independent Republic of Kosovo in 2008. From 2000 to 2007, Wayne was manager of the ARRL's Membership Services Department and worked on developing the Logbook of the World electronic confirmation system. Wayne also set several contesting records over the years, but says he considers himself much more of a DXer than a contester.
'I am looking forward to working closely with Wayne,' said CQ Editor Rich Moseson, W2VU, 'and to sharing with our readers his depth of knowledge and first-hand experience with so many aspects of DXing. We at CQ also thank Carl for his many contributions to the magazine and to all of amateur radio over the past 13 years. We wish him all the best in the future.'
'Following in Carl's footsteps will be difficult,' noted Mills, 'but going forward as the new CQ DX column editor, I will attempt to discuss items of current interest such as DXpedition funding, pileup behavior and maybe the many aspects of remote control DXing.'
Mills will begin writing the CQ DX column as of the magazine's April 2013 issue."
ADDED NOTE FROM KB8NW: Your editor has known Carl Smith, N4AA, for many years. Carl has always amazed me with all the hard work he put in for the DX community (writing the "QRZ DX" bulletin, "The DX Magazine" and the DX column for CQ Magazine). Where does he find the time?? I guess he deserves this break. Thanks Carl for the many years as DX editor for CQ Magazine.

D4, CAPE VERDE. Mats, SM7GIB, will be active as D44TIB from Cape Verde (AF-086) between February 25th and March 8th. Activity will be holiday style using a wire vertical on 160-10 meters. QSL via his home callsign.

DX ACROSS AFRICA. In January 2013, Jon, TF3ZA, and a team of 15 adventurers will attempt to drive from Reykjavik, Iceland to Cape Town, South Africa on a heavy duty ex-military 4×4 Bedford MK truck. Their planned route through the African continent is approximately 20,000km, and they estimate it will take them 6 months to reach Cape Town. They will depart Reykjavik in early January 2013 and update their Web site with news of their DXpedition. The operation is to last for approximately six months from 20 DXCC entities in Africa. Jon is in the process of obtaining licenses to operate from the following DXCC entities: CN2ZA, 5T0ZA, 6W/TF3ZA, 3XY0ZA, TU2ZA (pending), 9G0ZA, 5V7ZA, TY0ZA (pending), TJ0ZA (pending), TR0ZA (pending), TN0ZA (pending), 9Q0ZA (pending), 9J0ZA, Z2/TF3ZA, A20ZA and ZS/TF3ZA. Activity will be active on 160-6 meters using CW and SSB. Suggested frequencies are:
CW - 1824, 3524, 7024, 10124, 18074, 21024, 24894 and 28024 kHz
SSB - 3780, 7080, 14180, 18140, 21280, 24940 and 28480 kHz
6m - 50094/CW and 50110/SSB
The preferred QSL method is via LoTW. All logs will be uploaded to LoTW as soon as possible. The usage of Logbook Of The World is strongly encouraged, it's free, easy to set up and the fastest way to confirm your QSOs. An alternative QSL method is via OQRS. The OQRS system will be embedded on the Web site AFTER the expedition in August 2013. Direct QSL cards is the 3rd option. Send your QSL card with a Self Addressed Envelope and sufficient return postage, 2 USD per 50gr. (IRC will NOT be accepted), to: Jón Ágúst Erlingsson, Álftamýri 14, 108 Reykjavík, Iceland. Bureau cards should be sent via TF3ZA. An online log search will be available on the Web page, as well as tracking the team and their complete route. The Web page is at: http://www.dxacrossafrica.com
There is also a Twitter page: http://twitter.com/DXAcrossAfrica

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting the following operations for DXCC credit:
5V7TH - Togo; 2012 operation
S07EA - Western Sahara; 2006-2007 operations
XW4XR - Laos; Current Operations
XWPA - Laos; 2010□2011 operations

"If you have had these operations rejected in a recent application, please send an E-mail <bmoore@...> to the ARRL DXCC Desk," Moore said. "Once updated, results will appear in Logbook of The World (LoTW) accounts, as well as online in the daily listings."

DXCC NEWS (2013 Pending Applications). Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "Each year at this time DXCC is busy finishing up applications from the previous year. I have been getting questions from hams asking about applications that were sent for 2013.
Until DXCC completes applications for the 2012 calendar year, we cannot begin processing applications for 2013. Applicants can still submit their applications, but they need to be held pending completion of 2012.

Normally, completion of the previous year happens on or by March 1 so
please use this date as a guide as to when DXCC begins processing the
2013 applications.
Note: This applies to all Digital and LoTW applications as well as for
paper carde submissions.
Send questions to bmoore@...
73 es DX!"

EQ95, ESTONIA (Special Event/Contest). Toomas, ES5RY, will be active
with the special callsign ES95Q during the ARRL DX CW Contest (February
16-17th) as a Single-Op/All-Band/Low-Power entry. QSL via ES5RY. Activity
will be from station ES6Q. The special callsign is to celebrate 95th
anniversary of Estonia.

FK, NEW CALEDONIA. Seiji "OKU", JK1KSB, will be active as FK/JK1KSB from
New Caledonia between January 29th and February 3rd. Activity will be
holiday style on 80-10 meters using CW , RTTY and PSK31. Oku will use
100 watts into a ATU and long wire. He may only operate between 1300-
1830z during January 29th and February 1st due to limitation of the
hotel. QSL via JK1KSB, by the address on QRZ.com.

GREAT READS ON THE WEB (A Dream Come True!). Read an interesting article
called "ZL9HR Campbell Island DXpedition 2012: A DXer□s Dream Come True!"
by Glenn, KE4KY, who was one of the ZL9HR operators at:
http://www.ke4ky.net/p/zl9hr-campbell-island-dxpedition-2012.html

HC, ECUADOR. YL Elena, RC5A, will be active as HC2/RC5A between February
5th and March 9th. Activity will be on 160-6 meters, including 30/17/12
meters, using CW and SSB. Operation will also include the ARRL DX CW
Contest (February 16-17th) as a Single-Op/All-Band/Low-Power entry.
QSL via RC5A, direct or by the Bureau.

IOTA NEWS.............
EU-006. (OPDX.1096 QSL Correction) Members of the Westnet DX Group
will once again be active as EJ7NET from the Aran Islands
between May 10-15th. The QSL is via LoTW, or via Declan,
EI6FR via direct or by the Bureau.

EU-068. Members of the Charente DX Group will be active as TM0SI from
Sein Island (DIFM AT007, WLOTA 2721) between April 27th and
May 4th. Activity will be on all bands and modes. QSL via F5EOT,
direct or by the Bureau (sent in October). LoTW will be done
as soon as possible. Visit CDXG's Web page at:
http://www.cdxg.org

NA-171. Look for XF2E to be active from Venados Island between April
21-26th. QSL via IT9EJW. No other details available.

NA-180. Operators Enrique/XE2AA (V32EE), Hernan (V31HU) and Ismael
(V31MV) will be active from Twin Cayes between April 6-12th.
QSL via IT9EJW. No other details available.

SA-096. (Correction/Lets Try This Again) In OPDX.1095 and OPDX.1096, the Web pages for the LU6W DXpedition was listed wrong which could have an impact on donations. It should have been: http://lu6w.yolasite.com

JD1, OGASAWARA. Three JA operators will be active from Chichijima Island (AS-031) in the Ogasawara group between April 28th and May 5th. Callsigns to be used are JD1BLC (Operator Toshi/JP1IOF) and JD1YBT (World Wide Club station). Activity will be on 160-6 meters using CW, SSB, RTTY and FM. QSL JD1BLC via JP1IOF direct or by the Bureau to JD1BLC. QSL JD1YBT via JP1IOF direct or by the Bureau to JD1YBT. LoTW will also be available.

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will be active as KP2MM during the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band entry. QSL via LoTW. For more details, see: http://www.n2tta.info

KP2, U.S. VIRGIN ISLANDS. Three JA operators will be active from the KP2M rental shack on St. Croix Island (NA-106) between April 3-9th. Operators mentioned are Yoshi (QSL K1HP/KP2 via JE2EHP), Taka (QSL KP2/JF1BVG via JF1BVG) and Toshi (QSL WH7P/KP2 via JP1IOF). Activity will be on all bands and all modes. Both Bureau and direct cards are accepted via JA home callsigns. LoTW and OQRS will also be available.

NH0, MARIANA ISLANDS (Update). By the time you read this, most members of the Tinian Radio Space Club who are active as NH0J will be heading home to Japan except for Joe/JA1LZR and Kit/JA1NVF. They will continue to be active as NH0Z and AH0J, respectively, from Tinian Island (OC-086, USI NI003S, WLOTA 3108) until Tuesday morning (Monday evening in USA). NH0Z (Joe) operates mostly CW and he loves 160/80/30/12/10 meters. AH0J (Kit) operates SSB on 75/40/20/17/15/12/10 meters. By the way, operators of the NH0J club station this past weekend were:
JJ2VLY (YL Miho (Joe's XYL, also WS2M): SSB and RTTY
JQ2GYU (Yutaka, also WS2Y): CW and SSB, focusing on "Outside JA"
JE1KUC (Takky, also N1KU): SSB
JF7ELG (Kowata, also WA2O): SSB, focusing on JA
JL1RXW (Hiro, also KH0XG): SSB
JA1RPK (Yuki, also AD7KA): CW and SSB

The QSL routes for the stations at the site are as follows:
NH0J via JJ2VLY, NH0Z via JJ2VLY and AH0J via JA1NVF

PACIFIC TOUR. Operators Bob/W7YAQ and Bill/N7OU will return to the South Pacific again and be active between February 2-21st. Their schedule is as follows:
February 2-7th - Their callsign will be 3D2NB (W7YAQ) and 3D2OU (N7OU) from Nadi, Viti Levu Island (OC-016, WLOTA 0055), Fiji
February 8-21st - Their callsign will be 3D2RX (W7YAQ) and 3D2RO (N7OU) from Rotuma (OC-060)
Activity will be 160-10 meters, mainly CW but with some SSB and RTTY. At both QTHs their vertical antennas will be next to saltwater on a north-facing shore. During the ARRL CW DX Contest they will make a Multi-Single entry from Rotuma as 3D2RX. QSL via their home callsigns. They will be uploading their logs to LOTW as soon as they get back to the USA.

PY2, BRAZIL (Mobile Event). Look for PY2CDR/M to be on the air during the first Brazilian Bicycle/Mobile DXpedition, "long distance, low power HF," according to the coordinator Billy Dorsch, PY2LCD. The ride starts on Monday, January 28th, in Sao Sabastiao, Sao Paulo State. The trip ends on Sunday, February 3rd, in Rio De Janeiro at the Copacabana Palace Hotel. The route goes right along the coast as the map on their Web site indicates. PY2CDR/M plans to be on 40, 15 and 10 meters SSB and on the Digital modes during the 490 kilometer (304 bikes) bike ride.
Suggested frequencies are:
SSB - 7083, 21225 and 28430 kHz
PSK31 - To be determine (Digital modes will only take place when camped)
There may be live position shown on their Web site at:
http://grupocdr.com.br/dxp_en.htm
There is also a Facebook page to follow the ride along with photos which will be updated along the adventure. Visit the following at:
https://www.facebook.com/%2Fgroups%2F314408675344553%2F
All QSOs will be confirmed with a QSL via the Bureau. Please listen for PY2CDR/M and make a QSO. Please also SPOT the bike expedition on the DX Cluster.

IRCs (U.S.) DISCONTINUED! According to the "IMM Revision: Changes to Pricing and Mailing Standards for International Mailing Services" - Under "Changes to International Extra Services": "International Reply Coupons: The Postal Regulatory Commission (PRC), in its PRC Order No. 1541, approved the Postal Service's proposal to discontinue outbound international reply coupons effective January 27, 2013; however, the Postal Service will continue to exchange (redeem) international reply coupons purchased in foreign countries and presented at U.S. Post Office☐ facilities." Also, check under "381.1 International Reply Coupons (Description). For more, see: http://about.usps.com/postal-bulletin/2012/pb22352/html/updt_005.htm

NEW QSL ROUTE (TF4M and TF4X). Phil, G3SWH, has been appointed as QSL Manager for Thor's, TF4M, operations from September 2004 to the present. Thor has recently joined RSGB which means that cards for TF4M and TF4X can now be sent and received via the RSGB Bureau. There are log searches for both callsigns at: http://www.g3swh.org.uk/tf4m.html http://www.g3swh.org.uk/tf4x.html

QSL OH8X via OH2UA. Radio Arcala featured an international team during the CQWW 160m Contest this past weekend. Operators were Olof/G0CKD, Michael/G7VJR, Olli/OH0XX, Toni/OH2UA and Veijo/OH6KN, while Juha/OH8NC and Martti/OH2BH were bang the drums.

QSL N3A (Special Event Station) via LoTW, eQSL and direct to NW3DC (W3DQ). Check the NW3DC/N3A web page for more details. Activity was to celebrate the President's second inauguration.

QSL RECEIVED VIA LoTW: 3D2C, 3D2VB, 3V8BB, 4O3A, 6W7SK, C6ANM, CM5FZ, CT1JOP, CT3DZ, CT8/EA5KA, E77DX, EA1DR, EA1PO, EA3BOX, F8ARK, FM/KL7WA, FM/RC0F, FO/AD4LN, FS/K9EL, HF8N, HI3TEJ, HP1/IZ6BRN, J68UN, J8/W6HGF, KH7T, KL7RA, NH8S, OH6OS, OZ1ADL, P40L, PA1CC, PD7BZ, PJ4X, PJ5J, RA3DNC, RA3UT, RI1FJ, S57IIO, SA5K, SM5F, SN3R, SQ2IHP, TI2HAS, US2FX, UY0ZG, V44KAI, VE5KS, VP8KF, VQ9LA, WP2XX, YJ0VB, YU6AO, ZK1/AC4LN and ZK2VB

QSLS RECEIVED VIA THE BUREAU: 4U1WRC, 5B/HB9AII, 5B/HB9DGV, 6Y5/K1XM, 6Y9X, 9M6LSC, CO7WT, CR2V, CS2W, CT8/CT3FN, CU2CE, CU8/CT3FN, D2QV, DH1BBO, EL2DX, EM20LTD, EN2012UEFA, EO2012WZA, ES2012ABCS, FM1FV, FP/W8TOM, HB100FLP, HB0WR, HK3Q, JY4NE, KL8DX, OD5TE, P40L, P4/W1HEO, PJ2/K2PLF, PJ2/W5ZPA, PJ4/K4BAI, PJ4/AD8J, PJ5/K1XM, TF2LC, TF3IRA, TF3RF, TF4M, TF8GX, TF8SM, TI5/K4VAC, UT1FG/MM, V25OP, V25WY, V5/DJ2HD,

V73QQ, V8AQM, VE3XL, VP2MLP, VP2MVX, VP5/NF9V, VP5/W9RN, VP9/AA1AC, YB0JS, YI9PSE, YN2AA, ZF1A, ZF2GG, ZL1BYZ, ZL7AA and ZS6C

TZ, MALI. Fernando, EA4BB (ex-Z21BB), is now active as TZ6BB from Bamako. The length of his stay is not known. Most of his activity has been on 40/20/15/12/10 meters CW. QSL via W3HNK.

XT, BURKINA FASO (Update/Dates). Members of the "Italian DXpedition Team" will be active as XT1T from Ouagadougou (Grid Loc. IK92fi), Burkina Faso, between February 21st and March 6th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - 1826.5, 3515, 7015, 10115, 14025, 18070, 21025, 24891 and 28025 kHz
SSB - 3760, 7145, 14220, 18145, 21295, 24945 and 28475 kHz
RTTY - 14081 kHz
6m - 50105/CW and 50125/SSB
Equipment will be 4x Elecraft K3 transceivers with 3x KPA500 amps and 1x ACOM 1000 amp into 2x Spiderbeams, 1x Yagi (20/17/15/12/10m), 1x vertical (80/40m), 1x vertical (30m), longwire (160m), 1x Cubical Quad (6m), 1x Diamond Loop RX (low bands) and 1x DHDL RX (low bands) antennas. Operators mentioned are Alfeo/I1HJT, Silvano/I2YSB, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/IK2HKT, Gino/IK2RZP and Mac/JA3USA. The pilot station is IK7JWY, and the pilot station for the 6m band is IK0FTA. Software Management (real-time log online) will be by IH9GPI. QSL I2YSB for direct QSLs and IK2CIO for Bureau QSLs (no E-mail request please). A OQRS will be available for direct cards only. Now available on their Web page is a survey for both bands and modes needs. The official Web site is: http://www.i2ysb.com/idt
Official forum is: http://www.hamradioweb.org

Z8, SOUTH SUDAN. Massimo, IZ0EGB (ex-9L1MS, EL2GB), is now living in the South Sudan and hopes to be on the air as Z81B soon. QSL via IZ0EGB.

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM during the CQ 160 Meter SSB Contest (February 22-24th) as a Single-Op/High-Power entry. QSL via K6AM, direct or by the Bureau or LoTW.

ZD8, ASCENSION ISLAND. As of January 24th, Steve, G3ZVW, is once again active as ZD8N from Georgetown until February 5th. Activity will be on 80-10 meters using CW, SSB and the Digital modes. QSL via his home callsign, by the Bureau or direct.

ZK3, TOKELAU. Dieter "Dick", DJ2EH (ex-ZD9T), is now active as ZK3T until February 20th. The DX.World.net" reports that "recent info received from the ZK3N team now confirms that ZK3T is indeed Dieter, DJ2EH", so the info on ZK3T on QRZ.com is old. Activity has been on 30/17/15 meters CW, but he is expected to focus on the low bands later. QSL via DJ2EH.

ZL, NEW ZEALAND. Members of the Quake Contesters Group will be active as ZL3X during the CQWW WPX SSB Contest (March 30-31st) as a Multi-2/High-Power entry. QSL via ZL3PAH or LoTW. Operators mentioned are Mark/ZL3AB, Don/ZL3DMC, Byron/ZL3DXT, Geoff/ZL3GA, Chris/ZL3LF and Phil/ZL3PAH.

20464. HD-73 vs. Ham-M

Yahoo group: DX-IS (2013)
Date: 2013-01-28 01:23:25 UTC
From: John G.
Topic: 20464 Message: 20464

I am needing a rotor for the Cushcraft MA5B I will be putting up soon, and have found pretty good deals on both an Alliance HD-73 and a CDE Ham-M. Never used either one before, although I did have a Ham III a decade ago and wish I had kept it. How do these 2 compare? Which is better? Anyone have a rotor they are looking to sell that would handle a MA5B?

John, I had a shelf mounted HD-73 turning a TH-4 (TH-3 with a extra 10M reflector) for three months then it broke.... I wound up replacing it with CDE HAM-VI in January 1982. I'm still using the HAM-IV but its been rotating a TH-7 since the summer of 83.

Maybe I just bought a bad HD-73... I'm not an engineer, but I thought Alliance may have over rated the HD-73 wind load. YMMV, GL!

Hi Gary,

THanks for the feedback. Others also indicate that the Ham-M is probably more rugged and has more parts support.

Hi John,

For what it's worth, almost all of the guys I know use HAM IVs.
They have them cranking away for years and they are fairly easy to fix.
Everyone who has any experience with rotators knows how to repair them
and there are spare parts readily available from a number of places.

I plan on going with HAM IV when my current Yaesus go. I use Yaesu
G-800SA rotators and while they work well, they are literally throw-away
when they break. I have them because they are cheap, and I got them on
sale some years ago. I also find they don't like the cold . . . thend
to be sluggish and not want to turn if it gets much below 20°F. They
always turn eventually, but it's like trying to start a car on a cold
day! Go with CDE rotators.

John,

Given a choice, I would not even consider buying any rotor other than a Ham M or M2 one. I have about six Ham Ms, some dating back to the 80s. Parts are easy to obtain, reasonably priced, and working on one is a "piece of cake". Even individuals (assuming they are right handed) with "two left hands" can fix one! That said, I have had very few issues with mine, and the far majority of problems were "self induced" (too large of antenna for the rotor - Tailtwister fixed one problem, and a M2 R2800 fixed the other).

As for Yaesu rotors, I have a very sour taste in my mouth; several years ago I purchased their rotors for my satellite system. When one of them broke, I found out they changed to a "new model" and parts were no longer available! Contrast that with Ham Ms.

Thanks for all of the replies so far. It appears that the Ham type rotors
are better than both the Alliance or the Yaesus. The Ham-M I am looking at
also comes with the controller cable, so that is one less thing to have to
pick up.

I made a submission on 2 Jan and I am still waiting. Sent an email to
and got an answer that it would be March 1st before it well be processed.
They are doing all the 2012 first. So they are way behind. Guess the new
hardware did not fix that side of lotw.
Since I made my submission I have received a few more via lotw, but
can not
edit my submission and add the new ones..

CARIBBEAN/ATLANTIC TOUR (Press Release From OH2BH). Martti, OH2BH, sent out the following [edited]: "Press Release - January 30, 2013, Montego Bay, Jamaica --- M/S KRISTINA KATARINA

NORTHERN FOLKS AT IT AGAIN FROM THE CARIBBEAN TO THE ATLANTIC, OJ0H/MM

With the severe winter in Northern Europe, OHs are heading South as is their lifestyle of four deep seasons. Cruising in as many as nine countries in the Caribbean, they will end up meeting hams in many of their stopovers such as 6Y, P4, PJ4, YV7, J49, FM, V2 and HI.
They will be active on board their 450ft cruise ship m/s Kristina Katarina. Typically you will find them on 14.267 kHz. They will also be on CW at sea.
http://www.kristinacruises.com/en/cruises/ms-kristina-katarina

OJ0H/MM CREW: Hilkka/OH1DV (YL), Markku/OH1MV, Pekka/OH1TV, Rami/ OH2BCI, Leena/OH2BE (YL), Martti/OH2BH, Osmo/OH2KH, Heikki/OH4NS, Seppo/OH6TJ and Osmo/OH8KN.

CRUISING SCHEDULE:
January 31st - (THU) Montego Bay, Jamaica
February 1st - (FRI) at sea
February 2nd - (SAT) Oranjestad, Aruba and P43A & P49V
February 3rd - (SUN) Kralendijk, Bonaire and PJ4LS
February 4th - (MON) El Guamache, Isla Margarita, Venezuela
February 5th - (TUE) St. George's, Grenada and J39AH
February 6th - (WED) Fort-de-France, Martinique
February 7th - (THU) St. John's, Antigua, on the ruins of V26B
February 8th - (FRI) at sea
February 9th - (SAT) Santo Domingo, Dominican Republic

Following the Caribbean stint, the party will continue to Azores Islands with an additional Finnish and Estonian assemblage titled "The Atlantic and I" with participation in the ARRL CW and SSB Contests from their Atlantic outpost at CR2X and CQ8X.
QSL OJ0H/MM and CR2X & CQ8X via OH2BH."

CQ NEWS (International News Column to Debut in April). Richard, W2VU, Editor of CQ Amateur Radio, sent out the following [edited]:
"FOR IMMEDIATE RELEASE: January 29, 2013

CQ Adds International News Column, Names AA6TS International Editor

(Hicksville, NY January 29, 2013) ☐ CQ magazine will be adding a monthly international news column as of its April edition, magazine editor Rich Moseson, W2VU, announced today. It will be coordinated by new International Editor Tom Smerk, AA6TS.
'A growing number of our readers and our fans on social media are from outside the United States,' noted Moseson, 'particularly with the addition of our digital edition, which eliminates the high cost of international postage.'
'We'll be calling the column 'CQ World Wide,' ' Moseson continued, and our goals will be to both better serve our international audience and to bring more news of ham radio activities around the world to our prime reader base in the U.S.'
Smerk lives in Dulzura, California and has been active in ham radio off-and-on since 1988. For the past 25 years, he has taught business information technology for the San Diego Community College District. He is also a professional musician and formerly taught music as well. Tom enjoys 2-meter communications to keep in touch with friends during his commute to and from work; and after work, he can usually be found on the HF bands enjoying both voice and digital communications. Tom has written on various topics including business management, music and ham radio. He is active in ARES®, SKYWARN®, RACES, California Disaster Corps and CERT, and is a volunteer examiner as well. A committed lifelong learner, Tom's greatest joy is helping new hams enjoy the hobby.
Hams with news of events and activities outside the United States are urged to contact Tom at <aa6ts@...>."

D4, CAPE VERDE (Correction/Update). Mats, SM7GIB, will be active as D44TIB from Cape Verde (AF-086) until February 7th (not between February 25th and March 8th). Activity will be holiday style using a K3 into a wire vertical for 160-10 meters. Look for him to be on the radio in the early mornings and evenings - on CW. QSL via his home callsign.

TRIATHLON THIS WEEKEND (Also See OPDX.1095). Just a reminder that the "1st Triathlon DX Contest" will be held this weekend. A triathlon is a multi sport event involving the completion of three continuous and sequential endurance events. The word "triathlon" is of Greek origin from t?e?? or trei (three) and a???? or athlos (contest). While many variations of the sport exist, triathlon, in its ham form, involves the three most popular modes RTTY, SSB and CW.
Triathletes compete for the biggest score in its Radio Amateur variation.

Amateurs around the world will try to be the Ironham (the winner in
original Triathlon called Ironman) and contact other amateurs in as
many countries as possible and as many Greeks amateurs as possible...
Visit Triathlon DX Contest page at: http://www.triathlon-dx-contest.gr "

I submitted my DXCC application via the LoTW site on 18 Dec 2012, and the certificate arrived in the mail today, 30 Jan 2013 – so, about 6 weeks for processing, including overseas airmail.

The things I noticed on the LoTW site after making the application were a confirmation of the transaction in the “Your Messages” section and in the Application History section, and that the purchased calls moved from the “Selected” to “Awarded” column on the DXCC Account page.

You need to supply more information, specifically what client software you are using and what software is running on the DX Cluster node you are logged into. Every one has potentially different filtering options.

It would also be helpful if you expanded on the "and his offspring" comment. Do you mean his biological children or something else?

If you are using something other than CC User (a/k/a AR User) or DX Labs SpotCollector as the client on your end, I can't help, but given the ~300 users here, likely someone else can. If the DX Cluster node you log into is using software other than CC Cluster, likewise I can't help you, but no doubt others here can. We need specifics because there are numerous combinations, unlike the old days when everyone used pretty much the same thing.

To all radio amateurs

SB DX ARL ARLD005
ARLD005 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

FIJI, 3D2. Bob, W7YAQ and Bill, N7OU will be QRV as 3D2NB and 3D2OU, respectively, from Nadi, IOTA OC-016, from February 2 to 7. Activity will be on 160 to 10 meters using mainly CW with some SSB and RTTY. QSL to home calls.

TOGO, 5V. Jackie, F8AEJ will be QRV as 5V7JD from Lome from February 4 to March 15. Activity will be holiday style on the HF bands using mostly digital modes. QSL to home call.

MALDIVES, 8Q. Andrew, G7COD plans to be QRV as 8Q7AK from Kaafu Atoll, IOTA AS-013, for three weeks in February while on holiday. Activity will be holiday style on the HF bands generally during 0730 to 1100z, 1300 to 1500z and then 1730 to 1800z. QSL to home call.

AZORES, CT3. Hermann, CT3FN will be QRV as CR2V in the Mexico International RTTY Contest as a Single Op entry. QSL via HB9CRV.

CAPE VERDE, D4. Mats, SM7GIB is QRV as D44TIB until February 6. Activity is holiday style on 160 to 10 meters. QSL to home call.

GUADELOUPE, FG. Jean-Pierre, F6ITD will be QRV as FG/F6ITD from February 1 to 25. Activity will be on the HF bands using SSB and digital modes. QSL to home call.

NEW CALEDONIA, FK. Oku, JK1KSB is QRV as FK/JK1KSB until February 3. Activity is holiday style on 80 to 10 meters using CW, RTTY and PSK31. QSL to home call.

ECUADOR, HC. Elena, RC5A will be QRV as HC2/RC5A from February 5 to March 9. Activity will be on 160 to 6 meters using CW and SSB.

This includes being a Single Op/All Band/Low Power entry in the upcoming ARRL DX CW contest. QSL to home call.

ANTARCTICA. Nick, RW6ACM will be QRV as RI1ANP from the Russian Antarctic Base Progress from February 1 until the end of 2013. QSL via RN1ON.

SEYCHELLES, S7. Bert, CX3AN will be QRV as S79AN from Mahe Island, IOTA AF-024, from February 4 to 11. Activity will be on 80 to 6 meters using mainly CW and SSB. QSL via EB7DX.

SUDAN, ST. Sam, K0YAK is QRV as ST2SF until the mid of April. Activity is on 40 to 10 meters using CW, SSB and digital modes. QSL to home call.

TURKEY, TA. TC Special Wireless Activity Team members are QRV as TC1BW during February in remembrance of Asil Feri, TA1BW. QSL via bureau.

MALI, TX. Fernando, EA4BB is QRV as TZ6BB from Bamako. His length of stay is unknown. He is active on 40 to 10 meters. QSL direct via W3HNK.

SOUTH SUDAN, Z8. Massimo, IZ0EGB will soon be QRV as Z81B. QSL to home call.

ASCENSION ISLAND, ZD8. Steve, G3ZVW is QRV as ZD8N until February 5. Activity is on 80 to 10 meters using CW, SSB and digital modes. QSL to home call.

CAYMAN ISLANDS, ZF. Bruce, K0BJ is QRV as ZF2BJ until February 2. Activity is holiday style on the HF bands. QSL to home call.

TOKELAU, ZK3. Dieter, DJ2EH is now QRV as ZK3T and will be here until February 20. QSL to home call.

THIS WEEKEND ON THE RADIO. North American CW Sprint, 10-10 International Winter SSB Contest, QRP CW Fox Hunt, Mexico RTTY International Contest, NCCC Sprint CW Ladder, Vermont QSO Party, Triathlon DX Contest, EPC World Wide DX BPSK63 Contest, Black Sea Cup International, FYBO Winter QRP Sprint, Minnesota QSO Party, AGCW Straight Key CW Party, British Columbia QSO Party and the Delaware QSO Party will certainly keep contesters busy this upcoming weekend.

The RSGB 80-Meter Club SSB Championship is scheduled for February 4. The ARS Spartan CW Sprint is scheduled for February 5. The QRP CW Fox Hunt is scheduled for February 6. Please see February QST, page 90, and the ARRL and WA7BNM Contest websites for details.

PREDICTIONS FOR 03 Feb 2013 10CM FLUX: 097 / AP: 015
COMMENT: Solar flaring activity remains low and the solar wind is
quiet. Two filament eruptions were observed on the east side on the
solar disk yesterday. SDO/AIA images show a filament erupting in the
southeast around 06:00 UT and one in the northeast around 16:30 UT. The
CACTus halo CME alert sent at 07:26 UT today concerned the associated
CMEs. While the second CME was not earth-directed, we expect a possible
glancing blow from the first one early on February 3. Geomagnetic
conditions are very quiet. We expect possible unsettled to active
conditions (K <= 4) on February 3 due to the possible arrival of the CME
mentioned above and a coronal hole that may become geo-effective. The
SIDC All Quiet alert remains valid for now.

From: ve1al@...
Topic: 20481 Message: 20485

Hello Paul,

W3LPL's "offspring" are the W3LPL-1, W3LPL-5, W3LPL-137 notations. I am using either VE1DXI (which frustrates me by disconnecting me several times a day and/or will not accept my spots) or K3LR. Both, of course, offer the same in formation.

I have filtered the frequencies I do not want to have (60M and everything above 30 MHz, except for a couple of bands like 1296 and 70 cm).

My cluster connection is done through DXbase and my question remains: How do I get rid of W3LPL's skimmer spots which are far too numerous and of absolutely no value to me?

73

You need to supply more information, specifically what client software you are using and what software is running on the DX Cluster node you are logged into. Every one has potentially different filtering options.

It would also be helpful if you expanded on the "and his offspring" comment. Do you mean his biological children or something else?

If you are using something other than CC User (a/k/a AR User) or DX Labs SpotCollector as the client on your end, I can't help, but given the ~300 users here, likely someone else can. If the DX Cluster node you log into is using software other than CC Cluster, likewise I can't help you, but no doubt others here can. We need specifics because there are numerous combinations, unlike the old days when everyone used pretty much the same thing.

As someone else has pointed out, we (the RBN team) want to discourage people from doing this sort of filtering at their computer rather than at the node. Anything we can do to limit node loading is to the good, especially during major contests. CC User, AR User, and just plain learning the necessary syntax are all effective ways to do this

Al, K3LR is an ARC6 node, I believe, and has easy syntax to do what you want.

Al, I tried this and it works for us:

In the VE7CC program, go to Config and then "Reject ANN or DX Spots". Fill in W3LPL in the Spotter box, check the Enabled box, then Apply, then Exit. Try that for each offspring call too.

I appreciate the RBN teams efforts, Pete, I just don't want the information. Are you suggesting I ask both VE1DX and K3LR to stop those spots from getting to me (I suspect a problem) or can you, in fact, supply me the syntax and I can enter it into my filter. I get worldwide spots so I can see what's going on but the number of RBN spots is far more than I can handle and as I pointed out, most of the time I can't hear what's spotted. I know I can't hear what the Japanese and Europeans are hearing but I can see who they're hearing/working in NA.

QST de W1AW
Propagation Forecast Bulletin 5 ARLP005
>From Tad Cook, K7RA
Seattle, WA February 1, 2013
To all radio amateurs

SB PROP ARL ARLP005
ARLP005 Propagation de K7RA

Sunspot numbers and solar flux barely changed in the past week. Average daily sunspot numbers were 55.7, down slightly from 56.4 the previous week, and average daily solar flux was 98.7, down from 110.7. Geomagnetic conditions continued their quiet spell.

The most active day was Saturday, January 26, when both the mid-latitude and planetary A index was 18, and Alaska's college A index was 46.

The predicted solar flux is 100 for February 1, 105 on February 2-5, 110 on February 6-7, 120 and 125 on February 8-9, 120 on February 10-11, then 115, 110 and 105 on February 12-14, 110 on February 15-18, 105 on February 19-23, 95 on February 24-25, 110 on February 26, and 125 on February 27 through March 1. Flux values peak again at 140 on March 3-4.

The predicted planetary A index is 5 on February 1, then 12, 18, 15 and 8 on February 2-5, 5 on February 6-8, 8 on February 9-10, 5 on February 11-18, 8 on February 19, 5 on February 20-21, then 15, 10 and 8 on February 22-24, 5 on February 25 through March 7, and 8 on March 8-9.

OK1HH believes we will see quiet conditions on February 1-3, quiet to unsettled February 4, mostly quiet February 5, quiet to active February 6, mostly quiet February 7, quiet to unsettled February 8, quiet to active February 9-10, quiet to unsettled February 11, mostly quiet February 12, quiet to active February 13-14, active to disturbed February 15, quiet to unsettled February 16, quiet on February 17-21, active to disturbed February 22, quiet to unsettled February 23 and quiet February 24.

Regular readers know we've been tracking a three-month moving average of sunspot numbers for several years now. The average daily sunspot number for the three calendar months ending January 31 was

82.8, better than last month, but nothing like the numbers we saw over a year ago in fall 2011.

The three-month averages for the past year, the months ending in February 2012 through January 2013 were 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9, 89.9, 81.2, 82.3, 74.4 and 82.8.

The one month average sunspot number for January was 98.9, the highest monthly average since May and July of last year.

Not much news in reports from readers this week, but N8II of West Virginia reported last Friday, January 25, "Today was pretty decent considering the now double digit SFI and K of 2. I worked RC4HAA on 15 meter CW who was S6-9, and 12 meters opened well to Europe from 1400-1440Z. I got in on the tail end of it with QSOs with SV3, HB9, OM0 and G4.

"Last night at 0200Z I caught T6LG in Afghanistan on 80 CW for a new band/country. He was about S3-S6 and not hearing the USA stations calling him that well (about 10 callers when I was there)."

Glenn Axelrod, N6INM/9 in Mundelein, Illinois wrote: "Are SFI and conditions going to improve by the Spring/Summer? Are we ever going to see numbers again like in '58 in my lifetime? I am 48 years old."

By SFI, Glenn means solar flux index. We have no way of knowing when this cycle will peak, or even if it may have already peaked, but peaks of solar cycles become easier to predict later in the first part (the upswing) of any cycle.

Until recently experts predicted this cycle would probably peak in Spring of 2013, which begins in less than seven weeks. But later predictions moved it out to Fall of 2013, with slightly lower numbers. We had a period of higher solar activity in November and December of 2011, which led some to believe that perhaps the cycle had peaked early. Others believe we may see a double-peak in this cycle, as we have in some earlier solar cycles.

But we should see seasonal improvements in HF conditions in the Spring and again in the Fall. By seasonal, I mean that even if we saw no change in solar activity, just due to the season and position of the Sun relative to us, we see better conditions on the higher frequencies in Spring and Fall than we tend to see in Summer and Winter.

In September through December 2011 the monthly averages of daily sunspot numbers were 106.4, 123.6, 133.1 and 106.4. The previous four months (May through August) saw averages of 61.5, 55.5, 67.2 and 66, so the final third of 2011 showed a dramatic jump in activity. But the next year the numbers dropped back again. The average daily sunspot number for all of 2012 was 82.3. The average for all of 2011 was only 29.9, so that jump at the end of the year

was exciting, and convinced many of us that the cycle was starting to really ramp up. The January 2013 average was a little less than 100.

There is a hypothesis which posits that we may see a grand minimum, decades of depressed sunspot numbers, but of course that cannot be proven by observation in the next decade or two. I hope it isn't true. I hope we see future activity which is strong and surprises everyone, but I wouldn't count on it. I was licensed during the low point between Cycle 19 (the biggest in history) and Cycle 20, and along with many others have been wishing for decades to see another like Cycle 19. But Cycle 19 turned out to be a rarity. But just like Cycle 19 surprised many people, I hope we can be surprised again.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. This points out another virtue of filtering at the node, which is what
CC User does through its "Tell Cluster" command.

Once a filter or filters are associated with your call on a given node,
they will remain set until cancelled.

Hi Peg,

Trust you and Paul are well. HNY.

My question now is: How do I get to VE7CC to do that filtering? In DXbase I simply open the filtering script for modes and bands. However, how do I stop the W3LPL spots alone? Do I just open the filter to tell it to stop accepting W3LPL? And if so, how?

Hi Al - it all depends on the node's software. ARC Version 6 lets you SETDX Filter Not Skimmer, and SET DX spotter<>[whoever]. It also permits concatenating filter commands with AND and OR. The specific commands for filtering by spotter callsign (and myriad other things) are at <http://ab5k.net/ArcDocsVer6/UserManual/ArcDx.htm#SetDxFilter>.

You'll need to look up the syntax for DXSpider and CC Cluster on their respective websites.

OK, Pete. I got it. Just went to VE7CC and set the filter appropriately. Am not sure if this will work with K3LR but it will with VE1DXI. Right now I'm connected to K3LR and I notice a W3LPL-3 spot at 1617 but none since. Will check VE1DXI after lunch.

Hi Al - it all depends on the node's software. ARC Version 6 lets you SET DX Filter Not Skimmer, and SET DX spotter<>[whoever]. It also permits concatenating filter commands with AND and OR. The specific commands for filtering by spotter callsign (and myriad other things) are at <http://ab5k.net/ArcDocsVer6/UserManual/ArcDx.htm#SetDxFilter> <http://ab5k.net/ArcDocsVer6/UserManual/ArcDx.htm#SetDxFilter>.

You'll need to look up the syntax for DXSpider and CC Cluster on their respective websites.

As someone else has pointed out, we (the RBN team) want to discourage people from doing this sort of filtering at their computer rather than at the node. Anything we can do to limit node loading is to the good, especially during major contests. CC User, AR User, and just plain learning the necessary syntax are all effective ways to do this

Al, K3LR is an ARC6 node, I believe, and has easy syntax to do what you want.

You need to supply more information, specifically what client software you are using and what software is running on the DX Cluster node you are logged into. Every one has potentially different filtering options.

It would also be helpful if you expanded on the "and his offspring" comment. Do you mean his biological children or something else?

If you are using something other than CC User (a/k/a AR User) or DX Labs SpotCollector as the client on your end, I can't help, but given the ~300 users here, likely someone else can. If the DX Cluster node you log into is using software other than CC Cluster, likewise I can't help you, but no doubt others here can. We need specifics because there are numerous combinations, unlike the old days when everyone used pretty much the same thing.

Hej Al!

I have never seen spots from W3LPL-1, W3LPL-2, W3LPL-3, etc. There
are spots from W3LPL and W3LPL-#. The -# suffix is certainly not unique
to W3LPL. Here is a sample of what my cluster is generating now:

DX de NC7J-#: 14026.0 K9UIY CW 08 dB 25 WPM CQ 1607Z
DX de G4HSO-#: 10104.9 EA1PF CW 22 dB 17 WPM CQ 1607Z
DX de RU9CZD-#: 1831.2 RU9WZ CW 07 dB 35 WPM CQ 1607Z
DX de HA6PX-#: 1825.8 LY7M CW 17 dB 35 WPM CQ 1607Z
DX de N4ZR-#: 21027.3 OH2BV CW 14 dB 22 WPM CQ 1607Z
DX de 9A5KIS: 7187.0 9A1IW/P COTA 9A-0010 1607Z
DX de S55HH-#: 1825.8 LY7M CW 07 dB 35 WPM CQ 1607Z
DX de W4KKN-#: 21027.3 OH2BV CW 21 dB 22 WPM CQ 1607Z
DX de DJ3AK-#: 1825.8 LY7M CW 15 dB 36 WPM CQ 1607Z
DX de NY3A-#: 14020.5 LZ13FDAY CW 05 dB 27 WPM CQ 1607Z
DX de WZ7I-#: 21016.5 DK3LM CW 16 dB 21 WPM CQ 1607Z
DX de DR1A-#: 21027.3 OH2BV CW 12 dB 22 WPM CQ 1607Z
DX de W3LPL-#: 21016.5 DK3LM CW 14 dB 21 WPM CQ 1607Z
DX de S50ARX-#: 14032.0 OK2LA CW 14 dB 29 WPM CQ 1607Z
DX de 7Z1SJ-#: 1825.8 LY7M CW 07 dB 37 WPM CQ 1607Z
DX de EA4TX-#: 14019.1 I8GMG CW 15 dB 25 WPM CQ 1607Z
DX de SK3W-#: 1825.8 LY7M CW 51 dB 33 WPM CQ 1607Z
DX de G4HSO-#: 14019.0 I8GMG CW 29 dB 25 WPM CQ 1607Z
DX de DF7GB-#: 7010.7 RN3ZB CW 20 dB 34 WPM CQ 1607Z

DX de W4KAZ-#: 14023.9 HB9DAX CW 06 dB 27 WPM CQ 1607Z
DX de HA6PX-#: 7010.7 RN3ZB CW 33 dB 33 WPM CQ 1607Z
DX de DL1EMY-#: 7009.0 F5OEL CW 20 dB 28 WPM CQ 1607Z
DX de OZ5W-#: 21024.0 OK2QA CW 16 dB 24 WPM CQ 1607Z
DX de RN4WA-#: 7010.7 RN3ZB CW 16 dB 33 WPM CQ 1607Z

You will note one of them is from W3LPL-#, but not W3LPL-(a number). With my node, or VE7CC-1, or any other node running CC Cluster software, you can disable skimmer spots with the command: SET/NOSKIMMER and turn them on again with SET/SKIMMER. Note the cluster remembers this from session to session, so if you turn them off once, you should never have to turn them off again. In the above example, they are all skimmer spots except the one from 9A5KS. You can reduce the spot volume by 95-98% by disabling skimmer spots. There must be a way to issue commands to the DX Cluster node from DXBASE, but I don't know how. Surely there must be a DXBASE user here who can tell you how. If not, I think VE1BVD could figure it out.

I can't explain the iffy connection to VE1DXI as I have, on average, 100-130 users connected and it is a high speed cable EastLink connection. As regards to your inability to spot, again I can't really explain it. I just logged on to VE1DXI as VE1AL and spotted myself:

VE1AL de VE1DXI 01-Feb-2013 1618Z CCC >

It seems to work fine, but that was from a rudimentary telnet program (putty), not DXBASE. I know K3LR is running AR Cluster and I don't know what version he is running, nor do I know the syntax for disabling skimmer spots unless it is the latest release AR v6. If it is, then the following should work:

Set Dx Filter Skimmer <---- Enables skimmers spots
Set Dx Filter Not Skimmer <---- Disables skimmers spots

As for W3LPL spots, there may be a way to filter them out in DXBASE, but I don't know how. There is no way to filter a call out (as an individual user) on CC Cluster unless you use the companion client program CC User (sometimes called AR User), which is free and written by VE7CC. However, there may be a way to do it from DXBASE. Again, we need someone who knows DXBASE inside out to tell us if it is possible.

I could filter W3LPL spots globally on VE1DXI so that no one gets them (from the node level), but some users including myself find them useful. I much prefer to let each user customize what they see as opposed to me setting global filters that affect everyone.

Hopefully this makes it a bit clearer and a DBASE expert will pop in with the commands you need.

Tack, hej d? & 73, Paul VE1DX

Al,

On an ARCluster node you use the set dx filter command: SET DX FILTER SPOTTER <> w3lpl-*. It will stop all spots from there but
then.

You can go to my website http://www.kq8m.com and click on packet cluster and scroll down and see a couple of filter examples. I mean
to add more but not sure what others use.

My port 7373 has a default filter that filters us/ve spotters and spots DX outside of US. I do have 2 skimmers on there. One that is
mine and one that is W8WTS.

Paul,

W3LPL-3 is a special piece of software that monitors the RBN and only spots rarer countries with a big time verification of the
call. It requires X amount of Skimmers to spot the call before it re-spots it on the network.

You will note one of them is from W3LPL-#, but not W3LPL-(a number). With my node, or VE7CC-1, or any other node running CC Cluster software, you can disable skimmer spots with the command: SET/NOSKIMMER and turn them on again with SET/SKIMMER. Note the cluster remembers this from session to session, so if you turn them off once, you should never have to turn them off again. In the above example, they are all skimmer spots except the one from 9A5KS. You can reduce the spot volume by 95-98% by disabling skimmer spots. There must be a way to issue commands to the DX Cluster node from DXBASE, but I don't know how. Surely there must be a DXBASE user here who can tell you how. If not, I think VE1BVD could figure it out.

I can't explain the iffy connection to VE1DXI as I have, on average, 100-130 users connected and it is a high speed cable EastLink connection. As regards to your inability to spot, again I can't really explain it. I just logged on to VE1DXI as VE1AL and spotted myself:

It seems to work fine, but that was from a rudimentary telnet program (putty), not DXBASE. I know K3LR is running AR Cluster and I don't know what version he is running, nor do I know the syntax for disabling skimmer spots unless it is the latest release AR v6. If it is, then the following should work:

Set Dx Filter Skimmer <---- Enables skimmers spots
Set Dx Filter Not Skimmer <---- Disables skimmers spots

As for W3LPL spots, there may be a way to filter them out in DXBASE, but I don't know how. There is no way to filter a call out (as an individual user) on CC Cluster unless you use the companion client program CC User (sometimes called AR User), which is free and written by VE7CC. However, there may be a way to do it from DXBASE. Again, we need someone who knows DXBASE inside out to tell us if it is possible.

I could filter W3LPL spots globally on VE1DXI so that no one gets them (from the node level), but some users including myself find them useful. I much prefer to let each user customize what they see as opposed to me setting global filters that affect everyone.

Hopefully this makes it a bit clearer and a DBASE expert will pop in with the commands you need.

Tack, hej då & 73, Paul VE1DX

Just to clarify, there are two VE7CC "programs" that sometimes get
mixed up in the discussions.

(1) CC Cluster. This is the node software that only runs on DX Cluster
nodes. 15-20 worldwide. VE7CC-1, VE1DXI, AE5E, etc. are a few of these
nodes. Users can connect to any of these nodes with their favourite
telnet client program.

(2) CC User (sometimes called AR User for historical reasons.) CC User
runs on the client PC (you, the user) and is tailored to interact best

with CC Cluster. It will work with older versions of AR Cluster and (I believe) all versions of DX Spider. As Tim points out, it is incompatible with the most recent release of AR Cluster (v6.)

If you use CC User in conjunction with a CC Cluster node, I believe you can do just about anything you want (all the filtering, etc. that has been discussed.) I also believe there is an equivalent client program for AR Cluster v6, but I can't tell you what it is. Seeing as Tim is running AR Cluster v6, I am sure he can let us know.

73, Paul VE1DX

I am aware of that, although not the exact details. I just asked Pete, N4ZR, to post the technical details of what W3LPL is doing here. He has it well detailed and posted it to a different list an hour or so ago. Hopefully it will allow users to make informed decisions about Frank's spots rather than dismissing them as useless. Personally, I find W3KPL (not W3LPL-#) spots highly accurate. I feel it is unfair to dismiss W3LPL spots as useless until one takes the time to understand them and how accurate they can be. However, as we all know, you can't please everyone, and that's why there are client side filters. :-)

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5V - Jack, F8AEJ will be active holiday style as 5V7JD from Lome, Togo from 4 February to 15 March. QSL via home call and logsearch on Club Log.
9M2 - Taking part in the Chinese New Year Cultural and Heritage Celebration, special event callsign 9M4CNY will be active on 16 February from Penang Island (AS-015), West Malaysia. Expect operations on 40, 20 and 10 metres SSB, from 7 to 16 UTC. QSL direct to the qrz.com address.
C6 - Drew, N2RFA will be active as C6ABB from Nassau (NA-001), Bahamas on 10-21 February. He will be QRV on 80, 40, 20, 17 and 10 metres, with "some digital work" (PSK31, JT65, RTTY and possibly SSTV). QSL via N2RFA, eQSL and LoTW.
D4 - Mats, SM7GIB is currently active as D44TIB from Cape Verde until 7 February. He operates holiday style, typically during his early morning hours on the low bands. QSL via home call. [TNX QRZ DX]
FG - Oliver, F6ARC will be active as FG/F6ARC from Guadeloupe (NA-102) on 2-14 February. He will operate holiday style with a focus on 30 and 40 metres CW. QSL via bureau or direct (details on qrz.com). [TNX DX World]
H4 - Ralph, H44RK (currently active as 5W0W) is planning an extensive IOTA tour around the Solomon Islands, Temotu Province included, on his sailing boat "Hafskip". It is expected to start in late April-early May from Liapari, Vella Lavella (OC-149) and continue through other IOTA groups, with 2-4 days of radio activity from each of them, until they reach Honiara (Guadalcanal). Then the plan is to get "selected crew/operators on board" and reach the Stewart Islands (OC-285, new one for IOTA). Preliminary information cen be found at www.qrz.com/db/H40RK
HA - Special station HG66MALEV (for Hungary flag carrier Malev, which ceased flight activity in February 2012, after 66 years of continuous operation) will be active until 31 March on 80-10 metres CW, SSB, RTTY and possibly PSK31. QSL direct to HG4I. [TNX HA5LN]
HC - Elena, RC5A and Alex, RA1AGL will be active as HC2/homecall from Ecuador between 10 February and 9 March. They will operate SSB and CW on 160-6 metres, and Elena will participate in both the ARRL

Contests CW and SSB. QSL via home calls, direct or bureau. [TNX RC5A]
J3 - Roy, KE4TG will be active again as J38RF from Grenada (NA-024) from 6 February to 8 March. He will operate JT65HF, PSK31 and RTTY on 80-10 metres, with some activity (SSB, CW and digital modes) on 60 metres. QSL via KE4TG and LoTW. [TNX rsgbiota.org]
J5 - A group of operators from the Verona DX Team (namely IK3RBE, IK3VVD, IK3VZJ, IZ3BUR and IZ3STA) will be active again as J52HF from Guinea-Bissau between 10 February and 2 March. In their spare time they will operate SSB only on the HF bands and 6 metres. QSL via I3LDP.
J8 - Dave, G3TBK will be active once again as J88DR from St Vincent (NA-109) from 14 February to 11 March, including participation in the ARRL DX CW and SSB Contests. He will be QRV on all bands CW, SSB and RTTY. QSL via G3TBK, direct or bureau. [TNX NG3K]
LY - Celebrating the Act of Independence of Lithuania (16 February 1918), Sam, LY5W will be active as LY16W through February. QSL via home call. [TNX LY5W]
PJ2 - Joeke, PA0VDV will be active again as PJ2/PA0VDV from Curacao (SA-099) from 15 February to 22 March. He will operate CW only. QSL via home call, direct or bureau. [TNX PA0VDV]
T2 - Rob GM3YTS, Tom GM4FDM, Gavin GM0GAV and Clive GM3POI will be active as T2GM from Tuvalu (OC-015) on 12-23 March. They will operate stations with amplifers and vertical antennas placed either in or at the edge of the lagoon. QSL via GM4FDM, direct or bureau (OQRS on Club Log), and LoTW. The team will run a blog (http://t2gm.org/) courtesy MM0NDX before and during the expedition. [TNX DX World]
V6 - Bob, 5B4AGN will be active as KH2/G3ZEM from Guam on 9-13 February and as V63ZM from Micronesia on 13-23 February. He will be QRV on 80-10 metres, plus 160 metres "if useful antenna arrangements can be made". QSL via M0URX. [TNX NG3K]
VK_ant - Craig, VK6JJJ expects to arrive at the Australian Antarctic station Mawson around 7 February and to remain there for approximately twelve months. He plans to be QRV as VK0JJJ on 80-6 metres SSB and digital modes, with "a lot of priority given to 6m operation". His plans include the installing of a 6m beacon (VK0RTM) at 50w on 50.300 MHz to monitor openings. QSL via K7CO. Further details can be found at www.qrz.com/db/vk0jjj; he also has a blog at http://craighayhow.blogspot.com.au/
VK9N - A group of ten Oceania DX Group members (namely Allan VK2CA, Benton VK3CBV, Roy VK3GB, Lee VK3GK, Graeme VK3GL, Luke VK3HJ, Peter VK3IJ, Chris VK3QB, Catherine VK4GH and John VK4IO) will be active as VK9NT from Norfolk Island (OC-005) on 3-12 May. They plan to operate SSB, CW and RTTY on 80-10 metres, with four stations "as often as possibile" and "at least two stations on-air 18 hours per day". QSL via VK2CA, direct or bureau (please use the OQRS on Clublog). Logs will uploaded to LoTW "as soon as possible after the DXpedition". Further information can be found at http://vk9nt.odxg.org/

VP5 - Jeff, K0UU will be active as VP5/K0UU from Grand Turk Island (NA-003) on 13-21 February. He will operate CW with an emphasis on 30, 17 and 12 metres, and will participate in the ARRL DX W Contest as VQ5RP. QSL via K0UU, direct or bureau, and LoTW. [TNX The Daily DX]
W - Once again Joe, K5KUA will be active as K5KUA/5 from Galveston Island (NA-143) on 15-17 February. He usually operates CW only on 40-10 metres. QSL via home call, direct or bureau. [rsgbiota.org]
W - Dave, K3FT and Rob, N3RW will participate in the ARRL DX SSB Contest (LP Multi-Two) from the battleship "New Jersey" (NJ2BB) moored at the Camden waterfront, in New Jersey. "We will be using all WW2 original antennas and late model commercial transceivers", they say, "maybe even a military HF transceiver as well". [TNX K3FT]
XT - XT2TT is the callsign for the Italian DXpediton Team to use during their activity from Ouagadougou, Burkina Faso [425DXN 1125] from 21 February to 6 March. Eight operators (namely I1HJT, I2YSB, IK2CIO, IK2CKR, IK2DIA, IK2HKT, IK2RZP and JA3USA) will be active on CW (1826.5, 3515, 7015, 10115, 14025, 18070, 21025, 24891, 28025 and 50105 kHz), SSB (3760, 7145, 14220, 18145, 21295, 24945, 28475 and 50125 kHz) and RTTY (14081 kHz) with four stations. The pilot stations will be IK7JWY and (for 6m) IK0FTA; a dedicated forum will be on www.hamradioweb.org. Further information, including real-time logsearch, QSLling details and OQRS for direct cards, can be found at www.i2ysb.com/idt
XU - John, XU7ACQ will be active from Cambodia from 10 February to 18 March. He will operate SSB, CW and digital modes on 80-10 metres. QSL via KF0RQ. [TNX DX World]
YB - YB6AR and several other operators will be active as homecall/p from Pulau Bunta (claimed for IOTA group OC-245) on 15-17 February. They plan to be QRV on 40, 30, 20, 15 and 10 metres SSB and RTTY. QSL via operator's instructions. [TNX Mediterraneo DX Club]
ZF - Dave, N4QS will be active as ZF2DP from the Cayman Islands (NA-016) on 8-12 February. He will participate in the CQ WPX RTTY Contest; before and after the contest he will also operate some CW and SSB primarily on 30, 17 and 12 metres. Logserach on Clublog; QSL via home call and LoTW.
ZK3 - Dieter, DJ2EH is active as ZK3T from Tokelau (OC-048) until 20 February. He is QRV on 160-10 metres mainly CW with some RTTY. QSL via home call.

AFRICAN TOUR ---> Steve, HA0DU and Laci, HA0NAR will be active as 6V2R from Senegal and as J5NAR from Guinea Bissau starting around 9 February. They also plan to operate as 6V2R/p from Carabane Island (AF-078) and as J5NAR/p from Jeta Island (AF-093). QSL for both calls via HA0NAR, direct or bureau.

==========

20502. RE: [DX-IS] SPOT FILTERING

Yahoo group: DX-IS (2013)
Date: 2013-02-01 17:26:27 UTC
From: KQ8M
Topic: 20481 Message: 20502

The user program for AR-Cluster is AR-Cluster Client. I am not especially knowledgeable about it. AR-Cluster does the filter with a
SET DX Filter command that can be pretty long. But you can do a ton of filtering.

73,

Tim Herrick, KQ8M

Charter Member North Coast Contesters

kq8m@...

AR-Cluster V6 kq8m.no-ip.org

User Ports: 23, 7373 with local skimmer, 7374 without local skimmer

Server Ports: V6 3607, V4 Active 3605, V4 Passive 3606

Just to clarify, there are two VE7CC "programs" that sometimes get mixed up in the discussions.

(1) CC Cluster. This is the node software that only runs on DX Cluster nodes. 15-20 worldwide. VE7CC-1, VE1DXI, AE5E, etc. are a few of these nodes. Users can connect to any of these nodes with their favourite telnet client program.

(2) CC User (sometimes called AR User for historical reasons.) CC User runs on the client PC (you, the user) and is tailored to interact best with CC Cluster. It will work with older versions of AR Cluster and (I believe) all versions of DX Spider. As Tim points out, it is incompatible with the most recent release of AR Cluster (v6.)

If you use CC User in conjunction with a CC Cluster node, I believe you can do just about anything you want (all the filtering, etc. that has been discussed.) I also believe there is an equivalent client program for AR Cluster v6, but I can't tell you what it is. Seeing as Tim is running AR Cluster v6, I am sure he can let us know.

From: ve1al@...
Topic: 20504 Message: 20504

I've been monitoring both VE1DXI and K3LR and can report that no W3LPL skimmer spots have appeared for over an hour. The skimmer issue is mine. I'm glad it is available and if I ever find a need for skimmer spots I will change my settings.

Thanks to all of your for the suggestions on disabling them.

20508. Re: [dxlab] Re: Digital Skimmers

Yahoo group: DX-IS (2013)
Date: 2013-02-01 19:47:17 UTC
From: Pete Smith N4ZR
Topic: 20508 Message: 20508

With W3LPL's permission, let me "reprint" his explanation of how the W3LPL-3 spots work, so at least the debate can proceed on a sound basis...

"The W3LPL automation software uses all of the worldwide Reverse Beacon Network skimmer spots. The most important aspect of the software is that it uses a list of approximately one thousand active CW DX callsigns (no W, VE, XE and a relatively small number of European calls).

Each call in the list also has spotting rules that specify the valid bands and the re-spotting interval for that call. Only relatively rare DX stations are spotted on 40 and 15 meters and only the rarest DX stations are spotted on 20 meters. Most calls are re-spotted after 30 minutes, but very active stations are not re-spotted for one hour. Every CW skimmer spot received from the RBN is compared to the list of 1000 calls.

If the CW Skimmer spot is a perfect match to a call in the list and the spot was originated by any CW skimmer in the USA, the software then looks for ten minutes for a second perfect match from any other CW Skimmer anywhere in the world. If a second CW Skimmer spot perfectly matches the first call and is on the same frequency (+/- 300 Hz), the software examines the DX spotting rules (band and re-spotting interval) for that call. A DX spot is then sent (or not sent) over the DX Cluster network according the the spotting rules for that call.

W3LPL DX Cluster spots can originate from any CW Skimmer in the USA but are carefully screened by the list of 1000 calls and the further limited by the spotting rules associated with each call. The 80m and 160m spots and the other spots at "off times" are probably originated from the skimmers on the west coast (you can check this out by examining the RBN feed)."

The -# suffix denotes a Skimmer spot, unless someone is spoofing them.

I am aware of that, although not the exact details. I just asked Pete, N4ZR, to post the technical details of what W3LPL is doing here. He has it well detailed and posted it to a different list an hour or so ago. Hopefully it will allow users to make informed decisions about Frank's spots rather than dismissing them as useless. Personally, I find W3KPL (not W3LPL-#) spots highly accurate. I feel it is unfair to dismiss W3LPL spots as useless until one takes the time to understand them and how accurate they can be. However, as we all know, you can't please everyone, and that's why there are client side filters. :-)

I'm sorry Al, but with all due respect, that comment was uncalled for.

I don't believe that they are "lying".? They set a target time, and yes, they missed it.? That doesn't make the ARRL staff liars.? It does mean, and only means, that they were mistaken.

They may have underestimated the time.
They may have run into an unexpected issue.
They may have had something enitrely unrelated disrupt their schedule.
?
It happens in the IT world. We don't like it when it happens, but it happens.
?
C'mon.? Give them a break.

They are human, too. Most humans don't like being called names
when they are trying their best to do a good job. I know because I
worked in IT for over 35 years. The second you miss a deadline, you are
criticized. If you finish the maintenance a day early, no one says a thing.

The only thing that bothers me a bit is that they *changed* the time
in the existing outage notification, as if they had planned for it to
take until 2300Z all along. I think they'd get more respect if they
posted an update, saying something to the effect of "Apologies, but
it's taking longer than we expected - our new estimated time for
service resumption is 2300Z".

From: Dave AA6YQ
Topic: 20517 Message: 20517

Until a few months ago, the ARRL never informed the user community before taking LotW down for maintenance. Now they religiously
inform us beforehand in the "What's New with Logbook of the World" section of

<http://www.arrl.org/logbook-of-the-world>

and ops are accusing them of "lying" because the LotW has not been returned to service "on schedule".

1. Be thankful that the ARRL is maintaining LotW, given the low level of staffing allocated to this function.

2. It's not always possible to precisely estimate how long a maintenance task will require, particularly when the one person
available to do this work has 5 other responsibilities, any of which can generate unexpected interrupts.

3. Postings of the form "LotW will be down for maintenance from X until Y" should be interpreted as "LotW will be down for
maintenance starting at X, and we'll bring it back up as soon as we can".

4. If you haven't contacted your ARRL Representative and pointed out the need for dedicated development and maintenance staffing for
LotW, consider doing so.

73,

Dave, AA6YQ

Not true, Dick. What little snow we did have was melted by temperatures that reached 12°C yesterday. Today the grass was brown and the snow is gone. At least until Sunday when 10cm is expected (that's 6" for those using the old measurements). At the moment - -1C.

Al, if you want to express displeasure with the League for how they're handling today's down time, that's one thing. I may not agree with you, but I don't have a problem with that per se.

That said, calling them "liars" is, IMHO, over the line.

Yes, the change in time could have been handled better. Most likely the person who was asked to update the estimated time simply did that, without thinking through the possible consequences for not going into greater detail. And I'd bet apples to oranges that this wasn't the person who made the decision or is doing the work.

"Liars" implies an intention to deceive. I see no such intention.

What do you want? Not to be told anything at all? Or the League to say "forget it!" and abandon the system altogether?

In short: You are entitled to a level of criticism. IMHO, you went too far.

The only thing that bothers me a bit is that they *changed* the time in the existing outage notification, as if they had planned for it to take until 2300Z all along. I think they'd get more respect if they posted an update, saying something to the effect of "Apologies, but it's taking longer than we expected - our new estimated time for service resumption is 2300Z".

Intentional or not, Ron, the statement turned out to be an untruth. In fact, at 2300Z, four hours later, the system has not been restored. Ergo, the statement turns out to be a lie.

Yes, I understand what might have happened. My earlier statement about my power company holds true.

And yes, I am glad ARRL has started, albeit somewhat later than they should have -- or even never have -- informing those of us who are interested just what is happening. But they're certainly not yet perfectly transparent.

But that's for another discussion.

BTW, if you think I am an ARRL basher, rest assured that I am not.

Al, if you want to express displeasure with the League for how they're handling today's down time, that's one thing. I may not agree with you, but I don't have a problem with that per se.

That said, calling them "liars" is, IMHO, over the line.

Yes, the change in time could have been handled better. Most likely the person who was asked to update the estimated time simply did that, without thinking through the possible consequences for not going into greater detail. And I'd bet apples to oranges that this wasn't the person who made the decision or is doing the work.

"Liars" implies an intention to deceive. I see no such intention.

What do you want? Not to be told anything at all? Or the League to say "forget it!" and abandon the system altogether?

In short: You are entitled to a level of criticism. IMHO, you went too far.

I absolutely agree with you, Iain.

When my power company has a problem and announces an expected resumption of electricity, I know they over estimate. Saying they'll have service restored at 2300 and having it back on at 1915 puts a feather in their cap.

ARRL should have over-estimated and then had all of us cheering them by "restoring ahead of schedule" and not the other way around.

OTOH, I have been accused of being harsh and provocative in my comments today. Phooey.

Your clock is an hour off. The system was back up prior to 2300 Z - Tim's note was received here at 2254 Z.

Again: I see no intention to deceive. Therefore the term "liars" was (IMHO). unfortunate. If you don't realize that by now, then continued discussion of that is pointless and not worthy of the reflector's time.

Al, if you intended to meet me in Truro at 10 AM, and left Sydney at 7 AM after phoning me and confirming 10 AM, I'd expect you to be there. If, on the way, the road was closed at Antigonish and the police held you up for 3-4 hours, you probably would make it to Truro at 1 or 2 PM or later. Meanwhile I'm patiently waiting in Truro for you to show up. 3-4 hours later you do arrive.

Would that make your statement at 7 AM an untruth?

Would you also accept that it would be OK for me to call you a liar in public?

This is what you are doing to the DXCC Desk.

Comparing LoTW to the local power commission is a straw man argument. I just got a 2-month power bill today for over $700. When I pay LoTW at the sa,e rate as NSP for their services, I will expect the same accurate restoration estimates as NSP. Until then, it is a best effort.

73, Paul VE1DX

I'll concede that, Ron, in the interest of moving on. Although I wasn't there at the exact moment LoTW was restored, I'd estimate it was between 2258 and 2259Z. The current time, as I write this is 2340Z.

I've uploaded my January log and already received matches. When it works, these days, it works. ☺

Subject: RE: [DX-IS] LoTW

Your clock is an hour off. The system was back up prior to 2300 Z – Tim’s note was received here at 2254 Z.

Again: I see no intention to deceive. Therefore the term “liars” was (IMHO)… unfortunate. If you don’t realize that by now, then continued discussion of that is pointless and not worthy of the reflector’s time.

Intentional or not, Ron, the statement turned out to be an untruth. In fact, at 2300Z, four hours later, the system has not been restored. Ergo, the statement turns out to be a lie.

Yes, I understand what might have happened. My earlier statement about my power company holds true.

And yes, I am glad ARRL has started, albeit somewhat later than they should have -- or even never have -- informing those of us who are interested just what is happening. But they're certainly not yet perfectly transparent.

But that's for another discussion.

BTW, if you think I am an ARRL basher, rest assured that I am not.

Al, if you want to express displeasure with the League for how they're handling today's down time, that's one thing. I may not agree with you, but I don't have a problem with that per se.

That said, calling them "liars" is, IMHO, over the line.

Yes, the change in time could have been handled better. Most likely the person who was asked to update the estimated time simply did that, without thinking through the possible consequences for not going into greater detail. And I'd bet apples to oranges that this wasn't the person who made the decision or is doing the work.

"Liars" implies an intention to deceive. I see no such intention.

What do you want? Not to be told anything at all? Or the League to say "forget it!" and abandon the system altogether?

In short: You are entitled to a level of criticism. IMHO, you went too far.

I absolutely agree with you, Iain.

When my power company has a problem and announces an expected resumption of electricity, I know they over estimate. Saying they'll have service restored at 2300 and having it back on at 1915 puts a feather in their cap.

ARRL should have over-estimated and then had all of us cheering them by "restoring ahead of schedule" and not the other way around.

OTOH, I have been accused of being harsh and provocative in my comments today. Phooey.

The only thing that bothers me a bit is that they *changed* the time in the existing outage notification, as if they had planned for it to take until 2300Z all along. I think they'd get more respect if they posted an update, saying something to the effect of "Apologies, but it's taking longer than we expected - our new estimated time for service resumption is 2300Z".

That's why I have a mobile phone, Paul. I would certainly hope you have one also.

As for NSP, I guess I should consider my $350/2mo to be a bargain.

Yes, I grant you that unforeseen delays are often experienced. Now, I'm willing to completely abandon this because it, quite obviously, is going nowhere.

Al, if you intended to meet me in Truro at 10 AM, and left Sydney at 7 AM after phoning me and confirming 10 AM, I'd expect you to be there. If, on the way, the road was closed at Antigonish and the police held you up for 3-4 hours, you probably would make it to Truro at 1 or 2 PM or later. Meanwhile I'm patiently waiting in Truro for you to show up. 3-4 hours later you do arrive.

Would that make your statement at 7 AM an untruth?

Would you also accept that it would be OK for me to call you a liar in public?

This is what you are doing to the DXCC Desk.

Comparing LoTW to the local power commission is a straw man argument.
I just got a 2-month power bill today for over $700. When I pay LoTW at the sa,e rate as NSP for their services, I will expect the same accurate restoration estimates as NSP. Until then, it is a best effort.

No, no cell phone, no Android, no Blackberry, no i(anything.) I have a landline phone with 3 outlets throughout the house. No call display, no call waiting, no answering machine, etc. One of them is circa 1980 rotary dial phone with an annoyingly loud mechanical set of bells that drives my kids nuts. I also have a wind up alarm clock. Both work when the power goes out.

I do have several 7 computers and a few radios, but I drew the line at pagers and cell phones. In the 1990s they tried to make me carry a cell phone at work. Thankfully this was the time when the media was hyping up the linkage for cell phones to brain tumours. (I think that has been subsequently dis-proven.) Either way, I used the safety hazard excuse to get rid of it, and I never got a personal one. When I go to bed at night, I turn the ringers off on my phones, and turn them back on in the AM.

I communicate via Ham radio and email. I talk to my wife and kids face to face when I can find them. Why would I want a cell phone? It would be a leash around my ankle, and an extra bill to pay every month.

73, Paul VE1DX

From: rjohnson
Topic: 799 Message: 20541

Good Grief Al !!!

What would have happened if you couldn't have made your "JAN Upload" until tomorrow ???

Was the world going to stop turning ???

Were they going to fine you 5 DXCC entities for not having made you upload on time ???

LoTW is a great deal when comparing to any other way of QSL'ing and yet you always seem to find new complaints.

Maybe your Dr. could prescribe something for your anxiety, we all could use some of them.

My wife tells that I am an old curmudgeon frequently, what your wife have to say on the subject ???

Last question, did you get anything new for January ???

I also sent in some cards, around mid-December. I got them back a few days ago.

One of the Legal definitions of Prediction is:

..."Something foretold or predicted; a prophecy"...

As such, it cannot be Truth or Lie.

No, no cell phone, no Android, no Blackberry, no i(anything.) I have a landline phone with 3 outlets throughout the house. No call display, no call waiting, no answering machine, etc. One of them is circa 1980 rotary dial phone with an annoyingly loud mechanical set of bells that drives my kids nuts. I also have a wind up alarm clock.
Both work when the power goes out.

I do have several 7 computers and a few radios, but I drew the line at pagers and cell phones. In the 1990s they tried to make me carry a cell phone at work. Thankfully this was the time when the media was hyping up the linkage for cell phones to brain tumours. (I think that has been subsequently dis-proven.) Either way, I used the safety hazard excuse to get rid of it, and I never got a personal one. When I go to bed at night, I turn the ringers off on my phones, and turn them back on in the AM.

I communicate via Ham radio and email. I talk to my wife and kids face to face when I can find them. Why would I want a cell phone? It would be a leash around my ankle, and an extra bill to pay every month.

73, Paul VE1DX

Subject: RE: [DX-IS] LoTW

Intentional or not, Ron, the statement turned out to be an untruth. In fact, at 2300Z, four hours later, the system has not been restored. Ergo, the statement turns out to be a lie.

Yes, I understand what might have happened. My earlier statement about my power company holds true.

And yes, I am glad ARRL has started, albeit somewhat later than they should have -- or even never have -- informing those of us who are interested just what is happening. But they're certainly not yet perfectly transparent.

But that's for another discussion.

BTW, if you think I am an ARRL basher, rest assured that I am not.

Subject: RE: [DX-IS] LoTW
Al, if you want to express displeasure with the League for how they're handling today's down time, that's one thing. I may not agree with you,

but I don't have a problem with that per se.

That said, calling them "liars" is, IMHO, over the line.

Yes, the change in time could have been handled better. Most likely the person who was asked to update the estimated time simply did that, without thinking through the possible consequences for not going into greater detail. And I'd bet apples to oranges that this wasn't the person who made the decision or is doing the work.

"Liars" implies an intention to deceive. I see no such intention.

What do you want? Not to be told anything at all? Or the League to say "forget it!" and abandon the system altogether?

In short: You are entitled to a level of criticism. IMHO, you went too far.

Subject: RE: [DX-IS] LoTW

I absolutely agree with you, Iain.

When my power company has a problem and announces an expected resumption of electricity, I know they over estimate. Saying they'll have service restored at 2300 and having it back on at 1915 puts a feather in their cap.

ARRL should have over-estimated and then had all of us cheering them by "restoring ahead of schedule" and not the other way around.

OTOH, I have been accused of being harsh and provocative in my comments today. Phooey.

The only thing that bothers me a bit is that they *changed* the time in the existing outage notification, as if they had planned for it to take until 2300Z all along. I think they'd get more respect if they posted an update,

saying something to the effect of "Apologies, but it's taking longer than
we expected - our new estimated time for service resumption is 2300Z".

20546. Cluster question

Yahoo group: DX-IS (2013)
Date: 2013-02-02 04:06:34 UTC
From: John G.
Topic: 20546 Message: 20546

I use the DX summit internet cluster for my spotting, except when it goes down, then I use eham.net. It seems from the recent discussion that many people use the VE7CC cluster. What is the advantage of it over DX summit?

John AF5CC

20547. RE: [DX-IS] LoTW

Yahoo group: DX-IS (2013)
Date: 2013-02-02 04:11:15 UTC
From: ve1al@...
Topic: 799 Message: 20547

Anxiety? Not a problem here, Bob.

Curmudgeon? I've known for years that I am the penultimate curmudgeon and if you look in the dictionary I'm pretty sure my picture is there. Everyone I know will confirm that I am a curmudgeon. I don't have a wife but if I did I'm sure she would also confirm that I am curmudgeonly.

Me complain about LoTW as a way of exchanging confirmations? Absolutely and totally incorrect. I think LoTW is a wonderful concept and I have over 11,000 confirmations. My complaints center on the inability to access the system. And today, when it finally got up and running again, I had my first opportunity to test the speed at which the system is now operating. I was amazed and delighted.

And yes, I got three band countries for January: HK1MW on 12M, TZ6BB on 17M and Z31RQ on 15M. And it is just the beginning of the month. Think what the next 26 days might bring.

Good Grief Al !!!

What would have happened if you couldn't have made your "JAN Upload" until tomorrow ???

Was the world going to stop turning ???

Were they going to fine you 5 DXCC entities for not having made you upload on time ???

LoTW is a great deal when comparing to any other way of QSL'ing and yet you always seem to find new complaints.

Maybe your Dr. could prescribe something for your anxiety, we all could use some of them.

My wife tells that I am an old curmudgeon frequently, what your wife have to say on the subject ???

Last question, did you get anything new for January ???

I don't know enough about DX Summit to compare it to a traditional DX Cluster. All I know is it is web based and popular with a lot of users. DX Clusters are the traditional way of sharing DX information going back 20-25 years to the days of packet radio. They have evolved to use the Internet but retain much of the same look and feel as they did 20 years ago.

Rather than a number of people give you their opinion one way or the other, why not got here:

http://www.ve7cc.net/

Download CC User (the client telnet program that sits on your PC.) Configure it to connect to VE7CC-1 (in British Columbia) or VE1DXI (in my home in Nova Scotia.) These are two of many DX Cluster "nodes." Pick another one if you like . . . they all will give you the same spots unless you set up filters to customize them for your use.

Try it for a few days or a week. Then you can decide if a web based DX sources such as DX Summit or a traditional DX Cluster like VE7CC-1 or VR1DXI are more to your liking. They will all give you the same information, so I suspect it will be a matter of personal preference.

SIDC SOLAR BULLETIN 02 Feb 2013, 0933UT
SIDC FORECAST (valid from 1230UT, 02 Feb 2013 until 04 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 02 Feb 2013 10CM FLUX: 106 / AP: 013
PREDICTIONS FOR 03 Feb 2013 10CM FLUX: 107 / AP: 015
PREDICTIONS FOR 04 Feb 2013 10CM FLUX: 108 / AP: 008
COMMENT: Catania sunspot groups 78 (NOAA AR 1665) and 79 (NOAA AR 1667)
produce small flares, hardly reaching the C-level. Although, an isolated
C-flare is possible. The Earth undergoes a limited influence of the
small equatorial coronal hole: the local K indicating the geomagnetic
disturbances measured in Dourbes, Belgium became 3. The solar wind
heading for Earth has become faster: >400km/s. The temperature of the
solar wind particles has increased accordingly. The magnetic field is
stronger compared with the first part of Feb 01. A large coronal hole in
the northern hemisphere, although at a high latitude reached the central
meridian. Geomagnetic influence is possible in a few days. There is a
small probability for a glancing blow of the filament that erupted on
Jan 31, 06:00UT. In case of arrival, unsettled to active conditions are
possible.

TODAY'S ESTIMATED ISN : 049, BASED ON 09 STATIONS.

Subject: RE: [DX-IS] LoTW

Intentional or not, Ron, the statement turned out to be an untruth. In fact, at 2300Z, four hours later, the system has not been restored. Ergo, the statement turns out to be a lie.

Yes, I understand what might have happened. My earlier statement about my power company holds true.

And yes, I am glad ARRL has started, albeit somewhat later than they should have -- or even never have -- informing those of us who are interested just what is happening. But they're certainly not yet perfectly transparent.

But that's for another discussion.

BTW, if you think I am an ARRL basher, rest assured that I am not.

Subject: RE: [DX-IS] LoTW

Al, if you want to express displeasure with the League for how they're handling today's down time, that's one thing. I may not agree with you, but I don't have a problem with that per se.

That said, calling them "liars" is, IMHO, over the line.

Yes, the change in time could have been handled better. Most likely the person who was asked to update the estimated time simply did that, without thinking through the possible consequences for not going into greater detail. And I'd bet apples to oranges that this wasn't the person who made the decision or is doing the work.

"Liars" implies an intention to deceive. I see no such intention.

What do you want? Not to be told anything at all? Or the League to say "forget it!" and abandon the system altogether?

In short: You are entitled to a level of criticism. IMHO, you went too far.

Subject: RE: [DX-IS] LoTW

I absolutely agree with you, Iain.

When my power company has a problem and announces an expected resumption of electricity, I know they over estimate. Saying they'll have service restored at 2300 and having it back on at 1915 puts a feather in their cap.

ARRL should have over-estimated and then had all of us cheering them by "restoring ahead of schedule" and not the other way around.

OTOH, I have been accused of being harsh and provocative in my comments today. Phooey.

The only thing that bothers me a bit is that they *changed* the time in the
existing outage notification, as if they had planned for it to take until
2300Z all along. I think they'd get more respect if they posted an update,
saying something to the effect of "Apologies, but it's taking longer than
we expected - our new estimated time for service resumption is 2300Z".

I don't know enough about DX Summit to compare it to a traditional DX Cluster. All I know is it is web based and popular with a lot of users. DX Clusters are the traditional way of sharing DX information going back 20-25 years to the days of packet radio. They have evolved to use the Internet but retain much of the same look and feel as they did 20 years ago.

Rather than a number of people give you their opinion one way or the other, why not got here:

http://www.ve7cc.net/

Download CC User (the client telnet program that sits on your PC.) Configure it to connect to VE7CC-1 (in British Columbia) or VE1DXI (in my home in Nova Scotia.) These are two of many DX Cluster "nodes." Pick another one if you like . . . they all will give you the same spots unless you set up filters to customize them for your use.

Try it for a few days or a week. Then you can decide if a web based DX sources such as DX Summit or a traditional DX Cluster like VE7CC-1 or VR1DXI are more to your liking. They will all give you the same information, so I suspect it will be a matter of personal preference.

I used DXWatch primarily. The filtering abilities seem to be the best for me of any of Web Clusters I've looked at. DX Summit is useful for finding older history though.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-Jan, through Sunday, 3rd-February there were 229 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2013 FD PACKET NOW AVAILABLE. The ARRL states, "It's that time of year again -- time to start gearing up for ARRL Field Day, June 22-23, 2013! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of

operating fun. For the complete announcement, go to:
http://www.arrl.org/news/view/2013-field-day-packet-now-available
For the FD packet: http://www.arrl.org/field-day

3D2/R, ROTUMA. Antoine, 3D2AG, will once again be active as 3D2AG/p from Rotuma (OC-060) between late March/April. He states, "Now looking for spare parts for my 14-years-old ICOM 706-MKII, which is faulty (no TX). If anyone can help please contact me, so that I can be operational on 6m from Rotuma. Thanks in advance." His E-amil address is on QRZ.com. He also mentions, "QSL direct only to Fiji address. Please include at least two green stamps or one IRC with AIRMAIL SAE for first class return postage. After intense lobbying by 3D2AG, IRCs are now exchangeable at the normal UPU rate in Fiji. Please don't forget to put an airmail label on your return envelope, and write your country name clearly."

5X, UGANDA (Reminder). Members of the F6KOP team are expected to be active as 5X8C between February 6-18th, from a location some 20 Km from Entebbe airport.

CORRECTION/OOOPPPSS DEPARTMENT. In OPDX.1097, under "NH0, MARIANA ISLANDS (Update)", we mentioned that YL Miho/JJ2VLY was Joe's/JA1LZR XYL; this is incorrect. It should have read: "JJ2VLY (YL Miho (Yutaka's [JQ2GYU] XYL, also WS2M)".

CT9, MADEIRA ISLANDS. Operators Jozef/OM3GI, Tibor/OM3RM and Julius/OM7JG will be active as CR3A during the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. QSL via OM2VL.

D4, CAPE VERDE (Correction/Update). Mats, SM7GIB, will be active as D44TIB from Cape Verde (AF-086) until February 7th (not between February 25th and March 8th). Activity will be holiday style using a K3 into a wire vertical for 160-10 meters. Look for him to be on the radio in the early mornings and evenings - on CW. QSL via his home callsign.

E6, NIUE. Operators Alan/VK4WR and Graeme/VK4FI will be active as E6RQ and E6SG, respectively, from Niue (OC-040) between March 22-29th. Their activity will focus on 6 meters as well as some HF operations. QSL both callsigns via VK4FI.

FG, GUADELOUPE. Oliver, F6ARC, is now active as FG/F6ARC from Guadeloupe (NA-102) until February 14th. Activity will be holiday style with a focus on 40 and 30 meters CW, using wire antennas. QSL via FE11DX, by the Bureau or direct (see QRZ.com).

FS & PJ7, ST. MARTIN AND SINT MAARTEN. Andy, DK5ON, will be active as FS/DK5ON from French St. Martin (NA-105, WLOTA 0383) and PJ7/DK5ON from Dutch Sint Maarten (NA-105, WLOTA 0711, DIFO FS-001) between March 10-29th. Activity will be on 80-6 meters, including 17/12 meters, using SSB, RTTY and PSK. QSL via DK5ON, direct or by the Bureau. No eQSL.

IOTA NEWS.....
AF-019. An international team of operators will be active as IG9Y from

Lampedusa Island between October 17-30th. Operators mentioned
are Khalid/A61BK, Gianni/IT9BUN, Don/JH5GHM, Dale/N3BNA,
Frederic/ON4LG, Frank/ON9CC, Aurelio/PC5A, Romeo/S52RU,
Peter/S54W and Drago/S59A. Activity will be on 160-6 meters
using CW, SSB, and RTTY, with four stations on the air. The
team will be in the CQWW DX SSB Contest (October 26-27th) as
a Multi-2 entry. QSL via ON4LG. An OQRS will be available for
direct and Bureau cards. Visit their Web page at:
http://ig9.ii9p.com

AS-085. Members from the Korea Contest Club will be active as D85C
from Chongsan Island (WLOTA 1602) between June 6-9th. More
details to be forthcoming.

EU-120. Operators Terry/G3VFC, Keith/M0KJA, Fred/M0RFD, Rob/M0VFC,
Dave/M6KOM, Maureen/M6VFC and Richard/2E1EVK will be active
as GX5MW/p from the Isle of Wight (WLOTA 2985) between March
16-23rd. Activity will be on all HF bands and modes. QSL via
M0RFD, direct or by the Bureau.

NA-143. Joe, K5KUA, will once again operate portable from Galveston
Island (USI TX001S, Galveston County, TX) in the Gulf of Mexico
between February 15-17th. Activity will be holiday style on
the HF bands. QSL via K5KUA, direct or by the Bureau.

OC-129. Chris, OE9MON, is now active as DU6/OE9MON from Panay Island.
He is there on holiday with his family, and the length of his
stay is not known. Activity will be on 160-6 meters using
wire antennas. QSL via LZ1JZ, direct, by the Bureau or LoTW.

OC-245. Rohadi, YB6AR, and several other operators will be active
from Bunta Island between February 15-17th. Operators are
expected to use portable callsigns (YB6AR/P etc). Activity
will be on 40/30/20/15/10 meters using SSB and RTTY. They
plan to use five transceivers with 500 watt amps. All their
antennas are homebrew (verticals, yagis and Spiderbeam). QSL
via the operator's instructions.

ISWL CALLSIGNS (For February). The following ISWL club callsigns will be
used throughout the month of February 2013:

GX4BJC/A - Operated from Bream, in Gloucestershire, by Chris, G0SDD.
(/A WAB Square SO60, England, IOTA EU-005 and WLOTA LH-1841)

MX1SWL/A - Operated from Hartford, in Cambridgeshire, by Tom, G3RPV.
(/A WAB Square TL27, England, IOTA EU-005 and WLOTA LH-1841)

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual
operator. The I.S.W.L. is a member of the European PSK Club. All QSL
info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>.
NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see
<www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for

their awards.

J8, ST. VINCENT. Dave, G3TBK, will once again be active as J88DR between February 14th and March 11th. Activity will include the ARRL DX CW Contest (February 16-17th) and the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/Low-Power entry. He will also be in the RSGB's 75th Commonwealth Contest (March 9-10th). Activity outside of the contest will be on all HF bands, especially 30/17/12 meters, using CW, SSB and RTTY. QSL via G3TBK, direct or by the RSGB Bureau.

JD1, OGASAWARA (Update). Three JA operators will be active from Chichijima Island (AS-031) in the Ogasawara group between April 28th and May 5th. The callsigns to be used are JD1BLC (Operator Toshi/JP1IOF) and JD1YBT (World Wide Club station callsign). Activity will be on 160-6 meters using CW, SSB, RTTY and FM. QSL JD1BLC via JP1IOF direct or by the Bureau to JD1BLC. QSL JD1YBT via JP1IOF direct or by the Bureau to JD1YBT. Also, LoTW and an OQRS (via ClubLog) will be available for both callsigns at:
https://secure.clublog.org/logsearch/JD1YBT
https://secure.clublog.org/logsearch/JD1BLC

KP2, U.S. VIRGIN ISLANDS. Operators Philip/KT3Y, Frederick/K9VV and Robert/WP2XX will be active from the KP2M rental shack on St. Croix Island (NA-106) during the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. QSL via AI4U (DIRECT ONLY) OR LoTW. NO BUREAU QSLs.

KP2, U.S. VIRGIN ISLANDS. Look for operators and callsigns Munekazu/JI3DNN (KP2/KI3DNN), Yoshiaki "Aki"/JR3QFB (KP2/W3JH), Yoshiro/JL3SIK (KP2/K2JA), Takeshi "TAKE"/JS6RRR and KP2/NH2KY (Club callsign) to be active from the U.S. Virgin Island between March 13-19th. Activity will be on 160-6 meters using CW, SSB, RTTY, PSK31 and JT65A. Check QRZ.com for QSL details.

KP2, U.S. VIRGIN ISLANDS. Before his JD1YBT and JD1BLC Ogasawara operations (see JD1 above), Toshi, JP1IOF, will be active as WH7P/KP2 from U.S. Virgin Islands between April 3-9th. Activity will be on all bands and modes. QSL via JP1IOF, by the Bureau or direct. Also, LoTW and an OQRS (via ClubLog) will be available at: https://secure.clublog.org/logsearch/WH7P/KP2

LX, LUXEMBOURG. Philippe/LX2A and a team of operators will be active as LX7I from Eschdorf during the CQWW WPX RTTY Contest (February 9-10th) as a Multi-2 entry, and the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. QSL via LX2A. QSL via LX2A. Visit the following Web page at:
http://www.lx2a.com

MJ, JERSEY. Richrad, M5RIC, will be active as GJ2A for the ARRL DX SSB Contest (March 2-3rd). QSL route (See http://www.qrz.com/db).

NODXA'S MEMBER RTTY ACHIEVEMENT. The ARRL RTTY Honor roll contains 124 callsigns. Northern Ohio DX Association (NODXA) member "Scotty", WK3N, joined their ranks this week with his approved submission bringing him a total of 334 confirmed on RTTY. Scotty is the second NODXA member to achieve this status, Don, K8MFO, was our first.

MU0, GUERNSEY. Operators Peter/2E0SQL, Louis/2U0FER, Mark/M0MJH, Iain/
M0PCB, Dan/M0TCB and Steve/M0SPF will be active as MU0HTJ from Guernsey
(EU-114, WLOTA 0013) for the RSGB IOTA Contest (July 17-18th). QSL via
2E0SQL, direct or by the Bureau. For more info and updates, visit their
Blog page at: http://blog.hamtests.co.uk

P4, ARUBA. Howard, WA2NHA, will once again be active as P4/WA2NHA between
March 3-17th. Activity will be on 80-10 meters mainly CW. QSL via his
home callsign.

PJ2, CURACAO. Ulf, DL5AXX, will be active as PJ2/DL5AXX from Curacao
(SA-099, WLOTA LH-0942) between February 24th and March 11th. Activity
will be holiday style on 80-10 meters using mainly CW with some RTTY.
QSL via his home callsign, direct or by the Bureau. He does prefer his
OQRS at: http://www.dl5axx.de/dxlog/default.aspx?Logid=75

PJ2, CURACAO. A group of operators will activate PJ2T, the Caribbean
Contesting Consortium's (CCC) Signal Point Station on Curacao (SA-099,
WLOTA LH-0942) between February 13-20th. Activity will be on all bands
and modes, but their main operations will be during the ARRL DX CW Contest
(February 16-17th) as a Multi-Op entry. QSL PJ2T via LoTW or W3HNK. Look
for operators to possibly be active before and after the contest using
their own PJ2/homecall callsigns. QSL via their home callsigns unless
where indicated. Operators mentioned are John/K9QVB, Howie/K9KM, Kelly/
N0VD (via W3HNK), Mal/NP2L, Andy/W9NJY (via WD9DZV), Bill/W9VA and
Geoff/PJ2DX. Some operators will use LoTW.

4W3DX & 4W6MM QSL ROUTE CHANGE. Phil, G3SWH, has been appointed as QSL Manager for Thor's, TF4M, operations from Timor Leste between 2000 and 2003 as 4W3DX and 4W6MM. There are log searches at:
http://www.g3swh.org.uk/4w3dx.html
http://www.g3swh.org.uk/4w6mm.html

QSL RECEIVED VIA LoTW: 3V8BB, 9J3A, 9Y4D, CT3DZ, CT8/EA5KA, CU3EJ, EA7TG, HK1R, J77A, JA6JNF, KL7J, KP2/K5WE, KV4FZ, LY7Z, OH8A, PJ2T, PY0FO, RV6A, SN3R, T77C, TZ7BB, VA2EW, VE3EJ, VE3FU, VE6BMX, VP2MSW, VP2V/K6TOP, VY2CM, YS3CW, YV6BFE, YY4DNN and ZX2F

QSLS RECEIVED VIA MAIL: 3D2C, 5W1SA, 5Z4/DL7UCX, 7O6T, 7P8D, 7W50I, A92GR, AH0/N0AT, AH0KT, BV7GC, C6AVA, CP4BT, D64K, FM5BH, FR4NT, HH2/9A7GAE, J79WE, JD1BMH, LZ1ANA, PJ4LS, PJ5J, V26E, V26HS, V84SMD, WP2XX, ZD9UW and ZS6DJD

QSLS RECEIVED VIA THE BUREAU: 4O/OK1IEC, 4O/OK4ZW, 5R8HL, 5R8IC, 6W1RY, C50C, CN2DJ, ET3TK, EY8/F4EGS, FG/F6BFH, FG4NO, FG8NY, FK/F4BKV, FO8RZ, FR1FF, FY/F6CKD, HB0/F5PAC, HB0/OK1XD, HB0/OK6DJ/P, HR1RTF, IS0R, JW/F8DVD, KP2/AA1TR, MU/F5CWU, MU/F5NHJ, OH0/WS4T, OX/OK1JST, OX4OK, PJ4L, SV9/OK1AMM/P, TB0DX, TC03W, TC07DX, TC098A, TJ3AY, TK/F8DZY, TK12IOTA, TO5A, TO11A/P, TT8PK and ZA/OK1MBZ

T6, AFGHANISTAN. Eric, K9GY, will be active as T6MO from the Helmand Province (Grid MM21) during the ARRL DX CW Contest (February 16-17th) as a Single-Op/Low-Power entry. He states that he will probably be active during the first 28 hours or so, and it may be a Single-Band effort. QSL via LoTW or to K9GY (see QRZ.com) direct or by the Bureau. ADDED NOTE: Eric will also be active during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Single-Band (possibly 15 or 10m)/Low-Power.

TX5, CLIPPERTON ISLAND (Update). The March TX5K Clipperton Island DX-pedition Web page now has a new URL: http://tx5k.org
The current updated list of operators are Bob/KK6EK (Organizer, Expedition Leader), Christian/DL1MGB (Co-organizer), Walt/N6XG (Logistics), Ed/KE3D, Igor/US0VA (Doctor), Robert/SP5XVY, Dietmar/DL3DXX, Dave/WJ2O, Luis/XE1L, Mathias/DJ2HD, Mike/WA6O, Yann/F1NGP, Andreas/DL5CW, Roman/US5WDX, Rick/KF4ZZ, Heye/DJ9RR, Lance/W7GJ (6m), Tom/DL5LYM, Jef/DD2CW, Giovanni/I5JHW, Ken/OZ1IKY, Markus/DJ7EO, Gerhard/DJ5IW and Carlos/NP4IW (Logistics). Louis-Philippe Loncke will be there for documentation. There are four honorary team members: Chod Harris/VP2ML (SK - DXpedition Dedication), Yasuo "Zorro" Miyazawa/JH1AJT (Honorary DXpedition Leader), Conrad Limbaugh (Expedition Dedication) and Dan Gotshall (Honorary Expedition Leader).

The "Technology Development" team members are: Bob/N2OO is the QSL Manager, Peter/W6OP and Dean/N7XG are Software Development, Rich/KY6R (Social Media), Alan/AD6E (Satellite Communications), Dean/N6BV (Radio Propagation Modeling) and Felipe (Internet Data). Regional Coordinators (pilots) are: Gary/DF2RG (Chief Pilot, Germany), Marcus/DL9RCF (Germany), Stan/KH6CG (Hawaii), Col/MM0NDX (Scotland), Cesar/PY2YP (Brazil), Andre/V51B (Namibia), Bill/VK4FW (Australia), XE2HWJ (Mexico) and Rex/NR6M (USA). There will be four members on the Scientific Program team, and one is a ham - Alain/F6BFH. The vessel Shogun will leave from San Diego on February 19th. Schedule/Tenative activity dates are between February 28th and March 10th.

V6, MICRONESIA. Mike, WB7DXA, will be active as V63DXA in Micronesia between February 21st and March 21st. While there, he plans to operate from the islands of Kosrae (OC-059), Pohnpei (OC-010) and possibly Mokil and Pingelap Atolls (OC-226). He informs OPDX [edited], "I am sailing on a boat with a marine radio. The captain believes it works on 20 meters and possibly some additional bands. He isn't a ham so he can't try it out. So I am hoping that it works out when I get there. As it stands I arrive into Kosrae on February 23rd. Then leave Pohnpei on March 22nd. I plan to operate from Kosrae for about a week and then on to the Atolls (OC-226) on the way to Pohnpei, but it all depends on WX and other factors. As far as bands, I think 20 meters phone is what I am looking to operate mostly. I'll bring a key for CW just in case I can get it going. The other bands will need to be determined after I get there." Mike plans on using LoTW as the primary QSL vehicle, but you can send cards direct to him or by the Bureau.

VP2, MONTSERRAT. Will, AA4NC, will be active as VP2ME from Montserrat (NA-103, WLOTA 1475) between February 13-20th. Activity will include an entry in the ARRL CW DX Contest (February 16-17th). Outside the contest, he will be on RTTY, CW, and SSB mainly on the 30/17/12 meter bands. QSL via LoTW.

VP2, U.S. VIRGIN ISLANDS (NA-106). Matt, K0BBC, (along with his XYL Valeriw, K0VAL) will be heading south and will once again be active as KP2/K0BBC from the Hull Bay Cottages on St. Thomas Island (USI VI004S) between February 26th and March 5th. Activity will be holiday style on the HF bands. Matt plans to be active in the ARRL DX SSB Contest (March 2-3rd). QSL via K0BBC, direct, by the Bureau or LoTW.

WP2, U.S. VIRGIN ISLANDS (NA-106). Operators Stan/K8MJZ, Fred/NP2X, Robert/WP2XX and possibly others will be active from the Island Villa Contest Club WP2Z superstation on St. Croix during the CQWW WPX SSB Contest (March 30-31st) as a Multi-Single entry. QSL via KU9C.

WRTC-2014 NEWS RELEASE #15 (WRTC2014 Names Judging Committee). An excerpt from a press release dated January 31st states: "WRTC2014, Inc., host of the 2014 World Radiosport Team Championship competition is pleased to announce the judging committee that will be responsible for certifying the results of the competition. David Sumner, K1ZZ, will serve as Chief Judge leading the committee of Nodir Tursoon-Zadeh, EY8MM, Don Field,

G3XTT, Dan Street, K1TO, and Dick Norton, N6AA." To read the whole press release, go to: http://www.wrtc2014.org/wrtc2014-names-judging-committee

XR2, CHILE (Chilean Lighthouse). Manuel, CE2UNE, will be active as XR2BH from the Puerto Aldea (Caleta Hornilla) Lighthouse (NAC 133, ARLHS CHI-110, Admiralty G1896.20) between February 20-24th which also includes the "Weekend South American Lighthouses" event (February 22-24th). The beacon is located in Tongoy Bay, near the village of Puerto Aldea, Elqui Province, Coquimbo Region, Chile (WW Loc. FF49EQ). QSL XR2BH via CE2AA (QRZ.com).

XT, BURKINA FASO (Update to OPDX.1097/Callsign Change). Members of the "Italian DXpedition Team" will be active as XT2TT (not XT1T as first announced) from Ouagadougou (Grid Loc. IK92fi), Burkina Faso, between February 21st and March 6th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL I2YSB for direct QSLs and IK2CIO for Bureau QSLs (no E-mail request please). A OQRS will be available for direct cards only. Now available on their Web page is a survey for both bands and modes needs. The official Web site is: http://www.i2ysb.com/idt
Official forum is: http://www.hamradioweb.org

XU, CAMBODIA. John, KF0RQ, will once again be active as XU7ACQ but from a new location (east and west Cambodia) between February 10th and March 18th. Activity will be on 80-10 meters using CW, SSB and the Digital modes. He is still looking for Delaware and South Dakota for his WAS. QSL via KF0RQ. Online logsearch is available at ClubLog.

Z8, SOUTH SUDAN (Update). Massimo, IZ0EGB (ex-9L1MS, EL2GB), informs OPDX that he is now living in Juba, South Sudan, and plans to be on the air as Z81B soon. He will be using 600 watts into wire antennas for 40-6 meters, and operate on SSB and the Digital modes. Massimo adds that the equipment is installed already and was expected to be on the air this past week. Occasionally, Massimo will operate from other locations using only 100 watts into a T2FD (a terminated, tilted and folded dipole) operating SSB only. QSL via IZ0EGB: Alessandro Colasanti, Via Pia Nalli 30, 00134 Rome, Italy. Massimo states, "Colleagues should please avoid sending IRC coupons. Alessandro will periodically upload my log onto LoTW and ClubLog."

ZF, CAYMAN ISLANDS. Dave, N4QS, will be active as ZF2DP from Georgetown, Grand Cayman (NA-016, WLOTA 1042), between February 8-12th. Activity will be from the ZF1A club station and running low power using his Elecraft K3. He plans to be active during the CQ WPX RTTY Contest (February 9-10th), and will also operate some CW and SSB on the days before and after the contest -- primarily on the WARC bands. He will attempt to upload his log to ClubLog in real-time using the N1MM Gateway. You can see if you are in his log by clicking here: https://secure.clublog.org/logsearch/ZF2DP QSL via LoTW or his home callsign.

ZS8, MARION ISLAND. There has been an announcement by various sources that a second operator will be active from Marion Island. Pierre, ZS1HF, is reporting that Carson, ZR6CWI, has been appointed as the Space Weather Engineer on Marion Island between April 2013 and May 2014. Carson has just completed a one year work assignment at the SANAE (South African

National Antarctic Expedition) Antarctic Base and is expected to be back
in Cape Town on February 19th. Carson informed Pierre that he will be
active from Marion Island over this period. No callsign has been allocated
yet. His QSL Manager will be ZS1HF/ZS8M. At this stage SSB only. No further
info is available. Stay tuned!

#-----------------------------------------------------------------#
SIDC URSIGRAM 30204
SIDC SOLAR BULLETIN 04 Feb 2013, 1228UT
SIDC FORECAST (valid from 1230UT, 04 Feb 2013 until 06 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 04 Feb 2013 10CM FLUX: 114 / AP: 005
PREDICTIONS FOR 05 Feb 2013 10CM FLUX: 115 / AP: 012
PREDICTIONS FOR 06 Feb 2013 10CM FLUX: 115 / AP: 013
COMMENT: Four C-class flares were detected during the past 24 hours,
and the strongest one was C8.4 flare peaking at 06:10 UT, on February 3.
The C-class flares are possible, in particular from the Catania sunspot
group 79 (NOAA AR 1667). The interplanetary magnetic field magnitude is
about 5 nT. The Earth is currently under the influence of a slow solar
wind with the speed of 350 km/s. The low-latitude coronal hole in the
northern hemisphere has passed the central meridian and we expect
arrival of the fast solar wind late on February 5. We expect quiet to
possibly active geomagnetic conditions in the next 48 hours.

Did my new email address somehow fall through the cracks when I changed isp? I did the usual "unscribe" "suscribe deal--but have only seen a couple of emails posted. Normally the board is fairly active.

I don't think so, Dale. I am sending this to the entire list . .
. if you get it, all should be OK. Last day or so it hasn't been too
active. There are a couple of DX and solar bulletins every day. Have
you been getting them?

SIDC SOLAR BULLETIN 05 Feb 2013, 1210UT
SIDC FORECAST (valid from 1230UT, 05 Feb 2013 until 07 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 05 Feb 2013 10CM FLUX: 107 / AP: 011
PREDICTIONS FOR 06 Feb 2013 10CM FLUX: 104 / AP: 014
PREDICTIONS FOR 07 Feb 2013 10CM FLUX: 106 / AP: 006
COMMENT: The strongest flare in last 24 hours was a C6.3 flare peaking
at 08:19 UT, on February 5. The flare originated from the NOAA AR 1669,
situated at the moment close to the East solar limb. We expect more
C-class flares, in particular from this active region. The
interplanetary magnetic field is about 3 nT. The solar wind speed is
stable having value of about 350 km/s. The small low-latitude coronal
hole in the southern hemisphere has reached the central meridian. We
expect arrival of the associated fast flow early on February 9. The fast
flow associated with the low-latitude coronal hole in the northern
hemisphere should arrive late today or early tomorrow. The geomagnetic
conditions in the next 48 hours should be quiet to possibly active.

If you connect to VE1DXI you also get DX Summit spots, but with the majority of the "bad" ones removed. About 15% of the spots on VE1DXI originate on DX Summit. On the other hand, about 85% of DX Summit's spots come from the cluster network.

PREDICTIONS FOR 08 Feb 2013 10CM FLUX: 100 / AP: 005
COMMENT: Four C-class flares were detected during last 24 hours. The
C-class flares are possible, in particular from the Catania sunspot
group 79 (NOAA AR 1667). The strongest observed flare was C8.7 flare
peaking at 00:21 UT, on February 6. The long duration flare originated
from the Catania sunspot group 79 (NOAA AR 1667) and was associated with
the type II radio burst and the CME. Due to the data gap it is not
possible to determine when the CME first time appeared in the SOHO/LASCO
C2 field of view. The C1.3 flare peaking at 03:16 UT on February 6, was
associated with the partial halo CME. From the currently available data
it seems that the CME was directed somewhat northward of the Sun-Earth
line. Therefore, only arrival of a CME-driven shock at the Earth is
expected. The additional information will be possible once the data are
available. The interplanetary magnetic field magnitude is about 4 nT.
The solar wind speed is still low, having value of about 320 km/s. The
fast flow from the small low-latitude coronal hole in the southern
hemisphere might arrive on February 9. The fast flow associated with the
low-latitude coronal hole in the northern hemisphere should arrive
today. We expect quiet to possibly active geomagnetic conditions in the
next 48 hours.

Well Tim, that was the purpose of the test. When I changed ISP, I had an email forwarding from another site. Therefor every DX-IS message that was posted to the group, was also posted to my email account. It took a little while to figure out, but the test is over. I will now get two copies of this email. :(

PREDICTIONS FOR 09 Feb 2013 10CM FLUX: 103 / AP: 012
COMMENT: Four sunspot groups were reported by Catania today, and non of
them was particularly active. The flaring activity at the C-class level
is possible, in particular from the newly emerged and fast evolving
Catania sunspot group 80. The solar wind speed is about 360 km/s. The
interplanetary magnetic field magnitude is slightly elevated reaching
the value of about 10 nT. The compression visible in the magnetic field
and density might be indication on the arrival of the fast flow
associated with the low-latitude coronal hole in the northern hemisphere.
The arrival of a CME-driven shock wave associated with the partial-halo
CME on February 6 can be expected on early February 10. We expect quiet
to possibly unsettled geomagnetic conditions in the next 48 hours.

SB DX ARL ARLD006
ARLD006 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

UGANDA, 5X. A large group of operators are QRV as 5X8C until February 18. Activity is with six stations on 160 to 10 meters using CW, SSB, RTTY, and PSK. QSL via F1NGP.

JAMAICA, 6Y. Yuri, VE3DZ will be QRV as 6Y2T as a Single Op/All Band entry in the CQ World Wide WPX RTTY contest. QSL to home call.

PHILIPPINES, DU. Chris, OE9MON, is QRV as DU6/OE9MON from Panay Island, IOTA OC-129. Activity is holiday style on 160 to 6 meters. His length of stay is unknown. QSL via LZ1JZ.

HUNGARY, HA. Special event station HG66MALEV is QRV until march 31 to commemorate the former Hungarian airline MALEV. Activity is on 80 to 10 meters using CW, SSB and various digital modes. QSL direct via HG4I.

GRENADA, J3. Roy, KE4TG is QRV as J38RF until March 8. Activity is on 80 to 10 meters, and possibly 60 meters, using CW, SSB and digital modes. QSL to home call.

GUINEA-BISSAU, J5. A group of operators will be QRV as J52HF from Cumura from February 10 to March 2 while helping with mission work. Activity will be in their spare time on the HF bands, including 6 meters, using SSB. QSL via I3LDP.

GUAM, KH2. Bob, 5B4AGN will be QRV as KH2/G3ZEM from February 9 to 13. Activity will be on 80 to 10 meters and possibly 160 meters. QSL via M0URX.

LUXEMBOURG, LX. A group of operators will be QRV as LX7I from Eschdorf in the CQ World Wide WPX RTTY contest as a Multi-2 entry. They will be a Multi/Single entry in the upcoming ARRL DX CW contest. QSL via LX2A.

MICRONESIA, V6. After his Guam operation, Bob, 5B4AGN will be QRV as V63ZM from Pohnpei, IOTA OC-010, from February 13 to 23. Activity will be on 80 to 10 meters. QSL via M0URX.

MONTSERRAT, VP2M. Will, AA4NC will be QRV as VP2ME from February 13 to 20. Activity will be on the HF bands using CW, SSB and RTTY. This includes an entry in the upcoming ARRL DX CW contest. QSL via operator's instructions.

CAMBODIA, XU. John, KF0RQ will be QRV as XU7ACQ from February 10 to March 18. Activity will be on 80 to 10 meters using CW, SSB and various digital modes. QSL to home call.

SOUTH SUDAN, Z8. Massimo, IZ0EGB is living in Juba and now QRV as Z81B. Activity is on 40 to 6 meters using SSB and various digital modes. He may be active from other areas as well. QSL to home call.

CAYMAN ISLANDS, ZF. Dave, N4QS is QRV as ZF2DP from Georgetown, Grand Cayman, IOTA NA-016, until February 12. Activity is on the HF bands using CW and SSB. This includes being active in the CQ World Wide WPX RTTY contest. QSL to home call.

TOKELAU, ZK3. Dieter, DJ2EH is QRV as ZK3T until February 20. Activity may be holiday style on 160 to 10 meters using mostly CW with some RTTY. QSL to home call.

THIS WEEKEND ON THE RADIO. The CQ World Wide RTTY WPX Contest, QRP CW Fox Hunt, SKCC Weekend Sprintathon, NCCC Sprint CW Ladder, YLRL YL-OM Contest, YL-ISSB CW QSO Party, SARL Field Day Contest, Asia-Pacific Spring CW Sprint, Dutch PACC Contest, KCJ Topband CW Contest, Louisiana QSO Party, OMISS QSO Party, New Hampshire QSO Party, FISTS Winter CW Sprint, RSGB 1st 1.8 MHz Contest and the AWA Amplitude Modulation QSO Party will certainly keep contesters busy this upcoming weekend. The ARRL School Club Roundup runs from February 11 to 15.

The Classic Phone Exchange is scheduled for February 11. The NAQCC Straight Key/Bug CW Sprint, CWops Mini-CWT CW Test and QRP CW Fox Hunt are scheduled for February 13. Please see February QST, page 90, and the ARRL and WA7BNM Contest websites for details.

20575. RE: [DX-IS] SPOT FILTERING

Yahoo group: DX-IS (2013)
Date: 2013-02-08 03:41:54 UTC
From: Lance Martin
Topic: 20481 Message: 20575

Hi Al,

I am surprised at your request on this one.
For me there have been quite a few occasions where W3LPL spots have been very useful ...even to me on the other side of the planet.
I actually like the spots as they come up usually on the first CQ, so you can get in before the pileup, if you are quick.
I must admit there have been numerous times when the spots are useless due to insufficient propagation at that band/time, however common sense usually kicks in here and I just ignore (and here again as you know, propagation can be highly variable at times... so you never know and I have been pleasantly surprised...).

Subject: [DX-IS] SPOT FILTERING

Can anyone tall me how to delete spots from W3LPL and his offspring? I find that 95 out of 100 W3LPL spots are useless to me and I don't want them. I also need to know what numbers to put in to delete all spots above 30 MHz to infinity.

Thanks in advance.

73

My feeling is that knowing a DX station is active on a given frequency is very valuable. Even if I can't hear him, he (or she) might build. I see no benefit to negative information . . . if you are hearing ZL9XXX on 160 at noon here, I want you to spot it because it tells me they are active on 160M and allows me to plot strategy.

However, Al is from a diffident time, and when he cut his teeth in the DX world, I'm sure things were different than they are today. There is no universal right or wrong. We what to know what W3LPL is hearing (and we might hear.) Al doesn't want to know what W3LPL is hearing (and he likely can't hear.) Don't sell Al short . . . he is #1 HR.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30208
SIDC SOLAR BULLETIN 08 Feb 2013, 1151UT
SIDC FORECAST (valid from 1230UT, 08 Feb 2013 until 10 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 08 Feb 2013 10CM FLUX: 103 / AP: 011
PREDICTIONS FOR 09 Feb 2013 10CM FLUX: 102 / AP: 013
PREDICTIONS FOR 10 Feb 2013 10CM FLUX: 100 / AP: 011
COMMENT: The solar activity is low with no C-class flares reported
during last 36 hours. Some C-class flaring is still possible, in
particular from the Catania sunspot groups 79 (NOAA AR 1667), and 80
(part of NOAA AR 1669). The solar wind speed is about 430 km/s and
slowly increasing, and the interplanetary magnetic field magnitude is
stable having value of about 7 nT. The fast flow associated with a
small, low-latitude coronal hole in the southern hemisphere might arrive
at the Earth early on February 9. The arrival of the halo CME from
February 6 (associated with the C8.7 flare) is expected today or early
tomorrow. The arrival of a CME-driven shock wave associated with the
partial-halo CME on February 6 (related with the C1.3 flare) can be
expected on early February 10. We expect unsettled to possibly active
geomagnetic conditions in the next 48 hours.

20580. RE: [DX-IS] SPOT FILTERING

Yahoo group: DX-IS (2013)
Date: 2013-02-08 14:04:21 UTC
From: VE1AL
Topic: 20481 Message: 20580

Good grief, Paul. I can hardly be called a diffident person because I am neither "Modest or shy because of a lack of self-confidence." I hope you meant that I am a "different" person and of that there is no doubt. ☺

I don't "appreciate" W3LPLs spots (nor the ones from his children) because those spots come from big antennas that are well beyond the reach of most of us. If the spots were, say, to come from VK6DU that HE is hearing VK0XYZ on 160 at noon our time then I would be more interested in that spot. Every day there are dozens of spots from W3LPL. I can hear only 10% of those spots. W3LPL is southwest of me and I should expect to be able to hear more of his spots. I am not particularly interested in W6s who spot Oceania, Asia or Africa but the opposite is of interest if those DX areas are spotting central and east coast NA.

When an Asian spots a North American, I am interested because it points out to me that the band is open to Asia. If a North American from the east coast (not W3LPL) using a "normal" setup spots an African, I feel there's a chance I will also hear that station.

So, yes, I am keen on eliminating W3LPL spots. Obviously many others do not feel so strongly about this. I will continue to look for a way to blocking those spots without changing my DXbase logging software.

Lots of snow coming this weekend, nothing but ham radio to play with and conditions are awful. Thank goodness for TV and a couple of great books I bought last week!!!

73

Al, VE1AL

My feeling is that knowing a DX station is active on a given frequency is very valuable. Even if I can't hear him, he (or she) might build. I see no benefit to negative information . . . if you are hearing ZL9XXX on 160 at noon here, I want you to spot it because it tells me they are active on 160M and allows me to plot strategy.

However, Al is from a diffident time, and when he cut his teeth in the DX world, I'm sure things were different than they are today. There is no universal right or wrong. We what to know what W3LPL is hearing (and we might hear.) Al doesn't want to know what W3LPL is hearing (and he likely can't hear.) Don't sell Al short . . . he is #1 HR.

73, Paul VE1DX

ARLP006 Propagation de K7RA

ZCZC AP06
QST de W1AW
Propagation Forecast Bulletin 6 ARLP006
>From Tad Cook, K7RA
Seattle, WA February 8, 2013
To all radio amateurs

SB PROP ARL ARLP006
ARLP006 Propagation de K7RA

Average daily sunspot numbers hardly changed from last week and the week prior, but average daily solar flux bounced back to about the level it was from two weeks ago.

Average daily sunspot numbers were down five points to 50.7, and average daily solar flux was up 7.7 points to 106.4.

Predicted solar flux values are 105 on February 8-10, 110 and 105 on February 11-12, 100 on February 13-14, 110, 115 and 110 on February 15-17, 115 on February 18-19, 110 on February 20-21, 105 on February 22, 115 on February 23-24, then 110, 105 and 100 on February 25-27, 95 on February 28 through March 2, 115 on March 3-4, 120 on March 5-6, and 125 on March 7-8.

The predicted planetary A index is 22, 15 and 10 on February 8-10, 5 on February 11-18, 8 on February 19, 5 on February 20-21, then 15, 10 and 8 on February 22-24, 5 on February 25-28, 10 and 8 on March 1-2, 5 on March 3-7, and 8 on March 8-9.

OK1HH says geomagnetic activity should be quiet to unsettled on February 8, quiet to active February 9-10, quiet to unsettled February 11-12, quiet to active February 13-14, quiet to February 15-16, quiet February 17-21, active to disturbed February 22-23, quiet to unsettled February 24-25, quiet on February 26-27, mostly quiet February 28, quiet to active March 1, quiet to unsettled March 2, and mostly quiet on March 3.

I've been looking at the predictions for planetary A index and solar flux, and it is interesting to note how they change over time. The planetary A index prediction for February 3 for over a month was a value of 5, until January 31, when it changed to 18. Then on February 1 it was 15, and the same on February 2. But on February 3, the actual value was 4. A similar thing happened with the February 4 prediction. It was 5 up until January 31, when it changed

to 15, then for March 1 and 2 it was 12, then it changed back to 15 on March 3. The following day, March 4, the actual value was 4 again, just as it was the day earlier.

On February 7 the planetary A index prediction for February 8 is 22, and on February 6 the prediction for February 8 was 8. Prior to that it was 5. We will see the actual value at the end of the day today, February 8.

We heard from Fabrizio Valdirosa, a shortwave listener in Italy, who inquired about the average sunspot number for all of 2011. We mentioned recently that it was 29.9, but Fabrizio thought this was too low while looking at the monthly averages at, http://www.swpc.noaa.gov/ftpdir/weekly/RecentIndices.txt.

I recalculated by again totaling all of the daily sunspot numbers for 2011, which is 29,239. Divide that by 365 days, and we get an average daily sunspot number for that year of 80.1. I have no idea how 29.9 was previously calculated, except that I somehow came up with a total for the year of 10,913 instead of 29,239 and it was my own error. So the average yearly sunspot numbers for 2008-2012 were 4.7, 5.1, 25.5, 80.1 and 82.3.

Don Street, HS0ZEE wrote to ask about seasonal variations mentioned in the bulletin, and asked, "Here in Asia, Spring and Fall are not so well defined, perhaps for reader like me it would be helpful to mention which month you refer to." We are just referring to the seasons as the time between Equinox and Solstice, Solstice to Equinox, etc. This page gives the dates for the seasonal changes:

http://wwp.greenwichmeantime.com/longest-day/equinox-solstice-2010-2019.htm.

Don also likes the HAP charts for HF propagation produced by the Australian government and notes, "I find the charts near to actual band conditions. Unfortunately they are based on the previous hours observed conditions, but still very useful."

Here is the link Don refers to:

http://www.ips.gov.au/HF_Systems/6/6/1.

Bill Bliss, W1WBB of Portsmouth, Rhode Island wrote: "Don't believe I've seen these two new forecast products from the SWPC mentioned in your weekly column, found via link on their home page: http://www.swpc.noaa.gov/index.html

"They are issued twice daily and I've found them helpful as an additional tool for predicting near-term propagation on the HF/MF amateur bands. Links for feedback on both the 3-Day Forecast and the Forecast Discussion are also provided. Positive feedback on these 'experimental' products from the amateur community (accepted up through Feb. 12) may help ensure they become a permanent part of SWPC's Data and Products area."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for January 31 through February 6 were 47, 65, 54, 79, 30, 41, and 39, with a mean of 50.7. 10.7 cm flux was 102.7, 103.7, 111.8, 111.1, 106.7, 105.1, and 103.5, with a mean of 106.4. Estimated planetary A indices were 1, 4, 9, 4, 4, 2, and 2, with a mean of 3.7. Estimated mid-latitude A indices were 1, 4, 9, 6, 3, 2, and 2, with a mean of 3.9.

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

CO - Celebrating the 20th anniversary of the Russian Robinson Club, a large team of operators (namely CO2WF, CO6LC, CO8ZZ, N3QQ, R3FA, RA3NAN, RK7A, RW3RN, RZ3EC, RZ3EM and UA3EDQ) will be active from three Cuban IOTA groups as follows:
11-14 February T48RRC Moa Grande Island (NA-218)
14-16 February T47RRC Coco Island (NA-086)
16-18 February T46RRC Santa Maria (NA-204)
They plan to be active on 160-10 metres CW, SSB and digital modes with three stations, and to participate in the ARRL DX CW Contest as T46T from Santa Maria Island. QSL via OQRS (to be activated for both bureau and direct requests on http://cuba2013.ru/) and LoTW; traditional direct requests to Eugene Shelkanovtcev, P.O. Box 70, Orel, 302028, Russia. [TNX RZ3EM]
FM - Gildas, F6HMQ and Michel, F6GWV and will be active as TO22C from Guadeloupe (NA-102) from 17 February to 3 March. They plan to be QRV on all bands, with a focus on 160 metres. QSL via F6HMQ. [TNX NG3K]
FM - Valery, R5GA will be active as FM/R5GA from Martinique (NA-107) on 11-17 February, including an entry in the ARRL DX CW Contest as TO5X. Outside the contest, he is likely to concentrate on 30, 17 and 12 metres. QSL via UA3DX and LoTW. [TNX OPDX Bulletin]
FO0_ci - The TX5K DXpedition to Clipperton Island [425DXN 1129] is expected to start on 18 February, when the vessel "Shogun" will leave San Diego, with planned QRV dates from 28 February to 10 March. The current list of operators includes DD2CW, DJ2HD, DJ5IW, DJ7EO, DJ9RR, DL1MGB, DL3DXX, DL5CW, DL5LYM, F1NGP, I5JHW, KE3D, KF4ZZ, KK6EK, N6XG, NP4IW, OZ1IKY, SP5XVY, US0VA, US5WDX, W7GJ, WA6O, WJ2O and XE1L. There will be two operating sites, ten complete HF stations with verticals on the beach and one separate station for 6 metres (including EME). TX5K will use an advanced version of DXA, the satellite-linked system that displays near-real-time log data (it can be accessed from the home page below, or directly at www.dxa2.org). QSL via N2OO. The logs will be uploaded to LoTW within six months after the end of the DXpedition. Further information, including a link to the expedition blog where to read and enter comments) can be found at www.tx5k.org.

HK - Alain, F6BFH was active as HK0/F6BFH from San Andres (NA-033) on
5-8 February, and is now active with the same callsign from
Providencia (NA-049) until the 11th. On 13-15 February he will
operate as HK1/F6BFH from Tierra Bomba (SA-040, with HK1/HK3JJH).
QSL via home call, direct or bureau (email requests for bureau
cards to f6bfh[@]f6bfh.net). [TNX F6AJA and Les Nouvelles DX]
HA - Celebrating the 30th anniversary of club station HG1S, special
callsign HA30S will be in use until the end of the year. More
information on qrz.com [TNX HA1DAE]
KG4 - The Guantanamo Bay ARC station suffered extensive damages when
hurricane Sandy hit Cuba. Ed KN4KL/KG4KL (16-23 February) and
Bill, W4WV/KG4WV (17 February-1 March) will be there to "get all
antennas fixed and the shack back in operating condition". They
plan to be QRV "as time permits after repairs are completed". QSL
via home calls. [TNX The Daily DX]
PJ2 - Look for PJ2DX, PJ2/N0VD, PJ2/W9VA, PJ2/NP2L, PJ2/K9KM, PJ2/K9QVB
and PJ2/W9NJY to be active be active from Curacao (SA-099) on
13-20 February, including participation in the ARRL DX CW Contest
as PJ2T. QSL PJ2DX via LoTW (or to Geoff Howard, P.O. Box 1147,
Coeur d'Alene ID 83816-1147, USA), QSL PJ2/N0VD via W3HNK, QSL
PJ2/W9NJY via WD9DZV, QSL PJ2T via LoTW (or W3HNK), others via
home call.
VP2M - Will, AA4NC will be active as VP2ME from Montserrat on 13-20
February, including an entry in the ARRL DX CW Contest. Outside
the contest he will operate CW, SSB, RTTY and on 30, 17 and 12
metres. QSL via home call and LoTW. [TNX NG3K]
XV - A team from the Lufthansa Amateur Radio Club (namely DD8ZX,
DH6ICE, DH0RAK, DK7TF and DK8ZZ) will be active as XV2DLH from
Vietnam on 16-25 February. QSL via DK8ZZ and LoTW.
ZS8 - Contrary to the previous announcement [425DXN 1133], ZS1BCE will
not join the overwintering team on MarionIsland this year. However,
Carson ZR6CWI has been appointed as the Space Weather Engineer at
Marion from April 2013 to May 2014. He plans to be QRV on the
amateur radio bands, "at this stage SSB only". No call sign has
been allocated yet, but his QSL manager will be ZS1HF. [TNX DX
World]
ZS_ant - Adam, ZS7V is taking up the position of electronic engineer & team
leader at the South African National Antarctic Expedition's
station SANAE IV. He plans to be QRV (SSB only) in late February,
and to remain at the base until February 2014. QSL via ZS1HF.

Direttore Responsabile I2VGW

18TH IOTA DINNER ---> The 18th Annual Islands On The Air (IOTA) Dinner will
be held on Friday, 19 April at the Visalia Conference Center, in
conjunction with the 64th International DX Convention. Further information

on this event at www.dxconvention.com/pages/dinners-iota.html [TNX N6VR]

425 DX NEWS MAGAZINE ---> The January 2013 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

AFGHANISTAN ---> Salvatore, IZ1BWB is the operator of the Italian Army Alpine Brigade "Taurinense" station YA/IZ1CCK in Herat, Afghanistan. He and Stefano, I0KTE will be QRV on 10 February at 9 UTC on 21195 kHz. QSL via IZ1BWB. [TNX IK1MTX]

HELP NEEDED ---> Antoine, 3D2AG plans to be active again as 3D2AG/p from Rotuma in late March/April. He is looking for spare parts for his "14-years-old ICOM 706-MKII, which is faulty (no TX). If anyone can help please contact me, so that I can be operational on 6m from Rotuma". His email address is on qrz.com

INTERNATIONAL DX CONVENTION ---> The 9th International DX Convention organized by DX Italia will take place on 28 April at the Savoy Beach Hotel, Paestum (Salerno). Please visit www.dxitalia.it for full details on the programme, or e-mail iz8...@... for further information. [TNX IZ8EDJ]

QSL VIA G3SWH ---> Phil, G3SWH has been also been appointed as QSL manager For TF4M's various operations as follows: 4U/TF1MM, 4U1ET, 4X/TF1MM, 9A/TF1MM, 9A6MM, OD5/TF1MM, TF1MM, TF1MM/4L, TF1MM/YU1, TF1PS, TF1PSN, TF3MM, TF4MM, TF6MM, TF6PS, TF7PS, VK8CW. There are log searches for all activities at www.g3swh.org.uk [TNX G3SWH]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Luciano Lucini, IK2QPO (ik2qpo[@]425dxn.org).

WRTC2014 JUDGING COMMITTEE ---> Te judging committee that will be responsible for certifying the results of the 2014 World Radiosport Team Championship competition will be formed by David Sumner (K1ZZ, Chief Judge), Nodir Tursoon-Zadeh (EY8MM), Don Field (G3XTT), Dan Street (K1TO) and Dick Norton (N6AA). More information is available at www.wrtc2014.org

20584. cluster issue fixed

Yahoo group: DX-IS (2013)
Date: 2013-02-08 19:28:17 UTC
From: VE1AL
Topic: 20584 Message: 20584

For anyone interested, I have finally figured out the issue of expelling W3LPL from my cluster connection. So, I happily report that I am 100% W3LPL-free. :-)

Thanks to those who pointed the way!

I too was bothered by all the worthless spots until last night. W3LPL spotted A45XR on 30 while I was not getting anywhere with 5X8C on 30. I went up to Chris' frequency where he was calling CQ and one call added #324 to my 30 meter collection. Thanks W3LPL

That's good, Al. Seeing as you are farther north than me, you likely wouldn't have needed the W3LPL spot a little while ago of P5/VK6DU calling for east coast NA. I managed a 559 on 20M, and it was a new one on CW. Glad Lance went, even if it were for just 10 hours and he's now QRT. DXCC Desk pre-approved too. Anyhow, like I said, you are ~300 miles farther north and with conditions like they are, you likely wouldn't have been able to copy. :-)

I'm sending VK6DU an extra couple of green stamps for that QSL card, even though he is going to upload all of his logs to LoTW. Some of them you really want to have paper QSLs for! <G>

I'd never thought to listen on 14.054 MHz if not for the spot! :-)

A rare instance, indeed, Buzz. I'm sure someone else would have spotted Chris.

Congrats on 324 on 30. WOW!

Cheesh, Paul you could have called me on the phone! " :-(((((

Did get a couple of good ones on 12 & 15 today -- 3D2R and ZK3. Just that blasted P5 keeps eluding me.

Topic: 19749 Message: 20590

```
:Issued: 2013 Feb 09 1402 UTC
:Product: documentation at http://www.sidc.be/products/meu
#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30209
SIDC SOLAR BULLETIN 09 Feb 2013, 1328UT
SIDC FORECAST (valid from 1230UT, 09 Feb 2013 until 11 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 09 Feb 2013 10CM FLUX: 104 / AP: 007
PREDICTIONS FOR 10 Feb 2013 10CM FLUX: 103 / AP: 010
PREDICTIONS FOR 11 Feb 2013 10CM FLUX: 102 / AP: 005
COMMENT: The only C-class flare reported during last 24 hours was the
long duration C2.4 flare peaking at 06:40 UT. The flare was associated
with eruption of a filament channel between the Catania sunspot groups
79 (NOAA AR 1667), and 80 (NOAA AR 1670), coronal dimming and
post-eruption arcade. Occasional C-class flares are possible but not
very probable. The associated CME was directed northward and appeared
first time in the SOHO/LASCO C2 field of view at 06:48 UT. From the
currently available data it seems that the width of the CME was about
100 degrees. Due to the position of the CME source region close to the
central meridian, it is possible that this CME will arrive at the Earth.
More exact prediction will be available with the arrival of the new data.
The solar wind speed has reached maximum value of about 480 km/s late on
February 8. The speed of the solar wind is decreasing and is now around
400 km/s. The interplanetary magnetic field magnitude is about 5 nT. The
halo CME from February 6 (associated with the C8.7 flare) might still
arrive today. The arrival of a CME-driven shock wave associated with the
partial-halo CME on February 6 (related with the C1.3 flare) can be
expected on early February 10. We expect quiet to possibly unsettled
geomagnetic conditions.

TODAY'S ESTIMATED ISN : 035, BASED ON 07 STATIONS.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30210
SIDC SOLAR BULLETIN 10 Feb 2013, 1203UT
SIDC FORECAST (valid from 1230UT, 10 Feb 2013 until 12 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 10 Feb 2013 10CM FLUX: 108 / AP: 003
PREDICTIONS FOR 11 Feb 2013 10CM FLUX: 108 / AP: 012
PREDICTIONS FOR 12 Feb 2013 10CM FLUX: 109 / AP: 011
COMMENT: The background X-ray flax has a low B-level. There were no
C-class flares during last 24 hours. C-class flares are still possible,
in particular from the Catania sunspot group 80 (NOAA AR 1670) which has
the beta-gama configuration of its photospehric magnetic field. Earth is
currently inside a slow solar wind with a speed of about 350 km/s. The
interplanetary magnetic field magnitude is stable with value of about 5
nT. The partial halo CME from February 9 might arrive at the Earth on
February 12 producing unsettled geomagnetic conditions. We expect
geomagnetic conditions in the next 48 hours.

TODAY'S ESTIMATED ISN : 029, BASED ON 12 STATIONS.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, NJ1Q & W1AW, W1UL, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K5PI, K6VVA, KH6BZF, N6VR, W6NV, WB6RSE, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, DJ0IF, DK8JB & The DX News Letter, DL1SBF, DK8ZZ, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OZ6OM & 50 MHz DX News, IK7JWX, Pete's DX-Newsdesk, RSGB IOTA Web Site, RZ3EM, Sixitalia Weekly, VA3RJ & ICPO, VE3DZ, the VHF-DX-Portal (MMMonVHF) and YO6MP for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-February, through Sunday, 10th-February there were 225 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA (Rare IOTA). An International group, along with the Tunisian Radio Amateurs and the Engineering University of Gabes, are planning a second IOTA DXpedition to Djerba Island (AF-083, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), between April 29th and May 6th. The Association

des Radio Amateurs Tunisiens (ARAT) is expected to receive the callsign TS8TI on March 15th. Current operators/club participants mentioned are 3V8SA (ARCS of Tunisian Scout), 3V8ST (ARC of Tunis), 3V8ESG (Department of Communications and Networking National Engeneering School of Gabès), 3V8SF (Scout Radio Club of Sfax), Leopoldo/I8LWL, Fred/IK7JWX (Team Leader), Antonello/IK2DUW (QSL Manager), Titti/IK8GQY (YL), Ferruccio/ IK8TEM, Ampelio/IS0AGY, Rosy/IW2NLC (YL), Ashraf/KF5EYY, Danny/ON4ON, Harvey/ON5SY and Pat/ON7PQ. Activity will be on all HF bands, including the 30/17/12 meter bands and the CW, SSB, RTTY, AMTOR and PSK31 modes. They are looking for operators, sponsors and individual contributions.

5X, UGANDA (Update). Members of the F6KOP team are now active as 5X8C until February 18th, from a location some 20 Km from Entebbe airport. The crew has been on the air since February 7th, around 1530z. Reports indicate that some individuals are seeing their QSOs confirmed via LoTW. Log is being uploaded to ClubLog. Check your QSOs at:
http://www.5x2013.com/index.php/online-log
However, the following has been added on Clubog page: "Due to a high number of dupes made by guys trusting the online-log instead of their ears, we decided to STOP the live upload." As this was being typed, the 5X8C team has made over 23k QSO with about 9k unique callsigns. Remember, Yann, F1NGP, is their QSL Manager (100% OK Direct, ClubLog's OQRS, Bureau and LoTW). For more details and updates, see: http://www.5x2013.com

6Y, JAMAICA. Yuri, VE3DZ, is once again active as 6Y2T from Jamaica (NA-097) until February 19th. He was active this past weekend during the CQ WW WPX RTTY Contest, but he is also expected to be in the upcoming ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/High-Power entry. Activity outside of the contest will be on 160-10 meters, including the 30/17/12 meter bands and using CW, SSB and RTTY. QSL via VE3DZ.

7T50/7T9, ALGERIA. Members of the Algerian Radio Amateurs (ARA) will activate special event callsigns 7T9A and 7T50ARA to celebrate the 50th anniversary of the Algerian Amateur Radio Association. QSL both callsigns by the Bureau or direct to: PO Box 1, Algiers RP 16000, Algeria. (NO IRCs)

8P, BARBADOS. Gerry, W1VE, will be active as 8P9RM from Barbados (NA-021) starting February 26th. Activity will be on 160-6 meters, but with a focus on CW and the low bands. He will end his activity by being in the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/Low-Power entry using the callsign 8P1V. QSL via W1VE.

9H, MALTA. Operators Adam/DJ0IF and Mek/SP7VC will be active as 9H3RX and 9H3KK, respectively, from Gozo Island between February 13-19th. Adam informs OPDX that he will be active as 9H3RX during the ARRL DX CW Contest as a Single-Op/All-Band entry. Outside of the contest, Adam will be active on CW (focus on low & WARC bands). Mek will be active on SSB (all bands). QSL via their home callsigns.

9U, BURUNDI (Update). An international team of operators from ON, PA and GM will be on the air from Bujumbura between February 14-23rd (2013). In total they will have 9 operators and four stations and airing the call-

sign 9U4U. Operators currently mentioned are Patrick/ON4HIL, Theo/ON4ATW, Marc/ON6CC, Luc/ON4IA, Ronald/PA3EWP, Marc/ON4AMX, Stefaan/ON4FG and Franky/ON7RU. Pilot station will be Bjorn/ON9CFG and a guest operator will be Anton/ON6NL. Activity will be on 160-10 meters using CW, SSB and RTTY. Suggested frequencies will be:
CW - 1828.5, 3503, 7003, 10123, 14033, 18083, 21033, 24903 and 28033 kHz
CW (RX) - 1833-1838/US/Overall and 1815-1820/JA; other freq. listen up
SSB - 3773, 7083, 14183, 18153, 21283, 24963 and 28943 kHz
SSB (RX) - 3805-3810/US, 3802/JA, 7187-7192/US/JA; other freq. listen up 5-10
RTTY - 7044, 10142, 14088, 18104, 21082, 24924 and 28108 kHz
RTTY (RX) - Listen Down for JA on 40m; Overall listening Up/Down
QSL Manager will be M0URX. A Web site is now online at:
http://www.9u4u.be
This DXpedition will also has a Twitter page <https://twitter.com/9U4U>.
Also, this Expedition is organized by the "Belgian Rockall Team". The latest press release from the 9U4U Web page as of February 9th, from the 9U4U team states: "All systems are go! Today we packed all gear into the suitcases and are ready to leave. The computer network was tested with 4 stations and the equipment was double checked, and properly labeled for transport, so no mistake could be made once we begin with our setup in Burundi. In total we have 21 suitcases, 23 kg each makes 483 kg, with only radio stuff. We have much more equipment than the last expedition (TN2T). Below you see the happy faces from a great team... (picture on their Web page at <http://www.9u4u.be/images/stories/global_picture.jpg>"

CUBAN IOTA DXPEDITION. Members of the Russian Robinson Club (RRC), a team of highly skilled island activators, will be active from the following IOTAs and callsigns to celebrate the 20th anniversary of the RRC:
T48RRC ☐ Moa Grande Island (NA-218) between February 11-14th
T47RRC ☐ Coco Island (NA-086) between February 14-16th
T46RRC ☐ Santa Maria Island (NA-204) between February 16-18th
T46T - Santa Maria Island (NA-204) during the ARRL DX CW Contest (February 16-17th) as a Multi-Single or Multi/2 category
Operators mentioned are Winston/CO2WF, Orelvis/CO6LC, Raúl/CO8ZZ, Yuri/N3QQ, Igor/UA3EDQ, Oleg/R3FA, Andy/RK7A, Sergey/RA3NAN, Alex/RW3RN, Eugene/RZ3EC and Andy/RZ3EM. Activity will be on 160-6 meters, including the 30/17/12 meter bands, using CW, SSB and the Digital modes with 3 stations on the air at the same time on different bands and modes. Their suggested frequencies are:
CW - 1831.5*, 3520, 7020, 10120, 14020, 18070, 21020, 24890 and 28020 kHz
* RX 1825/JA and 1830/EU & USA
SSB - 1842, 3790*, 7060, 14260, 18140, 21260, 24960 and 28460 kHz
* RX 3775-/3825+
RTTY (TX) - 1840.7, 3585, 7038, 10132, 14082, 18097.7, 21082, 24922 and 28082 kHz
RTTY (RX) - 1855+, 3586+, 7039+, 10133+, 14083+, 18099+, 21083+, 24923+ and 28083+ kHz
6m - 50103/CW/beacon (RX up 2+) and 50115/SSB (RX up 5+)
An online log will be available. Three options to QSL. An OQRS will be

available for both direct and Bureau QSLs. Direct QSL can be sent to:
Eugene Shelkanovtcev, PO Box 70, Orel, 302028, RUSSIA (NO IRCs please).
All QSOs will be uploaded to LoTW. For more details, visit the Web page
at: http://cuba2013.ru

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting
the following operations for DXCC credit:
** 5X8C - Uganda; Current Operations commenting in 2012
** T6BP ☐ Afghanistan; Current operation commenting 2011
T6TJ ☐ Afghanistan; Current operation commenting 2012

If you've had cards declined (except LoTW applications) please send an
E-mail to bmoore@arrl.org to be placed on the list for an update.
** These operators have uploaded logs to LogBook of The World (LoTW).

Note: If your QSOs were only via LoTW they were not imported to DXCC
since at the time of your application these were not yet approved. LoTW
QSOs can be reclaimed via your next submission only.

ET, ETHIOPIA. "The Daily DX" reports that before Ken, K4ZW, heads to Juba,
South Sudan (see above), he will go to Addis Ababa and activate the ET3AA
club station during the second half of the ARRL DX CW Contest and again
the weekend of February 2224th. ET3AA QSOs made by Ken can be confirmed
by N2OO.

FM, MARTINIQUE. Ted, K7TRK, who was active as KP4/HB9WDF (Puerto Rico)
and FY/HB9WDF (Kourou, French Guyana) this past week, will be active as
FM/HB9WDF from Martinique between February 11-21st. Activity will be
holiday style on the satellites (AO-7, FO-29, VO-52, SO-50 and others
if they are active), and the HF bands on PSK-31 and sometimes SSB. QSL
via K7TRK, direct, by the Bureau, LoTW and eQSL.

FY, FRENCH GUYANA. Larry, F6FVY, will be active as FY5KE in the ARRL DX
CW Contest (February 16-17th) as a Single-Op/Single-Band (20m)/High-Power
entry. QSL via LoTW, by the REF Bureau or direct to FY5KE.

GW100, WALES. Adrian, MW1LCR, will be using the special callign GW100C
during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band
entry. QSL via MW1LCR. The special contest callsign is issued to celebrate
100th anniversary of the RSGB. Currently this is the only planned use of
the callsign from Wales during a SSB contest.

IOTA NEWS.............
OC-161. Members of the YB Land DX Club are planning to activate Nias
Island later this month (dates to bet confirmed). The team
will also apply to use the YE6N callsign, which was last used
in 2006 from the same island, or they may sign individual
callsigns/6. More details will be forthcoming.

SA-030. Members of the South Radiogrupo (SUR) of Uruguay will be active
as CV5A from Flores Island (WLOTA LH-0528, RGS CX-104, ARLHS
URU-001) between February 21-24th. Activity will be on all HF

bands, 160-6 meters. QSL via CX2ABC direct only. For more
details and updates, see: http://www.radiogruposur.org

SA-040. Alain, F6BFH, who was active from San Andres as HK0/F6BFH this
past week, and is currently active from Providencia as HK0/F6BFH
until February 11th, will team-up with Pedro/HK3JJH and be
active as HK1/F6BFH and HK1/HK3JJH from Tierra Bomba between
February 13-15th. QSL via the Bureau (E-mail requests can be
sent to f6bfh@...).

KH6BZF PROPAGATION FORECAST/REPORT (February 11-17th)....

M5, ENGLAND. Operators Olof/G0CKV, Kazu/JK3GAD, Seppo/OH1VR and Oliver/W6NV
will be active as M5E from the Marconi Center in Cornwall, England, (see:
http://marconi-centre-poldhu.org.uk) during the ARRL DX CW Contest
(February 16-17th) as Multi-2 entry. Their station will be on the bluff
at Poldhu Point, overlooking the Atlantic Ocean. QSL via G0CKV.

NODXA ADDS A CONDITION TO THEIR DONATION/FUNDING POLICY. The members of
the Northern Ohio DX Association during their February meeting voted (after
a lengthy discussion) to follow the "International DX Association's"
(INDEXA) example/guideline by adding a condition that must be met by
DXpeditions when requesting financial help.
As of February 1st, all DXpeditions requesting funds from NODXA will
now be sent the following question/statement before the release of any
funds:
"Members of NODXA believes that funds contributed to a DXpedition should
be used only for that purpose. If there is a surplus of funds after a
DXpedition is completed, a refund should be made, using some logical
approach, to help offset the personal expenses incurred by individual
team members and/or returned to the major sponsors. NODXA is not
concerned how the refunds are made, but does believe that any excess
funds should not be held by the organizers for other purposes or
projects. Do you agree? Yes or No"

P4, ARUBA. John, W2GD, will be active as P40W from Aruba (SA-036) during
the ARRL DX CW Contest (February 16-17th). He states that this is a last
minute trip. Operations outside of the contest are usually on 160/80m and

30/17/12 meters as time permits. Watch 160m on the hour and 80m on the half hour. QSL via LoTW or direct to N2MM. Logs will be loaded on LoTW upon his return to the USA.

NEW IRC INTRODUCED. The ARRL Letter reports [edited], "The Universal Postal Union has introduced the newest model of the International Reply Coupon (IRC): The Doha model -- so named for the 25th Universal Postal Congress that took place in Doha, Qatar, in October 2012 -- will replace the current model, known as the Nairobi model. Although the U.S. Postal Service no longer sells IRCs, they are still available in other countries and post offices in the U.S. are mandated to redeem them. The Doha model IRC will be available for purchase on July 1, 2013. It is valid for exchange until the end of 2017. The Nairobi model remains valid until December 31, 2013. Read more at:
http://www.arrl.org/news/new-international-reply-coupon-introduced "

MORE QSLs MANAGED BY G3SWH. Phil, G3SWH, has also been appointed as QSL Manager for Thor's, TF4M, various operations as follows: TF1PSN, TF1PS, TF6PS, TF7PS, TF6MM, TF1MM, 4X/TF1MM, TF1MM/YU1, 9A/TF1MM, 9A6MM, OD5/TF1MM, 4U/TF1MM, TF1MM/4L, VK8CW, 4U1ET, TF3MM and TF4MM. There are log searches for all activities are at:
http://www.g3swh.org.uk

USPS TO SUSPEND SATURDAY MAIL DELIVERY. The U.S. Postal Service announced this past week that effective the week of August 5th, it will stop Saturday delivery of most mail, including periodicals, first-class and standard mail, which is used most often for direct-mail advertising. However, packages, mail-order medicines, priority and express mail will still be delivered on Saturdays. ADDED NOTE: The U.S. Congress may try

to fight this! Stay Tuned!

QSL RECEIVED VIA LoTW: 5P1KZX, 5X8C, A61K, A45XR, D3AA, DK0PM, DL1LQA, DL3GD, DM5BB, FK8DD, FY5PO, FY8PE, HC6EP, JA4DND, JA5TNF, JA7QVI, JF3SUL, JH0INP, LB2TB, LY7Z, MU/PA9M, NP2KW, OK2PAY, PA0MJM, PA3UL, PR8ZX, PY2FN/P, PY2XB/1, RX6LG, SM6BZV, SP7HOV, SQ7LRT, SV1ACL, TM7T, TX6BB, UA3RF, UX2KA, V5/DL3XX, VE2OJ, VE4EAR, VP2MRV, VU2NKS, YZ1AU, ZF2BJ and ZX2S

QSLS RECEIVED VIA MAIL: 1A0C, 2O12L, 3C0C, 3W2J, 4S7NE, 5T0SP, 7O6T, 9M6/JA4DND, A92GR, C31CT, H40FN, HK3C, IS0/K7QB, J6/N7QT, JD1BMM, K8SDK/C6A/MM, OD5NJ, OJ0R, T8CW, TI8AA, UU5J, V5/DL3DXX, V63XG, VO2NS, VU3BPZ/MM, VU3BPZ/P, W7AVO/VK9L, W8XGI/KH2, YB0A, Z21BB and Z81Z

QSLS RECEIVED VIA THE BUREAU: DL0FHD, TK4W, V5/DJ2HD, VK9HR and VO1/K5KG

RI1, SOUTH SHETLAND ISLANDS. The "DX World.net" reports that Oleg, ZS1OIN (UA3HK), is the new Chief of Bellingshausen Base on King George Island, South Shetland Islands (AN-010), and will be active on all bands, mostly CW, after February 12th, as RI1ANU instead of the normally used RI1ANF callsign. He plans to stay at the base until March 31st. QSL via ZS1OIN.

T2, TUVALU. Tim, NL8F, is expected to be active from Tuvalu between March 19th and April 2nd. His callsign is not yet known, but he will obtain his license upon his arrival on Tuvalu. Activity will probably be mostly SSB. QSL via K8NA.

T6, AFGHANISTAN. Eric, K9GY, will be active as T6MO from the Helmand Province (Grid MM21) during the CQ 160 Meter SSB Contest (February 22-24th) as a Single-Op/Low-Power entry. He mentions that this will be a limited effort; mainly from sunset to 1730z. Eric will also be active during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/Low-Power entry. He states that activity will be mainly 20 meters (unless 15 and 10 meters is open to USA). Eric will also be active during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Single-Band (possibly 15 or 10m)/Low-Power. QSL via LoTW or to K9GY (see QRZ.com) direct or by the Bureau.

TI8, COSTA RICA. Operators Keith/W4KTR, Eddie/K4UN, Bob/W4BW, Lex/W4XO, Carlos/TI2KAC, Juan Carlos/TI2JCY and Mauricio/TI4ZM will be active as TI8M from Costa de Pajaros, during the ARRL DX SSB Contest (March 2-3rd) as a Multi-? entry. QSL via TI2KAC, direct preferred but bureau "OK". Their operations will be on 160-10 meters. Look for operations before the contest.

TO1, REUNION ISLAND (WFF Op). A team of operators from Reunion Island will be active as TO1PF from the UNESCO World Heritage site of "Piton de la Fournaise" [Peak of the Furnace] volcano during the following dates: February 23-24th, May 11-12th and August 3-4th. Operators mentioned are Jerome/FR1JB, Yvon/FR1GZ, Jacky/FR4NP, FR4DJ, Michel/FR4OA, FR4OM, FR4OO, François/FR4OS, FR4OU, FR4OV, FR4PE, Bruno/FR4PF, Jacques/FR4PG, Alain/FR5CU, Patrick/FR5FC and Philippe/FR5HV. The volcano is a shield volcano on the eastern side of Reunion island (AF-016, DIFO FR-001, WWFF FFF-011,

WLOTA 1812), with an elevation of elevation 2632m. It is currently one of the most active volcanoes in the world. Activity will be on all HF bands and modes. QSL via FR1GZ.

TX5, CLIPPERTON ISLAND (Update). The following update was posted on February 5th, on the TX5K Clipperton Island DXpedition Web page [edited]: "Nearly all the equipment has been assembled, and most has been packed. Transportation will be by truck on February 12th. The boat (Shogun, San Diego) will be loaded on Friday, February 15th.
We have implemented a new domain for the expedition: <www.TX5K.org>.
We have also implemented a BLOG <http://ky6r.com> (link is also on the TX5K homepage) where you can read and enter comments.
We have completed development and emplacing of DXA (version 2). It can be accessed by the link on the TX5K home page, or directly at <www.dxa2.org>. Until the DXpedition goes QRV, the display will be a simulation. Comments on the blog before, during, or after, are most welcome.
The webmaster during the DXpedition will be Rich, KY6R. Please send any news stories or other interesting information to him for possible sharing on the blog or general publicity."

V3, BELIZE. Operators Robert/K5PI (V31AT), Mark/AG9A and John/WC0W (V31TP) will compete in the ARRL International DX CW Contest (February 16-17th) as a Multi-Single entry from Cahal Pech in Western Belize. They will use V31TP for the contest callsign. The trio will be in Belize between February 11-18th, so there will be operations before and after the contest. They will focus on CW and the 30/17/12 meter bands mostly. QSL to their home callsigns.

VISALIA DX CONVENTION NEWS.....
* Steve, WB6RSE, reports: "The 2013 Visalia Top Band Dinner will be held on April 19, 2013. There will be a buffet dinner, door prizes including a Hi-Z Antennas Hi-Z 4 level 2 (PLUS6 Amps) System and a special program: Les Kalmus, W2LK: 'ZL9HR - The Auckland and Campbell Island 160m Challenge.' Cost is 40 (USDs) per person. For further details and reservations, please see:
http://www.dxconvention.com/pages/dinners-topband.html "

* The 18th annual Islands On The Air (IOTA) Dinner will be held in conjunction with the 64th annual Visalia International DX Convention on Friday, April 19, 2013, in the San Joaquin Room at the Visalia Conference Center, Downtown Visalia, 303 East Acequia, Visalia, CA.
See Convention Web site for details on the DX Convention:
http://dxconvention.com (Please note change of Convention site.)
This dinner is open to all who are active in the IOTA program or want to see beautiful pictures of far away islands. If you do not wish dinner, you may sit and enjoy the IOTA program following the dinner.
The IOTA Programs/Speakers as of February 8th, are: Don/G3XTT and Rick/K6VVA. For complete details, see:
http://www.dxconvention.com/pages/dinners-iota.html

VP5, TURKS AND CAICOS. Operators Urb/W1UL and his XYL Pat/W2PKV will be active as VP5/W1UL and VP5/W2PKV from Providenciales Island (NA-002) between March 7-13th. Look for W2PKV to operate primarily on SSB, while W1UL will be primarily on CW. Their activities will be on all bands including 6 meters. QSL both callsigns via W1UL.

XV2, VIETNAM. Operators Georg/DD8ZX, Jürgen/DH0RAK, Jürgen/DH6ICE, Bernd/ DK7TF and Zrinko (Zik)/DK8ZZ will be active as XV2DLH from Mui Ne between February 16-25th. Activity will be on the HF bands using CW, SSB and the Digital (PSK, RTTY) modes. QSL via DK8ZZ. Please note, logs will be uploaded daily on ClubLog Web site.

YO2013, ROMANIA (Special Event). Members of the Sportclub of the University Transilvania Brasov (YO6KSU, <http://www.csu.ro>) will activate the special event station YO2013EYOWF between February 16-24th. Activity is in celebration the "European Youth Olympic Winter Festival" <http://eyowf2013.ro>. Operations will be on 80-10 meters using CW, SSB and the Digital modes. Three special awards will be issued (Gold, Silver and Bronze), and the three different classes require a certain number of QSOs/bands with the event station on different days. Operators mentioned are Victor/YO6MP, Nonu/YO6FUG, Marius/YO6FTV, Lucilius/YO6FPW, Doru/YO6CHB, Adi/YO6GBD and Deszi/YO6UO. For more info, picture of the QSL and the QSL route, see QRZ.com.

Z8, SOUTH SUDAN (Update). Ken, K4ZW, will be returning to Juba and is expected to be active as Z81Z between February 25th and March 6th. "The Daily DX" reports that Ken is "bringing equipment for the lowbands" and will do his best to be active, but work requirements will dictate his schedule. QSL via his home callsign, direct or by LoTW.

ZS8, MARION ISLAND. Various sources report the following update (UPDATE #2) by Pierre, ZS1HF [edited]: "David, ZS1BCE, has not been appointed as the radio technician to join the team going down to Marion Island this year. At this stage, Carson McAfee, ZR6CWI, has been appointed as the Space Weather Engineer and will spend a year on the island. He has appointed me as his QSL Manager and informs me that he will be active from May 2013 to April 2014.
No callsign has been allocated yet and at this stage he will operate SSB only. Once he returns to Cape Town and I have had time to discuss his operating and equipment requirements, I will supply more info. Until then no more info is available. Carson has just completed a year at the SANAE Antarctic Base.

20593. LOTW

Yahoo group: DX-IS (2013)
Date: 2013-02-11 03:53:14 UTC
From: dale cole
Topic: 2352 Message: 20593

Is anyone else getting the "fatal error" too many tasks on LOTW?
They always get eldoos of logs right after a contest (and I suspect this is the issue), but new equipment? Thought the problems were on the way to being solved?
Dale K8TS

Hi Dale,

I'm getting the same response here . . . this is the typical error
it gives on temporary hiccups. Give it until the AM and I betcha it
will be OK.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30211
SIDC SOLAR BULLETIN 11 Feb 2013, 1221UT
SIDC FORECAST (valid from 1230UT, 11 Feb 2013 until 13 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 11 Feb 2013 10CM FLUX: 109 / AP: 003
PREDICTIONS FOR 12 Feb 2013 10CM FLUX: 108 / AP: 013
PREDICTIONS FOR 13 Feb 2013 10CM FLUX: 105 / AP: 007
COMMENT: Solar activity was very low during the last 24 hours, with a
soft Xray background in the low B level. There is a slight risk for an
isolated C class flare from NOAA AR 1670, but the next 48 hours are
expected to be mostly quiet in terms of flaring activity. Geomagnetic
activity is expected to be low to unsettled for the next 48 hours, with
the expected arrival, by mid-day, Feb. 12, of the CME of Feb. 9.
Unsettled activity, at most, is foreseen from this event, as the bulk of
the CME is passing northward of the Earth. Currently, quiet conditions
are observed by the ACE spacecraft.

TODAY'S ESTIMATED ISN : 035, BASED ON 03 STATIONS.

# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30212
SIDC SOLAR BULLETIN 12 Feb 2013, 1236UT
SIDC FORECAST (valid from 1230UT, 12 Feb 2013 until 14 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 12 Feb 2013 10CM FLUX: 105 / AP: 008
PREDICTIONS FOR 13 Feb 2013 10CM FLUX: 105 / AP: 011
PREDICTIONS FOR 14 Feb 2013 10CM FLUX: 102 / AP: 001
COMMENT: We expect quiet conditions to prevail for the solar activity,
with a small risk of an isolated C flare from NOAA AR 1670. Geomagnetic
conditions are expected to be quiet to unsettled any time now as the
southern flank of the CME of Feb. 9 arrives at Earth later today.
Geomagnetic conditions should be back to quiet levels by the second half
of Feb. 13.

TODAY'S ESTIMATED ISN : 045, BASED ON 06 STATIONS.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30213
SIDC SOLAR BULLETIN 13 Feb 2013, 1216UT
SIDC FORECAST (valid from 1230UT, 13 Feb 2013 until 15 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 13 Feb 2013 10CM FLUX: 102 / AP: 006
PREDICTIONS FOR 14 Feb 2013 10CM FLUX: 097 / AP: 001
PREDICTIONS FOR 15 Feb 2013 10CM FLUX: 094 / AP: 001
COMMENT: Solar activity is expected to be mostly quiet with a risk of
an isolated C flare from NOAA AR 1670. Two eruptive events occurred
relatively close to the west limb, late on Feb. 12. One is a filament
eruption taking place in the southern hemisphere. Owing to the current
coronagraphic observations, they do not appear to be geoeffective.
Geomagnetic activity is expected to be low for the next 48 hours.

20601. WAS and 4U

Yahoo group: DX-IS (2013)
Date: 2013-02-14 08:19:40 UTC
From: Lance Martin
Topic: 20601 Message: 20601

Hi Guys,

Anyone heading to 4U1UN this year? I need it on SSB any band.

Also will be looking for stateside on triple play LOTW this year 42 slots still to fill, all on SSB/RTTY.

Probably main bands will be 40/20/17 SSB/RTTY. (unless we get a sudden jump in SFI).

Anyway if you hear me or see me spotted, please give me a call.
The ones I need on both SSB/RTTY, CT, DE, ME, NH, ND, OK, SD,WV, WI

Btw. If anyone needs CQ zone29 on any mode, please let me know.

73, Lance - VK6DU

Great John,

I will email you off forum to arrange shortly.

I am no authority on 4U1UN but believe it would be a separate DXCC entity therefore not counting for WAS.
Please let me know if I am wrong.

I Know that 4U1WB should count for Maryland, even though it is in DC, which isn't part of Maryland, but counts for Maryland anyways. So, you could get Worked All States by working only 49 states in 2013. You could do that for a few months back in 1959 before Hawaii was added.

Totally correct, Lance - The UN reservation in New York was ceded to the UN, and is therefore not US territory. On the other hand, 4U1WB, in Washington, is on what remains US territory, and 4U1VIC is on Austrian soil.

20609. RE: [DX-IS] WAS and 4U

Yahoo group: DX-IS (2013)
Date: 2013-02-15 03:07:32 UTC
From: Ron Notarius W3WN
Topic: 20601 Message: 20609

4U1UN does not count for NY state because the UN Hq is not considered, legally, part of the United States, but territory of the United Nations. [And I don't believe "expropriated" is the correct term... the land was voluntarily transferred to UN sovereignty by the US and/or NY governments, they weren't deprived of it's possession by force or eminent domain or anything like that.]

4U1WB counts for MD because the land on which the office building that contains the World Bank sits IS considered, legally, part of the United States. [And the rules were changed between the times 4U1UN became an entity and 4U1WB came into existence, but that's another story]

DC counts for MD because it used to be part of MD (the part of VA ceded to DC is now part of VA again... my son lives there, in fact). Personally, and nothing against residents of DC, had I written the rules, I wouldn't have done that, but I didn't write the rules.

Alaska and Hawaii are both States and DXCC entities. Obviously they are both States in the Union. AK is separated from the continental US by Canada, and 'double qualifies' on those grounds. HI is separated from the continental US by a heck of a lot of warm blue Pacific ocean, with no intervening US territory... and 'double qualifies' on those grounds.

DX Bulletin 7 ARLD007
>From ARRL Headquarters
Newington CT February 14, 2013
To all radio amateurs

SB DX ARL ARLD007
ARLD007 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CYPRUS, 5B. Roman, UR0MC will be QRV as 5B/UW2M in the ARRL DX CW contest. QSL via US0LW.

JAMAICA, 6Y. Yuri, VE3DZ is QRV as 6Y2T until February 19. This includes being active in the ARRL DX CW contest as a Single Op/All Band/High Power entry. Outside the contest, he is active on 160 to 10 meters using CW, SSB and RTTY. QSL to home call.

MALTA, 9H. Operators Adam, DJ0IF and Mek, SP7VC are QRV as 9H3RX and 9H3KK, respectively, from Gozo Island until February 19. They will be QRV as 9H3RX in the ARRL DX CW contest as a Single Op/All Band entry. Outside of the contest they are active on the HF bands using CW and SSB. QSL to home calls.

BURUNDI, 9U. A group of operators are QRV as 9U4U from Bujumbura until February 23. Activity is on 160 to 10 meters using CW, SSB and RTTY with four stations. QSL via M0URX.

TONGA, A3. Werner, DJ9KH is QRV as A35WH from Tongatapu Island, IOTA OC-049, until February 23. Activity is on the HF bands. After this operation, he will be QRV as A35WH/p from Vava'u Island, IOTA OC-064, until March 3. QSL to home call.

MOROCCO, CN. Operators EA5CP, EA5YU and EA9BLJ will be QRV as 5C5T in the ARRL DX CW contest as a Multi/Single entry. They are active before and after the contest until February 18. QSL via EA5YU.

MADEIRA ISLANDS, CT3. Operators Rasto, OM3GI, Tibor, OM3RM and Julo, OM7JG will be QRV as CR3A in the ARRL DX CW contest. QSL via

OM2VL.

ESTONIA, ES. Toomas, ES5RY will be QRV as ES95Q from Tartu in the ARRL DX CW contest as a Single Op/All Band/Low Power entry. This special call sign celebrates the 95th anniversary of Estonia. QSL direct to home call.

ETHIOPIA, ET. Ken, K4ZW will be QRV from the ET3AA club station during the second half of the ARRL DX CW contest. QSL via N2OO.

FRENCH GUYANA, FY. Larry, F6FVY will be QRV as FY5KE in the ARRL DX CW contest as a Single Op/Single Band/High Power entry on 20 meters. QSL direct via FY5KE.

JERSEY, GJ. Mathieu, MJ0ASP will be QRV as GJ2A in St. Brelade in the ARRL DX CW contest. QSL via operator's instructions.

US VIRGIN ISLANDS, KP2. Operators Phil, KT3Y, Fred, K9VV and Bob, WP2XX will be QRV as KP2M from St. Croix Island in the ARRL DX CW contest. QSL direct via AI4U.

TURKS AND CAICOS ISLANDS, VP5. Jeff, K0UU is QRV as VP5/K0UU from Grand Turk Island, IOTA NA-003, until February 21. Activity is mainly on the newer bands. He will sign VQ5RP in the ARRL DX CW contest. QSL to home call.

VIET NAM, XV. Georg, DD8ZX, Juergen, DH0RAK, Juergen, DH6ICE, Bernd, DK7TF and Zrinko, DK8ZZ will be QRV as XV2DLH from Mui Ne from February 16 to 25. Activity will be on all bands using CW, SSB and various digital modes. QSL via DK8ZZ.

INDONESIA, YB. Ucok, YB6AR and other operators are QRV as home calls/p from Pulau Bunta, IOTA OC-245, until February 17. Activity is on 40, 30, 20, 15 and 10 meters using SSB and RTTY. QSL direct to home calls.

ROMANIA, YO. Members of the Sportclub of the University Transylvania Brasov will be QRV using special event call sign YO2013EYOWF from February 16 to 24 in celebration of the European Youth Olympic Winter Festival. Activity will be on 80 to 10 meters using CW, SSB and various digital modes. QSL via operators' instructions.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Uganda, 5X8C, current operations commencing 2012; Afghanistan, T6BP, current operation commencing 2012; Afghanistan, T6TJ, current operation commencing 2012; and Republic of South Sudan, Z81A and Z81D, current operations commencing 2012.

THIS WEEKEND ON THE RADIO. The ARRL International DX CW Contest, QRP CW Fox Hunt, NCCC Sprint CW Ladder, Russian World Wide PSK Contest and the Feld Hell Sprint will certainly keep contesters busy

this upcoming weekend. The NAQCC-EU Monthly CW Sprint is scheduled for February 18. The QRP CW Fox Hunt and AGCW Semi-Automatic CW Key Evening are scheduled for February 20. Please see February QST, page 90, and the ARRL and WA7BNM Contest websites for details.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1100
BID: $OPDX.1100
February 18, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AD1C, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KH6BZF, N7QT, K8GI, K8YSE, W8GEX & 60m News, W9ILY, 4J5T, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OZ6OM & 50 MHz DX News, IK7JWX, IK1SOW, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late ARRL DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the ARRL DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 9th-February, through Friday, 15th-February there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.kf5eyy.info

3V, TUNISIA (Correction/Operator Update). An Italian group, along with the Association des Radio Amateurs Tunisiens (ARAT) and the Engineering University of Gabes, are planning a second IOTA DXpedition to Djerba Island (AF-083, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), between April 29th and May 6th. The Association des Radio Amateurs Tunisiens (ARAT) is expected to receive the callsign TS8TI on March 15th. Current operators/club participants mentioned are 3V8SA (ARCS of Tunisian Scout), 3V8ST (ARC of Tunis), 3V8ESG (Department of Communications and Networking National Engeneering School of Gabès), 3V8SF (Scout Radio Club of Sfax), Leopoldo/I8LWL, Fred/IK7JWX (Team Leader), Antonello/IK2DUW (QSL Manager), Titti/IK8GQY (YL), Ferruccio/IK8TEM, Ampelio/IS0AGY, Rosy/IW2NLC (YL), Ashraf/KF5EYY and Stefano/IK6JRI. Activity will be on all HF bands, including the 30/17/12 meter bands and the CW, SSB, RTTY, AMTOR and PSK31 modes. They are looking for operators, sponsors and individual contributions, contact Fred, IK7JWX, at <ik7jwx2003@...>.

4JT, AZERBAIJAN (Special Prefix). The Federation of Radio Sport of Azerbaijan has announced that during the period of February 14th and March 5th, the Azerbaijanian HAMs are permitted to add the special addition of the letter "T", which means "Tragedy", to their callsigns. For example: 4J7DL would change to 4JT7DL, or 4K3M to 4KT3M, etc.... The activity is to remember the 21st anniversary of one of the most horrific events of the 1990s, the "Khojaly Massacre", the biggest war crime in the area of the former USSR. QSL via operator's home callsign. ADDED NOTE: On behalf of a group of Azerbaijani-Americans and their friends throughout the nation and the world, on the eve of the 21st anniversary of this tragedy, they hereby call upon you to help them commemorating Khojaly Massacre and its victims with a Presidential proclamation and submit a petition to the White House. Please go to: https://petitions.whitehouse.gov/petition/issue-proclamation-commemorating-and-recognizing-war-crime-khojaly-massacre-and-its-victims/W8BbDqYx

5C, MOROCCO. Members of the URE Cartagena team will be active from the ARRAM HQ club station (CN8MC) in Rabat as 5C5T during the ARRL DX CW Contest (February 16-17th) as a Multi-Single/Low-Power entry. QSL via EA5YU, by the Spanish Bureau or direct. Operators mentioned are: Juan/EA5BLJ, Jose/EA5CP and Jose/EA5YU. The operators will be there until February 18th, and plan to be active outside of the contest on 80-10 meters using 100 watts, CW only.

5X, UGANDA (Update). Members of the F6KOP team will be going QTH as 5X8C on February 18th. If you did not make a QSO with the 5X8C team, you may have another chance with a 5X station. Reg, NH6T, who is also in Uganda building apartment units there, reports: "Had the opportunity to spend several hours with the huge group out at Country Lake Resort yesterday (February 10th) afternoon and it was probably the most ham radio fun for me of the past decade. This resort, which was several miles down a rutted

dirt road, was a mammoth tropical paradise equivalent to most of our Hawaiian resorts other than the Hyatt Regency. The complete antithesis of HK0NA what with swimming pool and food/drinks at the snap of a finger. The organization and operation of this undertaking would put most military campaigns to shame. The group is so well experienced that they had all antennas and six operating positions up and running in less than one day and an antenna farm which defies description. Thousands of feet of coax cable running every direction like spaghetti and antennas even mounted on the the ends of piers sticking out into Lake Victoria (the 2nd largest fresh water lake in the world). One does not expect to see multiple four-squares on a DXpedition." Reg also mentioned that he received the callsign 5W1C, but has not been on the air much because of his work. He also states [edited], "I'm only working with an NVIS antenna strung along the hedges here, but with usable signals on all bands except 20M which is way down in the mud. .... I literally can't get a higher antenna up here on the estate because the trees are so thick and also covered with thorns. On my first try I wound up my trusty hammer weight for an underhanded throw and it went high enough, but unfortunately remained stuck in the branches." Reg also added that the F6KOP team tried to get his callsign 5X1C for their DXpedition, but were told they had to settle for 5X8C because Entebbe is in a different radio district than Kampala.
As this was being written on February 15th, the 5X8C log on ClubLog reports that the 5X8C team as made 70435/QSOs with 18896/Unique callsigns (35714/CW, 25869/SSB and 8852/RTTY) with 1056/AF, 0/AN, 6219/AS, 51747/EU, 10106/NA, 553/OC and 754/SA. To check your QSOs, go to:
http://www.clublog.org/charts/?c=5X8C
Remember, Yann, F1NGP, is their QSL Manager (100% OK Direct, ClubLog's OQRS, Bureau and LoTW). For more details and updates, see:
http://www.5x2013.com

9U, BURUNDI (Update). The international team of operators from ON, PA and GM are now on the air as 9U4U from Bujumbura until February 23rd. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL Manager will be M0URX.
The 9U4U Web site is online at: http://www.9u4u.be
This DXpedition will also have a Twitter page <https://twitter.com/9U4U>.

9X, RWANDA. Nick, G3RWF (5X1NH), plans to go to Rwanda between March 4-12th. He has requested the callsign 9X0NH, and the license should be valid for 2013 because he could return later in the year. Activity will be from Kigali and will be mainly CW. QSL via G3RWF.

A3, TONGA (Update/Callsign Change). Werner, DJ9KH, is now active from Tongatapu Island (OC-049) until February 23rd, and then on Vava'u Island (OC-064) between February 24th and March 2nd. His callsigns will be A35WH on both islands. He reported on February 14th: "Sorry to say, that we had to leave our mast-material in Auckland. Air New Zealand wanted us to pay a hell lot of money for 2kg fiberglass, incredible. Now we took a palm-tree instead, not that high, but good enough for a vertical-dipole for 20/17/15m. Tried to work CW this morning GMT. Some more will follow." His equipment will be a K3 with 100 watts and wire-antennas (loops and verticals). Activity will be on the HF bands, depending on propagation.

Suggested frequencies are:
CW - 1826.5, 3505, 7020, 10105, 14024, 18080, 21024, 24894 and 28024 kHz
SSB - 3799, 7070, 14190, 18145, 21290, 24950 and 28490 kHz
RTTY - 10140, 14080, 18110, 21080, 24920 and 28080 kHz

QSL via his home callsign, direct or by the DARC Bureau. He plans to update on <http://www.tonga2013.de/> every day and give information about planned activities, modes and frequencies. He doesn't use an online-log, LoTW and e-QSL.

A6, UNITED ARAB EMIRATES. Alex, SQ9UM, will be active as A6/SQ9UM between February 16-22nd. Activity will be on 40-10 meters, including the 30/17/12 meter bands, using CW, RTTY and from time to time SSB and PSK. QSL via his home callsign.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting the following operations for DXCC credit:
Z81A and Z81D ☐ Republic of South Sudan;
Current operations commencing 2012

EA8, CANARY ISLANDS. Mauri, OHBYS, will be active as EA8CMX during the ARRL DX CW Contest (February 16-17th) as a Single-Op/Single-Band (40m)/ High-Power entry. QSL via OH2BYS.

EF8, CANARY ISLANDS. Juan, EA8RM (ex-EA8CAC), will be active as EF8R during the ARRL DX CW Contest (February 16-17th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or EB7DX.

FM, MARTINIQUE (Correction). Michael, HB9WDF, (not Ted, K7TRK), who was active as KP4/HB9WDF (Puerto Rico) and FY/HB9WDF (Kourou, French Guyana) two weeks ago, will be active as FM/HB9WDF from Martinique between now and February 21st. Activity will be holiday style on the satellites (AO-7, FO-29, VO-52, SO-50 and others if they are active), and the HF bands on PSK-31 and sometimes SSB. QSL via HB9WDF, direct, by the Bureau and eQSL.

H40, TEMOTO PROVINCE. Members of the Temotu Aid Radio Club (TARC) report on QRZ.com: "After the terrible earthquake and tsunami on February 6th, 2013, a group of Radio Amateurs founded the Temotu Aid Radio Club (TARC). We are organizing aid for the local people, specially for supporting the LATA hospital. Therefore the next upcoming DX-expedition activity will be from December 21st, 2013, to January 10th, 2014 from Lata, Nendo Island (OC-100). Donations to support the local hospital are most welcome. The travel costs for the expedition will be fully financed by the operators themselves. So your donation goes straight 100% to the LATA hospital." They mention the callsign will be H40TA and the activity will be on CW and SSB. QSL and donations information will be forthcoming (November 2013).

H44, SOLOMON ISLANDS (Excerpts Edited From Press Release #2 by G3SWH). Operators Phil/G3SWH and Jim/G3RTE will be active from Honiara, Guadal-canal, in the Solomon Islands, between February 18-28th. The Solomon Islands are located in CQ zone 28, ITU zone 51. Guadalcanal counts as OC-047 for IOTA purposes. The "most wanted" data provided by ClubLog

currently shows the Solomon Islands at #81 in Europe and #77 in North America. Their activity will be on CW only on all bands 80-10 meters using 2 x K2s with 2 x KPA500 amplifiers to wire antennas. There will be no 160, 60, 6 meters or EME activity. Propagation permitting, they plan to have two stations on the air for as many hours everyday as is possible. Their main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs. They will always work split and listen between 1 and 5 kHz up. Subject to a reliable Internet connection, they will upload the log to ClubLog and the G3SWH Web site on a daily basis. Otherwise the complete log will be uploaded upon their return. The log will be uploaded to LoTW as soon as possible after they return to the UK. Please make only one QSO per band. Making duplicate QSOs prevents someone else from making a QSO! Duplicate QSOs will *NOT* be logged. Believe your ears, not your Internet browser! QSL via G3SWH, either via the OQRS facility on Phil's Web site <http://www.g3swh.org.uk> (recommended), direct with SAE and adequate return postage or via the traditional Bureau route. There is more information at <www.g3swh.org.uk/h44kw.html> which will be updated from time to time.

HQ2, HONDURAS. Hiro, JA6WFM, will be active as HQ2N from San Pedro Sula during the ARRL DX CW Contest (February 16-17th) as a Single-Op/Low-Power entry. QSL via EA5GL or LoTW. Hiro will be here until January 2014.

IOTA DXPEDITION. John, YB5NOF, along with possibly 1 or 2 more operators, will activate three Indonesian IOTA groups during the months of May, June and July. His plans are tentative, but here is the schedule:
Banggai Island (OC-208) - During late April/early May; he will apply for the YE8B callsign.
Subi Besar Islands (OC-109) - Sometime in June; he will apply for the YE5S callsign.
Tambelan Islands (OC-122) - During July for the RSGB IOTA Contest); he will apply for the YE5T callsign.
More details will be forthcoming. Stay tuned!

IOTA NEWS.....
EU-001. Operators Teo/SV1GRM, George/SV1RP, John/SV1GYG, John/SV1GE and Takis/SV2FWV will be active from Kalolimnos Island (GIOTA DKS-048, MIA MGD-011, WLOTA 0662) between May 10-20th. Activity will be on all HF bands and modes. QSL via SV1GRM.

EU-010. Graham, MM0GHM, will be active as MM0GHM/m from the Isle of Barra (IOSA OH11, SCOTIA HI02, WLOTA 3126), Outer Hebrides, between March 24-29th. Activity will be on the HF bands, depending on propagation. QSL via his home callsign, direct or RSGB Bureau.

EU-038. Dirk, DL5DCL, will once again be active as PA/DL5DCL from Ameland Island (WLOTA 1059) for 5 days starting April 1st. Activity will be holiday style on several HF bands, CW only. He will have an online log search and OQRS available during

and after his operation. He will have a new high quality QSL
card available. QSL via DL5DCL, by the Bureau, direct or via
OQRS. Visit his Web site at: http:/www.dl5dcl.de

EU-125. Dieter, DF2SD, will be active as OZ/DF2SD from Fano Island
(DIA NS-002, WWFF OZFF-004) between August 17-30th. Activity
will be holiday style on the 30/17/12 meter bands only, using
mainly RTTY and some SSB. QSL via his home callsign, direct
or by the Bureau.

NA-171. (Update) Operators Ismael/XE1AY, Benjamin/XE1AU, Armando/XE1CIC
and Enrique/XE2AA will be active as XF2E from Venados Island
between April 21-26th. Activity will be on 160-6 meters. QSL
via IT9EJW. Visit their Web page at: http://www.it9ejw.it/xf2e

OC-016. Jim, W8ERI, will be active as 3D2ZF from Taveuni Island between
February 17-23rd. Activity will be on 80-10 meters mainly SSB.
QSL via his home callsign.

OC-161. Imam, YB4IR, will be active as YB4IR/6 from Nias Island between
March 8-13th. Activity will be on the HF bands. QSL via his
home callsign. Visit his Blog page at: http://yb4ir.blogspot.com

OC-245. Operators Ucok/YB6AR, Adhi/YB3MM, Budi/YF1AR and Evendi/YC6EI
will be active from Rondo Island (ARLHS IDO-369) between March
9-17th. Callsign has not yet been announced. Activity will be
on 160-10 meters using CW, SSB and RTTY. QSL via IZ8CCW, direct
or by the Bureau. For more info and updates, visit:
http://www.mdxc.org/oc-245

J6, ST. LUCIA. Rob, N7QT, will be heading back to Saint Lucia on a suitcase
mini-DXpedition as J6/N7QT between April 5-16th. He will be using the new
CrankIR portable antenna system from SteppIR <www.steppir.com>. Operator
Frans, J69DS, will join him. Their operational base will be a magnificent
villa located in Babonneau, which overlooks the city of Gros Isle and Cap
Estate. Their goal is to demonstrate "ultralite" DXpeditions from magnif-
icent "vista" locations. The operation's equipment will include a field
portable radio (battery only) and using backpack/lightweight antennas.
Activity will be on 80-10 meters using CW, SSB and RTTY or PSK, as well
as operating field portable (battery only) either from the St. Lucia
beaches or scenic mountain tops. During field portable operations, they
will sign their callsigns /P. QSL J6/N7QT via LoTW, eQSL, by the Bureau,
or direct to his home callsign (SASE required!). J69DS will only accept
direct QSLs with a SASE. NO Bureau QSLs!

J7, DOMINICA. Rick, KK4GV, will be active as J79GV from Calibishie on
the northeast side of the island of Dominica (NA-101) between March
8-17th. He states, "The island is fairly un-commercialized and is mostly
rainforest and volcanic mountains. It has the tallest mountain peaks in
the Caribbean and is called the 'Nature Island of the Caribbean'." His
activity will be holiday style and SSB only. QSL via his home callsign,
direct or by the Bureau. He will upload log to LoTW when he gets home.

KH2/NH2, GUAM. Dave, N2NL, will once again be active as NH2T from Guam (OC-026) during ARRL DX CW Contest (February 16-17th) as a Single-Op/ All-Band/Assisted entry. Activity will be part-time with a focus on the low bands. He is expected to be here until the summer of 2013. Dave is usually active (outside of contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW or via W2YC.

KH8, AMERICAN SAMOA (Cancelled). Operators Bill/N6MW and Jim/N6TQ, who were expected to be active as KH8/N6MW from a hotel in Tutuila between March 19-28th, have postponed this indefinitely.

KP3, PUERTO RICO. Members of the Los Chachos Contest Club will be active as KP3Z during the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. Operators mentioned are Felipe/NP4Z and Eric/NP3A. QSL via N4AO.

MJ, JERSEY. A Belgian team will be active as MJ/ON6NB from Jersey between May 24-30th. Operators mentioned are Philippe/ON4ACP, Erik/ON4ANN, Jose/ ON4CAU, Erik/ON4CCV, Walter/ON8CW, Cedric/ON4CKM and Rudi/ON6MI. The pilot station will be Frans/ON6QB. Activity will be on 160-2 meters using CW, SSB and PSK. An emphasis will be on the higher bands, conditions permitting. QSL via ON4ANN, direct or by the Bureau. There will be an online log search at: https://secure.clublog.org/logsearch/mj/on6nb
A Web page is available at: http://users.telenet.be/on4ann/MJ/index.html

NEW CONTEST (RaDAR 2013). The RaDAR-America contest is an event aimed at promoting the use of Rapidly Deployable Amateur Radio stations throughout North and South America. This contest is for all licensed radio amateurs. A choice is made prior to the contest to participate in one of the defined categories. The points system is so structured as to encourage portable operation, especially moveable stations. The event takes place the first Saturday of April and first Saturday of November starting at 14:00 UTC and ending at 18:00 UTC (4 hours). Complete rules can be found at: http://radar-america.blogspot.com

OH0, ALAND ISLAND. Kim, OH6KZP, will be active as OH0X during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op entry. QSL via LoTW or to OH2TA.

PJ4, BONAIRE. Operators Janusz/SP9FIH and Kazik/SP6AXW will be active as PJ4/homecall from Bonaire (SA-006, WLOTA LH-1279) between April 8-20th. Activity will be on 160-6 meters using SSB and RTTY. Suggested frequencies are:
SSB - 1880, 3780, 7180, 14180, 18140, 21280, 24980, 28480 and 50120 kHz
RTTY - 1835, 3580, 7035, 10140, 14080, 18100, 21080, 24920 and 28080 kHz

A survey is available for bands/modes needs on their Web page. QSL via SP9FIH: Janusz Wegrzyn, P.O. Box 480, 44-100 Gliwice, Poland (see Web page for details; PayPal available). For more details and updates, see: http://www.pj4-dxpedition.com

NOT THE MANAGER. Willi, DF8WS, reports that he has been receiving more and more QSLs for activities of RM4A and RM7M in the last years. He states, "I was only manager for these special callsigns before the USSR fell apart. In that time, prefix belonged to Kirghiz Rep. but after that I don't know to whom these calligns belong to and how to send QSLs."

QSL RECEIVED VIA LoTW: 3A2MW, 3B9SP, 5B4AIF, 5C5W, 5R8IC, 5X8C, 7Z1HL, 9J3A, 9L0W, 9M2CNC, 9X/ON4WW, A45XR, A65BP, C31BO, C6ABB, CO2JD, CP4BT, CR2T, CT3AS, CT1FIU, CU3EQ, D4C, DL2OE, DL3KOG, DL6KR, E77DX, EA3GHZ, FI1FJA, HH2B, HK0GU, HK1R, HZ1FI, JA8BNP, JD1BLY, JE8TGI, JJ1DWT, KP2/K5WE, KP4JFR, MD0CCE, MU/PA9M, NH0Z, OH7MN, P40G, PJ2V/DL7VOG, PJ5/DL7VOG, PY0F/PP1CZ, R7NK, RI1FJA, RW3XW, T6LG, TF2RR, TI2HAS, TZ6BB, UN1L, UY6IM, VK6DXI, VQ9LA, VU2NKS, WP4JCF, Z37M, Z38N, ZK2VB, ZL2HAM, ZL3HAM and ZS2I

QSLS RECEIVED VIA MAIL: 1A0C, 5U5U, 6Y4WU, 7O6T, 9M2/JA1PVI, 9Y4/DL8DYL, 9Y4/DL9DRA, CP6XE, D64K, ES9C, HC2/KF6ZWD, JA1RGL, JD1BMH, JY5HX, KP2/NM2O, T30PY, T88CP, V63XG, V84SMD, VP8DLB, VP2EKG, YB3GXS and YN2AA

QSLS RECEIVED VIA THE BUREAU: 3D2ML, 5B/NN3AA, 5P3WW, 9M2/R6AF/P, 9Q6AL, A52AB, A6/DL9WVM, A65BR, A92IO, BT4EXPO, BV100, FM/KL7WA, HB0/DJ2IA,

HZ1DS, HZ1PS, IC8/DJ2OS, LX/DJ6OI, MD/DJ4AK, PJ7/DB4BJ, T8XX, TA4/DG1RYC, TC4X, TO5T, V31JZ/P, Z60K and ZD9AH.

RI1, FRANZ JOSEF LAND. Eugene, UA4RX, will be active as RI1FJ from Franz Josef Land (EU-019) during the ARRL DX CW Contest (February 16-17th) as a Single-Op/Low-Power entry. QSL via UA2FM direct, an OQRS is available on ClubLog.

SV8, GREECE (IOTA/Contest Op). Rich, M5RIC, will be active as SV8/M5RIC from Zakynthos Island (EU-052) between July 23-30th. Activity will be on 80-10 meters using SSB and RTTY. Rich will also be in the RSGB IOTA Contest (July 27-28th) as a Single-Op/High-Power/DXpedition entry. QSL via M5RIC.

TX5, CLIPPERTON ISLAND (Update). The following update was posted on February 12th, on the TX5K Clipperton Island DXpedition Web page [edited]: "All the California equipment has been assembled and is on the truck. It will be transported to San Diego on Wednesday, Thursday, February 13th. The boat (Shogun, San Diego) will be loaded on Thursday-Friday, February 14-15th. The first half of the team will board on Monday, February 18th, and the boat will sail for Cabo San Lucas, to pick up the rest of the team. We expect to arrive at Clipperton Island on February 26th. It will take at least one day to land and get the camp set up, so QRV should not be expected before February 28th. Please watch this site, the BLOG, and various news outlets for the anticipated start of operations. We look forward to having a rewarding DXpedition, and seeing you at the conferences later this year. We will be hosting a Courtesy Suite after the DX Dinner at Dayton and a similar party at Friedrichshafen, so plan to come see us! Good luck to all who want a contact with TX5K! Be sure to watch it in real time with DXA <http://www.dxa2.org/> and write to the BLOG <http://www.ky6r.com/>."

V3, BELIZE. Lee, N8LJ (ex-T32LJ), will be active as V31LJ from Placencia between February 27th and March 6th. Activity will be on the HF bands. QSL via K8ESQ.

VP2M, MONTSERRAT. Operators John/KB8RJ and XYL Crissie/WD8KUR will be active as VP2MRS and VP2MUR, respectively, from Gingerbread Hill in St. Peter's on Montserrat Island between February 20th and March 14th. Activity will be holiday style on 80-10 meters, including the WARC bands, using mostly SSB and some PSK. QSL both callsigns via KB8RJ.

VP2V, BRITISH VIRGIN ISLANDS (6m Op). Dave, W9DR, will be active as VP2V/W9DR from the north shore of the Island of Anegada (NA-023) in the British Virgin Islands (FK78TR) between June 14-28th. Activity will be on 50.115 MHz (SSB) and 50.115.6 MHz (CW). He will also be running a beacon on 50.115.6 when the band is not open. Please submit confirmation request (QSL) to W9DR home address (QRZ.com).

YE1, INDONESIA. Members of the Bekasi DX Contest Club (YE1ZAT) will be active during the ARRL DX CW Contest (February 16-17th) as a Multi-Single entry. QSL via YE1ZAT, by the Bureau, e-QSL or direct via info

on QRZ.com. Visit the Bekasi DX Contest Club's Web page at:
http://ye1zat.com

The following stations are expected to be active in the
ARRL DX CW Contest (February 16-17th, 2013)

Thanks to Bill, NG3K, for providing OPDX readers with the following
consolidated listing of the participants in the 2013 ARRL DX CW Contest.

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2 - Jim, W8ERI will be active as 3D2ZF from Taveuni (OC-016), Fiji Islands on 17-23 February. He will operate SSB on 80-10 metres. QSL via W8ERI. [TNX The Daily DX]
3V - Alfredo, IK7JWX and several other operators (I8LWL, IK2DUW, IK6JRI, IK8GQY, IK8TEM, IS0AGY, IW2NLC, KF5EYY, 3V8ESG, 3V8SA, 3V8SF and 3V8ST) will be active on all bands and modes as TS8TI from Djerba Island (AF-083) between 29 April and 6 May. QSL via IK2DUW. [TNX IK7JWX]
A6 - Alex, SQ9UM will be active as A6/SQ9UM on 16-22 February. He will operate mainly CW and RTTY, with some SSB and PSK, on 40-10 metres. QSL via home call. [TNX SQ9UM]
CE - Manuel, CE2UNE will be active as XR2BH from the lighthouse at Caleta Hornilla (Puerto Aldea) on 20-24 February, including participation in the South American Lighthouses Weekend. [TNX CE3FZL]
CN - EA5CP, EA5YU and EA9BLJ are active as 5C5T from Morocco until 18 February, including a Multi-Single LP entry in the ARRL DX CW Contest. QSL via EA5YU. [TNX NG3K]
CT9 - Once again Rosel, DL3KWR and Hardy, DL3KWF will be active as CT9/DL3KWR and CT9/DL3KWF from Madeira (AF-014) from 7 March to 3 April. They plan to operate mostly in CW and digital modes with a focus on 12, 17 and 30 metres. QSL via home calls. E-.mail requests for bureau cards can be sent to dl3kwr[@]darc.de or dl3kwf[@]darc.de respectively. [TNX DL3KWR]
CX - A team from Radiogrupo Sur (www.radiogruposur.org) will be active on all bands and modes as CV5A from Flores Island (SA-030) and lighthouse on 21-24 February. QSL via CX2ABC, direct only. [TNX rsgbiota.org]
ES - Celebrating the 95th anniversary of the Estonian Republic, a large number of callsigns with special prefix ES95 will be active from 15 February to 3 March. Information on the relevant award will be published on the Estonian Radio Amateurs Union's website (www.erau.ee). [TNX ES2TI]
F - A team from the Lanester Amateur Radio Club (F6KPQ) will be active on all bands and modes as TM2BI from Belle-Ile-en-Mer (EU-048) on 24-31 July, IOTA Contest included. QSL via F6KPQ, direct or

bureau. [TNX F4FFZ]
FO_ci - Announced frequencies for the TX5K DXpedition to Clipperton Island
[425DXN 1136] are:
CW 1833 3523 7023 10103 14033 18083 21033 24903 28033
SSB - 3785 7185 - 14185 18165 21285 24975 28515
RTTY - - - 10137 14087 18097 - - -
The team expects to arrive at Clipperton on 28 February. It will
take at least one day to land and get the camp set up, so QRV
should not be expected before 1 March. Bookmark www.tx5k.org for
updates.
FR - A group of FR operators will be active as TO1PF from Piton de la
Fournaise, a 2600m high volcano on Reunion Island (AF-016), on
23-24 February, 11-12 May and 3-4 August. QSL via FR1GZ.
H4 - Phil, G3SWH and Jim, G3RTE will be active as H44KW from Guadalcanal
(OC-047), Solomon Islands on 18-28 February [425DXN 1117]. They
will operate CW only on 80-10 metres: "please make only one QSO
per band", they say. "Duplicate QSOs will not be logged". Subject
to a reliable Internet connection, they will upload the log to
Clublog and www.g3swh.org.uk on a daily basis. Otherwise the
complete log will be uploaded after the expedition. QSL via G3SWH,
direct or bureau (OQRS for both direct and bureau cards on Phil's
website). The log will be uploaded to LoTW as soon as possible
after they return home. [TNX G3SWH]
HL - Rocky, HL1VAU is staying on Kanghwa Island (AS-105) until the end
of February. He is on a business trip and will operate on the HF
bands mainly CW as HL1VAU/2. QSL via home call. [TNX HL1VAU]
IS0 - Special stations II0IDP from Cagliari (EU-024, QSL via IS0IGV) and
II0ICH from La Maddalena (EU-041, QSL via IM0QMA) - both
representing former coast radio stations of the Italian Navy -
will be active on 2-17 March for the 7th Italian Navy Coastal
Radio Stations Award (www.assoradiomarinai.it). [TNX IS0IGV]
J8 - Mike, VA3MW will be active as J8/VA3MW from the island of Bequia
(NA-025) on 15-19 February. He plans to be QRV on 20 and 15
metres. QSL via home call, direct or bureau. [TNX VA3RJ]
PA - Look for Marcel, PD5MVH/p to be active from Vlieland Island
(EU-038) on 2-16 March. He will operate SSB on 40, 20 and 10
metres. QSL via home call, direct or bureau. [TNX PD5MVH]
PJ4 - Kazik, SP6AXW and Janusz, SP9FIH will be active on 160-6 metres as
PJ4/SP6AXW and PJ4/SP9FIH from Bonaire (SA-006) on 8-20 April. QSL
via SP9FIH. Logsearch and further information can be found on
www.pj4-dxpedition.com [TNX SP9FIH]
PY - Marcelo, PY2FN will be active as PY2FN/p from the lighthouse at
Ponta da Sela on Sao Sebastiao Island (SA-028) on 22-25 February.
He plans to operate CW only on 40-6 metres and to participate in
the South American Lighthouses Weekend. QSL via home call, direct
or bureau.
V3 - Lee, N8LJ will be active as V31LJ from Placencia, Belize from 27
February to 6 March. QSL via K8ESQ and LoTW.
V3 - Hernan V31HU, Ismael V31NV (XE1AY) and Enrique V32EE (XE2AA) will
be active from Twin Cayes, South Water Cay (NA-180), Belize on

6-12 April. They plan to operate on the HF bands and 6 metres. QSL via IT9EJW.
V4 - Once again John, W5JON will be active as V47JA from St. Kitts (NA-104)from 20 February to 21 March. He will operate SSB on 80-6 metres, and will participate in the ARRL DX SSB Contest. QSL via W5JON and LoTW. [TNX W5JON]
V6 - Mike, WB7DXA will be active as V63DXA from Micronesia between 21 February and 21 March. He plans to operate from Kosrae (OC-059) "for about a week", then hopefully from IOTA group OC-226 (Mokil and Pingelap Atolls, "but it all depends on WX and other factors") and finally from Pohnpei (OC-010). Main activity is expected on 20 metres SSB, possibly with some CW. QSL via home call, direct and bureau, and LoTW. [TNX OPDX Bulletin]
VP2M - Jack, KB8RJ (VP2MRS) and Crissie, WD8KUR (VP2MUR) will be active from Montserrat (NA-103) from 20 February to 14 March. They will operate holiday style on 80-10 metres, mainly SSB with some PSK31. QSL via KB8RJ.
W - Members of the Palos Verdes ARC will operate as K6PV/6 from Santa Catalina Island (NA-066) on 20-24 February. They plan to run two stations on 160, 80, 40, 20, 15 and 10 metres, possibily also on 17, 12 and 6 metres. Main activity will be on SSB, but they will be able to work CW, RTYY and PSK31 as well. QSL via K6PV. [TNX rsgbiota.org]
XE - Ismael XE1AY, Benjamin XE1AU, Armando XE1CIC and Enrique XE2AA will be active as XF2E from Isla de Venados (NA-171) on 21-26 April. They will be QRV on the HF bands and 6 metres. QSL via IT9EJW.
XT - JA3VWT (XT2VWT), JH3AEF (XT2AEF), JA3IVU (XT2IVU) and JA1CJA (XT2CJA) will be active from Burkina Faso from 22 February to 2 March. They will operate SSB, CW and digital modes on 80-10 metres. QSL via home calls. [TNX The Daily DX]
YB - Ucok YB6AR, Adhi YB3MM, Budi YF1AR and Evendi YC6EI will be active as YE6A from Rondo Island (OC-245) on 9-17 March. QSL via IZ8CCW. They have a website at www.mdxc.org/oc-245/
YO - Special event callsign YO2013EYOWF will be active on 15-24 February for the European Youth Olympic Winter Festival to be held in Brasov, Romania. Expect activity on 80-10 metres SSB, CW and digital modes. QSL via YO6MP. Information on the relevant award can be found at www.qrz.com/db/YO2013EYOWF
Z8 - Ken, K4ZW will be active again as Z81Z from Juba, South Sudan from 25 February to 6 March. He plans to be QRV on the low bands as time permits. QSL via home call. [TNX The Daily DX]

3D2C ---> The International DX Association has been given the first video of the Conway Reef DXpedition (3D2C) from September 2012. This 25 minute video is on the INDEXA web site (www.indexa.org) and can be viewed by clicking on the "DXpedition Videos" tab. [TNX K4MQG]

ANTARCTIC ACTIVITY WEEK ---> The Worldwide Antarctic Program has announced that the 10th Antarctic Activity Week will be held from 18 to 24 February. The aim of this annual event is to promote worldwide interest in the Antarctic continent. Special callsigns (QSL via operator's instructions) are expected to be aired during this year's AAW from the following countries:
Australia VK2ANT
Bulgaria LZ10ANT
Canada VA3WAP, VA7AAW
France TM10AAW, TM10WAP
India AT3ANT
Italy II2ANT, II5ANT, IO5ANT, IO5SP, IP2ANT, IP8AAW, IR0WAP, IR1ANT, IR1SP, IR7WAP
Poland HF0A
Romania YQ0ANT, YQ8ANT
Spain AO1ICE, AO4HAG, AO7WAP, EG1WAA
Switzerland HB9ICE
The Netherlands PA6ANT, PF13ANT
USA K0ANT, K4A, K4K, N6A
Complete information on the AAW can be found at www.waponline.it

CO8DM & LOTW ---> Doug, CO8DM is converting his paper logs into electronic format and uploads them to LoTW. This is an error-prone exercise, so if you cannot find a match on LoTW, please email your QSO data to Doug for him to correct any error. [TNX CO8DM]

DXCC NEWS ---> The following operations have been approved for DXCC credit: 5X8C (Uganda, current operation), T6BP (Afghanistan, operation commencing in 2011), T6TJ (Afghanistan, operation commencing in 2012), Z81A and Z81D (Republic of South Sudan, current operations commencing in 2012).

IOTA NEWS ---> The following operations in the period October 2012/January 2013 have provided acceptable validation and are therefore approved for IOTA credit: RA4HKM/0 (AS-025), C6AVA (NA-048 & NA-054), YB4IR/5 (OC-075), L22D (SA-022) and LU6W (SA-096). SA-096 is now confirmed as a valid IOTA group. [TNX G3KMA]

LIGHTHOUSE WEEKEND ---> The fifth South American Lighthouses Weekend will be held on 22-24 February. Details, including a listing of partecipating stations, can be found at www.grupodxbb.com.ar/faros2013/index.htm

QSL VIA F5OZC ---> Alain, F5OZC has logs and cards for the following operations by F8DQZ: 3XD02 & 3XD02/p (AF-051, April 2003), J5UAT & J5UAT/p (AF-020, April-May 2003), 3XDQZ/p (April 2004, the first and so far only operation from IOTA group AF-096) and F8DQZ/p (EU-105, August 2004). QSL direct only to Alain Rebondy, 4 rue des Violettes, 49260 Breze, France. [TNX VE3VHB]

QSLs received direct or through managers: 1A0C, 2O12L, 3C0C, 3D2C, 3W2J,

20615. T47RRC & 5X8C

Yahoo group: DX-IS (2013)
Date: 2013-02-15 18:36:12 UTC
From: VE1AL
Topic: 20615 Message: 20615

I'm sure that this has happened before but I'm pretty sure it is the first time for me in my 50+ years of operating: T47RRC and 5X8C were both on 14020 simultaneously today and I managed to work both within five minutes. It was frustrating but a the same time it was a real thrill!!!

Neither of them appears to have realized the other is there but surely there must be confusion over the pileups!!!

To add to the confusion there are two T4s -- T47RRC (NA086) and T48RRC (NA218).

From: John G.
Topic: 20615 Message: 20616

Congrats Al! T48RRC is finished. Unfortuntately I missed that one as I have pulled my QSLs and am getting ready to send in for my basic IOTA award.

Worked T47RRC on 17m CW today. Now hearing 9U4U on 17 but not real loud and no luck yet. Copied the 5x for the first tiime yesterday on 20m RTTY. No luck with them yet. Hopefully this weekend.

Good for you on the 9U4. Haven't even heard him yet! :-(

I was totally unaware of the T4 operations, John, but will now go to the net and see what I can find. I assume from what you said, the guys moved from one island to another (NA218 to NA086) so I now have them both.

A spot check shows the last report of T48RRC at 1548 today (although I suspect that is wrong)...more like 0900.

We'll see.

Good luck.

20618. Half an antenna is better than none!!

Yahoo group: DX-IS (2013)
Date: 2013-02-15 19:27:44 UTC
From: Bob
Topic: 20618 Message: 20618

Okay here is one for the live and learn list....

Spent the last 3 weeks at my place in the Western Maine Mountains...

Wanted to try JT65 so I loaded it and in the space of a week gave out Maine Digital to around 200 contacts on a variety of bands. I then saw that 5X8C was active so I tried to work them. All on low power. They were very light! but amazingly the got me in just a few calls on 80, 40, 15, &12. This got me thinking.

I switched from my 140' beloved doublet to my back up G5RV. Wires and vertical are the only option in the wind blown mountains. Amazing the received signal jumped 3-4 S units. Huh?

A visual of the antenna showed that the strap that connects the north side of the dipole to the ladderline was hanging free. Somehow my MFJ Auto tuner didn't care that I had half an antenna and tuned it right up.

Couple hundred JT65 contacts and 5 new DXbands with a 70foot wire.

Next trip will be with repair parts and my 2zillion watt soldering iron.
Then again maybe I should try tuning up a window frame....

/bob

20619. Re: [DX-IS] Half an antenna is better than none!!

Yahoo group: DX-IS (2013)

From: Derek Wills
Topic: 20618 Message: 20619

I've been able to load up a 40m wire dipole on 30m and work stuff, contrary to the laws of Physics. I worked 5N7M on 30m with one call, and some Europeans at various times.

It didn't work on 5X8C, though - they just CQ'd back in my face...

The nominal 100 watts is probably 1 W when it leaves the antenna, and some people can hear that. 5X8C couldn't.

Now you make me feel really bad, as I haven't been able to work 5X8C yet
with a whole antenna!

John

Please don't feel bad. I am at 1500 feet in a valley that face EU/Africa. Piece of cake!

In that location there is also ZERO noise.

However south is a mountain (hard to work SA) and the altitude gives me some limits with Asia and the S Pacific.

What nature gives she also takes away. That is why I enjoy working folks from that location because it is like a different world.

Bob

>From Tad Cook, K7RA
Seattle, WA February 15, 2013
To all radio amateurs

SB PROP ARL ARLP007
ARLP007 Propagation de K7RA

Low levels of solar activity continue, the same as the past few weeks. Sunspot numbers remain remarkably consistent, with average daily numbers for the four reporting weeks since January 17 at 56.4, 55.7, 50.7 and finally 51.3 for the past week. As you can see, average daily sunspot numbers rose less than a point from the previous week to the past week. Average daily solar flux receded 2.4 points to 104. Geomagnetic conditions remain calm.

The ARRL International DX CW Contest is this weekend. Conditions will probably be about the same as last year, because solar activity is about the same as this time in 2012. See http://www.arrl.org/arrl-dx for contest details.

The latest prediction for solar flux shows values of 100 for February 15-16, 105 on February 17-19, 100 on February 20-22, 115 on February 23-24, 110 and 105 on February 25-26, 100 on February 27 through March 3, 95 on March 4-9,115 on March 10 and 120 on March 11-13.

The predicted planetary A index is 5 on February 15-20, 9 on February 21-22, 8 on February 23, 5 on February 24-28, then 10 and 8 on March 1-2, and 5 on March 3-17.

Every week F.K. Janda, OK1HH gives us his thoughts on geomagnetic conditions over the next few weeks. Generally for HF propagation, particularly for the higher bands (10-20 meters) we would like to see very little geomagnetic activity, but with as many sunspots and as much solar flux as possible. We have seen a lot of quiet geomagnetic conditions over the past few years, but not much in the way of sunspots or high solar flux values.

OK1HH suggests the geomagnetic field will be quiet to unsettled on February 15-16, quiet on February 17-21, quiet to active February 22, active to disturbed February 23, mostly quiet February 24-25,

quiet February 26-28, quiet to unsettled March 1, quiet to active March 2, mostly quiet March 3, quiet to unsettled March 4, quiet March 5-6, mostly quiet March 7-8, quiet March 9, and quiet to active on March 10.

Don't miss the article in the March issue of QST, by Carl Luetzelschwab, K9LA titled "The Sun and the Ionosphere." It begins on page 48, gives an update on Cycle 24, and discusses measuring the Sun and ionosphere and relating solar flux to MUF, or Maximum Usable Frequency.

Neil Shapiro, W2NLS of Bethpage, which is on New York's Long Island, asked about relating the information in these bulletins to practical on-the-air results.

I suggested checking out the resources listed at the bottom of each bulletin, from the ARRL Technical Information Service and also the resources from the K9LA website.

One useful tool is to download the free program W6ELprop (which works on the Windows operating system) from http://www.qsl.net/w6elprop/.

You will need to enter your latitude and longitude for your default station location, and a useful tool for converting street addresses to geographical coordinates is at http://www.latlong.net/convert-address-to-lat-long.html.

You can use an average of the previous 5 days sunspot numbers from here:

http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt

For the K index, either use the latest Middle Latitude numbers from here:

http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt

Or use the planetary number from WWV:

http://www.swpc.noaa.gov/ftpdir/latest/wwv.txt

I ran the numbers for Neil on February 15, from his QTH to the Czech Republic. It looks like 15 meters is a good bet from 1430-1700z, 17 meters 1330-1800z, and 20 meters over the same period as 17 meters, but stronger signals on 17 meters (assuming power levels and antennas are equal). It looks like 30 meters should open up around 1800z, and have strongest signals 2130-0100z, and 40 meters 2000-1000z, with best signals around 2230-0630z.

An alternative to sunspot numbers would be to use solar flux. You can set W6ELprop to default to either type, or change it on the fly by entering F103 (for example) as solar flux of 103, or S66 as

sunspot number of 66.

The engine used for driving W6ELprop was originally designed to work with the predicted smoothed sunspot number for the month, and it doesn't really work well to try to use the latest day's numbers. So an average for the past 5 days is a compromise.

Another useful tool is a new one from Stu Phillips, K6TU of Woodside, California: http://k6tu.net/.

This one is interesting. You subscribe to this service (but I think there is a free trial) and tell it what kind of prediction you want to run, then after making the calculations, it emails a link that you use to display them. For each band, you can step through hour-by-hour to see maps showing where your signals will be strongest, with different colors used to express different signal levels. It is interesting to see how the coverage areas shift, hour-by-hour.

We heard from Peter Thulesen, OX3XR in Nuuk, Greenland. He wrote, "Just to report my observations on 28 MHz propagation from Greenland (grid GP44) to North America, US and VE in the evenings after sunset here in Greenland. Around 2000-2200 UTC I very often have worked several/many stations on 28 MHz CW from all US and VE. This has been the situation January 2013. In the weekends where I have the possibility to monitor the bands during the day 28 MHz seems to be more dead towards W and VE than in the evening just after sunset.

"In the evening after sunset 28 MHz seems dead listening on the band. However, after calling CQ a few times around 28.025 MHz W and VE stations start to answer my call. The signal strength is good up to 599 and stable signals with only little QSB.

"When conditions have dropped for CW contacts I can normally continue working JT65 stations on 28 MHz, maybe another 30-45 minutes. I'm using a sloping dipole toward Europe and 100 watts."

Jeff, N8II of West Virginia wrote: "The seasonal changes we expect on the bands are occurring. Long path propagation has disappeared on 30 meters into SE Asia and the evening openings much improved on 12 thru 20 meters into East Asia. We get JAs some nights in the 2200Z hour on 12, 15 is better and on 20 CW the JTs, JT1AA/3 and JT1E, are much louder around 0100Z along with good openings to UA0U area which were almost nil in mid January.

"Conditions have been quite good at times into central Asia on the low bands. 4S7NE was logged around 0125Z on 40 meters CW on the February 8, T6LG continues to be active on 80 CW and EY8MM was also heard around their sunrise.

"I had quite a struggle completing a QSO with K7EKD near Seattle for his last state on 160 meters due to high noise on his end, but we

made it at 0200Z on the February 7."

When Jeff mentioned K7EKD, I thought the call sounded eerily familiar. K7EKD taught electronics in my high school. I spoke with him a few times, but unfortunately was expelled from school (hey, it was the late 1960s!) before I got around to taking any of his classes. At that point I was WA7CSK and had been on the air four years. It was certainly an interesting time to be a teenager.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for February 7 through 13 were 58, 57, 58, 45, 60, 55, and 26, with a mean of 51.3. 10.7 cm flux was 102.8, 104.2, 107.6, 105.9, 105.2, 101.8, and 100.3, with a mean of 104. Estimated planetary A indices were 6, 7, 3, 4, 4, 4, and 11, with a mean of 5.6. Estimated mid-latitude A indices were 7, 8, 3, 3, 3, 3, and 9, with a mean of 5.1.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30216
SIDC SOLAR BULLETIN 16 Feb 2013, 1217UT
SIDC FORECAST (valid from 1230UT, 16 Feb 2013 until 18 Feb 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 16 Feb 2013 10CM FLUX: 103 / AP: 001
PREDICTIONS FOR 17 Feb 2013 10CM FLUX: 105 / AP: 008
PREDICTIONS FOR 18 Feb 2013 10CM FLUX: 107 / AP: 011
COMMENT: Flaring activity was low during the past 24 hours, and it is
expected that the next 48 hours should be mostly quiet, with however a
risk for C class flares from NOAA ARs 1670 and 1673. A CME was observed
on Feb. 15, around 1736 UT on LASCO C2. It is a partial halo event,
originating from a small eruptive event taking place to the south-east
of NOAA AR 1671 around 1615UT. Due to the position of the source region,
this event might arrive at Earth, although STEREO observations are
scarce at the time this bulletin is prepared. Preliminary estimates give
an arrival around Feb. 20, but this will be refined as new information
is available. Unsettled to active conditions might be expected from this
event. In the meanwhile, geomagnetic conditions are expected to be
mostly quiet to unsettled for the next 48 hours.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30217
SIDC SOLAR BULLETIN 17 Feb 2013, 1157UT
SIDC FORECAST (valid from 1230UT, 17 Feb 2013 until 19 Feb 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 17 Feb 2013 10CM FLUX: 108 / AP: 006
PREDICTIONS FOR 18 Feb 2013 10CM FLUX: 112 / AP: 007
PREDICTIONS FOR 19 Feb 2013 10CM FLUX: 116 / AP: 011
COMMENT: Solar activity was low during the past 24 hours, with only a
C1.0 flare on Feb. 17 (0036 UT peak time) from a new region, NOAA AR
1675, which emerged on Feb. 16. This is the main source for additional C
flares in the next 48 hours, together, albeit with a lower probability,
with NOAA AR 1671 and 1673. Geomagnetic activity was unsettled to active
at planetary levels and reached even minor storm conditions at local
level (K=5 at Dourbes from 15 to 18UT). This corresponds to a small
shock observed by the ACE spacecraft around 1200 UT, linked to a
moderate fast solar wind stream, associated with a coronal hole becoming
geoeffective. Bz excursions down to -10 nT were observed on that day
around 1400UT. We expect quiet conditions to prevail for the next 48
hours, and then reach unsettled to possibly active conditions for
isolated periods, by the end of Feb. 19, or the the first half of Feb.
20, due to the arrival of the CME of Feb. 15.

TODAY'S ESTIMATED ISN : 061, BASED ON 05 STATIONS.

There was some EP on a few days ago asking for $10 for his
QSL card. I wonder if he's the same guy.

But, in any way, good luck, almost as easy as a card from Fidel !!

That's absolutely outrageous! By the time I got an envelope in the mail it would be Cdn$16.00. One advantage of being an OT (there are few) is that I've got EP confirmed 15 thru 40 so I won't have to get an Iranian confirmation by mortgaging my house.

Probably. The "$9 plus 1 IRC" is strange - if IRCs are valid in EP, one should be enough without the $$. If they're not, why would he want one?

I've only ever worked two real EPs (not counting Romeo) - one was the 'bus boys' HA5BUS, who were EP/HA5BUS (they also gave me S2), and the other was EP2MKO. For the latter I collected cards from some local DXers who chipped in a dollar or two, and sent them in a group, via registered mail, to the Russian manager - we all got cards OK.

Hi all,

I worked Mohsen 23rd Dec 2012 on 15m RTTY. When I looked at his QRZ.com, I read that he requested 5 USD due to high postage in Iran.

I send Mohsen an email, asking if he can even use Euros and if I can send my QSL card registered. Shortly I got a notice back, that both is possible.

So I did and send 5 Euros (= 6.67 USD).

Later I got an email from Mohsen again, saying that he was at his local postoffice, and postage is now 10 USD. He noticed that it has something to do with the embargo.

Some days later, Mohsen send me a copy of my QSL card via email and he said, that my QSL card is in the mail.

It arrived here safely. So for me he is *NOT* an USD hunter - he QSLs.

Thank you Mohsen!

Andy - DO1DXX

Thanks, Zack, that's encouraging. $10 is a lot even if it's successful, but it would be far worse not to receive anything in return. I'm still debating what to do. 73, Jerry K3BZ

That's good news, Andy, thanks. But I'm guessing that from EP there's a
big difference between mailing something to Germany and mailing it to
the US. I guess it's worth a try though.

After all these years, I suspect most of us know a DXer in Germany
(or elsewhere in EU) we could send out QSL package (QSL, envelopes and
return postage) to and they would then mail it to EP for us. Use an
intermediary you trust and that might work if you don't want to go direct.

If I needed that one bad, I'd be asking all my pals in EU or AS or wherever to go to bat for me in terms of getting the QSL there and back. There is nothing better than getting a new one confirmed.

73, Paul VE1DX

20640. thanks to 9Y

Yahoo group: DX-IS (2013)
Date: 2013-02-19 04:57:31 UTC
From: Lance Martin
Topic: 20640 Message: 20640

Hi Guys,

I just wanted to thank 9Y4NW, DL7VOG and DL8DYL for their efforts on CW of recent months in 9Y land. As you all know the polar path propagation (for VK6 to east Caribbean and South America) is never stable so one has to be there at the right time to make the QSO. I was able to get these guys without skeds and I thank them for listening in the gaps for us weak sigs down under.

I finally have 9Y confirmed on CW!

A lot of VKs still need PJ2/4/5/7 on multiple modes and some VK6s for an all-time new one and mode/band.
For me I need PJ4/6 on RTTY.

I know it's just a matter of time and a lot of DXers are activating these spots. If you are going down that way (on behalf of the VK dxers), could you please spare a few minutes in your busy pileups for us?

For all South American and Caribbean stations: "Equinox is near upon us, propagation tends to get a lift at this time of year especially over the poles, so I hope to hear you guys on the band soon."

Keep at 'em.

73, Lance - VK6DU

Hi Guys,

When I got back on air in 2005 I didn’t have a QSO with EP in the log.

Since then I have had 10 and the best guy to work is EP3PK Pooyan as he is LOTW and still active (my last QSO with him Jan 2012). 3 modes confirmed.

He has an email address on QRZ.com, so maybe you can set up a sked with him.

I do have a QSO with EP3SMH but $10 is a bit rich…

From: Lance Martin
Topic: 9164 Message: 20652

Hi Guys,

Managed to work Norbert DL2RNS finally today for a new one on 30m CW and I guess I was lucky to get through as the pileup has been huge from EU every time I hear this guy.

It never ceases to amaze me for the demand from EU for C3, EA9, T7, 1A0, OJ0 (and off course SV/A that we can't hear out this way) that are right on their doorstep...hardly DX....

So I would love to see more activity from these areas, so that us remote guys can get through....

Congratulations on the catch, Lance! None of the ones you mentioned are rare and are activated quite often (although SV/A does go in spurts.) I worked EA9/DL2RNS on 160 earlier tonight.

I think what happens with those you listed is that there is one or two resident hams, or someone from a neighbouring country who goes there a few times a year with a modest set-up and keeps the demand down in terms of anyone going there and mounting a serious DXpedition. (1A0 is the exception to this . . . it is DXpedition material.) This has to be frustration for you guys who are so far away. A few operations a year with 100 watts and a vertical might keep NA and EU happy, but you guys are not going to easily hear them, or be heard. I don't know the answer, for no one would go to C3 or T7 with 8-10 OPs, amps and beams. OJ0 is equipped with permanent antennas now, I think, thanks to the work of OH2BH and others. It's activated a few times a year, usually during contests. It does suffer from attenuation because it is so far to the north.

What I'm saying is they all are on the verge of being just a bit semi-rare. Getting an operation going there with the fire power and duration to work you guys in Oceania is a challenge. It's all about location.

If JA, EU, NA and SA can work them with relative ease even once a year, there isn't a lot of incentive for the DXpeditioners to go there.

73, Paul VE1DX

Topic: 9164 Message: 20654

Hi Paul,

Yes, I hear you. I realise this and I guess I was thinking of just encouraging those who already go, to keep a window or ear out for Oceania.
It appears that predominantly C3 and SV/A stations are behind a hill for short path propagation and long path is less reliable. This only increases the frustration.
I have discussed the SV/A situation with many HR ops here in VK6 and many of them have almost given up on ever getting the Monk, which is a sad state of affairs considering their elderly status.
In recent past experience, every time I see SV/A spotted I get there and can hear the huge EU pile but never hear anything from SV/A. I have only really heard him once LP back in 2006 on 20m SSB, he was about 44 but just couldn't break through the pile....and had the TH6 and amp. going.

I know there are fairly regular teams that go to HB0 and over there years I have managed to get this one on all modes but I still need HB0 on 30/12m.
Can't these HB0 guys go to C3 or EA9 etc...though I guess there are always a number of factors involved when embarking on these ventures.

I need C3, 30/12m and RTTY.

1A0 is also an enigma. I was the only VK6 who made the last log there (1A0C) and I am sure those guys were QRV for every minute possible while they were there.
I need 1A0 on RTTY and 80/40/30/15/12 (1 mode and 5bands).

It is about location and living in the second most isolated capitol city in the world doesn't make it easy. (I guess I both love and hate the challenge...)

Ok, that's enough from me, sorry for those of you who are getting sore ears from this (or eyes).

One part of any difficult challenge....the harder it is the more you celebrate when you have success!

73, Lance - VK6DU

It's activated a few times a year, usually during contests. It does suffer from attenuation because it is so far to the north.

What I'm saying is they all are on the verge of being just a bit semi-rare. Getting an operation going there with the fire power and duration to work you guys in Oceania is a challenge. It's all about location.

If JA, EU, NA and SA can work them with relative ease even once a year, there isn't a lot of incentive for the DXpeditioners to go there.

73, Paul VE1DX

ARLD008 DX news

ZCZC AE08
QST de W1AW
DX Bulletin 8 ARLD008
>From ARRL Headquarters
Newington CT February 21, 2013
To all radio amateurs

SB DX ARL ARLD008
ARLD008 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

RWANDA, 9X. Nick, G3RWF (5X1NH) plans to be QRV from March 4 to 12. He has requested the call sign 9X0NH, and the license should be valid for 2013 because he could return later in the year. Activity will be mainly CW. QSL via G3RWF.

SOLOMON ISLANDS, H44. Operators Phil, G3SWH and Jim, G3RTE will be active from Honiara, Guadalcanal, until February 28. QSL via G3SWH, either via the OQRS facility on Phil's Web site, direct with SAE and adequate return postage or via the Bureau.

DOMINICA, J7. Rick, KK4GV will be active as J79GV from Calibishie between March 8 and 17. His activity will be holiday style and SSB only. QSL via his home call sign, direct or via the Bureau.

EL SALVADOR, YS. John, NO7B will be QRV as YS1/NO7B until March 12. Listen for him on SSB only on 40 to 10 meters. QSL via home call.

ALAND ISLANDS, OH0. Kim, OH6KZP will be active as OH0X during the ARRL DX SSB Contest, March 2 and 3, as a Single-Op entry. QSL via LoTW or to OH2TA.

BELIZE, V3. Lee, N8LJ will be active as V31LJ from Placencia between February 27 and March 6. Activity will be on the HF bands. QSL via K8ESQ.

MONTSERRAT, VP2M. Operators John, KB8RJ and XYL Crissie, WD8KUR will be active as VP2MRS and VP2MUR, respectively, until March 14. Activity will be holiday style on 80 to 10 meters, including the WARC bands, using mostly SSB and some PSK. QSL both call signs via

KB8RJ.

RODRIQUES ISLAND, 3B9. Operators Toshi, JA8BMK; Ken, JN1THL (AB1GJ) and Yoshiko, JQ1LCW (KF7JXL), plan to be active from March 1 to 10. Activity will be on 80 through 10 meters using SSB, CW, RTTY and PSK31. If time permits Toshi will operate from Mauritius Island as 3B8/JA8BMK on February 27 and 28. QSL via EA5GL, direct only.

ST. LUCIA, J6. Rob, N7QT, will be QRV as J6/N7QT between April 5 and 16. Activity will be on 80 to 10 meters using CW, SSB and RTTY or PSK, as well as operating field portable (battery only) either from the St. Lucia beaches or scenic mountain tops. During field portable operations, they will sign /P. QSL J6/N7QT via LoTW, eQSL, by the Bureau, or direct to his home call sign with SASE. J69DS will only accept direct QSLs with a SASE. No Bureau QSLs.

BONAIRE, PJ4. Operators Janusz, SP9FIH and Kazik, SP6AXW will be active as PJ4/home calls between April 8 and 20. Activity will be on 160 to 6 meters using SSB and RTTY. QSL via SP9FIH: Janusz Wegrzyn, P.O. Box 480, 44-100 Gliwice, Poland.

BRITISH VIRGIN ISLANDS, VP2V. Dave, W9DR will be active as VP2V/W9DR from the north shore of the Island of Anegada (NA-023) between June 14 and 28. Activity will be on 50.115 MHz (SSB) and 50.115.6 MHz (CW). He will also be running a beacon on 50.115.6 when the band is not open. QSL to home call.

GREECE, SV. Rich, M5RIC will be active as SV8/M5RIC from Zakynthos Island (EU-052) from July 23 to 30. Activity will be on 80 to 10 meters using SSB and RTTY. QSL via M5RIC.

MIQUELON ISLAND, FP. Eric, KV1J will be QRV as FP/KV1J from July 6 to 16. He plans to be on 160 through 6 meters, primarily on SSB and RTTY but some CW, PSK-31 and Feld Hell. QSL via KV1J either direct, via the bureau or LoTW.

THIS WEEKEND ON THE RADIO. The REF SSB Contest, UBA CW Contest, Mississippi QSO Party, North American RTTY QSO Party, North Carolina QSO Party, and the CQC Winter QSO Party are all on tap for this weekend. The CQ WW 160 Meter SSB Contest is on February 22. Please see February QST, page 90, and the ARRL and WA7BNM Contest websites for details.

20658. disparaging remark

Yahoo group: DX-IS (2013)
Date: 2013-02-22 00:08:40 UTC
From: VE1AL
Topic: 20658 Message: 20658

A little bit earlier this evening a W7 made a rude comment on the cluster about the current 9U4 and XT2 operations. It was both unfair and unnecessary.

Personally, I cannot comprehend the massive pileups these operators are facing. Operating practices have sunk to new lows and courtesy in a pileup is non-existent. All of the operators I have encountered with both operations have been fair and have not lost their cool despite the obstacles they have met with operators from all parts of the world.

I called XT2TT for well over an hour today before making my 12M QSO. I was rewarded with an almost instant on-line log entry that puts me in their log. That was an unexpected surprise. I expect the card in Monday's mail. :-)

The W7s call is lost to me because I was disconnected from the cluster. But I recall that a KC6 took him to task. Goodness knows this guy needs a reality check!

Ditto! I also saw it and was disgusted about it.

I guess the W7 hasn't been able to work the DXP's or else his comment would have been, "Great DXP, amazing operators, good ears"

From: John G.
Topic: 20658 Message: 20660

Hi Al,

It never ceases to amaze me what people want out of DXpeditions and the demands they make on them. I am constantly seeing remarks on the cluster about people bashing the DXpedition for not doing 160m SSTV or something like that. If they are on a different mode or band, go to that band or mode and chase them.

Then there are those who completely lose it because the DXpedition went 15 seconds without updating their logs. I guess they would have been completely lost when we started DXing-no cluster so you actually had a listen and tune a band to find the DX. No on-line logs, you worked them, figured you worked them, sent out a card, and got it back in 6 months or so, if you are lucky.

I am completely lost on the reasoning behind continuing to call the DX when they he/she is transmitting. There is probably no way the DX can hear you then. Same for calling him when he is working someone else on a different frequency. I guess the ops that do this are either incredibly stupid. or really can't hear the DX. They find the DXs frequency on the cluster, park out there, start calling up a few, and hope the DX pops out of the noise long at the price time he is sending their call.

I agree that pileups and piluep behavior is really hitting a new low. However, every time I think I have heard it all, it manages to get worse! I don't know what the solution is. i wish more DX stations would publish a black list of ops they won't work. Maybe that would lead to some improvements in behavior, but probably not. The stations on the blacklist would then just jam the DX station.

There are also tremendous pileups over entities that really shouldnt be causing much of a pileup. I don't know it if is caused by the DX marathon, or a huge influx of new operators who really need that entity on that band or mode, or just boredom and people looking for some pileup excitement.

Al,

I took a look at the Cluster - the announcements. I asked you directly if that wisecrack circa 2300 Z is the one you were thinking of.

It wouldn't surprise me if that wasn't the real op, but someone being a jacka. wiseacre at someone else's expense. There's been a lot of that lately.

There may be no explanation. Some people are just boneheads, and other words I should not use on this reflector. Best thing to do? Ignore them. Let them waste their time complaining. I'd rather work the DX.

And. Congrats on the XT2, by the way. Nice catch. I was happy to break through a small pile-up and work J5NAR on 40, just before dinner time.

It certainly is gratifying to read there are sane minds out there, from the comments received.

Sadly, I've come to the conclusion that there's really nothing anyone can do. As the saying goes, "The genie is out of the bottle..." Whether the comment really came from W7DJ or not, it stopped me in my tracks. Nonetheless, someone made it. Out of frustration, I don't know. Certainly the person who posted the comment has no concept of the realities at the receiving end of a DXpedition. The most recent DXpeditions have featured some amazing operators who have soldiered through magnificently.

One can only imagine that the operator has the narrowest filter on his receiver and if you're strong enough to be heard you'll crack through.

BTW, I've been filling band slots with these latest African operations and was sorry yesterday to see that 3D2RO/RX had ended their operation because I still needed them on 17 and was never able to get through.

Now on to the H44!!!

From: GARY HUBER
Topic: 20658 Message: 20663

While I've announcements unchecked and can't go back to look at the comment and callsign, I agree with Ron. Back when I was running N9PE DXSpider or its predecessors I found most of those who made nasty comments would NOT do so with their own callsign. Absent any other way to police the Cluster / DXSpider, the software developers provided callsign and text filters to remove the most common crude and obscene words and callsigns like B0ZO .....

Bootlegging another's callsign on the DX-pedition's QRG in order to get him (or her) blacklisted could be fairly easy with electronic keyers or digital recording devices for voice transmission and it seems like someone is doing something like that to disrupt the calling frequency during every major DX-pedition. Best thing for everyone is to ignore them and for the DX to move to an alternate frequency on the band if necessary.

Al, congrats on getting in the XT2TT log and that near instant QSL.

I am one of those people who doesn't care to work a DXpedition on every band/mode. I may try to work them on a few bands if possible but other than that I just don't care.

That being said, I have worked both these entities. I worked one of the 9U's in the past that counted (I think it was an operation by Baldur?). And XT2BW was a regular on 40 CW when he was in that country. In fact, he had pretty much worked out that band and would often call CQ with no takers. I believe he was the station I sent the current football scores to a couple times. :-)

DXing is getting very discouraging to me. The pileups are something I tire of facing. I praise any op who goes on a DXpedition these days. What they have to put up with is almost beyond belief.

Zack,

I am sure you would like to work one or both on 10ghz!

I am one of those people who doesn't care to work a DXpedition on every band/mode. I may try to work them on a few bands if possible but other than that I just don't care.

That being said, I have worked both these entities. I worked one of the 9U's in the past that counted (I think it was an operation by Baldur?). And XT2BW was a regular on 40 CW when he was in that country. In fact, he had pretty much worked out that band and would often call CQ with no takers. I believe he was the station I sent the current football scores to a couple times. :-)

DXing is getting very discouraging to me. The pileups are something I tire of facing. I praise any op who goes on a DXpedition these days. What they have to put up with is almost beyond belief.

Hi John,

Yeah! I'd settle for 50 MHz though.
:-)

I have about 20 countries on 6m so far. All have been in contests and all have been with 10 watts at this end. I am thinking of putting up a larger beam on a tower at home this spring for that band and bringing it to the 100 watt power level, though.

From: Lance Martin
Topic: 20667 Message: 20667

Hi Guys,

I just tweeted the following;

Active this week 2300z 18105 RTTY then 14081 mainly for NA LP. I need CT, DE, ID, ME, NV, NH, NY, OK, SD, WV, WI WY, triple play,

73 Lance
I hope I will get a few takers,

73, Lance - VK6DU

6 sure is a fun band. Would love to get on the microwaves like you are some day. Heck, would like to get back on 432 soon. I have about 45 countries on 6 now, with 100 watts and either a 2 or 3 element beam.

23 February 2013 A.R.I. DX Bulletin
No 1138
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3B9 - Toshi JA8BMK, Ken JA8CDG/JN1THL and Yoshiko JQ1LCW will be active as 3B9DX from Rodrigues Island (AF-017) on 1-10 March. They will operate CW, SSB, RTTY and PSK31 on 80-10 metres. QSL direct to EA5GL. [TNX DX World]
7P - Once again Peter, EI7CC will be active as 7P8PB from Lesotho on 6-26 March. He will operate holiday style from the station of his brother-in-law Gerry, 7P8CC (EI8CC, the Irish amabassador to Lesotho). QSL via EI7CC, direct or bureau. Logs will be uploaded to LoTW on a daily basis is at all possible. [TNX EI7CC]
8P - Gerry, W1VE will participate in the ARRL DX SSB Contest as 8P1V from Barbados. The week before the contest, starting on 26 February, he will be QRV as 8P9RM on 160-6 metres, with a focus on CW and the low bands, with "some SSB and RTTY thrown in". QSL direct to home call. [TNX W1VE]
9M4_spr- Christian EA3NT had to withdraw from the 10-18 March 9M4SLL DXpedition [425DXN 1132] due to work reasons, but he has been replaced by Pista HA5AO and George HA5UK. The other operators are John 9M6XRO, Steve 9M6DXX, James 9V1YC, Don G3BJ, Tony KM0O and Ben N6MUF/DJ0YI. 9M4SLL will operate from Pulau Layang Layang, Spratly Islands (AS-051) with five stations simultaneously at peak times, using full legal power linear amplifiers on all stations and vertical antennas sited within a few metres of the ocean. Activity will be on 160-10 metres, CW, SSB and RTTY. There will be no 60m operation as that is not permitted by the Malaysian licence. QSL via M0URX (OQRS for direct and bureau cards at http://m0urx.com/). Logs will be uploaded to LoTW within a few days after the end of the operation. Further information, including suggested operating frequencies, can be found at http://m0urx.com/9m4sll [TNX 9M6DXX]
CE0_ei - Nigel G3TXF, Martin G3ZAY, Michael G7VJR and John G4IRN will be active as XR0YG from Easter Island (SA-001) on 20-27 March. They will operate mainly CW on 160-10 metres, with a focus on the low bands and Europe. QSL via G3TXF (OQRS for direct and bureau cards on Club Log). They plan to upload their logs to Club Log and LoTW during the expedition. Chile experiences regular earthquakes, and the XR0YG team is making a donation of $500 to RCCh (Radio Club de Chile) "in support of their emergency communications projects, in

appreciation of their friendly backing of our expedition,
especially for their help with our licenses and 30m permits for
Easter Island". The website for the expedition is at
http://xr0yg.com/
FM - Al, F5VHJ will be active as FM/F5VHJ from Martinique (NA-107) from
25 February to 3 March, including an entry in the ARRL DX SSB
Contest as TO5A. QSL via home call, direct or bureau, and LoTW.
[TNX NG3K]
JA - Special event station 8J6ISG will be active on all bands and modes
between 1 March and 30 April to celebrate the opening of the new
airport of Ishigaki (AS-024). QSL via the JARL bureau. [TNX VA3RJ]
PJ2 - Ulf, DL5AXX will be active as PJ2/DL5AXX from Curacao (SA-099)
from 24 February to 11 March. He will operate holiday style on
80-10 metres, mainly CW with some RTTY. QSL via home call; an OQRS
for bureau cards can be found at www.dl5axx.de [TNX The Daily DX]
PY - PU5IKE and PP5RK will operate SSB and digital modes as ZW5WIM from
Ilha da Paz (SA-027) and lighthouse on 23-24 February. QSL via
PU5IKE, direct or bureau, plus LoTW and eQSL. [TNX PT7WA]
UA - Celebrating the 95th anniversary of the Russian National Military
Forces, special callsign UE95RA (Russian Army) will be in use
until 24 February on all bands and modes. QSL via UA3YLP. [TNX
RV3YR]
V3 - Lee N8LJ (V31LJ), Stan AC8W (V31AC) and Jim KB8TXZ (V31VJ) will be
active from Belize from 27 February to 6 March. They plan to be
QRV on 160-6 metres CW, RTTY and SSB and to operate a multi-single
entry in the ARRL DX SSB Contest. QSL V31LJ via K8ESQ, QSL V31AC
and V31VJ via KB8TXZ. [TNX AC8JF]
VP2V - Larry, KE2VB will be active as VP2V/KE2VB from the British Virgin
Islands (NA-023) from 27 February to 4 March, including an entry
in the ARRL DX SSB Contest. He will operate CW and SSB before and
after the contest, hopefully on 160-10 metres. QSL via NR6M.
W - Lou, W0FK plans to be active from Longboat Key (NA-034) on 2-16
March. QSL via home call, direct or bureau. [TNX rsgbiota.org]
W - Pete, VE3IKV will be active as W4/VA3RA from St. Simons Island
(NA-058) on 2 March and from Key West (NA-062) on 3-15 March. Look
for him on 30 and 17 metres CW. A side trip to the Dry Tortugas
(NA-079) is planned on 11-14 March, if the weather is fine. Expect
him to be signing VE3IKV/W4 while on NA-079 (a low-power battery
and solar power CW operation on 30, 17 and 6 metres). QSLs via
VE3IKV, direct or bureau. [TNX rsgbiota.org]
XU - Eddy, ON4AFU (www.on4afu.net) will be active as XU7AFU from
Cambodia until 14 March. He will operate CW only on 40-10 metres
with 100 watts and wire antennas. QSL via ON4AFU, direct or bureau.
YN - Scott, K7ZO will be active as YN5Z from Nicaragua from 27 February
until 3 March. His main focus will be a SOAB entry in the the ARRL
DX SSB Contest. QSL direct to K7ZO and LoTW.
YS - John, NO7B will be active as YS1/NO7B from El Salvador from 21
February to 12 March. He will operate SSB only on 40-10 metres.
QSL via home call. [TNX The Daily DX]
ZA - Max, IZ4JMA reports he is now living in Albania and will be on the

air as ZA/IZ4JMA starting from 25 February for 18 months at least.
He can be QRV on all bands and modes. QSL via IZ4JMA.

CQ WW 160-METER CONTEST (SSB) ---> Objective of the contest is for amateurs around the world to work as many US States, Canadian provinces and countries as possible on 160 metres CW (http://cq160.com/rules.htm). A list of stations that have announced their participation in this year's event (from 22.00 UTC on 22 February through 22.00 UTC on the 24th) is maintained by Bill, NG3K at http://www.ng3k.com/Misc/cq160s2013.html

NA-066 ---> The 20-24 February K6PV/6 activity from Santa Catalina Island [425DXN 1137] has been cancelled due to sea conditions. [TNX The Daily DX]

SA-030 ---> The 21-24 February CV5A activity from Flores Island [425DXN 1137] has been postponed until further notice while the Uruguayan Navy recovers the remains of an aircraft that crashed off Flores back in June 2012.

SB PROP @ ARL $ARLP008
ARLP008 Propagation de K7RA

ZCZC AP08
QST de W1AW
Propagation Forecast Bulletin 8 ARLP008
>From Tad Cook, K7RA
Seattle, WA February 22, 2013
To all radio amateurs

SB PROP ARL ARLP008
ARLP008 Propagation de K7RA

Average daily sunspot numbers over the past seven days, February 14-20, rose modestly by 27 points to 78.3. Average daily solar flux was up marginally, only 1.6 points to 105.6. Geomagnetic indices rose also, with the planetary A index from 5.6 to 6.4, and the middle latitude A index from 5.1 to 6. This is compared to the previous seven days, February 7-13 reported in last week's bulletin.

There was a more substantial rise in both solar flux and sunspot numbers for a recent three days, at 104.7, 112.4 and 113.5 for solar flux, and 92, 117 and 106 for sunspot numbers. But that turned around when the sunspot number dropped from 106 to 75 on Thursday, February 21 and solar flux declined from 113.5 to 108.5.

The predicted solar flux is 105 on February 22-23, 100 on February 24, 95 on February 25-26, 100, 105 and 110 on February 27 through March 1, 100 on March 2-3, 95 on March 4-14, 100 on March 15-16, 115 on March 17, and 120 on March 18-20, which represents a peak for the next 45 days.

The predicted planetary A index is 8 on February 22, 10 on February 23, 8 on February 24, 5 on February 25-28, 10 and 8 on March 1-2, 5 on March 3-10, 7 on March 11-12, and 5 on March 13-27.

Over the next month we can look forward to improving HF conditions as we progress toward the Spring Equinox, which occurs on Wednesday, March 20 at 1102z.

Using a propagation prediction program such as W6ELprop gives us a rough idea of what the seasonal improvement might be. Running two instances of the program simultaneously, once for February 21 and the other on March 21, but with the same solar flux (I used 107) allows me to flip back and forth between the results. I did one for Seattle to Japan, and the 15 meter opening from 2200z to 0030z on February 21 shows up as a 2130-0500z opening on March 21. Similarly,

a 17 meter opening from 2130-0230z on February 21 stretches to 2030-0500z on March 21.

OK1HH predicts the geomagnetic field as quiet to active on February 22, active to disturbed on February 23, mostly quiet February 24-25, quiet on February 26-28, quiet to unsettled March 1, quiet to active March 2, mostly quiet March 3, quiet to unsettled March 4, quiet March 5-6, mostly quiet March 7-8, quiet March 9, and quiet to active March 10.

Several news articles, such as
http://www.upi.com/Science_News/2013/02/20/NASA-instrument-sees-giant-sunspot-forming/UPI-80691361403797/
and
http://www.science20.com/news_articles/giant_sun_spot_size_6_earths_grows_48_hours-104269
mentioned a huge growing sunspot group 1678 that might spit out solar flares. But this spot is way over on the western horizon (yes, the right side is referred to as "west" on the Sun) and about to slip away from view. It is not geo-effective, which it would be if it appeared in the center of the visible solar disc.

Jon Jones, N0JK of Lawrence, Kansas (where I was born!) has long enjoyed working 6 meter E-skip and even DX using very modest and even compromised antennas. Jon reported on February 16: "Julian, XE2JS DL68 had a nice 6 meter Es opening to the Midwest Saturday evening (February 17 UTC). I worked Julian while I was mobile on highway 40 west of Lawrence, KS EM28 with 58 to 59 signals at 0135 UTC. My 6 meter mobile antenna is a 2 meter 5/8 mag. mount whip (quarter-wave on 6 meters). Saw ZL1RS worked TI5/N5BEK earlier at 2254 UTC February 16."

Yes, Jon feeds that 2 meter whip directly on 6 meters, no change in loading or any modification. That distance between him and XE2JS is a little less than 1,000 miles.

On February 19, Jon reported: "The whip I currently use has a 1.1 to 1 SWR, as-is on 6 meters. Some 2 meter mag antennas don't match well on 6 and may need to be trimmed. ZL1RS later worked KD5PBR, N5DG, NW0W and a few other stations on 6 meters around 0230 UTC on Feb. 17. Likely an Es link on to TEP. (Jon means sporadic-E propagation linked to trans-equatorial propagation. See
http://www.ips.gov.au/Category/Educational/Other%20Topics/Radio%20Communication/Transequatorial.pdf
or
http://www.amateur-radio-wiki.net/index.php?title=Trans-Equatorial_Propagation
for info on TEP).

On February 21 Jon wrote, "Even better, I heard ZL1RS CW on February 20 at 2300 UTC on 50.087 MHz, about a 339 RST. This was on an attic dipole. I am sure I could have worked him with better antenna."

Jeff Hartley, N8II of Shepherdstown, West Virginia wrote on February 17: "I had limited time due to working 1700Z-0230Z over the weekend, but found conditions at least on 80, 15 and 10 meters to be excellent during the ARRL CW DX contest.

"In just a few hours on 80 meters around 0140-0440Z Saturday the February 16 and 0230-0400Z Sunday, I managed to work 270 QSOs and 67 DXCC countries with a 1/4 wave ground plane. Conditions were overall the best to Europe I can ever remember in a contest. I was able to run a steady stream of callers at times, the best I have ever done on 80. I didn't make any QSOs with central Asia, but the well equipped big guns did work that area. I was called by C4N in Cyprus with a huge signal, and also a 4Z5 (Israel), and A65BP (United Arab Emirates). Russians were generally somewhat weaker than western Europe, but many had good signals all the way to the UA4 area. Big guns RU1A and RL3A were well over S9! ZS1EL also called me as well as about 3 or 4 five-watt European stations. At least 3 PY stations also called in from southern Brazil. The omni-directional antenna does have a few advantages. Activity from Europe was very good even the second night when traditionally it is very slow. I also noticed that some far western USA stations were working Europe as well.

"10 meters was very interesting with marginal conditions to Europe Saturday, but OH, LY, YL, and SM were logged. There were a few loud signals from LZ, F, and EA. Stations in the Caribbean at the same time were very loud as was CR2X, and Africans 6V7S, CR3A, 3V8BB, and EA9EU all had very good signals. 15 meters around 1530Z was wide open to Europe with booming signals. Solar flux was right around 100.

"Sunday, I arrived at the perfect time around 1400Z when 10 meters was just opening to Europe. East of Poland, propagation was almost nil except for a weak R7MM, and about 3 weak Ukrainians, but I ran a big pile-up with a huge number of Germans logged and strong signals even from SM and LA. All of Europe east of Poland had good conditions to here in West Virginia at least thru 1510Z when I had to QRT. Conditions were better than would be expected with a solar flux of only 103 and K index of 2-3, simply amazing that Europe was booming in."

On February 19 Jeff wrote: "Last night February 18 (but February 19 based on universal time), T46RRC (Cuban IOTA NA-204) was on 80 and European signals calling them were down 15-20 db from the levels over the weekend. They were S9+25-30 dB on 160 Monday at 0230Z, a really awesome signal! They have been so loud that they have had no trouble putting a lot from 'mother Russia' into the log, the 17 meter op in the mornings can be heard running stations in Russian, but will switch over to English when a loud station here QRMs the Europeans."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for February 14 through 20 were 25, 59, 75, 74, 92, 117, and 106, with a mean of 78.3. 10.7 cm flux was 99.5, 100.1, 103.2, 105.5, 104.7, 112.4, and 113.5, with a mean of 105.6. Estimated planetary A indices were 10, 4, 8, 8, 4, 6, and 5, with a mean of 6.4. Estimated mid-latitude A indices were 11, 3, 6, 7, 4, 5, and 6, with a mean of 6.

Turned out it was just the Log On Here links from the main LOTW page.
Once I got to the logon page it worked fine.

20678. LoTW shortcut tip

Yahoo group: DX-IS (2013)
Date: 2013-02-24 17:16:07 UTC
From: Paul M Dunphy
Topic: 20678 Message: 20678

If anyone is looking for a "shortcut" to log on LoTW and take them to their QSL pages, the following URL is something I have been using for 3-4 years:

<https://p1k.arrl.org/lotwuser/qsos?login=YOURCALL&password=YOURPASSWORD&qso_query=1&qso_qsl=yes&qso_withown=yes&&qso_sort=QSL+Date&qso_descend=yes&awg_id=DXCC&ac_acct=1>

Substitute YOURCALL with your own call sign and YOURPASSWORD with your password. Don't do this if it's a shared computer or if you think someone else will get at it, but the above works well in terms of saving typing everything in each time.

I bookmarked the above and I can now log into LoTW and go to my QSL page with a single mouse click. It works with Firefox, Internet Explorer and Google Chrome. I haven't tried it with other browsers.

73, Paul VE1DX

February 25, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, NF4A, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, N9GM, W9ILY, 9M6DXX, AT International, CO8DM, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, EA4ZB, EI7CC, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OZ6OM & 50 MHz DX News, ON6OM, Pete's DX-Newsdesk, PT7WA, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 17th-February, through Sunday, 24th-February there were 231 countries active. Countries available: 3A, 3B8, 3D2, 3D2/r, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP5, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8 & 3B9, MAURITIUS AND RODRIGUES ISLANDS. Operators Toshi/JA8BMK, Ken/JN1THL (AB1GJ) and YL Yoshiko/JQ1LCW (KF7JXL) will be active as 3B9DX from Rodrigues Island (AF-017) between March 1-10th. Activity will be on 80-10 meters using CW, SSB, RTTY and PSK31. The operators

will be using a Kenwood TS-590, a Yaesu FT-897D, and a Tokyo Hy-power HL-550fx amp into a Hexbeam, a Windom and a vertical antennas. QSL via EA5GL direct only (w/SASE and IRC/greenstamps). ADDED NOTE: If time permits, Toshi/JA8BMK will operate as 3B8/JA8BMK from Mauritius Island (AF-049) on February 27th and 28th. For updates, watch QRZ.com.

3V, TUNISIA (Operator Update). An Italian group, along with the Association des Radio Amateurs Tunisiens (ARAT) and the Engineering University of Gabes, who are planning a second IOTA DXpedition to Djerba Island (AF-083, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), as TS8TI (will receive license in March) between April 29th and May 6th (see OPDX.1100), have added two more operators to their operation. Operators mentioned are Luciano/IZ7EVZ and Fabio/IZ8DSS.

4Z, ISRAEL (WFF and Holyland SQ. Ops). Dov, 4Z4DX, plans to activate some World-Wide Flora & Fauna and Holyland Square locations to celebrate his 62nd birthday and 47 years on the air between March 25-27th. Look for him to operate from: Kursi Holyland (WWFF 4XFF-024, Holyland square O-06-HG), Park Hayarden (WWFF 4XFF-029, Holyland square N-05-KT) and Mount Hermon (WWFF 4XFF-023, Holyland square O-01-HG). QSL via 4Z4DX (QRZ.com).

5H, TANZANIA. Maurizio, IK2GZU, will once again return to the "Mission Ilembula" to do some work at the new hospital and orphanage between April 7th and May 8th. He plans to be active during his spare time as 5H3MB on the HF bands. Maurizio will use his FT-100 and the mission's TS-850 into a tri-band 3 element beam (20/15/10m) fixed on Europe and a vertical or dipole for the other bands. QSL via IK2GZU, direct or by the Bureau. Also, LoTW (after his return home). For more details, updates and an online log, visit his Web site at:
http://www.buffoli-pm.it/5h/Tanzania%202011.htm

5X, UGANDA (Update). Members of the F6KOP team went QRT as 5X8C at 1003z on February 17th. The 5X8C log on ClubLog reports that the 5X8C team has made 81242/QSOs with 21010/Unique callsigns (41077/CW, 28535/SSB, 11624/RTTY, 14/PSK63 and 1/PSK) with 1215/AF, 1/AN, 7560/AS, 59611/EU, 11391/NA, 627/OC and 837/SA. To check your QSOs, go to:
http://www.clublog.org/charts/?c=5X8C
Remember, Yann, F1NGP, is their QSL Manager (100% OK Direct, ClubLog's OQRS, Bureau and LoTW). For more details and updates, see:
http://www.5x2013.com

7P, LESOTHO. Peter, EI7CC, will once again be active as 7P8PB from Maseru between March 6-26th. Activity will be limited because he will be on a family holiday and will operate when circumstances permit. He will be operating from his brother-in-law Gerry's station, 7P8CC (home callsign EI8CC). QSL via EI7CC, by the Bureau or direct. Logs will be uploaded to LoTW immediately upon his return to Ireland. If possible, Peter may try to upload them while in Lesotho.

8P, BARBADOS. Gerry, W1VE, will be active as 8P9RM between February 26th and March 1st, and then for the ARRL DX SSB Contest (March 2-3rd) he will sign 8P1V. Activity will be on 160-6 meters, but with a concentration on

the low-band CW, and naturally SSB during the contest. QSL both callsigns via his home callsign direct only. NO Bureau.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the ARRL DX SSB Contest (March 2-3rd) as Single-Op/All-Band/High-Power entry. QSL via LoTW or direct to NN1N.

9A, CROATIA. Charlie, NF4A, will be leaving Monday, February 25th, for 9A and will be operating as 9A5PC all week. Look for him in the morning U.S. time on either 15 or 10 meters (+/- a few sunspots)..... During the ARRL DX SSB Contest (March 2-3rd), Charlie will be one of the Multi-Multi operators at 9A1A. Logs for 9A5PC will uploaded to LoTW when he returns home. Please QSL directly to his U.S. address. Do not send cards to the 9A Bureau.

9M4, SPRATLY ISLAND (Update/Press Release #2). Steve, 9M6DXX, sent out the following on February 19th [Edited]: "On January 9th, I sent you some brief information about the 9M4SLL Spratly DXpedition which will take place between March 10-18th, and promised more details later. Here now is some further information.
Unfortunately Christian, EA3NT, had to withdraw from the DXpedition due to work reasons, but he has been replaced by two experienced Hungarian DXpeditioners: Pista/HA5AO and George/HA5UK. The other operators are John/9M6XRO, Steve/9M6DXX, James/9V1YC, Don/G3BJ, Tony/KM0O and Ben/N6MU/DJ0YI (total 8 operators).
9M4SLL will operate with five stations simultaneously at peak times, using mainly Elecraft K3 and K2 transceivers plus full legal power linear amplifiers on all stations. The antennas will all be verticals and all will be sited within a few meters of the ocean. In particular we will have a Titanex V160E 27m (87ft) high vertical for 160 and 80m with a Pennant antenna for RX on those bands. Activity will be on 160 to 10m, CW, SSB and RTTY. There will be no 60 meters operation as that is not permitted by the Malaysian licence.
The QSL Manager is Tim, M0URX, and direct or bureau QSLs can be requested by OQRS from his website at <http://m0urx.com/oqrs>. Logs will be uploaded to LoTW as soon as possible after the end of the DXpedition - within a few days. We plan to upload to an online log once per day during the DXpedition. Further information, including suggested operating frequencies, can be found on the 9M4SLL page on M0URX's website at <http://m0urx.com/9m4sll>."

A3, TONGA (Update/OC-064 Cancelled). Werner, DJ9KH, who is now active as A35WH from Tongatapu Island (OC-049), was expected to be active from Vava'u Island (OC-064) this week and had to cancel due to [edited] "The local airline had to close, and the situation with our flights back and the international connection-flight were so unsecured, that we had to cancel the flights." He will continue to operate Tongatapu Island probably til March 2nd. QSL via his home callsign, direct or by the DARC Bureau. He plans to update on <http://www.tonga2013.de/> everyday and give information about planned activities, modes and frequencies. He doesn't use an online-log, LoTW and e-QSL.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, is now accepting
the following operations for DXCC credit:
4S7DXG ☐ Sri Lanka; Only operations in 2008 and 2011
8Q7VR ☐ Maldives; Only operations in 2008 and 2011

If you had credit rejected for contacts with dates during the periods
noted, contact <dxccrules@...> to be put on the list for an update.
Contacts before or after these periods cannot be accepted. Also, in order
to expedite the search for these QSOs, please include the application
"date received" or "reference number" noted on your credit slip of the
submission these were originally rejected.

DXCC NEWS (Important Information regarding Digital DXCC Applications).
The DXCC Blog <http://www.arrl.org/dxcc-blog> reports: "Before proceeding
with an Online DXCC application you 'MUST', first, have Mozilla Firefox
installed on your computer. Online DXCC is not compatible with Internet
Explorer. If you do not use Firefox please visit this site to download
and install this free program: http://www.mozilla.org/en-US/firefox/new/ "
For the complete announcement, go the DXCC Blog page listed above.

EA PSK63 CONTEST. Joaquin, EA4ZB, Contest Manager EA BPSK63, invites
everyone to participate in this year's event which will be held between
1600z Saturday and 1600z Sunday, March 9-10th. The contest is sponsored
by Unión de Radioaficionados Españoles (URE). The contest is open to any
licensed amateur station. Activity will be on 80/40/20/15/10 meters. The
complete official rules are available at:
http://www.ure.es/contest/428-ea-psk63-contest-english-version.html

FP, ST. PIERRE & MIQUELON. Eric, KV1J, will once again be operating
from the Island of Miquelon (NA-032, DIFO FP-002 WLOTA 1417, Grid GN17)
as FP/KV1J between July 6-16th. Activity will be on 160-6 meters using
CW, SSB, RTTY and PSK31 (but primarily SSB and RTTY). He will generally
be on the highest frequency band that is open, and he may try 6 meters
if there is any indications of openings. Also, look for him on the
satellites, weather permitting. Eric will also be in the IARU HF Contest
(July 13-14th) as a Single-Op/All-Band/Mixed-Mode/High-Power entry.
QSL via KV1J, direct or by the Bureau and also LoTW. For more details
and updates, check out his Web page at: http://www.kv1j.com/fp/July13.html

IOTA NEWS.............
AF-109. (New IOTA) Members of the Egyptian Radio Amateur Society for
Development (ERASD) plan to be active as SU8N from Geziret
Disuqi (aka Nelson's Island), an island in the Nile Delta and
Sinai Region Group, during May for one week (May 3-10th).
"Nelson's Island" is approximately 20 kilometers east of the
Egyptian port of Alexandria, four kilometers north of Cape
Aboukir. Nelson's Island is approximately 350 meters by 150
meters. Activity will be on most HF bands. Operators mentioned
are Said/SU1SK, Ateff/SU1AO, Hossam/SU1HM and Ayman/SU1AR.
Look for more info to be forthcoming. Also, watch the ERASD's
Web page at: http://www.qsl.net/egyptham
Also, watch: https://www.facebook.com/events/441478712566533

AS-042. Vladimir, RV3EFH, will once again be active as RV3EFH/0 from Bolshevik Island between March and October. Bolshevik Island is the second largest island of the archipelago of Severnaya Zemlya in the Russian Arctic. Activity is will be on 40/20/15/10 meters using CW, SSB and the Digital modes. While there he plans to activate several Loc. Squares. QSL via his QRZ.com address. All QSL will be answered once he returns to the mainland. Visit his Web page at: http://www.rv3efh.russian-hamradio.net

EU-047. Mike, DG5LAC, will be active as DG5LAC/p from Juist Island (GIA N-003) between July 27th and August 9th. Activity will be on 40-10 meters, possibly 80m, using 100 watts and SSB. He will also be a "part-time" entry in the RSGB IOTA Contest. QSL via his home callsign, by the Bureau, direct, eQSL, LoTW and OQRS.

EU-105. Operators Geert/ON7USB, Tim/ON5HC, Pat/ON7PQ, Jo/ON5MF and Francis/ON8AZ will be active as TM3B from Batz Island (WLOTA 0680) between May 4-11th. QSL via ON8AZ. The group has a Web page (still under construction) at: http://www.eu105.be

NA-014. Jim, AE1C, will be active as AE1C/VE9 from Grand Manan Island (CISA NB003, WLOTA 0082) between August 18-25th. Activity will be holiday style on the HF bands using 200 watts and a vertical antenna. QSL via his home callsign (LoTW preferred), eQSL or direct.

NA-034. Lou, W0FK, will be active from Longboat Key between March 2-16th. QSL via his home callsign, direct or by the Bureau.

NA-058. Pete, VE3IKV, will be active as W4/VA3RA from St. Simons Island (USI GA003S, WLOTA 4115, Glynn County, GA) on March 2nd. Activity will be on 30 or 17 meters using CW. QSL via VE3IKV, direct or by the Bureau.

NA-062. Pete, VE3IKV, will be active as W4/VA3RA from Key West (USI FL040S, Monroe County, FL) between March 3-15th. Activity will be holiday style on 30 or 17 meters using CW. QSL via VE3IKV, direct or by the Bureau.

NA-079. Pete, VE3IKV, will be active as VE3IKV/W4 from the Dry Tortugas Islands (Monroe County, FL) between March 11-14th. Activity will depend on the weather. Operations will be conducted by a battery and a solar panel since there is no power on the island. This will be CW only operation on 30/17/6 meters. QSL via his home callsign, by the Bureau or direct.

NA-143. Joe, K5KUA, will once again be active as K5KUA/5 from Galveston Island (USI TX001S, Galveston County, TX) between March 28th and April 1st. Activity will be on 80-10 meters using mainly CW and the Digital modes. QSL via his home callsign, direct or by the Bureau.

NA-213. Operators Allan/KV4T, Steve/KI4GGJ, John/AJ4T, Gaston/W4CCF and Nicholas/KJ4AVG will once again be active as homecall/p from Dauphin Island (USI AL002S, Mobile County, AL) between June 19-24th. Activity will be on the HF bands using CW and SSB. QSL via their home callsigns.

OC-245. (Update) Operators Ucok/YB6AR, Adhi/YB3MM, Budi/YF1AR and Evendi/YC6EI will be active as homecall/6 from Rondo Island (ARLHS IDO-369), the most western island lighthouse in Indonesia between March 9-17th. The group has applied for a special callsign but has not heard anything yet. Rondo Island is very difficult to reach since there is no special beach for the boat landing. This will be the first time amateur radio operations will take place from Rondo Island. Activity will be on 80-10 meters with 4 stations on the air using SSB and the Digital modes. QSL via IZ8CCW, direct or by the Bureau. The group is looking for sponsors. For more info and updates, visit: http://www.mdxc.org/oc-245

SA-027. Operators Jose/PU5IKE (Team Leader), Adriano/PP5RK and André (SWL) were expected to be active as ZW5WIM from Paz Island this past weekend (February 23-24th) during the South American Lighthouses Weekend. QSL via PU5IKE, direct, LoTW, e-QSL and Bureau.

SA-028. You may have one more day (February 25th) to work Marcelo, PY2FN, as PY2FN/p from São Sebastião Island. This is the first operation from the Farol Ponta da Sela Lighthouse (ARLHS BRA-287). QSL via his home callsign. Log will be uploaded to LoTW after his activity.

SA-030. (Update) The team that was going to be active as CV5A from Flores Island between February 21-24th, had to suspended their operation until further notice.

ISWL CALLSIGNS (For March). The following ISWL club callsigns will be used throughout the month of March 2013:

GX4BJC/A - Operated from Walton on the Naze, in Essex, by Herbie/G6XOU. (ISWL Council Member & QSL Bureau Manager) (/A WAB Square = TM22 - England, IOTA = EU-005). Herbie will also use GX4BJC/P during the month. (/P WAB Details will be given at the time of the QSO).

MX1SWL and M1SWL - Operated from Broad Oak, in East Sussex, England, by Arthur/G0KOC. (ISWL Council Member & Callsign holder) (WAB Square = TQ62 - England & IOTA = EU-005).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for

their awards.

KH0, MARIANA ISLANDS. Operators Gennady/R0FA and Yuri/RA0FU will be active as KH0/homecall from the Saipan Rental Shack on Saipan Island (OC-086, USI NI002S, WLOTA 1333) between March 25th and April 4th. Activity will be on all HF bands and modes, as well as an entry in the CQWW WPX SSB Contest (March 30-31st). QSL via their home callsign, by the Bureau or direct.

KH0, MARIANA ISLANDS. Operators Nick/JL1UTS and Chieko/7L3PFH will be active as KH0TH and KH0TG, respectively, from the Saipan Rental Shack on Saipan Island (OC-086, USI NI002S, WLOTA 1333) between May 2-5th. Activity will be on all HF bands and modes. QSL via their home callsign, direct or the JARL Bureau.

KH0, MARIANA ISLANDS. Operators Akira/JH8XGS (W3ANA/KH0) and Ben/JA1RTS (KH0/JA1RTS) will be active from the Saipan Rental Shack on Saipan Island (OC-086, USI NI002S, WLOTA 1333) between May 8-12th. Activity will be on all HF bands and modes. QSL via their JA home callsigns, direct or by the JARL Bureau.

CO8DM ON LOTW. Doug, CO8DM, informs OPDX that his QSL Manager Steve, KU9C, has opened an LoTW account for him. Doug is converting his paper log to digital logs to upload to LoTW. He mentions there may be some times differences.

QSL KH0WF via JH1AJT direct or the JA Bureau. Operator was Zorro, JH1AJT, from Saipan.

QSL RECEIVED VIA LoTW: 3B9SP, 5B4AJC, 5X8C, 9Y4/DL7VOG, CO8DM, DJ9RR, DL7CM, E77W, EA3GHZ, EA3NT, EF8R, F5CQ, F6EYB, F6HKA, G3TXF, GM0NAI, GU4YOX, GW6W, H44KW, HB9ACA, HB9CVQ, HB9DDO, HK0GU, HK3O, HQ2N, KH6LC, KP2MM, LY2J, LY6A, M3W, MD2C, NP4G, OE2013R, OG4X, OH1MA, PA5KT, PJ5/DL7VOG, PJ7XK, PV8ADI, PY1VOY, S50R, TI5W, US5I, US5IQ, UU7J, V31ME, WB4JTT/KH6, YO3APJ, ZS4TX and ZS6YH

QSLS RECEIVED VIA MAIL: 3D2OP, 3DA0NJ, 3W1M, 4K4K, 5N4EAM, 6V7S, 706T, HK1NA, HK1R, J88CG, KH8/DL3DXX, LX/PA0RDY, RI0FM, S79NEN, T77C, V5/DL3DXX, V84SMD, VK9/OH3JR, W7PBL/VK9L, XF1F, XW0ZJZ, XW1A, Z81D and ZL9HR

QSLS RECEIVED VIA THE BUREAU: 5N0OCH, 5R8HL, 7Z1HB, 8R1PY, 9X0TL, 9Y4W, AH0BT, BG1QQT, CT9/DF3FS, CU3NH, EA6/DL5NUA, EW7KF, FS/DL2RUM, HB0/HB9AON, MJ/DL9MWG, OM5CD, R100W, PJ2/DF8ZH, PJ4M, PJ7NK, TK/DL9YBY, TK5DS, V5/DC8QT, V5/DK2WH, VP2MOM, VP2MXO, VP5DX, YO9WF and Z21LS

TX5, CLIPPERTON ISLAND (Update). The TX5K Team is now on their way to Clipperton Island as of February 23rd. Here are details of the past week:
February 19th - "The team that had assembled in San Diego has now set sail on the Shogun for Cabo San Lucas, Mexico, where they will pick up the rest of the team." The team in San Diego included Jef/DD2CW, Ed/KE3D, Luis/XE1L, Bob/KK6EK, Giovanni/I5JHW, Lance/W7GJ, Walt/N6XG, Rick/KF4ZZ, Mike/WA6O and Igor/US0VA.
February 23rd - It was reported that they picked up the Cabo team and that "the full team has boarded, and once all 'precious cargo (all 1000 items)' is on board and stowed properly, they will be underway...."
A TX5K was spotted on the cluster on February 20th which was a pirate or a "phantom spot". They are scheduled to arrive on the 26th, but have a lot of work to do setting up. This means expect the operation to be on

air either February 28th or March 1st. The Team has been spotted while enroute to Cabo San Lucas as K6K/MM (QSL via N2OO). They will probably be on the air from Cabo to Clipperton. Once landing and set up is done, the TX5K activity will be on 160-10 meters using CW, SSB and RTTY. Their suggested frequencies are:
CW - 1833(*), 3523, 7023, 10103, 14033, 18083, 21033, 24903 and 28033 kHz
SSB - 3785 (up or down), 7185 (**), 14185 (***), 18165 (down), 21285, 24975 and 28515 kHz
RTTY - 10137, 14087 and 18097 kHz
Listening up, except were indicated.
* Listening up 2 / listen 10 down for JA
** Up 5-15 or down 5-15 / up 7225 for U.S. / down below 7100 for non-expanded band
*** Listen above 14225 for U.S. General licenses

QSL via the OQRS by ClubLog (Highly Recommended). This is the preferred method to use for your QSL confirmation. After the DXpedition ends you can order either a direct or Bureau QSL card using the OQRS online QSL service provided by ClubLog. Using this convenient online method you can easily apply for their QSL card to be sent directly to your home or via the Bureau....without having to send your QSL card at all. Direct QSLs are via Bob Schenck N2OO and the SJDXA QSL team: QSL Manager for TX5K, PO Box 345, Tuckerton, NJ 08087-0345, USA. Also, remember to use the DXA Web site <http://www.dxa2.org/> which allows DXers to view the QSO log, and the status and activities of the DXpedition in near-real-time. The TX5K's Web page is at <http://tx5k.org>. For updates, use the BLOG at: http://www.ky6r.com

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX) and Kei/JA7GYP (V63T) will be active from Pohnpei Island (OC-010) between April 15-20th. Activity will be on all bands and modes. QSL via their home callsigns.

VISALIA DX CONVENTION NEWS (Correction/IOTA Dinner). Ray, N6VR, sent out the following about the IOTA Dinner: "Guys, -- The 30 USDs I stated for the IOTA dinner has to be increased to 32 USDs because of an error the Hotel and I made during the initial meal cost computation, sorry. If you have all ready sent me 30 USDs please make up the 2 USDs difference at the door. Tnx, and sorry for the price increase, although it is 1 USD cheaper than last year! 73, Ray N6VR.... P.S. I may have not made it clear enough, but pse make checks to 'Ray Benny'."

VP5, TURKS AND CAICOS ISLANDS. Scott, K0MD, will be returning to Providenciales Island (NA-002, WLOTA 2003) and be active as VP5H during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/High-Power entry. QSL via his home callsign and LoTW.

VP9, BERMUDA (Update/Change). Operators Kurt/W6PH and Robert/WA1Z will team up to be active as VP9I for the ARRL DX SSB Contest (March 2-3rd) as a Multi-Op/Low-Power entry. QSL via WW3S (see QRZ.com).

XR0, EASTER ISLAND (Update). The UK DXpedition team which will be active as XR0YG from Easter Island (SA-001) between March 20-27th (see OPDX.1090),

now has a Web page available at: http://xr0yg.com

XT, BURKINA FASO (Reminder). By the time you read this, a team of Japanese operators will be active from Burkina Faso using their individual callsigns until March 2nd. Activity will be on 80-10 meters using CW, SSB and the Digital modes. Look for the following operators (w/their XT callsign): Yukinori/JA3VWT (XT2VWT), Jusei/JA3IVU (XT2IVU), Junichi/JH3AEF (XT2AEF) and Kunio/JA1CJA (XT2CJA). QSL via their home callsign.

XT, BURKINA FASO (Reminder). By the time you read this, members of the "Italian DXpedition Team" will be active as XT2TT from Ouagadougou (Grid Loc. IK92fi), Burkina Faso, until March 6th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL I2YSB for direct QSLs and IK2CIO for Bureau QSLs (no E-mail request please). A OQRS will be available for direct cards only. The official Web site is: http://www.i2ysb.com/idt Official forum is: http://www.hamradioweb.org

YN, NICARAGUA (Update/Callsign Change). Scott, K7ZO, will once again be active as during the ARRL DX SSB Contest (March 2-3nd) as a Single-Op/ All-Band entry. However, this year the TELCOR issued him a smaller callsign and he will be using YN5Z for the contest instead of his usual YN5ZO callsign. He usually operates "Field Day Style" using a 5 band Spiderbeam and 40m dipole on a push up mast. The radio is a TS-590 driving a KPA-500 amp. QSL via LoTW and K7ZO, direct or by the Bureau. Look for Scott to be active before the contest as well.

ZA, ALBANIA. The "425 DX News" reports that Max, IZ4JMA, is now living in Albania and will be on the air as ZA/IZ4JMA starting February 25th for 18 months at least. Activity will be on all bands and modes. QSL via IZ4JMA.

ZL7, CHATHAM ISLANDS (Update). Jim, ZL1LC, will be active as ZL7LC from Chatham Island (OC-038) between March 14-20th, as a micro DXpedition and running PSK31 only (see OPDX.1094). He announced this week on QRZ.com: "This is to give PSKers around the world, especially those in PODXS 070, DMC and EPC, an opportunity to work this DXCC entity on their mode of choice. The rigs will be Icom 7200 and 7000 with vertical antennas operating on 7.035, 14.070, 21.070 and 28.120 MHZ. I will be operating on the highest bands that are open. Please don't email me asking me to run another mode or operate on another frequency. Such emails will be treated as SPAM. To make quicker QSOs and allow more contacts, please send only your RST report and your name. I will QSL the RST. If a pileup develops, I will ask you to go UP 100 - 400Hz. Please operate in a SPLIT mode and transmit 100 to 400 Hertz above your receive frequency. I will be able to read your call and respond to you." He also reported that his QSL Manager will be EB7DX and direct (w/2 green stamps and SAE). NO Bureau. For more details and an online log (ClubLog), see QRZ.com.

ZS8, MARION ISLAND (Update). "DX-World.net" is reporting that Carson, ZR6CWI, has applied for ZS8C callsign for his stay on Marion Island.

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30226
SIDC SOLAR BULLETIN 26 Feb 2013, 1243UT
SIDC FORECAST (valid from 1230UT, 26 Feb 2013 until 28 Feb 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 26 Feb 2013 10CM FLUX: 097 / AP: 006
PREDICTIONS FOR 27 Feb 2013 10CM FLUX: 099 / AP: 004
PREDICTIONS FOR 28 Feb 2013 10CM FLUX: 101 / AP: 012
COMMENT: A moderate chance for C-class flares is expected. Geomagnetic
conditions are expected to remain quiet up till Feb 28 onwards when
geomagnetic conditions will possibly be disturbed (Kp=3) due to the
influence of a recurrent coronal hole.

You pay and I'll go, Brian. A one man (and one non-Ham wife to log) operation to FJ, FS and PJ5/6. I will do them from around 10 March until 10 April, but I'm flexible with the dates. I'll need $10,000 to by portable gear because I don't want to tear my shack apart. Would like a SteppIR and about a 30-40 foot fibreglass mast to hold it up. I'll use dipoles or a Windom for the low bands. Let's up it to $12K for equipment to be sure it's all covered.

Now, air travel . . . I probably can get a return ticket for $1K ($2K for the two of us) plus another $2K for the inter-island hops.

Need places to stay and I don't want any rat holes, so figure $200 a night. We can eat for $100 a day.

So:

Gear: $12K
Air: $ 4K
Lodging: $200 X 30 = $6K
Food $100 X 30 days = $3K

Total: $25K

Send a cashier's cheque for $25K to my QRZ.COM address . . . I'll only be QRV for one QSO per band (160-10 with you, of course) from each location. However, if it helps you with the CQ Marathon or whatever you are chasing, I'm willing to do it. It's cold and snowy here and I hate to leave, but I'll do it for you. I'll even throw in PJ7 seeing as I'll be on the same island (FS) at no extra cost! <G>

XYL and I were going through this math. It got to the point about
"bringing a radio or radio operating" and that killed the deal.

Bob,

I would think you should have the LOTW confirmations by now; I have had mine for sometime now.

That said, I am not sure of he status of the cards; I have not received mine yet, but am not sure if they have been sent out yet???

News posted today on the T30PY website.

http://www.mdxc.org/t30py/

Great News: All The Log Will Be Uploaded To LOTW!
<http://www.mdxc.org/t30py/great-news-all-the-log-will-be-uploaded-to-lotw/>

27/02/13 |News <http://www.mdxc.org/t30py/category/news/>

According our qsl policy, all the log would be sent to LOTW after 6
months of the end of dxpedition.

But the team resolved to upload all the log to LOTW now!!

Yes, in a couple of days you going to see your confirmation.

Best Regards

T30PY/T30SIX team

Bob

Thanks for the copy hadn't seen that.
I wouldn't have been in the first LOTW batch because I sent then $15 not $20 which I found out later on the site was the minimum. Just a couple of band fillers but I'm about to do an application.

Topic: 20702 Message: 20702

Hi Guys,

I see the Clipperton DXpedition (that I would have preferred to have gone to TI9, but that's another story) is due to start.
Looking forward to using that DXA thingo that was on K7C some years back, that was interesting.

Perhaps when the TX gets underway it will give the XT guys a breather from the piles and a chance to work the long haul stuff Oceania way :), well here's hoping....

Good luck to all,

73, Lance - VK6DU

ARLD009 DX news

ZCZC AE09
QST de W1AW
DX Bulletin 9 ARLD009
>From ARRL Headquarters
Newington CT February 28, 2013
To all radio amateurs

SB DX ARL ARLD009
ARLD009 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

BELIZE, V31. Operators N8LJ, AC8W and KB8TXZ plan to be QRV as V31LJ, V31AC and V31VJ, respectively, until March 5. This will include a multi-single entry in the ARRL DX SSB Contest. Activity will be on 160 to 6 meters using CW, RTTY and SSB. QSL V31LJ via K8ESQ. QSL V31AC and V31VJ via KB8TXZ.

CROATIA, 9A. Charlie, NF4A will be operating with the 9A1A group in the ARRL DX SSB Contest. Before and after the contest, he will be QRV as 9A5PC, until March 5. QSL to NF4A.

UGANDA, 5X. Alan, G3XAQ will be active as 5X1XA on the HF bands using CW, through March 14. QSL via G3SWH.

CAYMAN ISLANDS, ZF. During the ARRL DX SSB Contest look for Chris, HB9ELV to be operating as ZF2EL from Grand Cayman. QSL via LoTW.

SINT MAARTEN, PJ7. Randy, N0TG, Ron, AA4VK and Jeff, N1SNB plan to be QRV as PJ7/N0TG, PJ7/AA4VK and PJ7/N1SNB from March 15 to 23. The new QSL route is via AA4VK.

BELARUS, EW. In celebration of the 50th anniversary of the Dalnye Strany Radio Club, special event station EV50WB will be QRV during March. QSL for SSB QSOs via EU1AZ and via EU1DX for CW and RTTY QSOs. They will also use LoTW.

RWANDA, 9X. Nick, G3RWF (5X1NH) plans to be QRV from March 4 to 12. He applied for the call sign 9X0NH and hopes to be back later this year for another visit. He will operate mostly CW from Kigali. QSL via G3RWF or LoTW.

FRENCH GUIANA, FY. Marc, F1HAR will use the call sign FY5KE in the ARRL DX SSB Contest in the SOSB 15m HP category. QSL to F1HAR via the bureau, FY5KE direct, or LoTW. Herve, F5HRY will also be QRV from Kourou in this contest, signing TO1A in the SOSB 10 meter category. QSL via LoTW only.

TURKEY, TA. Willi, DJ7RJ will be on the bands as TA4/DJ7RJ until March 18, with a preference for the lowbands in CW and SSB. QSL via home call.

COSTA RICA, TI. Juan Carlos TI2JCY, Carlos TI2KAC, Mauricio TI4ZM, Eddie K4UN, Bob W4BW, Keith W4KTR, and Lex W4XO will take part in the ARRL DX SSB Contest as TI8M in one of the multi operator categories. Before and during the contest they will be active on all HF bands. QSL via TI2KAC.

UNITED STATES OF AMERICA, W. Dave, K3FT and Rob, N3RW will be active in the ARRL DX SSB Contest from the USS New Jersey battleship as NJ2BB, using the ship's antennas and possibly some military surplus equipment. QSL via KB2BRR.

CAMBODIA, XU. Eddy, ON4AFU will undertake a one man DXpedition from March 3 to 14 as XU7AFU, using CW. QSL via home call.

AFGHANISTAN, YA. Eric, K9GY (T6MO) will take part in the ARRL DX SSB Contest in the SOAB LP category, with a focus on 20 meters. If conditions permit he will also work 15 and 10 meters. QSL via home call.

NICARAGUA, YN. Scott, K7ZO will use his new short call, YN5Z in the ARRL DX SSB Contest in the SOAB HP category. QSL via home call or LoTW.

ALBANIA, ZA. Max, IZ4JMA will be QRV as ZA/IZ4JMA for at least 18 months on all bands and in all modes. QSL via IZ4JMA.

RODRIGUES ISLAND, 3B9. Operators Toshi, JA8BMK, Ken, JN1THL (AB1GJ) and Yoshiko, JQ1LCW (KF7JXL) will be active as 3B9DX from March 1 to 10. Activity will be on 80 to 10 meters using CW, SSB, RTTY and PSK31. QSL via EA5GL direct only.

LESOTHO, 7P. Peter, EI7CC will be active as 7P8PB from March 6 to 26. Activity will be limited because he will be on a family holiday and will operate when circumstances permit. QSL to EI7CC, via the bureau or direct.

BARBADOS, 8P. Gerry, W1VE will be QRV as 8P9RM until March 1. Then for the ARRL DX SSB Contest he will sign 8P1V. Activity will be on 160 to 6 meters, but with a concentration on low-band CW, and then SSB during the contest. QSL both call signs via his home call sign, direct only, no bureau. Also, Tom, W2SC will be active as 8P5A during the contest as a Single-Op/All-Band/High Power entry. QSL via NN1N.

ARUBA, P4. Andy, AE6Y will be active as P49Y during the ARRL DX SSB Contest as a Single-Op/All-Band/High-Power entry. QSL via LoTW or AE6Y.

MICRONESIA, V6. Operators Sho, JA7HMZ (V63DX) and Kei, JA7GYP (V63T) will be active from Pohnpei Island from April 15 to 20. Activity will be on all bands and modes. QSL via their home call signs.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC Credit, 4S7DXG, Sri Lanka, only operations in 2008 and 2011. 8Q7VR, Maldives, only operations in 2008 and 2011.

THIS WEEKEND ON THE RADIO. The ARRL International Phone DX Contest and Open Ukraine RTTY Championship are on tap for this weekend. The NS Weekly Sprint is March 1. The OK1WC Memorial Contest is March 4. Please see March QST, page 84, and the ARRL and WA7BNM contest web sites for details.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30301
SIDC SOLAR BULLETIN 01 Mar 2013, 1247UT
SIDC FORECAST (valid from 1230UT, 01 Mar 2013 until 03 Mar 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Minor geomagnetic storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 01 Mar 2013 10CM FLUX: 110 / AP: 026
PREDICTIONS FOR 02 Mar 2013 10CM FLUX: 112 / AP: 019
PREDICTIONS FOR 03 Mar 2013 10CM FLUX: 114 / AP: 007
COMMENT: The predicted enhancement of geomagnetic activity is
strengthening further than foreseen with K=5 levels now recorded at
different locations. We expect the responsible high speed solar wind
stream to persist for 1-2 days. Flaring activity is expected at the
C-class level, in particular from NOAA AR 1683, currently near the South
East limb.

TODAY'S ESTIMATED ISN : 062, BASED ON 07 STATIONS.

02 March 2013 A.R.I. DX Bulletin
No 1139
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5H - Maurizio, IK2GZU will be active again as 5H3MB from Ilembula, Tanzania from 7 April to 8 May, while doing volunteer work for the local mission. QSL via IK2GZU and LoTW. Log search and OQRS for bureau and direct cards at www.buffoli-pm.it
7X - 7T50ARA and 7T9A are two special callsigns to be used from 1 March to 30 May to celebrate the 50th anniversary of ARA (Amateurs Radio Algeriens), Algeria's IARU member society. QSL via 7X2ARA. Information on the relevant award can be found on qrz.com.
9X - Nick, G3RWF will operate (neither 160 nor 6m) mainly CW from Rwanda on 4-13 March. He will collect his license (hopefully 9X0NH) upon arrival. QSL via home call and LoTW.
A3 - Werner, A35WH is still active from Tongatapu (OC-049) until 2 March. His planned side trip to Vava'u (OC-064) [425DXN 1133] has been cancelled due to problems with local flights. QSL via home call (DJ9KH), direct or bureau.
EU - Special callsign EV50WB will be in use on 1-31 March to celebrate the 50th anniversary of Radioclub Dalnye Strany (EW1WB) of Minsk, Belarus. QSL via EU1AZ (SSB and CW QSOs) and EU1DX (RTTY QSOs), plus LoTW. [TNX EU1DX]
G - G3VFC, M0KJA, M0RFD, M0VFC, M6KOM, M6VFC and 2E1EVK will be active as GX5MW/p from the Isle of Wight (EU-120) on 16-23 March. QSL via M0RFD, direct or bureau. [TNX rsgbiota.org]
H4 - Announced frequencies for the 8-25 March H44G expedition to Guadalcanal (OC-047), Solomon Islands [425DXN 1123] are:
CW 1825.5 3505 7005 10115 14005 18070 21005 24890 28005 50103
SSB - - 7100 - 14140 18130 21240 24940 28400 -
RTTY - - - 10144 14080 18100 21080 24920 28080 -
Announced frequencies for the concurrent 12-23 March H40T expedition to Nendo Island (OC-100, Temotu province [425DXN 1123] are:
CW 1818.0 3515 7015 10122 14015 18077 21015 24895 28015 50103
SSB - - 7150 - 14165 18140 21265 24965 28450 -
RTTY - - - 10140 14093 18105 21090 24925 28090 -
QSL for both H44G and H40T via DL7DF, direct or bureau, and LoTW "within 6 months of the completion of the DXpedition". Logsearch and further information at www.dl7df.com/h4/index.php
J3 - Bob, G3PJT will be active as J34G from Grenada (NA-024) on 5-20

March, including an entry in the RSGB Commonwealth Contest (9-10 March). QSL via G3PJT. [TNX NG3K]
J7 - Rick, KK4GV will be active holiday style as J79GV from Dominica (NA-101) on 8-17 March. He will operate SSB only. QSL via home call, direct or bureau, and LoTW.
KH0 - Sam, JE1XUZ (KH0XH) and Tama, JQ2WTT (KH0XW) will be active from Saipan (OC-086) from 10 March to 1 April. QSL via home calls, direct or bureau. They will participate in the CQ WW WPX SSB Contest from the AH0BT contest station. [TNX NG3K]
KP2 - Matt, K0BBC is active as KP2/K0BBC from will be active from St. Thomas, Virgin Islands (NA-106) until 5 March, including an entry in the ARRL DX SSB Contest. QSL via home call. [TNX K0BBC]
KP2 - Look for KP2/JS6RRR (QSL via home call), KP2/K2JA (QSL via JL3SIK), KP2/KI3DNN (QSL via JI3DNN), KP2/W3JH (QSL via JR3QFB) and WP2KY (QSL via JR3QFB) to be active from the Virgin Islands (NA-106) on 13-19 March. They plan to be QRV on 160-6 metres SSB, CW, FM and digital modes. [TNX JR3TVH]
OZ - Look for Harry, OZ/PA1H and Nico, OZ/PA7PA to be active from Laeso Island (EU-088) on 13-26 April. They will operate SSB and digital modes on 80-10 metres, if possible also on 160m. QSL via home calls, direct or bureau. [TNX PA1H]
PA - Dirk, DL5DCL will be active holiday style as PA/DL5DCL from Ameland Island (EU-038) on 1-6 April. He will operate CW only "on several HF bands". QSL via home call, direct or bureau (OQRS on Club Log). More information can be found at www.dl5dcl.de [TNX DL5DCL]
PJ2 - Mike W1USN, Bob AA1M and Scott W1SSR will be active as PJ2/ from Curacao (SA-099) on 8-22 March. They will operate SSB, CW, PSK and RTTY on 160-10 metres. QSL via home calls, direct or bureau. [TNX NG3K]
S2 - Vadym, UT6UD will be active as S21XV from Bangladesh on 1-7 March. He plans to operate on all bands with a focus on North America. QSL via home call. [TNX DX World]
SU - A team from the Egyptian Radio Amateur Society for Development including SU1AO, SU1AR, SU1SK and SU3YM will be active as SU8N from Jazirat Disuqi (Nelson's Island, AF-109: new one for IOTA) on 3-10 May. [TNX SU1SK]
TK - Vincent F4BKV, Gil F4FET, Christian EA3NT and Laurent TK4LS will be active from three Corsican IOTA groups as follows:
23 March TK0INT EU-100
24 March TK1INT EU-104
25 March TK1INT EU-104
26 March TK0INT EU-100
27 March TK2INT EU-164
28 March TK2INT EU-164
They will operate SSB and CW with three stations on 40, 30, 20 17, 15 and 10 metres, using vertical GPs and vertical dipoles. QRV time from all of the three groups will be 8-18 UTC, as they are not permitted to overnight on the islands. These are protected areas, and from EU-100 they will have to use car batteries. QSL via

EA5KA, direct or bureau, and LoTW. Logsearch, OQRS and further information can be found at http://f4bkv.net/corsica2013/
UA - Vladimir, RV3EFH will be active as RV3EFH/0 from Bolshevik Island (AS-042) between March and October. He will operate CW, SSB and digital modes on 40, 20, 15 and 10 metres. QSL via home call. [TNX W5PF]
VE - David, VE3AAQ will be active as VO2AAA from Zone 2 on 7-10 March, including an entry in the RSGB Commonwealth Contest. QSL via VE3AAQ. [TNX VA3RJ]
VK9C - Chris, GM3WOJ and Keith, GM4YXI will be active as VK9CZ (replacing VK9C/GM2MP) from the Cocos-Keeling Islands (OC-003) from 30 March to 13 April [425DXN 1133]. A website is under construction at www.vk9cz.com. [TNX GM3WOJ]
VP5 - Urb, W1UL and his wife Patricia, W2PKV will be active as VP5/W1UL (mainly CW) and VP5/W2PKV (mainly SSB) from Provideciales (NA-002), Turks and Caicos on 7-13 March. QSL for both via W1UL. [TNX NG3K]
YB - Imam, YB4IR and others will be active as YB6N from Nias Island (OC-161) on 7-13 March. QSL via YB4IR (he requires that cards reach him before 31 August 2013).
YB - Look for YB3MM/6, YB6AR/p, YC6EI/p and YF1AR/6 to be active from Rondo Island (OC-245) on 9-17 March. They might be using a special callsign. QSL via IZ8CCW. Website at www.mdxc.org/oc-245/
YB - John YB5NOF, Anton YB5QZ and other three operators will be active as YE8B from the Banggai Islands (OC-208) from 26 April to 2 May. Plans are to be QRV on 80-10 metres CW, SSB and RTTY. Shu, JN6RZM (jn6rzm[@]nifty.com) is collecting donations by Paypal. [TNX JN6RZM]

Direttore Responsabile I2VGW

ARRL DX CONTEST (SSB) ---> Object of the contest is for W/VE amateurs to work as many stations in as many DXCC entities as possible on 160, 80, 40, 20, 15, and 10 metre bands, while DX stations work as many W/VE stations in as many of the 48 contiguous states and provinces as possible (full rules can be found at www.arrl.org/arrl-dx). This year's event will run from from 00.00 UTC 2 March through 23.59 UTC on the 3rd. Do not forget to give a look at the Announced Operations listing maintained by Bill, NG3K at www.ng3k.com/Misc/adxs2013.html

DXCC NEWS ---> 4S7DXG (Sri Lanka, only operations in 2008 and 2011) and 8Q7VR (Maldives, only operations in 2008 and 2011) have been approved for DXCC credit. If you had credit rejected for contacts with dates during the periods noted, contact dxccrules[@]arrl.org to be put on the list for an update. Contacts before or after these periods cannot be accepted. Also, in order to expedite the search for these QSOs please include the application

"date received" or "reference number" noted on your credit slip of the submission these were originally rejected. [TNX NC1L]

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Fourteen different galleries include more than 10,600 cards for the ten Most Wanted DXCC Entities (2004-12), the 61 deleted DXCC Entities, obsolete prefixes, stations from Magrebh from 1945 to 1962, Allied Forces stations in Germany (1946-69), Antarctic bases & TAAF (Terres Australes and Antarctiques Francaises), the various French DXCC island Entities in the Pacific Ocean, the Indian Ocean and the Americas (from 1945 to 1970), pre-1945 countries, French Departments and CONUS, plus a gallery for cards not accepted by DXCC. Your participation is encouraged - please visit www.LesNouvellesdx.fr and send your comments to lesnouvellesdx[@]free.fr [TNX F6AJA]

RSGB COMMONWEALTH CONTEST ---> The 76th edition of the Commonwealth (BERU) Contest (www.beru.org.uk) will be held on 9-10 March, from 10 UTC to 10 UTC, on 80, 40, 20, 15 and 10 metres CW. Only operators located within the Commonwealth or British Mandated Territories are eligible to enter.

TX5K ---> The TX5K team arrived at Clipperton at 04.30 UTC on 27 February, were able to land on the 28th and expected to set up radios on 1 March. Follow the updates posted by KY6R at http://ky6r.com/. The preferred method to use for QSLling is the OQRS provided by Club Log for either direct and bureau cards. Traditional requests go via N2OO (Bob Schenck, P.O. Box 345, Tuckerton NJ 08087-0345, USA). The log will be uploaded to LoTW "within six months after the end of the DXpedition".

+ SILENT KEYS + RSGB Life Vice President John Patrick Hawker, MBE (G3VA) passed away on 21 February at 90 years of age. In addition to writing the "Technical Topics" column in the Radio Society of Great Britain's journal for fifty years (1958-2008), he also authored various books on electronics and radio and television engineering. In 2006 he was inducted into the CQ Amateur Radio Hall of Fame and made a Member of the Order of the British Empire by Queen Elizabeth II for "Services to Radio Communications". Other recently reported Silent Keys include Valery N. Metaxa (ER1DA) and Pavel V. Presnov (RU3UA).

Propagation Forecast Bulletin 9 ARLP009
>From Tad Cook, K7RA
Seattle, WA March 1, 2013
To all radio amateurs

SB PROP ARL ARLP009
ARLP009 Propagation de K7RA

Solar and geomagnetic activity over the past week (Thursday through Wednesday, February 21-27) declined, with the average daily sunspot number dropping nearly 21 points to 57.7. Average daily solar flux softened by 4.7 points to 100.9, and average daily planetary A index declined 6.4 points to 5.1. This isn't much of a change, but geomagnetic activity was low already, and this is even lower.

Predicted solar flux for the near term is 110 on March 1-3, 105 on March 4-7, 100 on March 8, 95 on March 9-14, 100 on March 15-16, 105 on March 17, and 110 on March 18-20. Solar flux then reaches a peak of 120 on March 25-27, and on March 28 through April 6 maintains an average around 113.

The predicted planetary A index is 12 and 8 March 1-2, 5 on March 3-4, 8 on March 5, 7 on March 6-7, 5 on March 8-10, 7 on March 11-12, and 5 on March 13-20.

OK1HH predicts quiet to active geomagnetic conditions on March 1, mostly quite March 2, quiet to unsettled March 3, quiet on March 4, mostly quiet March 5, quiet to unsettled March 6, quiet to active March 7, quiet on March 8, mostly quiet March 9-10, quiet to active March 11-12, quiet to unsettled March 13-16, mostly quiet March 17-18, quiet to unsettled March 19-21, active to disturbed March 22 and quiet on March 23-24.

It is interesting to note that OK1HH predicts active to disturbed conditions on March 22, but NOAA and USAF predict a benign planetary A index of only 5 on that date.

This weekend is the ARRL International Phone DX Contest, from March 2, 0000z to March 3, 2400z. If you are on the West Coast, and use Pacific Standard Time, that would begin at 4:00 PM on Friday, ending at 4:00 PM on Sunday. For more info, check http://www.arrl.org/arrl-dx.

With February ended, let's look at some updated averages. Our most recent 3-month moving average does not impress. The three months centered on January 2013 had an average daily sunspot number of 73.6. This is below every three-month moving average for last year, except the three months centered on March 2012, which was 71.2. The 3-month moving averages of daily sunspot numbers centered on January 2012 through January 2013 were 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9, 89.9, 81.2, 82.3, 74.4, 82.8 and 73.6.

Jim Henderson, KF7E sent a link to an impressive NASA clip of solar activity from last July. Note that you can set this video to HD resolution, and it looks great on full screen. See it at http://apod.nasa.gov/apod/ap130226.html.

Also check out the photo gallery of solar events at http://news.cnet.com/2300-11386_3-10015988.html and note the dramatic composite image number 4.

Walt Knodle, W7VS sent an article about artificial ionosphere produced by the HAARP facility in Alaska with a 3.6 megawatt signal on 69 meters. Note that they are only able to produce the effect for 45 seconds. Read about it at http://phys.org/news/2013-02-scientists-densest-artificial-ionospheric-plasma.html.

I think the Wikipedia page at http://en.wikipedia.org/wiki/High_Frequency_Active_Auroral_Research_Program gives a pretty good overview of the HAARP project.

Also the September 1996 issue of QST has a nice article by K3NS titled, "The High Frequency Active Auroral Research Program." ARRL members can find and download it from the ARRL website with a search at http://www.arrl.org/arrl-periodicals-archive-search.

Jim Smith, K3RTU operated on HF CW from Ridley Creek State Park in Southeast Pennsylvania (FM29) on February 25. He wrote, "I hooked up with EA8BVP in the Canary Islands. 'Bal' EA8BVP was using a FT-817 and a vertical, and I was using my FT-817 and my trusty Buddistick vertical. This CW QSO took place early in the afternoon on 18.086 MHz. I had been trying to make a contact on 20 meters and was having no luck so I QSYed to 17 meters and almost within minutes heard EA8BVP calling CQ. Both of our signal levels were S4 to S5. I frequently operate on 17 meter CW while out backpacking and more often than not it provides me with good long distance contacts."

It looks like the path from the park to the Canary Islands would be good in the early afternoon, with the best 17 meter signals that day from 1200-2200 UTC. 17 meters does look like a better bet, with 20 meters not catching up until after 2000 UTC.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for February 21 through 27 were 75, 79, 56, 25, 59, 49, and 61, with a mean of 57.7. 10.7 cm flux was 108.5, 107, 99.6, 94.9, 95.4, 98.7, and 102, with a mean of 100.9. Estimated planetary A indices were 6, 9, 6, 3, 3, 5, and 4, with a mean of 5.1. Estimated mid-latitude A indices were 5, 9, 6, 2, 3, 4, and 4, with a mean of 4.7.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1102
BID: $OPDX.1102
March 4, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, W2VU, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K6VVA, KH6BZF, NA6L, K8GI, K8YSE, W8GEX & 60m News, W9ILY, 4Z4KX, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, GM3WOJ, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK7JWX, OZ6OM & 50 MHz DX News, ON6OM, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, UN8GC, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late ARRL DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the ARRL DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 23rd-February, through Friday, 1st-March there were 231 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z3, Z8, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8BB from the "Institute Superieur de L'Animation Pour la Jeunesse et la Culture" station in Tunis, during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.kf5eyy.info

3V, TUNISIA (Op/Web Update). An Italian group, along with the Association des Radio Amateurs Tunisiens (ARAT) and the Engineering University of Gabes, who are planning a second IOTA DXpedition to Djerba Island (AF-083, WW. Loc. JM53KT, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), as TS8TI (will receive license in March) between April 29th and May 6th (see OPDX.1100 & OPDX.1101), have announced that they will now be active on all HF bands, including the 30/17/12/6 meter bands using CW, SSB, RTTY and PSK31/63/125 modes. The team is still in need of sponsors and individual contributions. Contact: ik7jwx2003@...
For more info and updates, watch the following Web pages:
http://www.qrz.com/db/TS8TI/
http://www.arilimbiate.it/
https://www.facebook.com/notifications#!/alfredo.denisi

8Q, MALDIVES. Wolfgang, OE1MWW, will be active as 8Q7WK between March 9-23rd. Activity will be holiday style on the HF bands. QSL via his home callsign.

9X, RWANDA (Update/Reminder). Look for Nick, G3RWF (5X1NH), to be active from Rwanda between March 4-12th. He has requested the callsign 9X0NH, and the license should be valid for 2013 because he could return later in the year. Activity will be from Kigali on most HF bands and will be mainly CW with some SSB using 100 watts and wire antennas. There will be no 160m, but he will be on 6 meters. QSL via G3RWF. Nick will upload his log daily on LoTW.

CQ NEWS. Richard, W2VU, Editor of CQ Amateur Radio, sent out the following press release on February 28th: CQ Launches Online Photo Gallery (Hicksville, New York) -- CQ magazine today announced the launch of the online CQ Photo Gallery to supplement photos published in the magazine.
"We shoot photos at many events, and receive many photos from readers, that we don't have space to put in the magazine," said CQ Editor Rich Moseson, W2VU. "But we still want to share them with our readers. The new CQ Photo Gallery allows us to do that."
The photo gallery resides on the flickr.com web site and is organized into albums called "sets." Initial sets include CQ cover images; the "CQ Garage," featuring ham radio license plates from all over; news photos from the FCC's field hearing on communications lessons from Superstorm Sandy, and reader-submitted photos. Moseson recommended that readers check into the gallery site frequently, as new photos will be added regularly. The CQ Photo Gallery may be accessed at:
http://www.flickr.com/photos/cqphotogallery/sets
CQ <www.cq-amateur-radio.com> is the world's leading independent amateur radio magazine, serving the amateur radio community worldwide since 1945. It is published in three languages (English, Spanish and Portuguese) and in both print and digital editions.

EF8, CANARY ISLANDS. Carlos, IK1HJS, will be active as EF8U from Las Palmas Contest station during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or by the Bureau.

HOLYLAND CONTEST 2013. Mark, 4Z4KX, wants to remain everyone that the "Holyland Contest 2013" starts at 2100z on April 19th, and ends at 2100z on April 20th (24 hours!). This year's contest goal will be to have as many Israeli mobile stations activating many different and rare squares for the "Holyland Award". Complete contest details and last year's results are available at:
http://www.iarc.org/~4z1pf/HOLYLAND%20CONTEST%202012%20RESULTS.pdf

HC8, GALAPAGOS ISLANDS. "DX-World.net" reports that Adam, K7ST, is currently operating from a moored boat at the Galapagos Islands. This does not count for DXCC. However, during the weekend he will be on land for the ARRL SSB DX Contest (March 2-3rd) as K7ST/HC8 where it will be good for DXCC.

HR, HONDURAS. After being active from the 5X8C DXpedition, Gerard, F2FD, is now again active as HR5/F2JD from Copan between now and May 20th. He states that he will be active as much as possible on CW, SSB and RTTY. QSL via F6AJA or LoTW. QSOs will be on ClubLog. Also, visit his Web page at: http://f2jd.free.fr

IOTA DXPEDITIONS (Corsican). Operators Vincent/F4BKV, Gil/F4FET, Christian/EA3NT and Laurent/TK4LS will activate the following Corsican IOTAs between March 23-28th, with individual callsigns:
EU-100 - Between March 23-26th; Callsign TK0INT; Cerbicales Islands; 10th most wanted IOTA in Europe; Reference numbers DIFM TK-032 and WFF FFF945. The island is a natural reserve and the group only has access during the daytime at this time of year. Island was activated 7 years ago.
EU-104 - Between March 24-25th; Callsign TK1INT; Sanguinaires Islands; 5th most wanted IOTA in Europe; Reference numbers DIFM TK-002 and ARLHS COR003.
EU-164 - Between March 27-28th; Callsign TK2INT; San Ciprianu and Lavezzi Islands; 27th most wanted IOTA in Europe; Reference numbers DIFM TK-037 and WFF FFF253; DIFM TK-011 and WFF FFF068.
Operations will be limited to daytime hours only with up to 3 stations on the air. Activity will be on any band that is open; 40/30/20/17/15/12/10 meters using verticals and vertical dipoles. QSL Manager is EA5KA. A OQRS will be available on their Web site. The group is looking for sponsors/donations for this project. For more details and updates, visit their Web page at: http://f4bkv.net/corsica2013
Also, a Twitter Page at: https://twitter.com/IOTAcorsica

IOTA NEWS.....
EU-038. Marcel, PD5MVH, will once again be active as PD5MVH/P from Vlieland Island between March 2-16th. Activity will be on 40/20/10 meters SSB. QSL via his home callsign, direct or by the Bureau. NO LoTW or eQSL.

EU-038. Dirk, DL5DCL, will once again be active as PA/DL5DCL from Ameland Island for 5 days starting April 1st. Activity will be CW only on the HF bands. QSL via his home callsign, direct or by the Bureau.

EU-137. Lars, SM6CUK, will be active as SA6G/7 from Ven Island (WLOTA 0780) between June 10-17th. Activity will be holiday style on the HF bands. QSL via SM6CUK, by the Bureau or direct.

EU-172. Ric, DL2VFR, will be active use a special callsign, OU1RAEM, from Samso Island (DIA JY-008, WLOTA 0726) between May 18-24th. While there Ric will activate a new WFF reference number for the World-Wide Flora and Fauna program (OZFF-new, to be decided). Activity will be on the HF bands and mainly CW. QSLs will automatically be sent for all QSOs via the Bureau. QSL OU1RAEM via DF5LW.

NA-034. Lou, W0FK, will be active from Longboat Key (USI FL053S, Sarasota County, FL) between March 2-16th. Activity will be on or near the usual island and IOTA frequencies on the HF bands. QSL vai W0FK, direct or by the Bureau. Also via LoTW.

OC-042. Operators Jose/DU1BP, Torsten/DL2KGS and Rag/LA6FJA will be active as DZ1B from Luzon Island during the CQWW DX SSB Contest (October 26-27th) as a Multi-2 entry. QSL via DU1BP.

OC-161. (Update) Members of the Indonesian Amateur Radio Organization of North Sumatra Area will be active as YB6N from Nias Island between March 8-13th. The following operators will also sign homecall/6: Ady/YB6VK (Team Leader), Alex/YB0SAT, Hendra/YB1HK, Imam/YB4IR and Anton/YB5QZ. Activity will be on the HF bands. QSL via YB4IR (see QRZ.com).

KH0/AH0, MARIANA ISLANDS. Operators Sam/JE1XUZ (KH0XH) and Tama/JQ2WTT (KH0XW) will be active from Saipan, Northern Mariana Islands (OC-086), between March 10th and April 1st. Both operators are undergraduates at a JA university. QSL via the operator's home callsign, by the JA Bureau or direct. Also, the duo plans to be active as AH0BT (Saipan BBQ Contest Club callsign) during the CQWW WPX SSB Contest (March 30-31st). QSL via 7L1FPU, LoTW, by the JA Bureau or direct. Do NOT send to the W0 Bureau and the KH0 address.

KH2/NH2, GUAM. Operators Masanori/JA1OZK/W6LJ, Ryuji/JG1ITH/NY8A, Aki/JR3QFB/W3JH, Masaru/AI2K and Masatoshi/AH6KY/JA1MFR will be active as NH2KY (Ibaraki Net Amateur Radio Club callsign) between March 29th and April 2nd. QSL via JR3QFB. The team will use the callsign KH2KY (Guam Japanese DXer Club callsign) during the CQ WW WPX SSB Contest (March 30-31st) as a Multi-2 entry. QSL via JA1MFR.

KH6BZF PROPAGATION FORECAST/REPORT (March 4-10th)....

KP4, PUERTO RICO. Angelo, KP4EU, will be active during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via KP4EU.

LX, LUXEMBOURG. Philippe/LX2A will be active as LX7I during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

NAURYZ DX CONTEST. The contest is organized and conducted in order to promote amateur radio on high frequency bands in countries of Central Asia (Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, and Turkmenistan) and is dedicated to the spring celebration of Nauryz (Nowruz) included in the representative list of UNESCO List of the Intangible Cultural Heritage of Humanity, declared as the International Nowruz Day. Contest is held on March 23rd, between 0200-0759z. Bands are 80/40/20/15/10 meters, and modes are CW and SSB. Complete details are available at: http://www.nauryz-dx-contest.com

(e) eQSL only (d) direct only (B) Bureau only (L) LoTW only

QSL C6AVA via N6AWD. Activity was from IOTA NA-048 and NA-054.

QSL RECEIVED VIA LoTW: 3D2NB, 3V8BB, A5A, FP/VE3DZ, TO2U, V31YK, VP9/WW3S, XU7ACQ, YI1RZ, Z21BB and ZL9HR

QSLS RECEIVED VIA MAIL: 5T0SP, 7O6T, 8Q7AU, 9M6XRO, 9Q6CC, EG5PSP/mm, FM5AN, FR5HA, GD6IA, JT1CO, LU9EO/d, MO5BFL, SP6IXF, T30PY, T32WW, TL8ES, TZ6BB, VU7M, XU1A, XX9THX and ZL9HR

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

S2, BANGLADESH. Vadym, UT6UD, will be active as S21XV from Dhaka between March 1-7th. Activity will be on all HF bands with a focus on NA. QSL

via UT6UD.

S7, SEYCHELLES (Update). Nobby, G0VJG, will be active S79VJG from the Seychelles (AF-024) between April 4-16th. Activity will be on the 40-10 meters using SSB only and HF verticals on the beach (QRO). QSL via G4DFI.

SN3, POLAND. Operators Bogdan/SP3RBR, Rod/SP8GQU and Jakub/SQ8J will be active as SN3R during the ARRL DX SSB Contest (March 2-3rd) as a Multi-Single entry. QSL via SP3KEY.

TX5, CLIPPERTON ISLAND (Update). The TX5K team arrived at Clipperton Island at 0430z, February 27th, in the dark (and even with a full moon they can only just make out the island), so offloading onto the island did not start until day break. The TX5K Blog page states, "No one got sick on the way down ☐ all are doing well and have enjoyed the wonderful food and hospitality of the Shogun Crew." Excerpts from the blog state that the team will need a whole day and part of the next day to offload and set up. This means do not expect the start of the DXpedition until late in the day (Pacific Time) on February 28th (it will most likely be March 1st in some time zones) ☐ which is as planned. The team sends their thanks to everyone for your support of this DXpedition and send their love to their families. Then on February 28th, it was posted, "after spending hours circling the island looking for a suitable and safe place to land" the team began landing at 1300z. Later in the day, they posted "they have all life support, 2 out of 3 tents up, 20 members of the team on the island and that they have generators and lights that they can use to do some work into the night. They will set up radios tomorrow ☐ so this is all great news. All are tired ☐ but in very good spirits and doing well. It is hot there."
By the time you read this, the TX5K activity will probably have started and it will be on 160-6 meters using using CW, SSB and RTTY. Frequencies were listed in last week's bulletin (OPDX.1101). Just a reminder that they will also have a quality QRO 6m station with a dedicated operator (Lance, W7GJ, - <http://www.bigskyspaces.com/w7gj/TX5K.htm>) ready to do EME and terrestrial QSOs. Needless to say ☐ this is huge news for the 6m community!
QSL via the OQRS by ClubLog (Highly Recommended). This is the preferred method to use for your QSL confirmation. After the DXpedition ends you can order either a direct or Bureau QSL card using the OQRS online QSL service provided by ClubLog. Using this convenient online method you can easily apply for their QSL card to be sent directly to your home or via the Bureau....without having to send your QSL card at all. Direct QSLs are via Bob Schenck N2OO and the SJDXA QSL team: QSL Manager for TX5K, PO Box 345, Tuckerton, NJ 08087-0345, USA. Also, remember to use the DXA Web site <http://www.dxa2.org/> which allows DXers to view the QSO log, and the status and activities of the DXpedition in near-real-time. The TX5K's Web page is at <http://tx5k.org>. For updates, use the BLOG at: http://www.ky6r.com

V3, BELIZE (Update). Operators Lee/N8LJ, Stan/AC8W and Jim/KB8TXZ will be active as V31LJ, V31AC and V31VJ, respectively from Belize between now and March 5th. The trio will be in the ARRL DX SSB Contest (March 2-3rd) as a Multi-Single entry. The contest callsign was not provided. Activity outside of the contest will be on 160-6 meters using CW and RTTY. QSL V31LJ via K8ESQ. QSL V31AC and V31VJ via KB8TXZ.

VK9C, COCOS KEELING ISLANDS (Update/New Callsign). Operators Chris/GM3WOJ (ZK2V) and Keith/GM4YXI (ZK2X) will be active from Cocos Keeling Island (OC-003), using a new callsign that was issued, VK9CZ (not VK9C/GM2MP), between March 30th and April 13th. Activity will be on SSB and CW, with some RTTY. It is hoped to have a real-time logging system and daily LoTW uploads if possible. More details to follow. A new Web page will be available soon at: http://www.vk9cz.com

VP5, TURKS AND CAICOS ISLANDS (Update/Change). A team of operators (mentioned Geoff/W0CG, Scott/K0MD and possibly more) will be active as VP5H from Providenciales Island (NA-002, WLOTA 2003) during the ARRL DX SSB Contest (March 2-3rd) as a Multi-Op/All-Band/High-Power entry. QSL via his home callsign and LoTW.

WP3, PUERTO RICO. Jamie, WP3A, will be active during the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/Low-Power entry. QSL via NP3O.

XE, MEXICO. Brian, N3IQ, will be active as XE3/N3IQ from Cancun during the ARRL DX SSB Contest (March 2-3nd) as a Single-Op/All-Band/QRP entry. He will use a KX3 and little vertical. QSL via N3IQ. By the way, Brian is celebrating his wedding anniversary on this trip.

XU, CAMBODIA. Eddy, ON4AFU, will be active as XU7AFU between March 3-14th. Activity will be CW using 100 watts and wire antennas. QSL via home callsign, direct or by the Bureau. Visit his Web page at: http://www.on4afu.net

ZF, CAYMAN ISLANDS. Chris, HB9ELV, will be active as ZF2EL from the Grand Cayman Island during the ARRL DX SSB Contest (March 2-3rd). QSL via LoTW.

The following stations are expected to be active in the
ARRL DX SSB Contest (March 2-3rd, 2013)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2013 ARRL DX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

Looks like TX5K is up and running. Good luck to those that need them. I hope you get your needed bands/modes.

I don't so won't be calling other than to try a QRP QSO maybe in the last days. Won't see me on top of the hog list.

I just moved from NC to AL, no "real" antenna and tower yet. I only have a 17m dipole. Putting it up now but cold and snow is slowing me down.
I need the Clipperton on the warcs and on cw. Hope I can get maybe a q on 17cw at least.

20713. EP3SMH QSL card

Yahoo group: DX-IS (2013)
Date: 2013-03-01 22:06:06 UTC
From: Richard Williams
Topic: 20713 Message: 20713

For those of you looking for a QSL card from Mohsen (EP3SMH), I just received mine today for a QSO on 12M in 2002. I had not had any luck in the past, but he recently updated his QSL information on QRZ.com; and the "secret" is to send your card via registered mail.
FYI, I mailed the card on 24 Jan 13; turn around time was 5 weeks.

Dick K8ZTT

20716. TX5K

Yahoo group: DX-IS (2013)
Date: 2013-03-03 14:02:38 UTC
From: Phil Snyder
Topic: 20711 Message: 20716

First good work Lance, VK6DU, I saw your 30 meter RTTY QSO at 1355UTC.
Now my question.

This is simply a inquiry not a complaint. Why is it that just about every time I listen to the TX5K guys on 30 RTTY they are working JA's? Last evening they were working many and again this morning they are working NA but with many JA's in there as well.

I did nab them on 160 last night with 100 watts and just an 80/40 inverted V so no complaints here.

Just trying to stir up some discussion.

Phil

From: John G.
Topic: 20711 Message: 20717

I did get lucky at work them on 30m RTTY last night at 0519Z, but yes, they did seem to be working mainly JAs at that time. For a while before that they were calling for "outside NA only" for quite a while. The 30m CW station was insanely loud last night. One of the loudest DXpeditions I have ever heard! They were calling for EU only for a while as well. If their signal stays like this they should be real easy to work in the US by the end of their DXpedition. I hope so, because the only bands I need Clipperton on are 160 and 6. Not holding out much hope for 6m, and my antenna is a joke on 160. They were a new one on RTTY for me, though.

Hope they take some of the pressure off of the XT2TT pileups, as I still need them on 40, 80 and 12.

Dale,

Not sure what experience you have as a "DXer"; but the best way you can try and figure out what callsign you worked is by using a combination of "sh/dx callsign" on the DX Cluster (sh/dx TO22C, for instance), and checking the call on QRZ.com.

As for your current "dilima"; I just did a sh/dx for TO22C, and noted there were several posts for him on a couple of bands on 3 Mar. Additionally, I looked up TO22C on QRZ.com and it is F6GWV and F6HMQ active on Guadeloupe from 17 Feb thru 3 Mar.

As for TO5C, there have been no posts for that call sign on the cluster, nor is it a "valid" callsign according to qrz.com.

So, my bet is you worked TO22C.

Dick K8ZTT

PS I have used the above method to "sort out" callsigns, and though not %100, it beats the odds in Vegas.

Thanks Guys;
I had already checked qrz but no info on either. Checking DX Summit, I got Guadeloupe, but the op when I queried said Martinue. No results on qrz though. I guess I may have busted the TO5. So what's a few penalty q's. :(I did check my LoTW for past years and got TO5A for several contests and years. Maybe I will check Buck. Also checked DXNL and OPDX, WPX in couple of weeks to redeem myself hi hi

TO22C was on Guadeloupe. A few of the cluster posts even said FG / TO22C

TO1A was on Martinique, IIRC.

I remember checking both of those on QRZ the first time I worked them, since my copy of CT couldn't ID the entity (?????? Instead of ----*-), all was revealed. A quick edit of CTY.DAT fixed the issue.

From: GARY HUBER
Topic: 20718 Message: 20726

I asked TO22C for location during my first contest exchange with them (wanted to know the multiplier) and the operator said Guadeloupe. I heard them later say portable Guadeloupe when IDing.

TO22C is FG according to the Daily Dx.

Hey gang,

Let's not lose site of the important thing.

Did you work them (TO1A and/or TO22C) or not, during the contest?

If you did, and submitted your log to the ARRL (or will by deadline), the contest will give you appropriate credit.

And the QSL route, for those who need it, will be sent out by The Usual Suspects soon enough.

Don't sweat the small stuff.

73, ron w3wn

20730. RE: [DX-IS] TX5K

Yahoo group: DX-IS (2013)
Date: 2013-03-04 07:40:14 UTC
From: Lance Martin
Topic: 20711 Message: 20730

Hi Phil,

Good job on your TX5K contacts.

I have managed to get them on 15/17/20 as well but I think the demand at the time of day was low when I got through (USA midnight plus).
I did have a go this morning on 17CW but there was way higher demand and I didn't get through.

So really just missing 12 and 10m now. With current SFI numbers though, I doubt that 10m will open that way, but one never knows... (I did miss XT, 5X and 9U recently on 10m).
I did notice S21XV pounding in on 10m last night (though that one is a lot closer), I hope to pick that one up for a new one on 10m soon.

I used to have an 80m inverted V but didn't have a hope of tuning it on 160m, how did you manage to do that?

73, Lance - VK6DU

First good work Lance, VK6DU, I saw your 30 meter RTTY QSO at 1355UTC.
Now my question.

This is simply a inquiry not a complaint. Why is it that just about every time I listen to the TX5K guys on 30 RTTY they are working JA's?
Last evening they were working many and again this morning they are working NA but with many JA's in there as well.

I did nab them on 160 last night with 100 watts and just an 80/40 inverted V so no complaints here.

Just trying to stir up some discussion.

I was able to hear the S21 on 17 CW yesterday about 1330 UTC but was unable to work it. My first ever S21 even heard.

My antenna is actually two full size wire dipoles on the same feed. They are separated about 4-6 inches by spreaders made out of CPVC water pipe. I put the wires on each end of the pipe and run a black zip tie around both wires and through the inside of the pipe. The apex is at 55 feet on my tower. I actually just use the tuner in the FT1000 Mark V Field. There are some spots in the band where it tunes and some where it doesn't. I have 41 countries worked on 160 and plan on a slightly modified inverted "L" with a remote tuner at the base and we'll see what happens then.

The pileups are fierce. I got them on 160M last night with one call . . . was convinced it was a pirate because he was so loud, but it showed in the log. After he worked me, he went to EU EU EU like they were doing on 20 RTTY, 30 both modes, 40 both modes and 80 all evening! EU better be happy with this operation. :-)

To be fair, it makes sense to give EU a couple of days priority because it is long haul for them. Pretty easy for NA.

I worked them on the first call on 80 CW last night. They said "UP 2", I dialed in "UP 2" for transmit and called. They came right back to me. I fell out of my chair. I was expecting a grueling couple hours of calling.

This was a new band for me. I have worked a couple previous Clipperton operations but not on 80m. I was watching the log on their DXA website and the QSO showed up in about a minute.

This is cool technology. I am hoping it will curtail pirate operations. Hopefully you'd know if you worked a pirate or the real thing within a minute or so.

There was some whining at first when it wasn't updating, but it's slick to listen to the pileup and see the calls they work pop up on the map! They must look up the grids or something because mine cake up in NS. Real time logs were always my dream, and I finally get to see it. As you say, stops pirates in their tracks, and also stops insurance contacts.

XT2TT are updating immediately as well, but you have to go put your call in to see. I think T32C did this too. TX5T is fully automatic. Technology is good! In a few years I think all operations will do this, although it might be hard from places like Bouvet. Do any of you tech wizards know it the entire earth now has Internet access by satellite? If so, then even OPs from a place like Bouvet could do it.

Did you have the "stick-with-it-ness" to keep at them for 2-3 hours? I did. I never said it was easy. He was loud, but there are a lot of W4/W5/W6 stations between us and them who are louder that you or I. I just got a stubborn on and said I'm going to work them. 15 and 20 were hard too, but not as bad as 17. 12 was 1-2 calls the first day.

Anyhow, you'll get them. That CC A3WS should have more gain than my Mosley because it is just a dual bander. Mine is compromised in terms of spacing as all 3 element tribanders are.

Yeah, you'd think!! Well I went back and forth on 12 and 17 today from 11:30 AM AST to 5:30 PM. I went for dinner and after that 12 was gone. So I went back to 17 and the operator is still calling for EU with half of NA calling him. Yes, he's working some NA but when he gets a hint of a EU call he becomes tenacious.

He came back to AL when he was calling for EU on 17 but as soon as he realized I wasn't EU he went on to a DL.

Granted, they are very proficient ops but early on in this operation I'm not yet happy. But I'll just keep trying and perhaps I'll have success on at least one or two of the bands I need 'em on.

Should have put more effort into the DXpedition my buddy Ann, WA1S, was on!! :-(

Did you have the "stick-with-it-ness" to keep at them for 2-3 hours?
I did. I never said it was easy. He was loud, but there are a lot of W4/W5/W6 stations between us and them who are louder that you or I. I just got a stubborn on and said I'm going to work them. 15 and 20 were hard too, but not as bad as 17. 12 was 1-2 calls the first day.

Anyhow, you'll get them. That CC A3WS should have more gain than my Mosley because it is just a dual bander. Mine is compromised in terms of spacing as all 3 element tribanders are.

Hello Al,

probably a stupid question ... never thought of trying to catch them
when EU condx are over? Right now You should have them almost for NA
only on 5 bands CW + SSB (per DXA) ... until the JA opening starts, but
even than I don't think they will call for JA for hours.

Yes, Axel, of course I have thought of that. Out here on the NE coast of NA they are now gone on all bands. So far, they have been best on 10 through 20 in the mornings (13-1600) when they are also very good into EU. When I have conditions on HF in the afternoon they have still been working EU. Mind you, they have picked off many of the big guns and some little pistols who have managed to sneak through from NA. Sadly, I haven't been one of them -- YET :-(

I won't be able to spend any late nights or early mornings on the LF bands until Thursday but will try there also through next weekend.

I need FO/C on all the WARC bands, 10M CW and 80M. Sometime during this operation I'll add one or more!!!

I feel pretty good on Clip. I just moved to Alabama and hung a 17m dipole out the window to see what I could hear. I got them on 17cw and 12cw, so far.
With that DXA thingy you can see your qso real quick. Running 100w.

Got them on 80 CW Saturday night / Sunday morning, while taking a short break from the SSB contest (I'd pretty much worked everyone I heard on 75 at that point)

It was around 0700 Z, they didn't appear to have too much of a pile-up. Once I properly zero-beat their listening frequency, I think it was 2 calls.

Of course, my friend Bill W3WH had to do me one better. he got them on 160, one call. Nice thing about being retired. if he stays up that late on a weeknight, or gets up real early, he doesn't have to worry about going in to work the next day. plenty of time though.

The pileups are fierce. I got them on 160M last night with one call . . . was convinced it was a pirate because he was so loud, but it showed in the log. After he worked me, he went to EU EU EU like they were doing on 20 RTTY, 30 both modes, 40 both modes and 80 all evening! EU better be happy with this operation. :-)

To be fair, it makes sense to give EU a couple of days priority because it is long haul for them. Pretty easy for NA.

In the world of DX'ing, everything balances out to "net-sum-zero".
What is easy for me, is difficult for you, and the reverse is just as
true.

Let Kosovo get added to the DXCC list and you guys on the East Coast
will be crowing about how easy it is, while us folks out West will be
in the same position you folks are in with Clipperton.

Hang in there Al,

As we speak the piles are going down (somewhat...). Funny you talk about EU, last night I thought I would get a QSO on 30CW but they were NA only.
On 17m was EU only. Anyway they have to do what they gotta do.. I see their end date is the 10th March which will give me time this weekend in the day here to try and get them on 12/10m.

I managed to finally get the XT guys this morning on 15m CW LP (I didn't need them there, but haven't been able to make a QSO anywhere so I took the opportunity, very light copy so piles are thinning).

5V7JD has been a really tough one, haven't heard Jackie yet, even though he said he may be able to squeeze a CW QSO in, I am now less hopeful. He said he has only 2 VKs in the log.

Anyway keep at 'em,

73, Lance - VK6DU

Topic: 20711 Message: 20751

For once, Oklahoma is actually a pretty decent place to be chasing a DXpedition from. Don't expect that to happen very often. Caught them on 12m CW with only needing 2 or 3 calls. That was around 2342Z. Now to get them on 160m and XT2TT on RTTY and 40m before they go QRT. Worked them on 15m right after the Clipperton. That was pretty late for them on 15.

In the world of DX'ing, everything balances out to "net-sum-zero".
What is easy for me, is difficult for you, and the reverse is just as
true.

Let Kosovo get added to the DXCC list and you guys on the East Coast
will be crowing about how easy it is, while us folks out West will be
in the same position you folks are in with Clipperton.

On Mon, Mar 4, 2013 at 4:16 PM, VE1AL <ve1al@...> wrote:

Yes, Axel, of course I have thought of that. Out here on the NE coast of
NA they are now gone on all bands. So far, they have been best on 10
through 20 in the mornings (13-1600) when they are also very good into EU.
When I have conditions on HF in the afternoon they have still been working
EU. Mind you, they have picked off many of the big guns and some little
pistols who have managed to sneak through from NA. Sadly, I haven't been
one of them -- YET :-(

I won't be able to spend any late nights or early mornings on the LF bands
until Thursday but will try there also through next weekend.

I need FO/C on all the WARC bands, 10M CW and 80M. Sometime during this
operation I'll add one or more!!!

Hello Al,

probably a stupid question ... never thought of trying to catch them when EU condx are over? Right now You should have them almost for NA only on 5 bands CW + SSB (per DXA) ... until the JA opening starts, but even than I don't think they will call for JA for hours.

SIDC SOLAR BULLETIN 05 Mar 2013, 1322UT
SIDC FORECAST (valid from 1230UT, 05 Mar 2013 until 07 Mar 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Active conditions expected (A>=20 or K=4)
SOLAR PROTONS : Warning condition
PREDICTIONS FOR 05 Mar 2013 10CM FLUX: 114 / AP: 007
PREDICTIONS FOR 06 Mar 2013 10CM FLUX: 115 / AP: 011
PREDICTIONS FOR 07 Mar 2013 10CM FLUX: 117 / AP: 007
COMMENT: NOAA AR 1686 (S12W52) produced an isolated M1.2 flare peaking
at 07:54 UT, C-class level activity can be expected for the coming
hours. Dimmings associated with this flare suggest the presence of a
CME, but there is nothing visible in STEREO-A and no LASCO data yet.
STEREO-B witnessed a full halo CME starting at 04:10 UT (COR2), this is
a backsided event not expected to arrive to the Earth. A filament
erupted south-east of NOAA AR 1688 (S15E31) at 23:00 UT on March 4
leading to a narrow CME seen by STEREO-B, this event is not believed to
be Earth directed, even though there is no LASCO data yet to confirm
(data gap). Geomagnetic conditions have been quiet and are expected to
remain so until the arrival of a fast speed stream in 24h that may lead
to active levels.

Very Loud!!!

I showed up in Maine last night. Dug myself out to get into the garage. An then worked them on 20 SSB, 40 SSB & 30 RTTY this morning. All with just a few calls.

Using a G5RV (thats right tuned on 30?) and 100 watts.

They are just in the right spot for me.

You did, indeed, Iain. I have since genuflected and kneeled to the east. I'd been calling for just over an hour. Also heard them around 0400 today on 80 but was too tired to stay in the pack for more than 30 min. Tonight I'll be there and hope I can hear them again. Now on to 17 & 30. Just maybe.....

From: VE1AL
Topic: 20711 Message: 20759

Thanks, Ron! Went to 17 and he was barely strong enough to call. He was S5 when I called 20 min later and got him on the 5th call (was S7 on 12M). So that's two bands down, need 30 and 80 still and will work on those when the sun goes down. Not bothering on SSB unless they're 20 over 9 and that's not likely to happen!!

Am delighted to see I'm in the log. :-)

20761. TX5K 40 Meter SSB

Yahoo group: DX-IS (2013)
Date: 2013-03-05 19:14:32 UTC
From: GARY HUBER
Topic: 20761 Message: 20761

Last night the TX5K 7180 QRG and 7185 – 7195 QSX was a mess. There were Nets and DXers in conflict to be sure. The Net operators were using 7180 making that frequency most difficult for those trying to hear TX5K, while those calling on 7185-7195 were possibly QRMing on-going net operations. After listening for ten minutes and making a few calls, (the whole thing just didn’t feel right to me) I gave up and QSY’d to 40 CW. I listened to TX5K send XnXX DE TX5K TU UP EU for over three hours before giving up on getting a chance to work them on 40 CW. (160, 80, 20, 15, and 10 CW are in the log). No complaints, No whining, just the facts.

Maybe the answer is NA on 40 between 0800 and 1400 UTC.

73 ES DX,
Gary -- AB9M

20762. RE: RE: [DX-IS] TX5K

From: John
Topic: 20711 Message: 20763

So you arent on 160, or you can't hear them on 160? They were booming in here on 160 last night as well but only calling for EU. Need to get that as my suffix so I can work those DXpeditions.

Subject: RE: RE: [DX-IS] TX5K

Thanks, Ron! Went to 17 and he was barely strong enough to call. He was
S5 when I called 20 min later and got him on the 5th call (was S7 on 12M).
So that's two bands down, need 30 and 80 still and will work on those when
the sun goes down. Not bothering on SSB unless they're 20 over 9 and
that's not likely to happen!!

Am delighted to see I'm in the log. :-)

73,

Al, VE1AL

Date: 2013-03-05 20:04:42 UTC
From: VE1AL
Topic: 20711 Message: 20765

Yeah, Tim, I know how you feel. I saw a spot or two for TX5K on 10 but there are no conditions from here. Good luck to you with the XT2. Have 'em everywhere I need them but that's a relatively easy shot from here.

Just got 9U4U on LoTW so that's three more band countries for Club Log.

And am listening to a LID on 17 trying to QRM the TX5. God bless 'em. Morons!

Thanks, Ron! Went to 17 and he was barely strong enough to call. He was S5 when I called 20 min later and got him on the 5th call (was S7 on 12M). So that's two bands down, need 30 and 80 still and will work on those when the sun goes down. Not bothering on SSB unless they're 20 over 9 and that's not likely to happen!!

Am delighted to see I'm in the log. :-)

20766. RE: RE: [DX-IS] TX5K

Yahoo group: DX-IS (2013)
Date: 2013-03-05 20:11:51 UTC
From: VE1AL
Topic: 20711 Message: 20766

No, I'm no longer on 160 from this location. I had a dipole that went across two neighbour's properties on both sides. But one of them moved and the new owner would not allow me to attach the end of one leg on his property any more. I live on a tiny city lot (90 x 35') and as it is my 80M inverted vee crosses to the outside yards of neighbours on both sides.

Maybe one day I'll be able to do an inverted L but the directional options are not great!

So you arent on 160, or you can't hear them on 160? They were booming in here on 160 last night as well but only calling for EU. Need to get that as my suffix so I can work those DXpeditions.

John AF5CC

On Tue, Mar 5, 2013 at 1:43 PM, VE1AL <ve1al@...> wrote:

Good to know, John. Thanks.

No 160 here but they were good and strong around 0400 today on 80.

Trying to get the XT on 40m. Looks like tonight will be my last chance.
No luck on 12m either. Didn't even see them spotted there today. Heard
them pop out of the noise yesterday on 12, for a few moments.

20768. Re: RE: [DX-IS] TX5K

Yahoo group: DX-IS (2013)
Date: 2013-03-05 20:57:35 UTC
From: John
Topic: 20711 Message: 20768

I live on a lot about as small, but am able to load up my G5RV type dipole on 160m. I am sure the efficiency is horrible, but have been able to work 15 or so countries on top band. Worked Cuba a few weeks ago for a new band country. I would like to put up a vertical or inverted L someday also, but do not relish the idea of laying down radials at all.

Thanks, Ron! Went to 17 and he was barely strong enough to call. He was
S5 when I called 20 min later and got him on the 5th call (was S7 on 12M).
So that's two bands down, need 30 and 80 still and will work on those when
the sun goes down. Not bothering on SSB unless they're 20 over 9 and
that's not likely to happen!!

Am delighted to see I'm in the log. :-)

From: VE1AL
Topic: 20711 Message: 20771

Oh, how I wish. Got 'em on 12 & 17 earlier but can't hear them on 10 way up here nearer the Arctic Circle. :-(And at the moment I can't hear anything but the pileup on 20. Couple of guys up here seem to have worked them on 6 and maybe even EME.

Good luck to all.

Thanks, Ron! Went to 17 and he was barely strong enough to call. He was S5 when I called 20 min later and got him on the 5th call (was S7 on 12M). So that's two bands down, need 30 and 80 still and will work on those when the sun goes down. Not bothering on SSB unless they're 20 over 9 and that's not likely to happen!!

Am delighted to see I'm in the log. :-)

73,

Al, VE1AL

From: VE1AL
Topic: 20773 Message: 20773

OK, I've been very lucky to have worked TX5K on 12, 17 & 30M and added them for a new mode on 10M. But, after all, it is just southwest of W6. However, the bands are open in that direction, from here, only during certain hours of the day.

Am I the only one who has become very, very frustrated with the hours a day spent on EU?

I've been listening to TX5Ks operator on 15 CW for a few hours. He actually came back to me but when he realized I was a VE1 (on a direct path to EU for him, he went on to a European and totally ignored me. This happened a few days ago on another band. A quick report would have made me happy but that didn't happen.

The last two early mornings here (0400-0500) TX5K was S9 on 80M working EU only!!! Not a single NA worked in an hour.

Enough already!!!!!

Al, I understand your frustration. I'd like a 40m CW contact but have not been able to find a time over the past couple nights (I listened from 0200 to 0545 UTC Tuesday) when TX5K was QRV for NA. It seems to me if the EU demand is that great for 40 CW and that is all they will work while there is propagation to EU, maybe the 08-09 to 1300 UTC slot could open to DXers NOT in EU. I'd bet there would be DXers from VE1 to ZL who having common darkness with TX5K would be calling. Last weekend during the ARRL DX test I worked VK, ZL, and JA on 40M in a three minute period just before 1200 UTC, so I know there is 40M propagation, but not to EU at that time.

I do have 160, 80, 20, 15, and 10 Meter CW contacts confirmed on http://www.dxa2.org/ so I know I can work them; I'd just like to have a chance at 40 CW!

Heard them a short time ago on 17 CW, coming in like gangbusters, but primarily working JA's.

Switched to 12, got them on 3rd call.

Went back to 17, and they're gone now. But that's OK, plenty of time.

Now, I'm just hoping for 160 tonight.

Am I the only one who has become very, very frustrated with the hours a day spent on EU?
I've been listening to TX5Ks operator on 15 CW for a few hours. He actually came back to me but when he realized I was a VE1 (on a direct path to EU for him, he went on to a European and totally ignored me. This happened a few days ago on another band. A quick report would have made me happy but that didn't happen.
The last two early mornings here (0400-0500) TX5K was S9 on 80M working EU only!!! Not a single NA worked in an hour.
Enough already!!!!!

20782. TX5K 40 CW

Yahoo group: DX-IS (2013)
Date: 2013-03-07 13:01:23 UTC
From: Tom Martin
Topic: 20782 Message: 20782

I have tried in the evening and morning for hours for 5 days and still can't get them on 40 CW. This morning, at 1230 UTC. I got them on 40 SSB on the first call. I went to 30 RTTY and got them on the first call. I would imagine from my experience in V31-land that they must have wall to wall stations calling on 40 meter CW. They probably call EU only to take a break.

I've had plenty of time to work them because I'm recovering from a Total Knee Replacement. I'm sleeping in the shack.

Now, to see if I can hear them on 6 meters.

Good luck to all.

73,

Tom W8JWN

SIDC SOLAR BULLETIN 07 Mar 2013, 1248UT
SIDC FORECAST (valid from 1230UT, 07 Mar 2013 until 09 Mar 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Warning condition
PREDICTIONS FOR 07 Mar 2013 10CM FLUX: 114 / AP: 006
PREDICTIONS FOR 08 Mar 2013 10CM FLUX: 116 / AP: 007
PREDICTIONS FOR 09 Mar 2013 10CM FLUX: 119 / AP: 007
COMMENT: Solar activity has been low, no C-class flares in past 24h.
Several ARs (especially NOAA ARs 1686 and 1689) have potential for
C-class flaring, and 1686 has still low chances of producing M-class
flares as it rotates over the west limb. A backsided halo CME was seen
leaving the Sun on March 6 at 09:24 UT, and two slow west limb CMEs were
also detected. None of these CMEs are expected to affect the Earth.
Geomagnetic conditions have been quiet, a fast solar wind stream from a
coronal hole may still arrive today, causing unsettled to active
conditions.

20784. RE: [DX-IS] TX5K 40 CW

Yahoo group: DX-IS (2013)
Date: 2013-03-07 14:12:26 UTC
From: VE1AL
Topic: 20782 Message: 20784

Now isn't that interesting. I listened to TX5K on 80M CW around 0400 working only EU today. They were S9 and I thought working very, very slowly. Knowing I had no chance I went to bed and got up at 0930 to try again. NUTTIN' on 80M CW (saw a spot for 80M SSB) but I don't like SSB pileups. So I went to 40 on the off chance I'd find them there. And I did. Two calls and no luck, moved up 1.5 kHz and I was back in bed 5 minutes later after checking the on-line log.

Now, I didn't need 40M CW but since I'd gotten out of bed I needed something to make getting out of bed at zero-dark-30 worth the effort. Despite my bitchin' and complainin' (nonetheless justified, I believe) I now have 'em on 10, 12, 17, 30 & 40 CW. I've already got FO/C on 20 & 15 so no sense causing QRM there. I'll try 80M CW again tomorrow and Saturday and hopefully have them in the log before their departure. If not, well, next time! My SSB QSOs are from previous operations.

Yes, I certainly imagine the pileups are absolutely fierce (what I can hear) and totally and disgracefully unruly. So I'm particularly happy that my less than a superstation with just 100W has managed to get through.

Hope you do get them logged on 6M, Tom.

From: GARY HUBER
Topic: 20782 Message: 20785

Congratulations on the 40 CW contact Al. Like W8JWN, I've had no joy with TX5K on 40 CW, although I'm in the log for 160, 80, 20, 15, and 10 CW. I listened for them last night from 0100 to 0300 UTC until they came up at 0300 and then tried moving around in the pile close to the last station worked or on the edges until nearly 0600. I came back to the shack at 1130 UTC and found them at 7021 working up five and tried calling until they went QRT for ten minutes at 1155. listened until 1300 but they never came back. I am running a FLEX-1500 as a panadapter / sub-rx on my OMNI-VII which running at 11W drives the TITAN-425 to 500W which is the maximum the HV-2 is rated at with the 160M mod. I've worked a lot of DX with this configuration so it isn't the equipment. I just have to transmit where the DX is listening in the pile.

Its better to be lucky than good, I guess.

I am glad I already have Clipperton confirmed on 40 and 15. The pileups there sound pretty bad. Working them on the other bands has been easy from Oklahoma, although i really havent listened on 80 yet. Have them confirmed on that band as well. Only new band/mode countries have been 160m and RTTY. The rest of them are just for the thrill of the chase.

I know this is a test run for Heard Island next year. Hope they are as loud from Heard as they are now, but I seriously doubt that.will occur!

Good luck to everyone else in the pileups. Did get the XT2 on 12m yesterday right before they went QRT for a new band country!

It's funny how propagation... and expectations & reactions of others... are working.
?
I was listening, on & off, to TX5K on 40 & 30 CW last night.? Never could find the split, and it was total chaos anyway, so I didn't try too hard.? Barely heard them on 160 before hitting the sack.
?
Got up a little early before work, and sad to say (for me), nothing on 160.? DXA (and that is a fun little app, isn't it?) showed no 160 activity at the time.? (I'll just try and stay up a little later tonight).
?
No copy on 40 CW, so I tried 40 SSB.? One call.
?;
I already had them on 80 CW, so I dialed up the 75 SSB frequency, and they were coming through like gangbusters.? Probably could have worked them easily, but I didn't feel like retuning the transmatch on the 80/160 "L".
?
Something similar yesterday late afternoon.? Heard them on 17 CW, total zoo.? Went up to 12 CW, got them on the third call.? Went back to 17, zoo had died down a little, zero beat their split, one call.
?
Go figure.
?
... I don't think W3WH will be too happy with me.? The one band he's missing (as of right now, at least)... 40.? OTOH, he got them on 160, which is the one band I really want to work them on.? We'll see.
?
And, again, congrats to all for getting through.
?

From: Thomas
Topic: 20782 Message: 20789

Thanks, Al. I doubt if I will hear them on 6. They've only been about S2-3 here in the U.P. on 10. I worked them on CW and SSB anyway.

I have TX5C on 40 CW. Just wanted to work all bands with the TX5K.

Ii tried every technique on 40 CW. No luck. 1000 watts to a rotatable dipole at 80 feet and no CW success. One call on SSB,my least favorite mode,using an inverted vee at 65 feet,and one call. Weird. I guess that's why we love to chase DX. You never know what can happen.

I need Heard to reach #337. I'll be happy with one band!

73,

Tom

Newington CT March 7, 2013
To all radio amateurs

SB DX ARL ARLD010
ARLD010 DX news

This week's bulletin was made possible with information provided by N6NY, NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SPRATLY ISLANDS. Members of the Borneo Amateur Radio Club will be QRV as 9M4SLL from Pulau Layang Layang, IOTA AS-051, from March 10 to 18. Activity will be on 160 to 10 meters using CW, SSB and RTTY with five stations active. QSL via M0OXO.

ALGERIA, 7X. Members of Amateurs Radio Algeriens are QRV as 7T50ARA and 7T9A until May 30 to commemorate the 50th jubilee of the IARU society. QSL via 7X2ARA.

MALDIVES, 8Q. Wolfgang, OE1MWW will be QRV as 8Q7WK from March 9 to 23. Activity will be holiday style on the HF bands. QSL to home call.

RWANDA, 9X. Nick, G3RWF is QRV as 9X0NH from Kigali until March 12. Activity is on the HF bands using mostly CW. QSL to home call.

IRAN, EP. Mohsen, EP3SMH has generally been active using RTTY on 20 and 15 meters around 1500 and 1550z. QSL to home call.

BELARUS, EU. Members of the radio club Dalnye Strany are QRV during March as EV50WB in celebration of its golden jubilee. Activity is on the HF bands using CW, SSB and RTTY. QSL via EU1AZ for SSB contacts and EU1DX for CW and RTTY.

CLIPPERTON ISLAND, FO. A large group of operators are QRV as TX5K until March 10. They are active on 160 to 10 meters using CW, SSB and RTTY with up to 10 stations active. QSL via N2OO.

DOMINICA, J7. Rick, KK4GV is QRV as J79GV until March 17. Activity is holiday style on the HF bands using SSB. QSL to home call.

MARIANA ISLANDS, KH0. Operators Sam, JE1XUZ and Tama, JQ2WTT will be QRV as KH0XH and KH0XW, respectively, from Saipan from March 10 to April 1. They will also be active as AH0BT in the upcoming CQ WW WPX SSB contest. QSL to home calls and QSL contest call via 7L1FPU.

GUAM, KH2. Look for operators JE1JAC, JK1FUP, JA2JWH and JA3HHV to be QRV as AC2CX/KH2, N6NY/NH2, KH2/K2IO and AE3KS/KH2, respectively, from March 9 to 10. Activity will be on 80 to 6 meters using CW, SSB, RTTY and PSK31. QSL to home calls.

CURACAO, PJ2. Operators W1USN, AA1M and W1SSR are QRV as PJ2/home calls until March 22. Activity is on 160 to 10 meters using CW, SSB, RTTY and PSK. QSL to home calls.

TUVALU, T2. A group of operators will be QRV as T2GM from March 12 to 23. Activity will be on the HF bands with two stations. QSL via GM4FDM.

ASIATIC RUSSIA, UA0. Vladimir, RV3EFH is QRV as RV3EFH/0 from Bolshevik Island, IOTA AS-042, until October. Activity is on 40, 20, 15 and 10 meters using CW, SSB and various digital modes. QSL direct to home call.

CAMBODIA, XU. Eddy, ON4AFU is QRV as XU7AFU until March 14. Activity is on the HF bands using CW. QSL to home call.

INDONESIA, YB. Members of the Indonesian Amateur Radio Organization are QRV as YB6N from Nias Island, IOTA OC-161, until March 13. Also look for operators YB6VK, YB0SAT, YB1HK, YB4IR and YB5QZ to be QRV as home calls/6. Activity is on the HF bands. QSL via operators' instructions.

ROMANIA, YO. Members of the AJR Brasov Radioclub are QRV as YP0FOTO until the end of August. QSL via YO6BBQ.

ALBANIA, ZA. Max, IZ4JMA is QRV as ZA/IZ4JMA for the next 18 months. Activity is on all bands and modes. QSL to home call.

THIS WEEKEND ON THE RADIO. The North American RTTY Sprint, SKCC Weekend CW Sprintathon, AWA John Rollins Memorial DX CW Contest, NCCC RTTY Sprint, QRP CW Fox Hunt, NCCC Sprint, RSGB Commonwealth CW Contest, AGCW QRP CW Contest, QRP ARCI HF Grid Square CW Sprint, EA PSK63 Contest, Idaho QSO Party, UBA Spring 6-Meter Contest, NSARA Contest and the Wisconsin QSO Party will certainly keep contesters busy this upcoming weekend.

The RSGB 80-Meter Club CW Championship, QRP 40-Meter CW Fox Hunt, NAQCC-EU Monthly CW Sprint and CWops Mini-CWT Test are scheduled for March 13. Please see March QST, page 84, and the ARRL and WA7BNM Contest websites for details.

From: Lance Martin
Topic: 20711 Message: 20791

Hi Al,

FB on your TX5K QSOs.
I managed to get them on a few bands and was a bit lucky to get them on 20m RTTY LP this morning. Long path to them always surprises me as I think of them as pacific rather than US but you are very close of course. By the time I got to the DXA thing (not thinking I would get through) my call had passed to the back bench, I did see it in the list so it is working.

Did get XT2TT on 10m! CW for a new one on that band, very, very, light copy but that was the same for S01R the other year.

Will be gunning for TX5T on 12/10m this weekend, the band hasn't opened that way yet (I don't think, though I do have to work in the week).

Nigel ZF2XF was pounding in this morning on 20m CW LP, hope to get him on 17 and above while he is there for new ones.

Kosovo, yes, I have a few Qs into there, just waiting....

73, Lance - VK6DU

You did, indeed, Iain. I have since genuflected and kneeled to the east.
I'd been calling for just over an hour. Also heard them around 0400 today
on 80 but was too tired to stay in the pack for more than 30 min. Tonight
I'll be there and hope I can hear them again. Now on to 17 & 30. Just
maybe.............

20792. Re: [DX-IS] TX5K 40 CW

Yahoo group: DX-IS (2013)
Date: 2013-03-08 03:20:32 UTC
From: GARY HUBER
Topic: 20782 Message: 20792

We went out for dinner this evening at 5 PM CST and when we came back at 6:15, I came down to the shack to read a few emails before taking a nap, as I planned to get up and hunt TX5X on 40 CW from 01 AM CST (07 UTC) until I worked him or lost propagation which ever came first. After a couple minutes I turned on the FLEX-1500 which was still on 7023 KHz in panadapter mode and saw a signal bouncing and a pile up from 7025 to 7031.

I turned on the OMNI-VII and started the TITAN-425, listening to the pile while waiting for the 3CX800A7s to warm up. I made a few calls from 7030 as I could hear stations working TX5K in and around there. Then I heard the NA standby listening for AS message and figured it was going to be a long night, but after half a dozen TX5K AS UP 3, ... UP 2 with no exchange, he came back with TX5K UP and started working callers, after a dozen calls from 7030, I heard AB9M , made an exchange and was in the log by 7:35 PM.

The DXA thing is really great. If you have it running, you know when you callsign is entered by band and mode. No question if you are in the log. 160 thru 10 NON-WARC CW sweep is FB!

Subject: RE: [DX-IS] TX5K 40 CW

Now isn't that interesting. I listened to TX5K on 80M CW around 0400 working only EU today. They were S9 and I thought working very, very slowly. Knowing I had no chance I went to bed and got up at 0930 to try again. NUTTIN' on 80M CW (saw a spot for 80M SSB) but I don't like SSB pileups. So I went to 40 on the off chance I'd find them there. And I did. Two calls and no luck, moved up 1.5 kHz and I was back in bed 5 minutes later after checking the on-line log.

Now, I didn't need 40M CW but since I'd gotten out of bed I needed something to make getting out of bed at zero-dark-30 worth the effort. Despite my bitchin' and complainin' (nonetheless justified, I believe) I now have 'em on 10, 12, 17, 30 & 40 CW. I've already got FO/C on 20 & 15 so no sense causing QRM there. I'll try 80M CW again tomorrow and Saturday and hopefully have them in the log before their departure. If not, well, next time! My SSB QSOs are from previous operations.

Yes, I certainly imagine the pileups are absolutely fierce (what I can hear) and totally and disgracefully unruly. So I'm particularly happy that my less than a superstation with just 100W has managed to get through.

Hope you do get them logged on 6M, Tom.

Subject: [DX-IS] TX5K 40 CW

I have tried in the evening and morning for hours for 5 days and still can't get them on 40 CW. This morning, at 1230 UTC. I got them on 40 SSB on the first call. I went to 30 RTTY and got them on the first call. I would imagine from my experience in V31-land that they must have wall to wall stations calling on 40 meter CW. They probably call EU only to take a break.

I've had plenty of time to work them because I'm recovering from a Total Knee Replacement. I'm sleeping in the shack.

Now, to see if I can hear them on 6 meters.

Good luck to all.

I will agree the DXA thing is pretty neat. Nice to see your call some up pretty quickly. I worked them this evening on 15m CW, didn't see my call come up after 5 minutes or so, so I worked them again. Did finally appear after the second time. Really didn't need them there, though. The DXA site should also keep pirates down as you can see exactly where they are operating.

Hi Lance,

Have you been able to get a SP 40 contact from TX5K? It seemed like the primary focus was EU and AS on CW and I made it known via one of the Pilots, that they should be listening for VK-ZL on 40 before they lost propagation at their Sunrise.

20795. RE: [DX-IS] TX5K

Yahoo group: DX-IS (2013)
Date: 2013-03-08 03:39:08 UTC
From: Lance Martin
Topic: 20711 Message: 20795

Hi Gary,

That is very kind of you, thank you. I did have a go at them last night on 40CW but I wasn't serious as I cleaned up on the last TX5C mob on the low bands just a few years ago. TX5K wasn't strong last night on 40 CW and I couldn't really hear them at all on SSB so perhaps they were directional to NA.

Will be gunning for them on 12/10m this weekend, 0200 – 0800z is my best bet, not sure how that fits with them.

73, Lance – VK6DU

Hi Lance,

Have you been able to get a SP 40 contact from TX5K? It seemed like the primary focus was EU and AS on CW and I made it known via one of the Pilots, that they should be listening for VK-ZL on 40 before they lost propagation at their Sunrise.

73 ES DX,

Hi Al,
FB on your TX5K QSOs.
I managed to get them on a few bands and was a bit lucky to get them on 20m RTTY LP this morning. Long path to them always surprises me as I think of them as pacific rather than US but you are very close of course. By the time I got to the DXA thing (not thinking I would get through) my call had passed to the back bench, I did see it in the list so it is working.
Did get XT2TT on 10m! CW for a new one on that band, very, very, light copy but that was the same for S01R the other year.
Will be gunning for TX5T on 12/10m this weekend, the band hasn't opened that way yet (I don't think, though I do have to work in the week).
Nigel ZF2XF was pounding in this morning on 20m CW LP, hope to get him on 17 and above while he is there for new ones.
Kosovo, yes, I have a few Qs into there, just waiting….

DXA thinks KH2D is still on Guam

On 03/06/13, GARY HUBER wrote:

Al, I understand your frustration. I?d like a 40m CW contact but have not been able to find a time over the past couple nights (I listened from 0200 to
0545 UTC Tuesday) when TX5K was QRV for NA. It seems to me if the EU demand is that great for 40 CW and that is all they will work while there is propagation to EU, maybe the 08-09 to 1300 UTC slot could open to DXers NOT in EU. I?d bet there would be DXers from VE1 to ZL who having common darkness with TX5K would be calling. Last weekend during the ARRL DX test I worked VK, ZL, and JA on 40M in a three minute period just before 1200 UTC, so I know there is 40M propagation, but not to EU at that time.

I do have 160, 80, 20, 15, and 10 Meter CW contacts confirmed on http://www.dxa2.org/ so I know I can work them; I?d just like to have a chance at 40 CW!

Subject: [DX-IS] TX5K EU

OK, I've been very lucky to have worked
TX5K on 12, 17 & 30M and added them for a new mode on 10M. But, after
all, it is just southwest of W6. However, the bands are open in that
direction, from here, only during certain hours of the day.

Am I the only one who has become very, very
frustrated with the hours a day spent on EU?

I've been listening to TX5Ks operator on 15
CW for a few hours. He actually came back to me but when he realized I was

a VE1 (on a direct path to EU for him, he went on to a European and totally ignored me. This happened a few days ago on another band. A quick report would have made me happy but that didn't happen.

The last two early mornings here (0400-0500) TX5K was S9 on 80M working EU only!!! Not a single NA worked in an hour.

Enough already!!!!!

Well, it was initially issued in Guam around 1985, but it belongs to Jim Kehler who started this list in 1998. He moved from Guam to Florida in 2001. I don't want to start up the never ending FCC bashing thread and the "calls should be like they used to be in 1969" argument again. KH2D is a legal call that was renewed in 2012, and the FCC and I know it is in the state of Florida.

I'm sure the DXA application doesn't research all of this, and that's why it may show as Guam on that web page. The grid specified by Jim on QRZ.COM (EM90gp) looks like Florida to me. DX Labs (the logging suite I use) looks up the grid if one is present and tells you where it is, but something like DXA is going to have to rely on the call structure to determine the location of the station.

If they get all the bugs worked out of DXA (as they seem to have by now), then for Heard Island next year this will be a blessing. It's amazing to work them and see your call pop up a minute or two later. When I started, you found out 6 months later when your cards came back. If a band was NIL, it was a little late to re-work them then! :-)

By the way, how many current members were here from day 1 when KH2D formed this list? I was. Anyone else? It was a successor of the one VE7TCP ran back in 1996-1998.

Since you bring up DXA, Heard Island, and this list, it should be noted for the newcomers that in 1995 VK0IR came on the air led by the same Bob Schmeider, KK6EK. He sent logs daily via ham satellite to our pilot in Belgium who then forwarded them to me via packet clusters. I then posted them to the website for lookup. This was the first time online logs were available (it took 24-36 hours). Looking back, it was the beginning of the use of pilots, websites, log lookups etc. And VE7TCP was one of the technical advisors to us on transferring the data securely over packet cluster messages.

Seeing your QSO after 36 hours was considered amazing. Now we want it in 36 seconds.

And one of the outgrowths of VK0IR was the creation of this list.

We've come full circle.

Hi Lance,

This morning (3-8-13) at my SR (12:20) the TX5K 40 CW pile was mostly NA (US) with several VK callers. But I was hearing TX5K EU UP. Maybe it was a mistake as there is NO way theres prop to EU from Clipperton at 1200 UTC...

I did get thru on 40 CW last night. Lots of callers. Stayed on the high edge as that seemed to be where the TX5K op was working. I did not hear any 599 or TU on the low end.

Hi Paul...

to be honest I don't remember KH2D running the list, but I was a member of VE7TCP's list back in the 90's. I thought it was kinda neat that a VE should be hosting a DX list; but come to think of it, now it's a VE1, which makes me feel a bit prouder. Of course, one must also remember Don, N1DG[?] for his work as co-owner.

Don's email reminded me of how I got involved in this. Being in the IT field, I was naturally drawn to the marriage of computers and Ham radio. Around this time I was helping then VE1CBK (now VE1NR) keep our DX Packet Cluster going and it was occasionally linked to the one in your area that VE1XT ran (although our packet nodes were down more than they were up.)

Sometime around then VE7TCP showed up with a DX discussion list (thanks Don for filling in the gap that you and he were involved with the log transfer from Heard . . . I didn't know that.) VE7TCP was good, but a few years ago I tried to find him and the call didn't exist. I think I once found a reference to him in VE6 with a different call, but he seems to have disappeared.

This isn't *exactly* the same list as was started in 1998. Because of Yahoo's refusal to reset the owner password after the owner at the time (after KH2D gave it up) died, the only "control" was N1DG's moderator status. We decided to create a new, parallel list with a slightly different name, and mass migrate everyone from the hobbled list to this one. Don and I are co-owners here on the theory that when one of us dies, the surviving member will still be an owner and can appoint another co-owner. This is to prevent a repeat of a list with no owner, just a moderator. Moderators can do a lot, but there are some functions

only an owner can do.

Anyhow, thanks for the compliment. It isn't a hard job . . . but
at times it can be frustrating knowing what to do. We want discussion,
and one never knows when to say "tone it down, guys!" :-)

73, Paul VE1DX

20802. RE: [DX-IS] TX5K

Yahoo group: DX-IS (2013)
Date: 2013-03-08 13:57:44 UTC
From: VE1AL
Topic: 20711 Message: 20802

Gary & Lance,

I got up at Zero dark 30 again today and found nothing on 80M. So I looked on 40 and found TX5K about S7. But I'd already had a 40M QSO and after several minutes of listening to him work mostly JAs and a few NA, I planned to go back to bed. A little voice told me to check 80 again and lo and behold there was TX5K peaking S8.

I called twice and he went back to some left coasters, VE3IC, VA3... and then VE1AL. I was blown away -- 100W and an 80M inverted vee at this end.

While I have somewhat negative feelings about this whole DXpedition, I'm a happy camper in the end with 80, 40, 30, 17, 12 & 10M CW in the log (and theirs also!). Didn't bother with SSB or 15 & 20 because I have 3 bands confirmed on phone.

When I had gone to bed at 0430 TX5K was working one station in EU every 70-90 seconds and pointedly told one US station he wouldn't work him because he wasn't EU. At that time the signal was peaking S9 +5. The only time I called was when he forgot to say "UP EU". That admonition had been sent to me twice. I'm "sure" working so slowly was incredibly productive.

Eurocentric? But they have broken 100K so what little they did right seems to have worked.

Other than meeting their QSO goal perhaps their only other success was adding to the rat population for 12 days. :-) Oh yes, and that logging program. Was supposed to cut down on dupes and perhaps it did. But on three occasions I heard them tell Europeans they were dupes rather than give them a quick report and get rid of them. SAD.

Hi Al,

FB on your TX5K QSOs.

I managed to get them on a few bands and was a bit lucky to get them on 20m RTTY LP this morning. Long path to them always surprises me as I think of

them as pacific rather than US but you are very close of course. By the time I got to the DXA thing (not thinking I would get through) my call had passed to the back bench, I did see it in the list so it is working.

Did get XT2TT on 10m! CW for a new one on that band, very, very, light copy but that was the same for S01R the other year.

Will be gunning for TX5T on 12/10m this weekend, the band hasn't opened that way yet (I don't think, though I do have to work in the week).

Nigel ZF2XF was pounding in this morning on 20m CW LP, hope to get him on 17 and above while he is there for new ones.

Kosovo, yes, I have a few Qs into there, just waiting..

Congrats on the 80m QSO AL! Glad you finally got them there. One of the biggest thrills I have had in ham radio was hearing my call being sent back by 5A7A on 80m while I was running 100 watts and a low dipole. Such a setup isn't supposed to work zone 34 on 80!

From: VE1AL
Topic: 20711 Message: 20805

Well, John, revel in that memory. I have several similar stories about having the luck of the Irish (I'm ¼ Irish) that are best told over a couple of beers with pretzels and/or wings! ☺

As I write this TX5K is on 12M CW working, you guessed it, Europe. The signal is peaking S9. Arghhhhhhhhhh.

Congrats on the 80m QSO AL! Glad you finally got them there. One of the biggest thrills I have had in ham radio was hearing my call being sent back by 5A7A on 80m while I was running 100 watts and a low dipole. Such a setup isn't supposed to work zone 34 on 80!

Subject: RE: [DX-IS] TX5K

Gary & Lance,

I got up at Zero dark 30 again today and found nothing on 80M. So I looked on 40 and found TX5K about S7. But I'd already had a 40M QSO and after several minutes of listening to him work mostly JAs and a few NA, I planned to go back to bed. A little voice told me to check 80 again and lo and behold there was TX5K peaking S8.

I called twice and he went back to some left coasters, VE3IC, VA3... and then VE1AL. I was blown away -- 100W and an 80M inverted vee at this end.

While I have somewhat negative feelings about this whole DXpedition, I'm a happy camper in the end with 80, 40, 30, 17, 12 & 10M CW in the log (and theirs also!). Didn't bother with SSB or 15 & 20 because I have 3 bands confirmed on phone.

When I had gone to bed at 0430 TX5K was working one station in EU every 70-90 seconds and pointedly told one US station he wouldn't work him because he wasn't EU. At that time the signal was peaking S9 +5. The only time I called was when he forgot to say "UP EU". That admonition had been sent to me twice. I'm "sure" working so slowly was incredibly productive.

Eurocentric? But they have broken 100K so what little they did right seems to have worked.

Other than meeting their QSO goal perhaps their only other success was adding to the rat population for 12 days. :-) Oh yes, and that logging program. Was supposed to cut down on dupes and perhaps it did. But on three occasions I heard them tell Europeans they were dupes rather than give them a quick report and get rid of them. SAD.

Hi Lance,

This morning (3-8-13) at my SR (12:20) the TX5K 40 CW pile was mostly NA (US) with several VK callers. But I was hearing TX5K EU UP. Maybe it was a mistake as there is NO way theres prop to EU from Clipperton at 1200 UTC...

I did get thru on 40 CW last night. Lots of callers. Stayed on the high edge as that seemed to be where the TX5K op was working. I did not hear any 599 or TU on the low end.

Hi Gary,

That is very kind of you, thank you. I did have a go at them last night on 40CW but I wasn't serious as I cleaned up on the last TX5C mob on the low bands just a few years ago.

TX5K wasn't strong last night on 40 CW and I couldn't really hear them at all on SSB so perhaps they were directional to NA.

Will be gunning for them on 12/10m this weekend, 0200 – 0800z is my best bet, not sure how that fits with them.

Hi Lance,

Have you been able to get a SP 40 contact from TX5K? It seemed like the primary focus was EU and AS on CW and I made it known via one of the Pilots, that they should be listening for VK-ZL on 40 before they lost propagation at their Sunrise.

Subject: RE: [DX-IS] TX5K

Hi Al,

FB on your TX5K QSOs.

I managed to get them on a few bands and was a bit lucky to get them on 20m RTTY LP this morning. Long path to them always surprises me as I think of them as pacific rather than US but you are very close of course. By the time I got to the DXA thing (not thinking I would get through) my call had passed to the back bench, I did see it in the list so it is working.

Did get XT2TT on 10m! CW for a new one on that band, very, very, light copy but that was the same for S01R the other year.

Will be gunning for TX5T on 12/10m this weekend, the band hasn’t opened that way yet (I don’t think, though I do have to work in the week).

Nigel ZF2XF was pounding in this morning on 20m CW LP, hope to get him on 17 and above while he is there for new ones.

Kosovo, yes, I have a few Qs into there, just waiting….

You did, indeed, Iain. I have since genuflected and kneeled to the east.
I'd been calling for just over an hour. Also heard them around 0400 today
on 80 but was too tired to stay in the pack for more than 30 min. Tonight
I'll be there and hope I can hear them again. Now on to 17 & 30. Just
maybe.....

20807. Re: [DX-IS] TX5K EU

Yahoo group: DX-IS (2013)
Date: 2013-03-08 14:36:48 UTC
From: Zack Widup
Topic: 20773 Message: 20807

I was on the old list when VE7TCP ran it and I was on the list when KH2D had it, pretty much from the start.

I haven't heard from Jim in years but I used to chat with him via e-mail. He sent me a beta version of some software he developed called "Clusterbuster" (I think) which was something relatively new then. It interfaced with your radio and if you clicked on a spot, it would take the radio to that frequency.

I worked TK5K on 30 last night. They were working mostly EU but they were not sending "EU." So I was in there calling. Every once in a while they'd answer a couple US stations. After about a half an hour they heard me.

I probably worked the last Clipperton operation on 30 but I know I didn't work that one on 80. So I'm particularly happy that I got this one on 80m with my barefoot rig and non-optimum antenna.

From: VE1AL
Topic: 20773 Message: 20808

I must have been on the VE7TCP system (although I didn't remember his call) because VE1XT's biggest customer was me. I remember the fights he had with the local repeater group who constantly complained that the packet bursts were interfering with their "right" to a clear repeater. And of course I concur that the packet cluster between Sydney and Halifax (I don't recall the number of hops) was always down more than it was up!

I'll always remember how excited Jack would get when he could connect all the way to Boston or New York on a dozen or more repeaters. AHHHHHHHHH.....!

Don's email reminded me of how I got involved in this. Being in the IT field, I was naturally drawn to the marriage of computers and Ham radio. Around this time I was helping then VE1CBK (now VE1NR) keep our DX Packet Cluster going and it was occasionally linked to the one in your area that VE1XT ran (although our packet nodes were down more than they were up.)

Sometime around then VE7TCP showed up with a DX discussion list (thanks Don for filling in the gap that you and he were involved with the log transfer from Heard . . . I didn't know that.) VE7TCP was good, but a few years ago I tried to find him and the call didn't exist. I think I once found a reference to him in VE6 with a different call, but he seems to have disappeared.

This isn't *exactly* the same list as was started in 1998. Because of Yahoo's refusal to reset the owner password after the owner at the time (after KH2D gave it up) died, the only "control" was N1DG's moderator status. We decided to create a new, parallel list with a slightly different name, and mass migrate everyone from the hobbled list to this one. Don and I are co-owners here on the theory that when one of us dies, the surviving member will still be an owner and can appoint another co-owner. This is to prevent a repeat of a list with no owner, just a moderator. Moderators can do a lot, but there are some functions only an owner can do.

Anyhow, thanks for the compliment. It isn't a hard job . . . but at times it can be frustrating knowing what to do. We want discussion, and one never knows when to say "tone it down, guys!" :-)

I have been a member of this list and its predecessors since the mid 90's shortly after I retired.

I remember fondly the many "DX-IS" essays written by VE1DX in the style of an earlier set of essays in the old West Coast DX Bulletin by Hugh Cassidy, WA6AUD. I miss them.

SB PROP @ ARL $ARLP010
ARLP010 Propagation de K7RA

ZCZC AP10
QST de W1AW
Propagation Forecast Bulletin 10 ARLP010
>From Tad Cook, K7RA
Seattle, WA March 8, 2013
To all radio amateurs

SB PROP ARL ARLP010
ARLP010 Propagation de K7RA

The averages of daily sunspot numbers and solar flux over the reporting week (February 28 through March 6) both rose, with sunspot numbers up nearly 36 points to 93.3 and solar flux up nearly 12 points to 112.6, in comparison to the previous seven days. The most active geomagnetic day was Friday, March 1, when the planetary A index was 27 and the mid-latitude A index was 23. Alaska's high latitude college A index was a whopping 64. The upset was sparked by a stream of high speed solar wind.

The latest forecast from NOAA/USAF puts average solar flux for the next five days (March 9-13) at 118.2, higher than average solar flux for the reporting week, which was 112.6.

Predicted solar flux is 112 and 118 on March 8-9, 120 on March 10-11, 118 on March 12, 115 on March 13-14, 105 on March 15, 95 on March 16-17, 100 on March 18-20, 105 on March 21-24, 110 on March 25 through April 1, and 105 on April 2-5.

The predicted planetary A index is 8 on March 8, 5 on March 9, 8 on March 10-12, 5 on March 13-20, 8 on March 21, 5 on March 22-27, then 18, 10, 5 and 10 on March 28-31 and 8 on April 1-4.

F.K. Janda, OK1HH predicts quiet geomagnetic conditions on March 8-9, mostly quiet March 10-11, quiet to unsettled March 12, quiet to active March 13, quiet on March 14, quiet to unsettled March 15-17, quiet on March 18, mostly quiet March 19-20, active to disturbed March 21-22, quiet March 23-24, mostly quiet March 25, quiet March 26-27, quiet to active March 28-30, and quiet to unsettled March 31.

Have we mentioned recently that for HF propagation, we generally want higher sunspot numbers but low geomagnetic indices at the same time?

At http://solarscience.msfc.nasa.gov/predict.shtml you can see the latest NASA solar cycle prediction. They revised the forecast downward again. Last month they said that the cycle should peak this Fall with a smoothed sunspot number of 69. That was revised down by three points, and now they say it will peak at 66. These are International Sunspot Numbers, which have a lower scale than the Boulder numbers we use in this bulletin, which run about 35% higher.

Many readers wrote in concerning the news about a possible double-peak for the current solar cycle. There seemed to be a peak in activity around the end of 2011, then activity fell off last year. If true that the cycle peaks this Spring or Fall, we don't seem to be trending toward that activity yet.

Check http://www.youtube.com/watch?v=6j4bl57D_1U for a video from NASA explaining this. Note you can watch the video in HD and full screen by selecting options at the bottom.

Thanks to John Campbell, K4NFE, Elwood Downey, WB0OEW, Gary Johnson, K5SWW, and David Dary, W5ZAX, for the tips on the story.

If you go to http://www.swpc.noaa.gov/weekly/pdf/prf1957.pdf for the latest Preliminary Report and Forecast and turn to page 15, you can check the numbers for the latest prediction from Boulder. It shows a peak in September and October 2013, with levels about 27% higher than solar activity last month, February 2013.

See also that the peak in activity at the end of 2011 is represented by the higher numbers (smoothed, so the peak is not pronounced), then gradually declining. The averaging function seems to have moved that peak out to February and March of 2012. But the predicted peak this year is quite a bit higher than the previous peak. Let's hope that the second peak is indeed much more robust, as predicted.

At http://www.swpc.noaa.gov/weekly/pdf/prf1953.pdf the forecast from last month shows higher values for the end of 2012 and the first few months of 2013. These reflect estimated future sunspot numbers, which would drag the average down. The numbers for each month are an average for a year's worth of data, six months forward, and six months back. The estimate for March 2013 went from 77 last month to 73 this month. The latest figure represents one more month of real recorded data than last month's prediction.

Note also on the next page that the solar flux prediction shows the peak for that parameter in August 2013.

Julio Medina, NP3CW of San Juan, Puerto Rico wrote, "Just to let you know that today 01 March 2013 from 1826-1837z I worked VU3WIJ and VU3WII on 20 meter SSB with 5x9 reports both way. I was using a vertical antenna at ten feet above the ground and 100 watts. Both stations had pile ups and they copied my signal very easily."

I replied, "On that day I would expect the band to just begin to open at that time, but signals should reach a peak from 2100-2300z."

Steve Hawkins, NG0G wrote: "On March 5 at 2213Z I had just worked TX5K (Clipperton Island) on 24 MHz CW. I live in Boone Iowa and it was getting on toward late afternoon." (See http://www.tx5k.org/ for the Clipperton DXpedition.)

"After working TX5K I stumbled across XT2TT (Burkina Faso) on the same band. Since by then it had been dark in Africa for hours I was very skeptical and thinking pirate. But I adopted the standard 'Work now, worry later' mode.

"I'll admit it took tweaking everything built into my FT-1000 MKV Field, and listening so hard there may have been arcing inside my skull, but I could hear them. I called and worked them about the 3rd call. At first I thought 'noooooo, this must be a pirate,' as with my wimpy vertical, and the solar flux as low as it is, 24 MHz should not be open to Africa from Iowa at 2213Z. I was astounded when not only did they answer me, but I quickly showed up in their online log.

"I could almost hear http://www.youtube.com/watch?v=NzlG28B-R8Y (cue the Twilight Zone theme music.)

"Despite feeling like the guest on a certain late night talk show, I quickly launched into my best post-back surgery version of the 'Happy Dance.'

Talking later with a friend, K0KT, he reminded me that near to the equator, the MUF can be surprisingly high up to midnight."

Actually when running the numbers on W6ELprop, propagation over that path at that time on that band is not unusual. I entered 42.07 degrees North, 93.88 degrees West for Steve's location, and found the XT2TT DXpedition QTH at, http://www.i2ysb.com/idt/index.php?option=com_content&view=featured&Itemid=101.

That page shows a grid square location of IK92fi, so I entered this into the AMSAT grid square conversion tool at http://www.amsat.org/cgi-bin/gridconv.

This yielded 12.3542 degrees North, 1.54167 degrees West for XT2TT. This turns out to be only 25 miles north of the default Burkina Faso coordinates in W6ELprop.

Based on these coordinates, the station is in the southwest portion of Ouagadougou, Burkina Faso's capitol city. I checked this at 4:17 AM Seattle time today, which is 12:17 PM in Burkina Faso and also 1217z. The temperature was 102 degrees F with humidity of only 11% in Ouagadougou. The annual rainfall there is only 35 inches, and the high temperatures between March and May reach 113 degrees F.

The path length is 5,767 miles (9,281 km), and on March 5 W6ELprop shows an opening beginning with a B rating (available 50-75% of the time) and signal-to-noise ratio of 40 dB at 1330z, changing to an A rating (opening 75-100% of the time) by 1430z. By 1830z the s/n ratio is 43 dB and it gradually increases to a peak of 48 dB at 2300z. Signals stay at that level, but availability degrades to a B rating at 2330-0000z, C rating (25-50% availability) at 0030z and D rating (1-25%) at 0100-0130z.

Sunset at XT2TT was 1812z on March 5, and at NG0G it was 0006z. So that path opens about 45 minutes after sunrise at NG0G (1248z), gets better after sunset at XT2TT, and finally begins fading around sunset at NG0G. A half hour after sunset in Iowa, that path is done.

For more info on using W6ELprop, see references at the bottom of this page, or check http://www.arrl.org/files/file/Technology/propagation/W6elprop.pdf. You can download W6ELprop at http://www.qsl.net/w6elprop/.

Ken Miller, K6CTW of Rancho Cucamonga, California wrote, "I was up late last night working on the computer and saw that the Clipperton DXpedition was operating on 80 meter CW near the bottom end of the band. Just to satisfy my curiosity I turned on the 1960s station I've restored (Heathkit DX-60 with homebrew DDS-VFO and Drake 2-B receiver with 2-BQ Q-Multiplier feeding an inverted-vee dipole antenna) to see what I could hear. (Ken runs the old Novice power limit on this rig, just as he did on the same setup in 1967, 75 watts, or about 40-45 watts out.) Their signal here in Southern California was 20 over S-9 or better so I loaded up the DX-60 and gave a call after figuring out where the operator was listening (he was running JAs). Imagine my amazement when he came back to my call! I am always impressed that the operators at these DXpeditions can sort out a weak signal like mine out of the unbelievable racket. Thanks to them and also, what a surprise to see how good communications can be on the low bands late at night."

Ken wrote in a subsequent email: "I've restored this first DX-60 (and a Drake 2-B and 2-BQ Q-Multiplier) to get my feet wet. I am now in the process of rebuilding another DX-60 kit with all new parts. I re-plated the chassis and all the metal, and I've added an OA2 voltage regulator tube to the power segment of the 6CL6 oscillator section. That will prevent chirp on 10 meters.

"The VFO is a home brew DDS unit using the now 'retired' FCC-1 and FCC-2 from The NorCal QRP Club. For details, check the April or May issue of Electric Radio as Ray is publishing an article I wrote about my experience.

"I'm also home-brewing another improved version VFO using Jim, WA1FFL's DDS unit. This one is a significant upgrade to the unit described in the article."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. 09 March 2013 A.R.I. DX Bulletin
No 1140
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

C5 - Pedro, ON7WP will be working on a human aid project in The Gambia and be active C5WP on 20-27 March. He will be QRV on 40-10 metres. QSL via home call, direct only. [TNX ON7WP]
CT9 - Peter, G3TKK reports he will be active holiday style as CT9/G3TKK from Madeira (AF-014) on 12-22 March. He operates CW and digital modes. QSL via home call.
FS & PJ- Andy, DK5ON will be active from either Saint Martin (FS/DK5ON) and Sint Maarten (PJ7/DK5ON) on 10-29 March. He plans to operate SSB, PSK and RTTY on 80-6 metres. QSL via home call. [TNX NG3K]
H4 - Dom, SQ9KWW and Maggie, H44MK will join Ralph, H44RK/H40RK on a 4-week IOTA tour around the Solomon Islands [425DXN 1135]. It will start the first week of June, with planned activities from IOTA groups OC-149, OC-168, OC-047, OC-127 and OC-285 (Stewart Islands, new one for IOTA). A special callsign is being applied for (reportedly H40IOTA, but all of the groups mentioned above count for Solomon Islands, H44, DXCC wise). They are looking to take on board one proficient CW operator for the OC-285 leg of the journey. Please contact Ralph at ralph.honiara[@]gmail.com, which is also the PayPal address for donations. After OC-285, Ralph will continue on a solo activation trip to three IOTA groups in Temotu Province (OC-065, OC-100 and OC-163) and two groups in Vanuatu (OC-110 and OC-104) as heading back to Brisbane (Australia). All QSL requests via NR6M. [TNX NR6M]
JD1_oga- Harry, JG7PSJ will be active again as JD1BMH from Chichijima (AS-031), Ogasawara from 22 April to 4 May. He will operate CW, SSB and RTTY on 40-10 metres, plus 80m if possible. QSL via JD1BMH (bureau) or JG7PSJ (direct). Logsearch and other information can be found at http://jd1bmh.zxq.net/ [TNX JG7PSJ]
KH9 - A DXpedition to Wake Island (OC-053) is being organized to take place in October. Access to Wake is extremely limited and the time frame is dictated by transportation issues. As such, official dates have not been set but will be announced as soon as possible. Twelve operators (Lou N2TU, Craig K9CT, Joe AA4NN, Joe W8GEX, Jerry WB9Z, Tom ND2T, Mike K9NW, John K6MM, Hal W8HC, Carl K9CS, Dick W3OA and Tom N4XP) plan to be QRV with five stations on all bands and modes over a 14 day period. This operation combines a

DXpedition and a commemoration of the 70th anniversary of a tragic event occurred on the atoll during World War II. Bookmark www.wake2013.org for further information and updates. [TNX W8GEX]
LU - Members of Radio Club Ushuaia (LU8XW) will operate as LT5X from Isla Redonda (SA-049) from around 00:00 UTC on 23 March until around 15 UTC on the 24th. They plan to run three stations on 80, 40, 20, 25 and 10 metres SSB, CW and PSK31. [TNX LU6XV]
LY - Jonas, LY5A will be active as LY23A from 11 March to 11 April to celebrate the 23rd anniversary of the restoration of Lithuanian independence QSL via LY5A. Information on the LY WPX Trophy can be found at http://qrz.com/db/LY5W [TNX LY5W]
MJ - Kazu, M0CFW will be active as MJ0CFW from Jersey (EU-013) on 15-17 March. He will participate in the Russian DX and BARTG HF RTTY contests. QSL via home call and LoTW. [TNX NG3K]
OE - The Amateur Radio Section of ORF (the Austrian Broadcasting Corporation) and the Documentary Archives Radio Communications/QSL Collection will operate special event station OE13M on 19-21 April. This is an official "International Marconi Day" station and contacts made on 20 April will count for the IMD Award. QSL via OE1WHC. [TNX OE1WHC]
PJ7 - Look for Randy PJ7/N0TG, Ron PJ7/AA4VK and Jeff PJ7/N1SNB to be active from St Maarten (NA-105) on 15-23 March, with a focus on the higher bands. QSL all callsigns via AA4VK (direct only). [TNX DX World]
T5 - Tevfik Aydin, TA1HZ will be in Mogadishu, Somalia on a humanitarian mission from 23 March to 4 April. He plans to operate on the HF bands in his spare time, hopefully as T5TC (callsign not assigned yet), with activity also during the CQ WW WPX SSB Contest. QSL via home call. [TNX TA1HZ]
V3 - Ron, WB1EAZ and Elaine, KA1UCC will be active as V31RT and V31BE from Belize on 13-20 March. They will operate SSB with a focus on Europe, Oceania and Asia. QSLs direct to WB1EAZ.
VK - Graham VK3DOG, Keith VK3FT and Tony VK3TZ will be active as homecall/p from Phillip Island (OC-136) on 15-18 March. They will be QRV on 160-10 metres, using rotatable dipoles on the high bands, full size verticals on 40m and 80m and a 22m-tall vertical array on 160m, with some parasitic elements, beverages and loops for receive. [TNX DX World]
ZL7 - Jim, ZL1LC will be active as ZL7LC from the Chatham Islands (OC-038) on 14-20 March. He will operate PSK31 only on 7035, 14070, 21070 and 28120 kHz. QSL via EB7DX (direct).
ZS8 - At the end of the day, two radio amateurs will be part of the overwintering team on Marion Island and will be active from May 2013 to April 2014: Carson, ZR6CWI (ZS8C) [425DXN 1136] and David, ZS1BCE (ZS8Z), who finally has been appointed as the radio technician. They are expected to operate SSB and digital modes on 40-10 metres. QSL for both via ZS1HF, who says that "more information will be posted on their respective qrz.com sites once they have been created". [TNX DX World]

INTERNATIONAL MARCONI DAY ---> Organized by the Cornish Radio Amateur Club, the International Marconi Day (IMD) is a 24-hour amateur radio event held annually to celebrate the birth of Guglielmo Marconi (25 April 1874). It is not a contest, but an opportunity for amateurs around the world to make contacts with historic Marconi sites using HF communications techniques. This year's event will be held on 20 April, from 00.00 UTC through 23.59 UTC. Details, including information on the relevant Award Certificates and the listing of participating stations, can be found at www.gb4imd.org.uk

T4#RRC ---> All of the recent activities (T48RRC from NA-218, T47RRC from NA-086, T46RRC & T46T from NA-204) have been approved for IOTA and DXCC credit. The OQRS for either direct and bureau cards has been activated (http://cuba2013.ru/oqrs)

20815. Rob Chipperfield M0VFC has won the 2012 Single-Operator Cass Award

Yahoo group: DX-IS (2013)
Date: 2013-03-09 02:11:14 UTC
From: Dave AA6YQ
Topic: 20815 Message: 20815

The Cass Award is an incentive to encourage DXpedition operating excellence.

From the remote South Atlantic island of Tristan Da Cunha as ZD9UW in October 2012, Rob worked 3362 unique stations over his 4-day
DXPedition, demonstrating an outstanding effort to log as many individuals as possible. A picture of Rob (on the left) receiving his
plaque and prize from Michael G7VJR in Cambridge, England on March 7, 2013 can be seen in

<http://www.cassaward.com/M0VFC_G7VJR.jpg>

Presented annually, the Cass Award encourages DXPeditions to maximize the number of DXers worked with a $1000 prize for the
Single-Operator DXpedition that works the most unique callsigns. This award honors the wisdom and spirit of Cass WA6AUD (SK), whose
stories in the West Coast DX Bulletin taught a generation of DXers that DX IS!

Congratulations to Rob ZD9UW on his achievement in winning this year’s award. If you’re interested in competing for or contributing
to the 2013 Cass Award, visit http://www.cassaward.com .

73,

the Cass Award Team (Michael G7VJR, Paul VE1DX, Dave AA6YQ)

20817. RE: [Dx-qsl] TX5K

Yahoo group: DX-IS (2013)
Date: 2013-03-10 00:11:21 UTC
From: Ron Notarius W3WN
Topic: 20817 Message: 20817

Something's not right there, Dave. From what I seen in DXA, you're off by a factor of 3 or more.

-----Original Message-----
From: dx-qsl-bounces@... [mailto:dx-qsl-bounces@...]
On Behalf Of Dave Novoa W4DN
Sent: Saturday, March 09, 2013 11:19 AM
To: dxpeditions@...; dx-is@yahoogroups.com; QSL List
Subject: [Dx-qsl] TX5K

DXA shows over 348,000 QSOs by the TX5K team. In that correct? If so, it's an all-time record that will be very difficult to beat.
--Dave, W4DN

SIDC URSIGRAM 30310
SIDC SOLAR BULLETIN 10 Mar 2013, 1213UT
SIDC FORECAST (valid from 1230UT, 10 Mar 2013 until 12 Mar 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 10 Mar 2013 10CM FLUX: 116 / AP: 006
PREDICTIONS FOR 11 Mar 2013 10CM FLUX: 118 / AP: 007
PREDICTIONS FOR 12 Mar 2013 10CM FLUX: 120 / AP: 007
COMMENT: Solar activity has been very low, no C-class flares in past
48h. NOAA AR 1692 is rotating over the east limb now and may increase
activity level in the coming days. Geomagnetic conditions are very
quiet, with a solar wind speed of 315 km/s and an interplanetary
magnetic field around 2 nT, no disturbances are foreseen.

TODAY'S ESTIMATED ISN : 075, BASED ON 03 STATIONS.

Ohio/Penn DX Bulletin No. 1103

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1103
BID: $OPDX.1103
March 11, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, W1SRD, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, AA6YQ, KH6BZF, N6PSE, NR6M, W6NV, WB6RSE, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, CO8ZZ, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, EA3BHK, F5NQL, F6AJA & Les Nouvelles DX, HA0HW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, JG7PSJ, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, TA1HZ, UT5UGR, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF), YC9MLL, ZL1LC and ZS1HF/ZS8M for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 3rd-March, through Sunday, 10th-March there were 236 countries active. Countries available: 3A, 3B8, 3B9, 3C, 3D2, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FO/c, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2012 CASS AWARD WON. Rob Chipperfield, M0VFC, has won the 2012 Single-Operator Cass Award. The Cass Award is an incentive to encourage DX-pedition operating excellence. From the remote South Atlantic island of

Tristan Da Cunha as ZD9UW in October 2012, Rob worked 3362 unique stations over his 4-day DXPedition, demonstrating an outstanding effort to log as many individuals as possible. Michael, G7VJR, presented Rob with his plaque and prize in Cambridge, England on March 7, 2013.
<http://www.cassaward.com/M0VFC_G7VJR.jpg>
ABOUT THE CASS AWARD: Presented annually, the Cass Award encourages DXPeditions to maximize the number of DXers worked with a $1000 prize for the Single-Operator DXpedition that works the most unique callsigns. This award honors the wisdom and spirit of Cass WA6AUD (SK), whose stories in the West Coast DX Bulletin taught a generation of DXers that DX IS! Congratulations to Rob, ZD9UW, on his achievement in winning this year's award. If you're interested in competing for or contributing to the 2013 Cass Award, visit: http://www.cassaward.com
The Cass Award Team (Michael G7VJR, Paul VE1DX, Dave AA6YQ)

4X, ISRAEL. Dimitry, UT5UGR, will be active as 4X/UT5UGR from Israel between March, 15-18th. He will use the callsign 4X0W during his activity in the Russian DX Contest. QSL via UT5UGR.

5H, TANZANIA (IOTA Op). Bodo, DF8DX, will be active as 5H1DX between April 20-28th. Activity will include the activation of several IOTAs (Pemba Island [AF-063] was mentioned). Operations will be on the HF bands and EME. QSL via DF8DX. Look for more details to be forthcoming. Visit his Web page at: http://www.qslnet.de/member/dl3och/index_e.htm

7O6T DXPEDITION VIDEO. Paul, N6PSE, from the Intrepid-DX Group, reports: "The 7O6T Team is glad to announce that our DXpedition video is now available for free download. We have uploaded the video to two different sites where you may view it:
1) You can view the High Definition version of this 12 minute video from this link: https://vimeo.com/61384528
2) You can also view the Standard Definition version of this video embedded on our web page. Please go to <www.intrepid-dx.com> select DXpedition Video, then select 7O6T DXpedition Video at: http://www.intrepid-dx.com/ For SD version.

Thank you for supporting the 7O6T DXpedition to Socotra Yemen."

8Q, MALDIVES. Operators Pai/VU2PAI and Krish/W4VKU will be active as 8Q7KP from Bodufinolhu, South Male Atoll (AS-013), between April 23-30th. Their plans are for 2 stations to be on the air using an Elecraft K3/ Acom 1000 and TS480Sat/Tentec Hercules II, into two Butternut HF9V and a 2 element SteppIR for higher bands. Operators plan to setup an OQRS and also upload logs to LoTW, eQSL and QRZ.com.

9L, SIERRA LEONE. Stephen, G7BXU, is once again planning to be active as 9L1BXU from Freetown this year sometime in December and early January 2014. Activity last time was on 12 and 10 meters using a FT-897 and G5RV. QSL via his home callsign.

9M4, SPRATLY ISLAND (Reminder). Just a reminder that operators John/ 9M6XRO, Steve/9M6DXX, James/9V1YC, Don/G3BJ, Tony/KM0O, Ben/N6MU/DJ0YI,

Pista/HA5AO and George/HA5UK will be active as 9M4SLL from Layang Layang Island (AS-051) between March 10-18th (See OPDX.1095 and OPDX.1101). Look for 9M4SLL to be on the air with five stations simultaneously at peak times, on 160-10 meters using CW, SSB and RTTY. Suggested frequencies are (see Web page below for more details):
CW - 1811.5, 3523, 10110, 14035, 18087, 21035, 24907 and 28035 kHz
SSB - 3780/3803, 7058, 14210, 18165, 21295, 24985 and 28495 kHz
RTTY - 7033/7055, 10132, 14097, 18107, 21097, 24927 and 28097 kHz
QSL via M0URX. For more details and updates, see: http://m0urx.com/9m4sll

C5, THE GAMBIA. Pedro, ON7WP/ AA9HX will once again be active from Gambia, in the Kololi area and also from inland Buntu village, between March 20-27th. He mentions that he just received his permanent license for 2013, and will use the callsign C5WP. Pedro will use a FT-897 into multiple dipole antennas. QSL via ON7WP, only direct. Pedro has plans to be active again later in August. To see some pictures of his last activity, see: http://www.qrz.com/db/C5WP

C9, MOZAMBIQUE. Gert, ZS6AYU, will be active as C91GR from Bilene between May 7-11th. Callsign has been applied for but not yet issued. Activity will be on 40-10 meters using CW only. His equipment is a FT857D with HL-550 amp (400w) into a Cushcraft R7000 vertical. QSL vis his home callsign, direct or by the Bureau.

DAYLIGHT SAVING TIME (DST). Did you remember to change your clocks? Countries who observe Daylight Saving Time, which took place on Sunday, March 10th at 2:00 AM, were expected to move their "local clocks" forward 1 hour to 3:00:00 AM local time. Daylight Saving Time will end on Sunday, November 3rd at 2:00 AM. For the history and details about DST, as well as an interesting map of the world (showing the countries who observe DST), see: http://en.wikipedia.org/wiki/Daylight_saving_time
ADDED NOTE: Hopefully, all amateur radio operators know not to change their GMT/UTC/ZULU clocks. However, since most operators usually set their computers to local time, some may have to change their settings on "some" ham radio software (ex. logging, propagation, DXTelnet, etc..) programs.

E5, SOUTH COOK ISLANDS. Mauri, AG1LE, will be active as E51DXX on a holiday/ DXpedition from Rarotonga (OC-013) between April 1-13th. Activity will be on the HF bands. QSL via his home callsign.

EH5, SPAIN (Special Event). Members of Team Cartagena will activate special event station EH5SIP between March 17-31st. Operations will be on all bands using SSB and the Digital modes (PSK31, RTTY, SSTV, etc.). Activity is to commemorative the 125th anniversary of the launching of the submarine Isaac Peral. All QSLs will be sent via Bureau, so save your money if you are a member of the QSL Bureau. If not a member, send your QSL and a SAE along with 1 USD or 1 ☐. QSL via EA5HRD, by the Bureau or direct.

FS, ST. MARTIN. Ark, UA4CC, will be active as FS/UA4CC from Saint Martin (NA-105, WLOTA 0383) between March 13-24th. Activity will be only during

his spare time (holiday style) with operations on 160-10 meters using CW, SSB, and RTTY. His equipment is a K2 and KPA500. QSL via his home callsign. If possible, logs will be uploaded to ClubLog. An OQRS is possible after this trip.

H40 & H44, TEMOTU AND SOLOMON ISLANDS (Reminder). By the time you read this, Sigi, DL7DF, and his crew will be active on their 2013 DXpedition which is being called a "Two Entities DXpedition - Solomon 2013". Sigi states on his Web page that they have chosen two destinations. The first destination will be the Guadalcandal (OC-047), Solomon Islands (H44), where the team will sign H44G between March 8-25th. During the time between March 12-23rd, part of the group will be active as H40T from Nendo (OC-100), Temotu Island (H40). Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are as follows:
H44G Frequencies

CW - 1825.5, 3505, 7005, 10115, 14005, 18070, 21005, 24890 and 28005 kHz
SSB - 7100, 14140, 18130, 21240, 24940 and 28400 kHz
RTTY - 10144, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50103/CW

H40T Frequencies

CW - 1818, 3515, 7015, 10122, 14015, 18077, 21015, 24895 and 28015 kHz
SSB - 7150, 14165, 18140, 21265, 24965 and 28450 kHz
RTTY - 10140, 14093, 18105, 21090, 24925 and 28090 kHz
6m - 50103/CW

They will have several stations on the air. One station on each destination will be exclusively dedicated to RTTY, PSK31 and SSTV. Their station equipment on each destination consists of 4 transceivers (3 x K2, 1 x FT857D), 3 power amplifiers, a lowband vertical for 160/80m, a deltaloop for 40, a deltaloop for 30, a Spiderbeam for 20/17/15/12/10, a 5 element Yagi for 6m, some Beverage antennas as well as some laptop computers. Operators mentioned are:
H44G Crew - Manfred/DK1BT, Wolf/DL4WK, Reiner/DL7KL and Juergen/DL7UFN
H40T Crew - Georg/DK7LX, Sigi/DL7DF, Frank/DL7UFR, Jan/SP3CYY and Leszek/SP3DOI.
Pilot station is Bernd, DF3CB. QSL route is via DL7DF, direct or by the Bureau. For more details and updates, visit: http://www.dl7df.com/h4/index.php

H40, H44 & YJ, SOLOMON ISLANDS, TEMOTU PROVINCE AND VANUATU (Update). Ralph, 5W0W/H44RK, has announced more plans for his upcoming IOTA tour which will start during the first week of June. He has added two operators to join him: Dom/SQ9KWW and Maggie/H44MK (the only local YL Ham). The callsign H40IOTA has been applied for the operation. The plan is to activate the following IOTAs in order as follows (specific dates were not provided):
OC-149 - New Georgia Islands; counts as Solomon Islands.
OC-168 - Russell Islands; counts as Solomon Islands.
OC-047 - Solomon Islands

OC-127 - Rennell Island; counts as Solomon Islands.
OC-285 - Stewart Island [aka Sikaiana Atoll]; never has been activated before; counts as Solomon Islands.
After OC-285, Ralph will continue his trip to Brisbane, Australia, on board the sailboat "SV Hafskip" via through the Temotu Province with plans to activate the following IOTAs as H40RK:
OC-065 - Reef Islands; counts as Temotu Province.
OC-100 - Nendo Island; counts as Temotu Province.
OC-163 - Vanikolo and Utupua Islands; counts as Temotu Province.
After the Temotu Province Islands, Ralph will head to Vanuatu (YJ) and activate two IOTAs there: Torres Island (OC-110) and Banks Island (OC-104). A callsign has not been announced yet for his Vanuatu opertions. Ralph's QSL Manager Rex, NR6M, reports, that Ralph and his team, will be donating much needed supplies and solar lighting packs to each chief of the villages they operate from. The team is requesting donations for their DXpedition, and look forward to you being a part of this trip, whether it be small or large to help support those most in need. If you would like to help, please contact Ralph at <ralph.honiara@...> which is also his PayPal address. Also mentioned, they are still looking to take on board one proficient CW operator for the OC-285 leg of the journey. All QSL requests are via QSL Manager Rex Turvin, NR6M. For updates, it is suggested to watch: http://www.qrz.com/db/H40RK

HG42, HUNGARY (Special Event). Look for special event station HG52FC now active until May 31st. The activity is taking place during the 52nd FIRAC Congress event being held in Hungary. Operations will be on all HF bands using CW, SSB and the Digital modes. QSL via HA5BSW, by the HA Bureau, LoTW, EQSL and direct to the address on QRZ.com. The cards will be printed out after May 31st.

IOTA NEWS.............
EU-047. Sebastian, DL1AXX, will be active as homecall/p from Baltrum Island (DID/GIA N-06) between May 20-26th. Activity will be holiday style on the HF bands. QSL via home callsign, direct or by the Bureau. Visit his Web site at: http://www.mydarc.de/dl1axx

NA-174. The "DX-World.net" reports that David, VE3VID, is now active as VY0/VE3VID from the rare Igloolik Island (WW.Loc EP-99). He will be there for the next 3 weeks. Activity will be on SSB and RTTY. On QRZ.com, he also states that he will operate on PSK-31, and possibly more exotic digital modes like OLIVIA and HELL. QSL via his home callsign, direct or by the Bureau.

OC-042. Operators Jose/DU1BP, Torsten/DL2KGS and Rag/LA6FJA will be active as DZ1B from Luzon Island during the CQWW WPX SSB Contest (March 30-31st) as a Multi-2 entry. QSL via LoTW.
ADDED NOTE: The CQWW DX SSB Contest (October 26-27th) operation mentioned in last week's bulletin is now off.

OC-136. Operators Graham/VK3DOG, Keith/VK3FT and Tony/VK3TZ will be active as homecall/p from Phillip Island between March 15-18th. Activity will be active on all HF bands 160-10 meters using a single transmitter into simple rotatable dipoles on the high bands and full size verticals on 80/40m. On 160m, they will try to have a vertical array (22m tall) with some parasitic elements, beverages and loops for receiving. The trio will be looking especially for Europe on the top band at their sunrise and also Stateside on 75m SSB. They plan to be active approx-imately 20 hours a day, while resting during their off time by surfing, relaxing or sampling some beers or rum.

OC-151. Leo, YC9MLL, who has been live on Flores Island for 8 years, informs OPDX this past week [edited], "...I have also improved my antenna. I put up a 33 ft vertical on top of our roof not with 13 radials (hope to increase it soon from wires recovered from a burnt transformer, hi!). It has an SG-239 auto tuner with a homebrew bias-tee for remote power. I would like to inform you that I am still on OC-151 and I am glad to be of service to any ham who would like to have a QSO. They can always contact me at this e-mail address <yc9mll@...> for a schedule. Or most of the time I operate on Saturdays and Sundays. I can transmit on 160, 80, 40, 20 (up to 14.150 MHz only), 15, and 10 meters. I have an old power supply operating a 22A radio at 100W and the power supply barely can supply the radio's demand. That might explains the often times QSB. I put a car battery in parallel to remedy the situation. I hope I can homebrew the MFJ-4403 like power conditioner. I have most all the materials except for the 25Farad capacitors and the 15KE15A and CL101 parts. I hope to find them soon so that my signal will be more stable. Our island's power is from several big generators in the center of the town. Another thing that I learned from last December was about RFI. There was a Swedish station that was trying to contact me. I cannot simply hear him, and he was using a yagi and a 1KW. There were too many cell phone chargers and other RFI generating devices plugged-in that time on the house power outlets. Now, I homebrewed another MFJ-like RFI filter from my junk box. I cannot have torroids to accommodate the 20-ish turns, but I was able to put in about 8-10 turns and the radio is quieter now, ready for another IOTA chasers round. These are the improvements I had on my 100W set-up. I hope I can reach out to the other IOTA chasers more. I am not a contester or any award chaser... I just have the eQSL eDX on my sight but not really an avid (yet) fan for awards." Leo can operate on CW, SSB, PSK31, RTTY and SSTV. QSL via his home callsign (see QRZ.com).

OC-236. Operators YB8HZ and Ram/YB8BRI will be active as homecall/p from Balang Lompo Islands between March 28-31st. Activity will be on 40/20/17/15/12/10 meters using CW, SSB and RTTY. QSL via YB8BRI.

SA-049. Members of the Radio Club Ushuaia (LU8XW) will activate the special callsign LT5X from Isla Redonda, beginning at 0000z on Saturday, March 23rd, until 1500z on Sunday, March 24th. Activity will be on 80/40/20/15/10 meters using CW, SSB and PSK. QSL via LU8XW. Isla Redonda is a small island in the mouth of the Bahía Lapataia within the Department Ushuaia in Tierra del Fuego, Antarctica and South Atlantic Islands Province. It is surrounded by the waters of the Canal de Beagle and has an area of ??about 50 hectares. Its maximum length is 1022 meters and its maximum width is 840 meters. Its center is located at coordinates: 54 ° 51'49 .26 "S - 68 ° 28'54 .47" W. Grid Loc: FD55ue. On the island is installed a detachment of the Naval Prefecture Argentina that has been there more than 100 years.

JD1, OGASAWARA. Harry, JG7PSJ, will once again be active as JD1BMH from Chichijima Island (AS-031) between April 22nd and May 4th. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via the Bureau to JD1BMH or direct to JG7PSJ. Visit his Web page for more details at: http://sapphire.es.tohoku.ac.jp/jd1bmh

JD1, OGASAWARA. Makoto, JI5RPT, will once again be active as JD1BLY from Chichijima Island (AS-031), Ogasawara, between April 28th and May 4th. Activity will be on 40-6 meters, including the satellites, using CW, SSB and the Digital modes (NO 6m EME). QSL via his home callsign JI5RPT. His log search will be available on his Web site at:
http://www.ji5rpt.com/jd1
He will also use Twitter to inform his real-time activities at:
http://twitter.com/jd1bly

JW, SVALBARD. Ronny, LA3ZPA, is now active as JW3ZPA from the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026) until March 13th. Activity will be on the HF bands. QSL via LA3ZPA. Check out the live Web cameras to see JW5E antennas, shack and harbor at:
http://longyearbyen.livecam360.com/flash/main.php
http://portlongyear.livecam360.com/flash/main.php

KH9, WAKE ISLAND (Press Release). Joe, W8GEX, sent out the following press release on March 1st [edited]: "Press Release - Team Leader Lou, N2TU, and the Management Team of Joe/W8GEX, Craig/K9CT, and Joe/AA4NN are proud to announce they are planning a 'Commemorative DXpedition' to a rare DX entity. This DXpedition will be to Wake Atoll (KH9) [OC-053] in October 2013.
Joe and Craig were the co-leaders of the very successful DXpeditions to Swains Island NH8S in 2012, and Sint Maarten PJ7E in 2010. They were also team members of the Midway K4M DXpedition in 2009. AA4NN is a veteran of these as well as many other DXpeditions across the globe. Lou was also a member of the Swains NH8S team.
This operation is a 'Commemorative DXpedition' in that it combines a DXpedition and a commemoration of an event. 98 civilian contractors working for Morrison- Knutsen, lost their lives on the atoll in October 1943. The group has been named the 'Forgotten 98'. Our operation, observing the 70th anniversary of their deaths, will be dedicated to keeping their memory alive and honoring their sacrifice.
Wake Atoll ranks number 15 in 'ClubLog's Most Wanted Entities'. A highly experienced team of 12 operators is being formed. They plan to operate five stations over a 14 day period, 160 to 6 meters on all modes, using a callsign to be announced at a later date.
Team members include Lou/N2TU, Craig/K9CT, Joe/AA4NN, Joe/W8GEX, Jerry/ WB9Z, Tom/ND2T, Mike/K9NW, John/K6MM, Hal/W8HC, Carl/K9CS, Dick/W3OA and Tom/N4XP.
Wake Atoll's access is extremely limited and the time frame is dictated by transportation issues. As such, official dates have not been set, but will be announced as soon as possible. The team will gather in Honolulu and then travel to Wake. Official landing permission has been obtained.
Our website, <www.wake2013.org>, developed by team member John, K6MM, will provide updates as they become available. Later, the group will also have an OQRS link on the website for easy QSLing.
We want to thank Elecraft, who will be supplying K3s and KPA500s for our use. Steppir will be supplying an assortment of versatile antennas, and we appreciate their help. This 'Commemorative Dxpedition' would not happen without the outstanding support of these companies. Others will be added and shown on our website as planning progresses.
Thanks also to Joe, AA4NN, who will be the QSL manager."

MJ, JERSEY. Kazu, JK3GAD, will be active as MJ0CFW from Jersey (EA-013) between March 15-17th. Look for activity in the Russian DX Contest (RDXC) and the BARTG HF RTTY Contest. QSL via LoTW or M0CFW.

P4, ARUBA (Update). Helmut, DF7ZS, will once again be active from Aruba (SA-036) between March 26th and April 3rd, and signing P40Z. Main activity will include the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band entry. Some casual operations will take place before and after the contest on 17/12 meters. QSL via W3HNK. Watch his home page at: http://www.df7zs.de

PJ4, BONAIRE. Operators Steven/W1SRD and Dean/N6DE will be active as PJ4/homecall from the "Radio House" <http://www.pj4g.com> on Bonaire (SA-006, WLOTA LH-1279) between March 26th and April 1st. They plan to

be active in the CQWW WPX SSB Contest (March 30-31st) as a Multi-2 entry.
The contest callsign has not been issued yet. Operation before and after
the contest will be focused on RTTY. QSL via LoTW is preferred. Direct
to W1SRD with SASE/return postage for the contest callsign. QSL the QSOs
to their homecalls for contacts outside of the contest.

PIRATE ALERT. Xavier, EA3BHK, reports that a station signing FK8IK on
17m CW was active on March 9th, and was definitely a PIRATE station.
He contacted Mic, FK8IK, and he also states it was a PIRATE.

V73CW QSL INFO. Bruce, V73CW, reports, "Logs have been updated to LoTW.
If you prefer a QSL, please send DIRECT w/SASE to my home callsign AC4G."

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

T2, TUVALU (Update/Reminder). Operators Gavin/GM0GAV, Clive/GM3POI, Robert/GM3YTS and Tom/GM4FDM will be active as T2GM from the Vaiaku Lagi Hotel on the lagoon side of Fongafale islet, Funafuti Atoll (OC-015) between March 12-23rd. Activity will be 160-10 meters using CW, SSB and RTTY. Suggested frequencies are:
CW - *1826.5, 3506, 7009, 10104, 14019, 18076, 21019, 24896 and 28019 kHz
SSB - 3790, 7079/7179, 14145, 18139, 21269, 24949 and 28469 kHz
RTTY - 7040, 10145, 18099, 21079, 24919 and 28079 kHz
* Up 3 kHz/World and Down 3 kHz JA
They will have two stations with Elecraft K3 and 500w amps using vertical antennas placed either in or at the edge of the lagoon. If the InterNet is available, logs will be uploaded to ClubLog and LoTW. QSL Manager will be GM4FDM (QRZ.com), direct or by the Bureau. A OQRS will be available via ClubLog. A Web Blog page is also available at: http://t2gm.org

T48, CUBA. Members of the "Las Tunas Contest Crew", T48K, will be active during the CQWW WPX SSB Contest (March 30-31st) as a Multi-Single entry from the north coast of Las Tunas Province. Operators mentioned are Hugo/F5FYO who will be a guest operator, and the rest of the crew includes Alex/CO8KA, Alejandro/CM8AKY, Doug/CO8DM, Del/CO8DRG and Raúl/CO8ZZ. QSL for this operation will be via F5FYO.

T5, SOMALIA. Tevfik, TA1HZ, will be travelling to Mogadishu to be a part of a Turkish team on a humanitarian mission called Yeryuzu Doktorlari (Doctors Worldwide - see <https://yyd.org.tr>) between March 23rd and April 4th. As a doctor, his work is primary, but during his free time, Tevfik hopes to be active as T5TC (callsign to be assigned). Activity will be on all HF bands, depending on band conditions, using a Kenwood TS-480 and Windom antenna. Tevfik also plans to be in the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band/Low-Power entry. QSL via TA1HZ, only direct, by the Bureau or LoTW and eQSL. QSL cards will be printed late May. See QRZ.com for more info. PLEASE NOTE: Bureau QSLs and uploading the log to LoTW/Eqsl will be done after direct requests are fulfilled! Also, any donations for the hospital and food distrubition centers can be sent via: https://www.yyd.org.tr/bagis/index.php

TX5, CLIPPERTON ISLAND (Update). The TX5K team on Clipperton Island is now QRT, and they are packing things up to leave the island or probably have left the island already. Here is a quick summary of things from the TX5K Blog page that took place over the past weekend:
* Bob, KK6EK, reported on March 8th on the TX5K Blog page [edited], "According to the schedule we will pack on Sunday, March 10th and Monday, March 11th. If we are able to leave the island on Monday, we will keep the schedule given on the website."
* Early Friday, March 8th, the TX5K team hit the 100k QSOs mark around

1213z.
* Then late Friday, March 8th, the team started some teardown early. The TX5K team announced, "We have decided to dismantle site B (mostly CW) today and pack it for transport to the boat. Site A will remain operating for at least a day, perhaps longer. Exact shutdown time is not yet determined."
* However, the TX5K team did go QRT at 0000z, Sunday, March 10th. As this was being written on March 10th, TX5K QSOs totals are as follows: 113844 QSOs (60227/CW, 45030/SSB and 8587/Digi)
QSL via the OQRS by ClubLog (Highly Recommended). This is the preferred method to use for your QSL confirmation. After the DXpedition ends you can order either a direct or Bureau QSL card using the OQRS online QSL service provided by ClubLog. Using this convenient online method you can easily apply for their QSL card to be sent directly to your home or via the Bureau....without having to send your QSL card at all. Direct QSLs are via Bob Schenck N2OO and the SJDXA QSL team: QSL Manager for TX5K, PO Box 345, Tuckerton, NJ 08087-0345, USA. Also, remember to use the DXA Web site <http://www.dxa2.org/> which allows DXers to view the QSO log, and the status and activities of the DXpedition in near-real-time. The TX5K's Web page is at <http://tx5k.org>. For updates, use the BLOG at: http://www.ky6r.com

V3, BELIZE. Operators Ron/WB1EAZ and XYL Elaine/KA1UCC will be active as V31RT and V31BE, respectively, from Belize between March 13-20th. Activity will be SSB with a focus on Europe, Oceania and Asia. QSL via WB1EAZ.

V7, MARSHALL ISLANDS. Tatsuhiko "Ted", JF1CCH, will be active as V73TS from Majuro Island (OC-029) resort hotel between March 21-26th. Activity will be mainly CW and the HF bands, 40-10 meters, and using a Delta Loop antenna. Power on 12 and 10 meters will be 100w, and 15 meters and down 400w. QSL via his home callsign and eQSL.

VK9C, COCOS KEELING ISLANDS (Web Page Updated). The VK9CA Web page has been updated for the operation to Cocos Keeling Island (OC-003) which will take place between March 30th and April 13th (see OPDX.1102). The Web page can be viewed at: http://www.vk9cz.com
Operator Keith, GM4YXI, has added a 4.8MB Powerpoint presentation to the Web page (under Latest news) with propagation charts for different parts of the world to VK9CZ which can be viewed or downloaded.

VK9L, LORD HOWE ISLAND. Oliver, W6NV, informs OPDX that he will be at Lord Howe Island between April 10-14th, to see the sights and join Seppo, OH1VR for some casual operations. Oliver has obtained the VK9LT callsign for his Lord Howe Island operation which was approved for re-issue by the WIA effective April 1st, 2013. He mentions, "We have confirmed reservations, however, the equipment logistics and propagation will be the determining factors." Seppo will operate as VK9/OH1VR between April 11-16th. Direct QSLs for VK9LT (operations for 2013 only) are to be sent to W6NV. QSL VK9/OH1VR via OH1VR only direct. More later on bands and modes, when equipment logistics is firm. ADDED NOTE: Look for them

to possibly participate in the Japan International DX Contest and the Yuri Gagarin International DX Contest over the weekend of April 13-14th.

ZD8, ASCENSION ISLAND. Mick, G1EUZ, will be active as ZD8RAF from Ascension Island between March 18-22nd. He will be taking an IC-7000, and a Vertical Horizontal dipole. He hope to make many contacts, especially with some fellow RAFARS members. QSL via his home callsign.

ZL7, CHATHAM ISLANDS (Update/Reminder). Jim, ZL1LC, will be active this week as ZL7LC from Chatham Island (OC-038) between March 14-20th, as a micro DXpedition and running PSK31 only (see OPDX.1094 and OPDX.1101). He informed OPDX on Saturday: "We are almost ready to go. We arrive late Thursday (0400z, March 14th) and will get the Windom up before dark so that I have an antenna for the night. The QRZ.com Web page for ZL7LC is up-to-date with all the info. PSK31 only. I'm using EB7DX as my QSL Manager and there is a note about donations, if you so desire. The pro-pagation conditions aren't brilliant. However, a couple of days ago, when the 10 meter forecast was POOR, there was a 10 meter opening from here into the USA and Asia for an hour or so. There was a slow deep fade, but you could work stations if you were quick. Look forward to catching you on the bands." Jim's rigs will be an Icom 7200 and 7000 with vertical antennas operating on 7035, 14070, 21070 and 28120 kHz. Remember, his QSL Manager will be EB7DX and direct (w/2 green stamps and SAE). NO Bureau QSLs. For more details and an online log (ClubLog), see QRZ.com.

ZS8, MARION ISLAND (Update). Pierre, ZS1HF/ZS8M, informs OPDX that two radio amateurs will be part of the over wintering team and will be active on Marion Island between May 2013 to April 2014. Look for the following operators:

ZS8C - Carson, ZR6CWI, has been appointed as the Space Weather Engineer and is employed for the next year by the SA National Space Agency (SANSA).

ZS8Z - David, ZS1BCE, has finally been appointed as the radio technician. His appointment was delayed due to a clerical error.

Pierre states that the expected modes will mainly be SSB and the Digital modes. They may only use the existing commercial broadband HF antenna. Their QSL Manager is ZS1HF. More info will be posted on their respective QRZ.com sites once they have been created. They expect this info to be made available within the next 2 weeks. All inquiries are via ZS1HF at this stage.

20820. Ohio/Penn DX Special Bulletin #1103.1

Yahoo group: DX-IS (2013)
Date: 2013-03-10 23:07:08 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 20820 Message: 20820

SB DX @ WW < KB8NW $OPDX.1103.1
Ohio/Penn DX Special Bulletin No. 1103.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1103.1
BID: $OPDX.1103.1
March 10, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and the T2GM Web page for the following DX information.

T2, TUVALU (Update/Cancelled). Operators Gavin/GM0GAV, Clive/GM3POI, Robert/GM3YTS and Tom/GM4FDM, who were expected to be active as T2GM from the Funafuti Atoll (OC-015) between March 12-23rd, have announced on March 10th, the following on their Web page [excerpts/edited]: "Three of the team (Rob/GM3YTS, Gav/GM0GAV and Tom/GM4FDM) had extremely bad luck when their outward flight from Glasgow was cancelled due to an undercarriage problem. This had a knock-on effect for others flights they were due to catch, especially the connection from Fiji to Tuvalu which is now fully booked for the week ahead. They are very unhappy but nothing they can do about it. With Clive, GM3POI, already on route to Fiji they have now decided to be operational from there, probably starting activities on Wednesday, March 13th. [This blog will re-focus on their Fiji expedition and will update with callsign(s) and further info]."
For updates, watch the Web Blog page at: http://t2gm.org

My 9M4SLL QSOs up to 0009Z today (last night, local time) confirmed in LotW. QSO at 1355Z (this morning) not there yet. The last QSO in Club Log is 0244Z, so perhaps they uploaded the same log to LotW.

20831. Paper QSL's

Yahoo group: DX-IS (2013)
Date: 2013-03-13 03:15:21 UTC
From: dale cole
Topic: 20831 Message: 20831

In January I sent some paper qsl's and also uploaded many of my LoTW matches. It appears the LoTW matches have already been credited, but does not look like the paper have been processed. Am I expecting too short of time? I do have signed receipt, but still don't like not having them in my grubby hands. Just makes me real nervous. And (DUH) I did not write down
where the q's were from
Dale K8TS

If they process the LoTW ones they will ding you for the paper cards as a dupe. Think a 15-cent processing fee. That's the trouble with hybrid applications.

But . . . I understand the concern is sending the cards when you don't have to, not so much the minor handling charge.

Only non-LoTW qsl's were sent. Maybe they holding up the physical processing
until 2012 ap's are finished?
Maybe should drop a line to make sure that is the case?

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30313
SIDC SOLAR BULLETIN 13 Mar 2013, 1147UT
SIDC FORECAST (valid from 1230UT, 13 Mar 2013 until 15 Mar 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 13 Mar 2013 10CM FLUX: 125 / AP: 003
PREDICTIONS FOR 14 Mar 2013 10CM FLUX: 127 / AP: 004
PREDICTIONS FOR 15 Mar 2013 10CM FLUX: 129 / AP: 015
COMMENT: Solar activity has been eruptive featuring several C-flares
where two long duration flares where accompanied by CME's. Solar
activity is expected to remain eruptive for the next 24 hours.
The first CME was detected by SOHO on March 12th 11:00 UT and
originated from AR NOAA 1690 with a long duration C2.0 flare at 10:17 UT.
This halo CME with an angular width around 170 degrees might give Earth
a glancing blow as seen in STEREO A & B. traveling at an estimated speed
of 537 km/s it would reach Earth on Friday March 15th 21:00 UT. A second
eruption took place after a long duration flare in AR NOAA 1692, but at
the time of writing there is insufficient data available to provide more
details.
Solar wind speed is at a slow 315 km/s and the interplanetary magnetic
field Bz component has near zero values.
Geomagnetic activity was quiet to moderate and is expected to remain so
for the next 48 hours after which it might reach storm conditions due to
the CME of March 12th 11:00 UT.

Glenn;
Never thought to look there--probably because the LoTW had been processed and most inportantly It dawned on me that I made that post around mid-nite and my brain cells were starting to wain. Don't understand the three posts on queue, just have to wait. At least I know they made it.

From: kh2d2
Topic: 20838 Message: 20838

I found 9M4SLL CQ'ing, all by his lonesome self, this morning on 40 CW. I even got to call him a couple times before one of the skimmers found him.

I'm not at all surprised that a bunch of people showed up immediately to try and work him, but I was amazed at the number of QRM'ers and UpUpUp Cops that were set up and in business less than a minute after the first spot.

It appears we no longer have just an army of frustrated DX'ers but a bunch of people who are sitting around watching for somebody to QRM on the cluster. Sad. Very sad.

On a happier note, the JA's were banging in on 40 this morning, don't think I've ever heard them this loud here.

73, Jim KH2D

DX Bulletin 11 ARLD011
>From ARRL Headquarters
Newington CT March 14, 2013
To all radio amateurs

SB DX ARL ARLD011
ARLD011 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SPRATLY ISLANDS. Members of the Borneo Amateur Radio Club are QRV as 9M4SLL from Pulau Layang Layang, IOTA AS 051, until March 18. Activity is on 160 to 10 meters using CW, SSB and RTTY with five stations active. QSL via M0URX.

ISRAEL, 4X. Dimitry, UT5UGR is QRV as 4X/UT5UGR until March 18. This includes being active as 4X0W in the Russian DX contest. QSL both calls to home call.

SENEGAL, 6W. Hans, PB2T will be QRV as 6W/PB2T from March 17 to 21. QSL to home call.

MALDIVES, 8Q. Noel, F6BGC will be QRV as 8Q7NC from Rihiveli, South Male Atoll, IOTA AS-013, from March 19 to 29. Activity will be holiday style on 40 to 6 meters using mostly SSB with some CW and RTTY. QSL to home call.

THE GAMBIA, C5. Pedro, ON7WP will be QRV as C5WP from the Kololi area and also from the inland Buntu village from March 20 to 27. Activity will be on the HF bands. QSL direct to home call.

SPAIN, EA. Members of Team Cartagena will be QRV with special event call sign EH5SIP from March 17 to 31 to commemorate the 125th anniversary of the launching of the submarine Isaac Peral. Activity will be on the HF bands using SSB, RTTY, SSTV and PSK31. QSL via EA5HRD.

IRAN, EP. Mohsen, EP3SMH has been active on 20 and 15 meters between 1500 to 1600z using RTTY. QSL direct to home call.

JERSEY, GJ. Kazu, M0CFW is QRV as MJ0CFW until March 17. This includes entries in the Russian DX and BARTG HF RTTY contests. QSL to home call.

TEMOTU PROVINCE, H40. A group of operators are QRV as H40T from Nendo Island, IOTA OC-100, until March 23. Activity is on 160 to 6 meters using CW, SSB and RTTY. QSL via DL7DF.

LITHUANIA, LY. Special event station LY63S is active during the month of March in remembrance of the 150th anniversary of the Polish-Lithuanian uprising against Russia. QSL via LY3BY.

HUNGARY, HA. Special event station HG52FC is QRV until May 31 during the 52nd FIRAC Congress event being held in Hungary. Activity is on the HF bands using CW, SSB and various digital modes. QSL via HA5BSW.

ECUADOR, HC. Rick, NE8Z will be QRV as HC1MD from March 21 to April 11. Activity will be on 40 to 10 meters using CW, SSB and RTTY. QSL via K8LJG.

ARGENTINA, LU. Members of the Radio Club Ushuaia will be QRV as LT5X from Isla Redonda, IOTA SA-049, on March 23 and 24. Activity will be with three stations on 80 to 10 meters using CW, SSB and PSK31. QSL via LU8XW.

TURKEY, TA. Special event station TC18M will be QRV from March 16 to 18 in remembrance of the Naval Victory of March 18, 1915. QSL via bureau.

MARSHALL ISLANDS, V7. Ted, JF1CCH will be QRV as V73TS from March 21 to 26. Activity will be on 40 to 10 meters using mostly CW. QSL to home call.

CANADA, VE. David, VE3VID is QRV as VY0/VE3VID from Igloolik Island, IOTA NA-174, for the next three weeks. Activity is on the HF bands using SSB, RTTY, PSK31, Olivia and Feld-Hell. QSL to home call.

AUSTRALIA, VK. Members of the Canberra Region Amateur Radio Club are QRV as VI100ACT during the 100th anniversary celebration of Canberra. QSL via VK1ACA.

ASCENSION ISLAND, ZD8. Mick, G1EUZ plans to be QRV as ZD8RAF from March 18 to 22. Activity will be on the HF bands. QSL to home call.

CHATHAM ISLANDS, ZL7. Jim, ZL1LC is QRV as ZL7LC until March 20. Activity is on the HF bands using only PSK31. QSL direct to EB7DX.

THIS WEEKEND ON THE RADIO. The BARTG HF RTTY Contest, North American SSB Sprint, QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint, SARL VHF/UHF Analogue/Digital Contest, Russian DX Contest, Oklahoma QSO Party, AGCW VHF/UHF CW Contest, Virginia QSO Party, Feld Hell

Sprint and the UBA Spring 2-Meter Contest will certainly keep contesters busy this upcoming weekend. The Run for the Bacon QRP CW Contest and Bucharest Contest are scheduled for March 18. The CLARA HF Contest is scheduled for March 19. The QRP CW Fox Hunt is scheduled for March 20. Please see March QST, page 84, and the ARRL and WA7BNM Contest websites for details.

PREDICTIONS FOR 17 Mar 2013 10CM FLUX: 127 / AP: 004
COMMENT: Solar activity featured one M1.2 flare originating from NOAA
1692 on March 15th 07:00 UT. Activity is expected to remain eruptive for
the next 24 hours.
A full halo CME was detected by SOHO LASCO C2 on Friday, March 15th at
07:12 UT which was a result of the above mentioned M1.2 flare. This CME
has an angular width of almost 360 degrees and an estimated speed of 710
km/s. Estimated arrival on Earth is Monday, March 18th around 13:00 UT.
Solar wind speed has increased to around 450 km/s and interplanetary
magnetic field Bz component is around 5 nT.
Geomagnetic conditions were quiet to moderate, but is expected to
increase to active or storm conditions this evening with the arrival of
the CME seen in SOHO LASCO C2 Tuesday, March 12th at 11:00 UT.

16 March 2013 A.R.I. DX Bulletin
No 1141
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

8Q - Noel, F6BGC will be active as 8Q7NC from the Maldives (AS-013) on 19-29 March. He plans to operate holiday style on 40-6m with 100w and a vertical, using mostly SSB with some CW and RTTY. Further information can be found at http://f8kcf.free.fr/. QSL via F6BGC, direct or bureau, and LoTW. [TNX F6BGC]
A3 - Jacek, SP5EAQ will be active as A3EAQ from Tongatapu (OC-049), Tonga from 26 March to 16 April. He will operate SSB only on 80-10 metres. QSL via home call, direct or bureau. Further information and logsearch will be available at http://sp5drh.com/a3eaq/ [TNX NG3K]
CE - Jose, CE8DMT expects to be QRV from Navarino Island (SA-050) on 23 and 24 March Look for him on 21277 kHz at 13.30-15.30 UTC and on 28477 kHz at 16-17 UTC. QSL via home call. [TNX DX World]
E5 - Andy, AB7FS (E51AND) is moving to Rarotonga (OC-013), South Cook Islands. "If all goes as planned I should have a good gain antenna system", he says, "and I may try for Palmerston (OC-124, North Cooks) or possibly Pukapuka (OC-098, North Cooks) in July or August, this time with better preparation and hopefully a Hexbeam". According to his qrz.com page, after 15 April cards should be sent to Andy Duncan, P.O. Box 618, Avarua, Rarotonga, Cook Islands.
E6 - Alan, VK4WR (E6RQ) and Graeme, VK4FI (E6SG) will be active from Niue (OC-040) on 22-29 March. Their main focus will be on 6 metres. QSL both calls via VK4FI. [TNX DX World]
EI - Olivier, ON4EI will be active as EI8GQB from Fethard, Ireland (EU-115) from 24 March to 3 April using an hybrid wind-solar power system (see www.qrz.com/db/EI8GQB) from his caravan. He will participate in the CQ WW WPX SSB Contest as EI1A. QSL for both callsigns via bureau to ON4EI.
FH - Hartwig, DL7BC (www.qslnet.de/dl7bc) will be active again from Mayotte (AF-027) between 26 March and 12 April. Until 9 April he will be QRV as TO7BC (including an entry in the CQWW WPX SSB Contest), after that he might operate as FH/DL7BC. QSL via home call, direct or bureau.
GM - The Camb-Hams (http://dx.camb-hams.com) will be active again as GS3PYE/p from the Isle of Mull (EU-008) on 10-16 May. A large

group of operators will be QRV with five stations on 600 (472 kHz)-10 metres, as well as on 6m, 4m, 2m EME and some 70cm. QSL via M0VFC (OQRS on Club Log). [TNX rsgbiota.org]
H40 - Part of the H44G team was expected to go and operate as H40T from Temotu Province on 12-23 March [425DXN 1139]. However, several flights to Santa Cruz were cancelled due to bad weather conditions, and they were able to get bookings for 16 March, to be confirmed on the 15th. As some operators "are bound to fixed return flight dates", the new H40T team will include DL4WK, DL7DF, DL7UFR and SP3DOI. Check http://dl7df.com/h4/news.php for updates.
H44 - The June 2013 Solomon Islands IOTA Tour [425DXN 1140] has become "The 3C Project" (Connect, Communicate, Coordinate): "as a group of skilled and passionate amateur radio operators", the organizers say, "we wanted to do more than just go to exotic locations to operate from. Our Mission is to actively seek a dialogue with islanders and discuss and record the needs of the villagers that we meet. This will be an expedition with a difference". The plan is to activate (in order) IOTA groups OC-149, OC-168, OC-047, OC-127 and OC-285 (Stewart Islands, new one for IOTA). Exact dates and the callsign to be announced. Read more on the project's website at http://h44iota.com/
HA - Special station HG52FC is active on all bands and modes until 31 May for the 52nd FIRAC congress to be held in Galyateto on 16-20 May (details at http://www.firac.de/html/congress_2013.html). QSL via HA5BSW, direct or bureau, LoTW and eQSL. [TNX HA0HW]
HC - Once again Rick, NE8Z will be active as HC1MD from Ecuador from 21 March to 11 April. He will operate CW, SSB and RTTY on 40-10 metres. QSL via K8LJG. Information on the HC/Ecuador and HC8/ Galapagos DX Diplomas at http://webpages.charter.net/ne8z. [TNX NE8Z]
JD1_oga- Once again Makoto, JI5RPT (www.ji5rpt.com/jd1/) will be active as JD1BLY from Chichijima (AS-031), Ogasawara from 28 April to 4 May. He will operate CW, SSB and digital modes on 40-10 metres and satellite. QSL via home call, direct or bureau. [TNX JI5RPT]
KH9 - K9W is the callsign issued to the DXpedition to Wake Island [425DXN 1140], which is anticipated taking place at the beginning of October. The actual days of use will be announced in due course. Val, NV9L and Col, MM0NDX will be the Pilot Stations. Bookmark www.wake2013.org for further information and updates. [TNX W8GEX]
OZ - Once again the OZ1RDP Scout team (www.oz1rdp.de) will be active from Romo Island (EU-125) on 17-21 May. They plan to operate SSB, BPSK31 and maybe some CW on 80, 40, 30, 20, 17, 15, 10 and 6 metres. QSL via DL9BCP, direct or bureau. [TNX DL9BCP]
PA - Celebrating his 70th birthday, Joop Tijpens (PD0RKA) will be active on the HF bands as PD70JT from 16 March to 13 April. All of the QSOs will be confirmed automatically via the bureau, LoTW and eQSL.
PA - Queen Beatrix of the Netherlands will formally end her reign on 30 April, and leave monarchy to Crown-Prince Willem-Alexander. At

least a couple of special stations are expected to be active to
celebrate the event: PA200KING from 18 April to 5 May (QSL via
PD5ROB), and PC13KING, operated by Contest Club Apeldoorn from 22
April to 2 May (QSL via PA1DV). [TNX PA7CW]
S7 - Nobby, G0VJG will be active as S79VJG from Mahe (AF-024),
Seychelles on 4-17 April. He will operate SSB only on 80-10
metres. QSL via G4DFI.
T2 - Clive, GM3POI made it to Tuvalu on 12 March, with a transceiver
(100 watts) and wire antennas, but he has not been reported active
so far. After many trials and tribulations, the other three T2GM
team members (GM3YTS, GM0GAV and GM4FDM) were finally able to
reach Fiji and retrieve their lost luggage. They are booked on the
16 March flight to Tuvalu, which is their last chance of going to
T2. Check http://t2gm.org/ for updates.
T2 - Tim, NL8F will operate mainly SSB from Tuvalu (OC-015) between 19
March and 2 April. The callsign is not known, as he will have to
collect his license upon arrival. QSL via K8NA. [TNX DX World]
T2 - Ingolf DJ4LS, Rick DK8YY and Detlef DL3ALI will be active as T2YY
(requested callsign) from Tuvalu from 23 March to 4 April. They
plan to operate CW, SSB and RTTY on 80-10 metres with two
stations. QSL via DH7WW. [TNX The Daily DX]
TA - Once again the TC Special Wireless Activity Team (www.tcswat.org)
will be active as TC18M on 16-18 March to commemorate the
anniversary of the naval battle of 18 March 1915 during the
Dardanelles Campaign. All of the QSOs will be confirmed
automatically via the bureau.
V7 - Ted, JF1CCH will be active as V73TS from the Marshall Islands on
21-26 March. He will operate mainly CW on 40-10 metres. QSL via
home call. [TNX NG3K]
VE - David, VE3VID is QRV in his spare time as VY0/VE3VID from Igloolik
Island (NA-174) until 29 March. He uses a 20m dipole on RTTY, but
has plans to have a multiband antenna when he returns to the
island in September/October. QSL via home call. [TNX DX World]
W - Once again Joe, K5KUA will be active as K5KUA/5 from Galveston
Island (NA-143) from 28 March to 1 April. He usually operates CW
only on 40-10 metres. QSL via home call, direct or bureau.
[rsgbiota.org]
ZD8 - Mick, G1EUZ will be active as ZD8RAF from Ascension Island
(AF-003) on 18-22 March. QSL via home call, direct or bureau.
ZK3 - Hans, DL6JGN and Guenter, DL2AWG will be active as ZK3N from
Nukunonu, Tokelau (OC-048) from 25 April to 8 May
(www.tokelau2013.de). They will operate CW, SSB and digital modes
on 80-10 metres. QSL via DL2AWG.

*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The February 2013 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

7O6T VIDEO ---> The 7O6T DXpedition video is now available for free download from two different sites. The High Definition can be found on https://vimeo.com/61384528, while the Standard Definition video is on www.intrepid-dx.com [TNX N6PSE]

CASS AWARD ---> Presented annually, the Cass Award (www.cassaward.com) [425DXN 1102] honours the wisdom and spirit of Cass WA6AUD (SK) and encourages DXPeditions to maximize the number of DXers worked with a $1000 prize for the Single-Operator DXpedition that works the most unique callsigns. The 2012 Cass Award has been won by Rob Chipperfield, M0VFC: "from the remote South Atlantic island of Tristan Da Cunha as ZD9UW in October 2012, Rob worked 3362 unique stations over his 4-day DXpedition, demonstrating an outstanding effort to log as many individuals as possible". [TNX AA6YQ]

CLIPPERTON 2013 ---> TX5K started operations on 40m SSB around 06.15 UTC on 2 March and went QRT at 00.00 utc on the 10th. The team hit the 100,000th QSO mark around 12.15 UTC on 8 March, and finished with a grand total of 113,844 QSOs (60227 CW, 45030 SSB and 8587 Digi).

DX DINNER ---> David Patton, NN1N will be the featured speaker for the 28th annual DX Dinner, sponsored by the Southwest Ohio DX Association (SWODXA) and to be held in conjunction with the 2013 Dayton Hamvention on Friday, 17 May at the Dayton Marriott Hotel. Details can be found on the SWODXA Events website (www.swodxaevents.org) and updates will be sent out regularly via Twitter (@SWODXA). [TNX W8GEX]

HAM RADIO 2013 ---> The 38th International Exibition for Radio Amateurs - Europe's premiere gathering for amateur radio enthusiasts - will take place on 28-30 June at Friedrichshafen (www.hamradio-friedrichshafen.de). As usual, there will be a big flea market and commercial exhibitors, as well as many lectures and presentations. Ham Radio 2013 will be combined with the 64th Bodensee Convention organized by the Deutscher Amateur Radio Club.

NORTH KOREA ---> Rick, K6VVA has posted Info Update #2 to the "P5 CW Only & IOTA AS-197 Project" [425DXN 1105 and 1106] he has been working on for seven years now. "Recent 'circumstances' in P5 during the last several months have made this Project even more challenging, for obvious reasons", he says, "Yet a new alternative route to potential success has also materialized, and I decided to unleash the full 'long term' plan, which has been to activate ALL of the four P5 IOTA Designators (AS-195, AS-196, AS-197 and AS-198)".
Over the past 18 months, Rick has been part of a discussion group (N7NG, G3SXW, ON4UN, ON4WW, W6SJ, ST2AR/S53R and others all with considerable DXpedition and/or DX QTH operating experience) and spent "considerable time in analyzing and discussing the observed cause and effect relationship between the operating 'styles' (and errors) of many major DXpedition operators, which always result in the same predictable anti-social behaviors and chaos occurring in all pileups". Rick plans to produce a web viewable video soon, "summarizing my perspective of the reality of things,

which will also be the basis for any P5 operations and Pileup Management".
Read the full release at www.k6vva.com/p5/p5infoupdates.html

QSL OX3XR ---> OZ3PZ is no longer the QSL manager for Peter, OX3XR.
Effective 1 April, the new QSL route will be via SWL PA3249, direct only
(see qrz.com for details). You can also use the "Get a Card In the Mail"
service provided by eQSL. Bureau QSL requests will go unanswered, but
electronic confirmations will still be available through LoTW and eQSL. As
for XP3A, neither direct nor bureau paper cards are available, and QSOs are
confirmed only via LoTW and eQSL.

WAPC ---> The second Worked All Provinces of China (WAPC) DX Contest will
be held on 20-21 April (from 6 UTC on the 20th to 05.59 UTC on the 21st),
on 80, 40, 20, 15 and 10 metres SSB and CW. Complete details can be found
on the Mulan DX Club's website (www.mulandxc.org). Last year's event saw
participating stations from 32 out of 34 Chinese provinces, municipal
cities, autonomous regions and special administration regions. [TNX BA7JS]

QSLs received direct or through managers: 3D2C, 3D2ZY, 3V8BB, 3XDQZ/p

20844. ARLP011 Propagation de K7RA

Yahoo group: DX-IS (2013)
Date: 2013-03-15 18:29:31 UTC
From: jjreisert@...
Topic: 9254 Message: 20844

SB PROP @ ARL $ARLP011
ARLP011 Propagation de K7RA

ZCZC AP11
QST de W1AW
Propagation Forecast Bulletin 11 ARLP011
>From Tad Cook, K7RA
Seattle, WA March 15, 2013
To all radio amateurs

SB PROP ARL ARLP011
ARLP011 Propagation de K7RA

Solar indicators were mixed this week, with the average daily sunspot number down 8.4 points to 84.9, but average daily solar flux up 5.9 points to 118.5. Geomagnetic indices were much quieter, with the average planetary A index down 4.7 points to 4.4, and the average mid-latitude A index down 5 points to 3.9. The main reason for this is there weren't any active days this week, such as March 1-2 in the previous week's report.

The predicted solar flux for March 15-17 is 120, then 115 on March 18-19, 110 on March 20, 105 on March 21, 95 on March 22-24, 100 on March 25-26, 105 on March 27, 110 on March 28-31, 115 on April 1-3, then solar flux peaks around 120 on April 4-11. This prediction for solar flux at 120 on April 4-11 is fairly recent, first appearing in the March 11 forecast. Prior to that date, values were predicted around 100-105, and back before February 25, 95 was the predicted level. The predicted March 15-17 flux value of 120 is also recent. On March 6 the predicted values were 95 for that period.

The average of predicted solar flux for the next five days, March 15-19 is 118, right around the average of 118.5 for the past reporting week, March 7-13.

The predicted planetary A index on March 15-16 is 17 and 12, indicating more geomagnetic activity similar to March 1-2. The predicted planetary A index is 5 on March 17-20, 8 on March 21, 5 on March 22-27, 18 and 10 on March 28-29, and 5 again on March 30 through April 16.

OK1HH predicts the geomagnetic field will be active to disturbed on March 15, quiet to unsettled March 16-17, mostly quiet March 18, quiet to unsettled March 19-21, active to disturbed March 22, quiet to active March 23, quiet March 24-25, mostly quiet March 26, quiet to active March 27-28, quiet to unsettled March 29-30, mostly quiet March 31, and quiet on April 1-4.

At 0600 UTC on March 15 the Australian Space Forecast Centre reported that a sudden impulse of 22 nT was detected in magnetometers at 0527 UTC. Due to a CME, increased geomagnetic activity is predicted on March 15-16. Minor storm periods at high latitudes are possible.

The coronal mass ejection and M1 class solar flare were from sunspot group 1692, right in the center of the visible solar disc viewed from Earth, and was Earth-directed.

In recent online articles about a possible two-peak Cycle 24, they were talking about the peak in late 2011 and another in 2013. But I noticed recently that solar physicist Dean Pesnell of NASA is suggesting a peak in late 2013 and another in 2015. Check the last line of the first paragraph of this article posted yesterday on the ARRL website:
http://www.arrl.org/news/solar-cycle-24-may-have-double-peaks-says-nasa-solar-physicist.

Robert Elek, W3HKK sent these observations about the TX5K operation on Clipperton Island:

"Kudos to the ops at TX5K! And to their nifty web site. I love the world map, spotting of call signs, almost instantaneous log updates, QSO totals, etc. It lets you see the propagation on a visual basis, call by call.

"I had not realized TX5K was on the air until, during our club effort at WW8OH for the ARRL SSB DX Contest on March 2-3, we worked them. Post-contest, and after catching up on my sleep Sunday night and most of Monday, I turned on the rig, right after dinner, and TX5K was EVERYWHERE, with big sigs! I worked them on 12, 15, 17, 30, 40 and 160 meters, many bands on both SSB and CW, during an amazing three hour stretch of operating!

"The station here is modest: 100 watts to an assortment of single band ground planes, and an inverted L for 160m. Working them so quickly, often on the very first or second call, was mind-blowing. Their pile-ups were HUGE. It had to be a miracle of good timing, plus a little experience to boot.

"I have since worked them on 160 thru 10m. Great job by TX5K! Thanks, guys!"

For a peek at the vertical antennas at W3HKK, click the photo on the upper right on his QRZ.com page at http://www.qrz.com/db/W3HKK. Note you will have to log in, but accounts are free.

Brian Alsop, K3KO of Henderson, North Carolina commented that "DXers shouldn't overlook VOACAP while chasing new ones." He sent a couple of circuit reliability plots from his location to ZL9CI and 9M4SLL on Spratly, and noted that the times he worked them lined up with the predictions. "I recently downgraded to 500 watts, a 2 element tri-bander at 40 feet and rotary dipole for 30/17/12 at 42 feet. I

need all the help I can get. Besides the DX cluster, knowing what paths at what time may be possible helps."

K9LA has a tutorial on the ARRL web site for using VOACAP, and you can see it at http://www.arrl.org/files/file/Technology/propagation/Voacap.pdf.

Finally, at http://stevemorse.org/jcal/latlon.php is a handy tool for converting a street address into latitude/longitude coordinates. This is useful for determining locations for propagation prediction and other programs based on FCC database address records, or for your own location.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for March 7 through 13 were 80, 59, 63, 89, 105, 95, and 103, with a mean of 84.9. 10.7 cm flux was 113.8, 115, 116.2, 119.2, 119.7, 123, and 122.9, with a mean of 118.5. Estimated planetary A indices were 4, 3, 6, 4, 5, 5, and 4, with a mean of 4.4. Estimated mid-latitude A indices were 2, 3, 6, 3, 4, 6, and 3, with a mean of 3.9.

20845. 17M band limit

Yahoo group: DX-IS (2013)
Date: 2013-03-15 19:17:53 UTC
From: Paul M Dunphy
Topic: 20845 Message: 20845

In the USA, are Hams allowed to transmit RTTY above 18.110 MHz? It seems today with 9M4SLL on 18.1075 QSX UP that a lot of 1X2 and 2X1 well known calls are transmitting up to 18.113 MHz. There seems to be a lot of DX Cluster "chat line" about it being out of band.

I would think 1X2 and 2X1 would know the rules. All I recall is US Hams can't operate SSB below 18.110 MHz . . . can they go above with RTTY? If they can't, will anyone ever do anything about it if they do?

Just trying to understand what the fuss is about. I worked them an hour ago on 17M RTTY so it doesn't have any bearing on my ability to get another slot . . .

Yes, Paul, 18110 is the top of the band so ;legally one should be at least 5kHz from the edge. A lot know they will not get anything
done about working out of band. Unfortunately most hams outside of the US do not know this so like these guys they are calling for
NA but listening at 18112 and up.

Yeah, that's what I figured. They really had you guys squeezed into a small range, and at one point blasted the pileup to spread out after saying NA/SA/AF only. Probably made the SA/AF guys happy, and even us VEs, but it effectively locked out the US guys. However, many of them called up above .110 anyhow.

Times have changed . . . don't know if you remember the Bouvet operation of 1989 or 1990 but they were on 14.145 QSX UP into the US phone band. Of course there were the usual VFO mistakes and the odd US guy would call on 14.145 (I'm sure 99% honest mistakes.) Anyhow, I read in QST or CQ that many of them got letters from the FCC for doing it.

Today . . . "Hello, this is the <insert the agency relevant to your country>, how may I help? Ham Radio? What's that got to do with us? We look after cell phones and TV. Call someone else." And that is not restricted to the USA . . . it's now an "honour" (or "honor: if you are an American) system.

Yeah, that's what I figured. They really had you guys squeezed
into a small range, and at one point blasted the pileup to spread out
after saying NA/SA/AF only. Probably made the SA/AF guys happy, and
even us VEs, but it effectively locked out the US guys. However, many
of them called up above .110 anyhow.

Times have changed . . . don't know if you remember the Bouvet
operation of 1989 or 1990 but they were on 14.145 QSX UP into the US
phone band. Of course there were the usual VFO mistakes and the odd US
guy would call on 14.145 (I'm sure 99% honest mistakes.) Anyhow, I read
in QST or CQ that many of them got letters from the FCC for doing it.

Today . . . "Hello, this is the <insert the agency relevant to your
country>, how may I help? Ham Radio? What's that got to do with us? We
look after cell phones and TV. Call someone else." And that is not
restricted to the USA . . . it's now an "honour" (or "honor: if you are
an American) system.

73, Paul VE1DX

Your right Paul. Yes, I remember that operation. Your right 99% were mistakes but then they
weren't telling US to transmit out of
band like these guys.

I tweeted Tim about the 17m problem. Now whether he gets it or not who knows. I would think
about dropping an email but he is
probably getting so many of the I need them here and I need them there emails that he is
probably not reading them. This has
happened before though.

I think operating out of the band should be a personal choice, made
by the individual operator :-)

The FCC is totally out of pink slips. Budget cuts......

According to the ARRL's frequency allocation page, US RTTY may not go
above 18.110.

Subject: Re: [DX-IS] 17M band limit

According to the ARRL's frequency allocation page, US RTTY may not go above 18.110.

73, Pete N4ZR
Check out the Reverse Beacon Network at
http://reversebeacon.net,
blog at reversebeacon.blogspot.com.
For spots, please go to your favorite
ARC V6 or VE7CC DX cluster node.
On 3/15/2013 3:17 PM, Paul M Dunphy wrote:

In the USA, are Hams allowed to transmit RTTY above 18.110 MHz? It
seems today with 9M4SLL on 18.1075 QSX UP that a lot of 1X2 and 2X1 well
known calls are transmitting up to 18.113 MHz. There seems to be a lot
of DX Cluster "chat line" about it being out of band.

I would think 1X2 and 2X1 would know the rules. All I recall is US
Hams can't operate SSB below 18.110 MHz . . . can they go above with
RTTY? If they can't, will anyone ever do anything about it if they do?

Just trying to understand what the fuss is about. I worked them an
hour ago on 17M RTTY so it doesn't have any bearing on my ability to get
another slot . . .

# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30316
SIDC SOLAR BULLETIN 16 Mar 2013, 1147UT
SIDC FORECAST (valid from 1230UT, 16 Mar 2013 until 18 Mar 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Minor geomagnetic storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 16 Mar 2013 10CM FLUX: 123 / AP: 009
PREDICTIONS FOR 17 Mar 2013 10CM FLUX: 121 / AP: 004
PREDICTIONS FOR 18 Mar 2013 10CM FLUX: 118 / AP: 022
COMMENT: Solar activity was eruptive with several C flares and is
expected to remain that way for the next 24 hours.
A rise in the proton levels was detected, but still below 10 000/(cm2 s
sr). The levels are, however, still rising, especially for the 10 MeV.
A very small jump in the solar wind and a turbulent interplanetary
magnetic field indicate the arrival of the CME detected by LASCO C2 on
March 12th 11:00 UT.
The geomagnetic condition remained quiet to moderate, but are expected
to reach Active to Storm levels on Monday, March 18th around 13:00 UT
with the arrival of the full halo CME of March 15th 7:12 UT.

PREDICTIONS FOR 19 Mar 2013 10CM FLUX: 123 / AP: 004
COMMENT: Solar activity has been quiet, but is expected to be eruptive
for the next 24 hours.
The full halo CME of Friday March 15th has arrived since Sunday March
17th around 6 o'clock and geomagnetic activity has reached storm levels
since 9:00 UT. The Solar wind speed jumped to around 700 km/s. The
interplanetary magnetic field Bz component is turbulent around -15 nT.
Active to Storm geomagnetic conditions are expected for the next few
hours, but will return to quiet levels after that.
Proton levels of 10 MeV are dropping below the 10 pfu treshold again.

DX'ing is getting better and better. These days you have almost instant confirmation of a QSO (TX5K) and overnight confirmation in LoTW (9M4SLL).

When I remember the days of Box 88, we have it so much better these days.

Pretty soon, all you will need to do is think about working the DX and credits will show up HI HI

I dunno, I am still waiting on my RTTY LOTW confirmation from a couple of days ago from 9M4SLL. So slow.so slow.

Just kidding. Missed them on 80, 40 and 10 but those guys did a great job.

The Clipperton "instant greenies" were sort of cute, and the logical
next step would be for the DX to listen to the pile-up and put calls
in the log, and show greenies, without bothering with all the "599"
stuff over the air.

Actually, a robot could do it faster - it could be dropped on the
island from the air (if they can land those things on Mars, this
would be easy), listen to the pile-up and award instant greenies.
Computers can beat the best humans at chess, so this should be a
trivial task. They could have put one on the Mars thingie too -
but no, all we get is "JPL" in CW on its tires - phooey.

10 METER CONTEST. Members of "Radio Club Guadeloupe" (ACRA - FG5KC) invite all Contests/DXers to be active in the "2013 Championship 10M FG (Guadeloupe) SSB Contest" on June 29th, between 0100-2300z. Details

are available at:
http://rc-fg5kc.over-blog.org/pages/CONTEST_2013_CHAMPIONSHIP_10M_SSB_GUADELOUPE-8570589.html

5H, TANZANIA (Update/IOTA Op). Bodo, DF8DX, will be active as 5H1DX between April 20-28th. Activity will include the activation of several IOTAs which include the following: AF-075 - Bongoyo Island as 5H1DX3
AF-063 - Pemba Island as 5H1DX
AF-032 - Zanzibar as 5H1DX
Operations will be on the HF bands and EME. QSL via DF8DX.

8P, BARBADOS. Dean, 8P6SH, will be active as 8P2K during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Single-Band (10m) entry. QSL via KU9C.

8P, BARBADOS. Jeff, VA3QSL, is once again heading to the Caribbean, but this time he will be active as 8P9HI from Farther Away Cottage, Bayfield, St. Philip, Barbados (NA-021), between April 6-13th. Activity will be holiday style on the HF bands. QSL via his home callsign, direct or by the Bureau.

8Q, MALDIVES. Noel, F6BGC, will be active as 8Q7NC from Rihiveli, South Male Atoll, in the Maldives Islands (AS-013) between March 19-29th. He plans to operate holiday style on 40-6 meters with 100w and a vertical, using mostly SSB with some CW and RTTY. He states, "The island is isolated in the Indian Ocean, it's motto is 'No News, No Shoes'. There is no InterNet, cell phone ... so no DXA and no Cluster!" QSL via F6BGC, direct or by the Bureau and LoTW. More information can be found at:
http://f8kcf.free.fr

9X, RWANDA. Kiyoshi "KIYO", JR1IZM (ex-V31IZ, 7P8ZM), has been in Kigali since February and announced that he finally received his license/callsign 9X0ZM. He will be there until March of 2014 and expects to be active soon. Activity will be limited to his free time. He will use an IC-7200 with ATU/AH-4 and Loop antenna. Operations will be mainly 20 meters on the Digital mode JT65), CW and SSB. QSL via JO1CRA, direct (SASE) or by the Bureau.

A5, BHUTAN. Yuki, JH1NBN, is expected to be active as A52W through March 26th. He is in Bhutan on business, so his activity will only be during his spare time. There has been no QSN reported as this was being written. QSL via JH1NBN direct.

A7, QATAR. Operators Ali/A71BX, Khalid/A71CO, Abdulla/A71CV, Saif/A71AM and Andrey/RA9CKQ will be active as A71AM from Dukhan during the CQWW WPX SSB Contest (March 30-31st) as a Multi-2 entry. QSL via A71AM, direct or by the Bureau.

DAYTON HAMVENTION NEWS (SWODXA DX DINNER ANNOUNCEMENT, dated March 13th). Janet Pater, W8CAA, writes, "FOR IMMEDIATE RELEASE -- The SouthWest Ohio DX Association (SWODXA) has announced that David Patton, NN1N, will be the featured speaker for their 28th annual DX dinner☐. The dinner, held

in conjunction with the 2013 Dayton Hamvention®, will be on Friday, May 17th, at the Marriott Hotel in Dayton.
Dave was first licensed in 1977 at the age of 12 as WD9DCL. Always an avid DXer and contester, the two-time WRTC competitor has been on world record holding multi-op teams at 6Y2A and HC8N. Changing his calls frequently in his quest for a "good" call sign, Dave has worked 10 Band DXCC along with 2875 countries in the DXCC Challenge using 'DCL, KJ9W, AH2U, NU9R, WO0G, AA9AK, WX3N, KW9KW, W9QA, NT1N and now NN1N. In his past he has been a net control, and public service volunteer, as well as a 6-year President of the Society of Midwest Contesters.
He started at ARRL HQ as the Special Assistant to the Executive Vice President, and is now the Manager of the Membership and Volunteer Programs Department with a staff of 22. The MVP Dept. includes Field Services, W1AW, Emergency Preparedness and Response, ARRL Operating Awards, and the QSL Bureau.
Dave will have an informative and entertaining presentation on the Logbook of the World (LOTW□). We look forward to Dave presenting 'What hath LOTW Wrought?'; exploring the initial, current and future impact of this state-of-the-art logging and awards website.
For more information and to order dinner tickets, visit <WWW.SWODXAEVENTS.ORG> and follow us on @SWODXA ."

E5, SOUTH COOK ISLANDS (Update/New 'Resident' Operator/QSL INFO & Change).
Andy, AB7FS/E51AND, informs OPDX that he is moving to Rarotonga (OC-013). Edited excerpts from his long E-mail, Andy writes, "My wife Kat and I are moving to Rarotonga -- she arrives there on March 25th and I will be there on April 29th. We are moving into a house in the part of Arorangi Beach called Inave (say ee-nah-vay) -- about 100 meters inland from the back road -- and probably about 1/2 mile inland from the beach roughly in line with the Crown Beach or Manuia Beach "resorts" (There are no street addresses in Rarotonga). We would rather be inland to moderate the impact of cyclones and to stay away from the storm surges. Arorangi is on the West side of Rarotonga, and we will have a range of volcanic mountains up to 2,500 feet to the East -- which may limit operations in that direction. I hope to be operating using a 43 ft vertical and 100 watts from a Yaesu FT 857D by the end of the first week of May. The container with the tower and yagis will likely not arrive until early June -- so it will be July or August before I have the tower up and the yagis in the air. Once it's up we should have a 5 element KLM monobander at 70 feet for 20m and a Tennadyne T7 at 80 feet for the higher bands. Not sure yet how we will handle 30 meters and below though we do have an OCF dipole and I can drive the tower. We'll be using a Icom 756Pro and have an Ameritron AL1200 - though I prefer to operate using as little power as possible. I'm a ragchewer at heart -- NOT a DXer -- and with several active hams on Raro I'm hoping to avoid some of the rapid fire 5 and 9 contacts and ACTUALLY talk to people. LOL. I got back into CW a while back and although I'm still plodding along at 10 wpm, I enjoy CW and will likely hang out at the Straight Key Century Club frequencies and exchange SKCC numbers with other members. On SSB, the place to find me will be on the ANZA DX net (14183 kHz daily starting at 0515z). And if you are looking for esoteric VK and NZ -- and Tahiti,

Fiji, the Cooks, New Caledonia, Kiribati, etc.. -- and the occasional African Station -- it's a good net to check in to. Kat is also a licensed Ham (ZK1SCH/KB7SCH) and I'm hoping that being in a 'rare' location will prompt her to get on the air :-). Other active hams on Rarotonga include: Jim Ditchburn, E51JD, in the village of Tupapa (North side of the Island) who is on almost daily on 20 meters SSB; Victor Rivera, E51CG (or E51USA), in Nikao (NW corner) who tends to work the highest band open and has a 6m beacon; and Bob Walker, E51BQ, in Muri in the SE corner of the Island... I'll keep the E51AND page on QRZ.com updated." Andy announced on March 11th, on QRZ.com, that there is a change in the QSL route (address) and he has responded to all cards received to date!! After April 15th, he states, "Please QSL DIRECT to P.O. Box 618, Avarua, Rarotonga, Cook Islands". He also states, "If there are problems/issues with your QSL -- Please E-mail me with all the QSO info and your mailing address - I have a paper log and CANNOT find you without date, time and callsign :-) Thanks". Andy also mentions, "If all goes as planned I should have a good gain antenna system on Rarotonga, and I may try for Palmerston [OC-124] (or possibly PukaPuka [OC-098]) again in July or August :-). This time with better preparation and hopefully a Hex Beam at 30+ feet. :-)". Take a look at his QRZ.com page for some great pictures.

E6, NIUE (Reminder). Look for operators Alan/VK4WR and Graeme/VK4FI to be active as E6RQ and E6SG, respectively, from Niue (OC-040) between March 22-29th. Their activity will focus on 6 meters as well as some HF operations. QSL both callsigns via VK4FI

FR, REUNION ISLAND. Guy, F5MNW, will be active as FR/F5MNW from Reunion Island (AF-016) between April 6-29th. Activity will be on the HF bands using only CW. QSL via his home callsign, direct or by the Bureau.

H40 & H44, TEMOTU AND SOLOMON ISLANDS (Update). The "Two Entities DX-pedition - Solomon 2013" continues with both operations on the air as this was being written. The first group signing H44G from Guadalcandal (OC-047), Solomon Islands will operate until March 25th. The second group finally hit the air waves as H40T on March 16th (after a flight delay of 4 days due to bad weather), from Santa Cruz Island (OC-100) [Temotu Island], and will operate until March 23rd. Activity from both locations will be on 160-6 meters using CW, SSB and RTTY. See OPDX.1103 for suggested frequencies. QSL route is via DL7DF, direct or by the Bureau. For more details and updates, visit:
http://www.dl7df.com/h4/index.php

H44, SOLOMON ISLANDS (IOTA Op/Update to OPDX.1103). Operators Ralph, 5W0W/H44RK, Dom/SQ9KWW, Tom/WL7HP and Maggie/H44MK (the only local YL Ham from Sikiana) are planning an upcoming IOTA tour which will start during the first week of June. The callsign will be H44IOTA (not H40IOTA as mentioned earlier). The group now has a Web, Twitter and FaceBook page at: http://www.h44iota.com
https://twitter.com/h44iota
https://www.facebook.com/pages/H44-IOTA-DXpedition/136003426577924

Activity will be on 80-10 meters using CW and SSB. The suggested
frequencies are:
CW - 3530, 7030, 10115, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 3755, 7055, 14260, 18128, 21260, 24950, 28460 and 28560 kHz

All QSL requests are via QSL Manager Rex Turvin, NR6M. For updates,
it is suggested to watch: http://www.qrz.com/db/H40RK

HB30, SWITZERLAND. Member of the Tera Radio Club (HB9OK) will celebrate
their 30th anniversary by using the callsign HB30OK until the end of the
year. Look for operators Marco/HB9OCR, Luigi/HB9CXZ, Claudio/HB9OAU and
Marco/HB9EUY to use the special callsign during the CQWW WPX SSB Contest
as a Multi-Single entry. QSL via HB9OCR, director by the Bureau.

HC, ECUADOR. Dr. Rick, NE8Z/HC1MD, will once again be active from here
between March 21st and April 11th. Activity will be from Tumbaco on
40-10 meters operating CW, SSB and RTTY, using a TS-850s with a Heath
SB-200 into a Carolina Windom (40-10m) antenna. QSL via K8LJG. View the
HC DX-Diplomas at: http://webpages.charter.net/ne8z/NE8Z/Welcome.html

HQ9, HONDURAS. Ray, WQ7R, will once again be active as HQ9R from Honduras,
but this time during the CQ WW WPX SSB Contest (March 30-31st) as Single-
Op/Single-Band (10m)/Low-Power entry. QSL via K5WW or LoTW.

IOTA NEWS.............
AF-019. (Update) An international team of operators will be active as
IG9Y from Lampedusa Island between October 17-30th. Operators
mentioned are Khalid/A61BK, Gianni/IT9BUN, Roy/IW9ELR, Don/
JH5GHM, Boyko/LZ1QN, Dale/N3BNA, Frederic/ON4LG, Aurelio/PC5A,
Romeo/S52RU, Peter/S54W, Renato/S57UN and Drago/S59A. Activity
will be on 160-6 meters using CW, SSB, and RTTY, with four
stations on the air. The team will be in the CQWW DX SSB Contest
(October 26-27th) as a Multi-2 entry. QSL via ON4LG. An OQRS
will be available for direct and Bureau cards. Visit their Web
page at: http://ig9.ii9p.com

AS-073. Jack, SP5APW, will be active as 9M2/SP5APW from Perhentian
Besar Island between May 1-7th. Activity will be SSB and a
little digital. His license is good for 160-10 meters. QSL
via his home callsign, direct, by the Bureau or use LoTW.
For updates, watch: http://as-073.blogspot.com

AS-118. Members of the Kuwait Amateur Radio Society are once again
active as 9K2F from Failaka Island between now and March
18th. This is their 7th annual trip. Activity will be on
the HF bands. QSL via 9K2HN. Watch last year's operation
at: http://www.youtube.com/watch?v=EdmJe2saYm4

EU-006. Members of the Papa Lima DX Group will be active as EJ0PL
from Inishmore Islands (Aran Islands) between July 23-29th.
Ten operators plan to have three stations active on 80-6
meters using CW, SSB and the Digital modes. Activity will
include the RSGB IOTA Contest (July 27-28th) as a Multi-Op/

High-Power entry. They will use Hexbeams (20-6m) and verticals (80-30m). Operators mentioned are Michal/EI3KG, John/EI4GK, Adam/EI5JQ, Robert/EI6KD, Oleg/EI7KD, Waldi/SP7IDX, Jerzy/SQ7JT, David/EI9FBB, Ark/EI9KC and Mietek/SP9NWN. QSL via EI5JQ, direct or by the Bureau. An OQRS will be available via ClubLog. Log will be uploaded to LoTW, eQSL and HRDLOG.net.

EU-008. Members of the Camb-Hams will once again activate the Isle of Mull (IOSA NH15, SCOTIA CN10, WLOTA 2485), Inner Hebrides, as GS3PYE/p between May 10-16th. They were there in April 2008. Activity will be on all HF bands (600-10m) using five stations with amps. Operations will also be on 6m, 4m and 2m. They will focus more effort on 2m EME. QSL via M0VFC (OQRS via QRZ.com). More details and updates can be found at: http://dx.camb-hams.com

EU-038. Wim, PA0WRS, will be active as homecall/p from Ameland Island (WLOTA 1059) between April 19-26th. Activity will be on the HF bands, all modes, propagation permitting. QSL via his home callsign, direct or by the Bureau.

EU-039. Operators Jacques/ON5OO, Jean-Jacques/ON7EQ, Noel/ON4NS, Pascal/ON5RA, Ann/ON5AR, Roger/ON6WU, Martin/ON4VMA, Frank/ON5NQ, Peter/ON8ZZ and Frederik/ON8ZL will be active as TM7T from Grand Ile (DIFM MA-004, WLOTA 0424) in the Iles Chausey Group between July 26-28th. Activity will include the RSGB IOTA Contest (July 27-28th) as a Multi-Op/24hr/DXpedition entry. Operations will be on 80-10 meters using CW and SSB. QSL via ON8ZL, direct (QRZ.com) or by the ON Bureau. See the QRZ.com Web page for more details at: http://www.qrz.com/db/TM7T

NA-174. (Update to OPDX.1103) The "DX-World.net" reports that David, VE3VID, who is currently active as VY0/VE3VID from the rare Igloolik Island (WW.Loc EP-99), will be there until March 29th, but he will return later this year during September/October. Currently, David uses a 20m dipole on RTTY, but has plans to use a multiband antenna upon his return. His work obligations will determine his activity, but generally he will be on the air after 2100z and definitely weekends. QSL via his home callsign, by the Bureau or direct to: David Gerrard, 1653 Mountain Rd, R.R. #1, Westport, ON, K0G 1X0, Canada.

OC-090. Victor, R6AF, will be active as DU1/R6AF from Busuanga Island possibly April 27th and May 3rd. Watch for updates on Twitter: https://twitter.com/r6af

SA-050. José, CE8DMT, will be active from Navarino Island (WAP CHL-13) in the Chilean Antarctic Province between March 23-24th, to meet the needs for European and North American stations seeking WAP Antarctic stations award. José will operate according to the following schedule: 1330-1530z on 15 meters (21277 kHz) 1600-1700z on 10 meters (28477 kHz)

He will use a Kenwood TS-130S into a Hi-Gain 3 element Yagi
beam. QSL via address on QRZ.com. Suggested URLs are:
http://www.waponline.it/NewsInformation/tabid/225/Default.aspx
http://yimber-gaviria.blogspot.com/2013/03/chile-antartic-province-ce8-23-24-de.html

IS0, SARDINIA. Hubert, OE3FHA, will be active as IS0/OE3FHA from Sardinia
(EU-024, IIA SD-001, MIA MIS-035, WLOTA 1608) between September 8-26th.
Activity will be on 40/20/15 meters using SSB with 100 watts and a CP6
Diamond antenna. QSL via his home callsign, by the ARI Bureau or direct.

J3, GRENADA. Operators Tom/OE2ATN and Franz/OE2SNL will be on a suitcase
DXpedition to Grenada Island (NA-024, WLOTA 0718) between October 28th
and November 10th. The callsign has not been issued yet. Operations will
be on CW, SSB and RTTY with 100-200 watts. A Web page is under constructions.
More details will be forthcoming.

KH9, WAKE ISLAND (Press Release). Joe, W8GEX, sent out the following
press release on March 10th [edited]: "Press Release #2 - Wake Atoll
Commemorative DXpedition -- "We are pleased to announce the callsign for
the Commemoration anticipated taking place at the beginning of October,
2013.
K9W has been assigned to this event! The actual days of use will be
announced on our website and through the normal media channels.
Additionally, we are happy to announce that Val, NV9L, and Col, MMØNDX,
have joined the Team as Pilot Stations. Pilot stations are essential
members of the DXpedition's operation and gather the DX communities'
feedback during the event. This information allows the 'on island team'
to tailor their activities to the needs of stations worldwide.
We have received our first foundation support from INDEXA and donations
from clubs and individuals.
In-depth planning is continuing and progressing nicely thanks to the
efforts of many members of the DX community. Their input and assistance
is greatly appreciated and welcomed!
Please check our web site often for updates: http://www.wake2013.org/
K9W Wake Atoll Management Team"

OH0, ALAND ISLANDS. Operators Pertti/OG2W and Raimo/OH0BCI will be active as OH0/OG2W from the Aland Islands(EU-002, WLOTA 1373, WWFF OHFF-037) between March 20-24th. Activity will be on all HF bands and modes. QSL via OG2W, direct or by the Bureau.

P5, NORTH KOREA (Update To P5/K6VVA Pending "CW ONLY" & IOTA AS-197 Activation Proposal Project). Rick, K6VVA, posted another new supplement (INFO UPDATE #2) at: http://www.k6vva.com/p5/p5infoupdate2.pdf
If you have not read the general information page <http://www.k6vva.com/p5> and/or Rick's "INFO UPDATE #1" <http://www.k6vva.com/p5/p5infoupdate1.pdf>, it is suggested that you do so before reading "INFO UPDATE #2".
In short, Rick updates everyone on his efforts and continues to pursue his goal of activating P5 from an IOTA (AS-197) on CW only. However, in "INFO UPDATE #2" he states, "Yet a new alternative route to potential success has also materialized, and I decided to unleash the full 'long term' plan, which has been to activate ALL of the four P5 IOTA Designators (AS-195, AS-196, AS-197 and AS-198)." He also talks about the recent appalling behavior of DXpedition pileups.

PB33, NETHERLANDS (Special Event). Jaap, PA7DA, will be active with the special callsign PB33Q (Princess Beatrix 33 years Queen) between April 20th and May 1st. On April 30th, Queen Beatrix will hand over the throne to her eldest son Prince Willem Alexander. On April 30th, 1980, she took over the throne of her mother Juliana. When she abdicates her throne, she has been the Queen for almost 33 years. Activity will be on the HF bands, as well as 6 and 2 meters. QSL please via the Bureau. For more details, see: http://pa7da.jouwweb.nl/pb33q
ADDED NOTE: There will be several other amateur stations to be active with special callsigns during this event. As this was being written, look for the following announced special callsigns:
PA33KBX in Zeeuws Vlaanderen (QSL PA0ABM) PD6KING -> PD9ND
PB2013KING -> PA9LUC PE6KING -> PE1KFC
PB6KING -> PB2JJ PA200KING -> PD5ROB
PC6KING -> PC7C PC13KING -> PA1DV

PJ4, BONAIRE (Update to OPDX.1103). Operators Steven/W1SRD and Dean/N6DE will be active as PJ4/homecall from the "Radio House" <http://www.pj4g.com> on Bonaire (SA-006, WLOTA LH-1279) between March 26th and April 1st. They plan to be active as PJ4D in the CQWW WPX SSB Contest (March 30-31st) as a Multi-2 entry. Operation before and after the contest will be focused on RTTY. QSL via LoTW is preferred. Direct to W1SRD with SASE/return postage for the contest callsign. QSL the QSOs to their homecalls for contacts outside of the contest.

PJ7, SINT MAARTEN. Operators Randy/N0TG, Ron/AA4VK and Jeff/N1SNB will be active as PJ7/homecall from Dutch Sint Maarten (NA-105, WLOTA 0711, DIFO FS-001) between March 15-23rd. Activity will be a suitcase operation on 40-10 meters using CW and SSB, with wire antennas and 100 watts. QSL "ALL" callsigns via AA4VK.

T2, TUVALU (Back on again and now active!). No sooner than OPDX.1103 was
sent out, word came out that operators Gavin/GM0GAV, Robert/GM3YTS and
Tom/GM4FDM had to change their operating plans to Tuvalu because their
outward flight from Glasgow was cancelled due to an undercarriage problem.
This effected all their others flights they were due to catch, especially
the connection from Fiji to Tuvalu. However when this happened, their
fourth operator Clive, GM3POI, was already on route to Fiji and did
continue onto Tuvalu while the other three operators were making plans
to operate from Fiji. By Tuesday, Clive, GM3POI, made it to Tuvalu and
was planning to operate using a rig (w/100 watts) and wire antennas. Then
on Wednesday, their Blog reported that Gav/GM0GAV, Rob/GM3YTS and Tom/
GM4FDM were booked on a Saturday flight to Tuvalu. They were initially
booked on a Thursday flight, however, since arriving in Fiji Monday, their
luggage did not arrived and was still missing. The Saturday flight was
their last chance of going to Tuvalu, but if no luggage by then they would
return home. Then on March 14th, their luggage finally showed up. The three
Scots were able to leave on Saturday, and by the time you read this, they
should be on the air from Funafuti Atoll (OC-015). For updates, watch the

Web Blog page at: http://t2gm.org
Activity should be 160-10 meters using CW, SSB and RTTY. See suggested frequencies in OPDX.1103. If the InterNet is available, logs will be uploaded to ClubLog and LoTW. QSL Manager will be GM4FDM (QRZ.com), direct or by the Bureau. A OQRS will be available via ClubLog.
LAST MINUTE UPDATE: Activity from T2GM may be limited. Operators report, "On the flight to Tuvalu from Suva, Fiji, Rob's (GM3YTS) luggage was again lost. This bag contained band pass filters and coax, so antenna choice until Tuesday will be limited. (It's expected the missing luggage will arrive on the Tuesday flight). The team will QRT on Friday, March 22nd. at 1830z."

T2, TUVALU. A German team consisting of Rich/DK8YY, Detlef/DL3ALI and Ingolf/DL4JS will be active from the "Hideaway Guesthouse" on Funafuti Atoll (OC-015), the capital of the island nation of Tuvalu, between March 23rd and April 4th. They have requested the callsign T2YY and will receive the license upon their arrival. Activity will be on 80-10 meters, possibly 160m, using CW, SSB and RTTY. They plan on having two stations with amps using a Hexbeam for the HF bands and verticals for 80/40/30m. QSL via DH7WW.

T2, TUVALU (Reminder). Tim, NL8F, is expected to be active from Tuvalu between March 19th and April 2nd. His callsign is not yet known, but he will obtain his license upon his arrival on Tuvalu. Activity will probably be mostly SSB. QSL via K8NA.

TO7, MAYOTTE. Hartwig, DL7BC, will once agin be active as FH/DL7BC from Mayotte (AF-027) between March 26th and April 12th. Activity will be from Bruno's, DH1BL/FH4VOS, QTH. Operations will be on 80-10 meters plus participation in CQWW WPX SSB Contest signing TO7BC. QSL via his home callsign, direct or by the Bureau. For more details, visit it his Web site at: http://www.qslnet.de/member/dl7bc/en_TO7BC.htm

XR0, EASTER ISLAND (Reminder). Just a reminder that a UK DXpedition team will be active as XR0YG from Easter Island (SA-001) between March 20-27th (see OPDX.1090). Activity will be on all bands 160-10 meters, mainly CW. Even though the operations will be on the HF bands, they also plan to work challenging paths on the low bands and with an emphasis on Europe. ClubLog and LoTW uploads will occur daily. The log search on ClubLog will be available at: https://secure.clublog.org/charts/?c=XR0YG
There will also be OQRS available. QSL via G3TXF and LoTW. Visit their Web page at: http://xr0yg.com

YE1, INDONESIA. Team members of the Bekasi Club Station (YE1ZAT) and the Jakarta Contest DX Team (YE0X) will be active as YE1K from Bekasi (OC-021, WLOTA 1660) during the CQWW WPX SSB Contest (March 30-31st) as a Multi-Multi entry. QSL via YE1ZAT.

20861. Re: [DX-IS] DX Nirvana

Yahoo group: DX-IS (2013)
Date: 2013-03-17 17:36:03 UTC
From: Steve Lybarger
Topic: 20857 Message: 20861

Derek,

The DXpedition folks would setup a reverse beacon thingy on the rock, beach, etc. Once it is operational and reporting to the internet, return to the boat and “pound some Bud” until breakdown. They could avoid most of the heat/cold, insects, crabs... That might put the “UP UP UP cops” out of a job, too.
Steve, NU7T

20862. Report SIDC Ursigram

SIDC URSIGRAM 30318
SIDC SOLAR BULLETIN 18 Mar 2013, 1159UT
SIDC FORECAST (valid from 1230UT, 18 Mar 2013 until 20 Mar 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Proton event expected (10 pfu at >10 MeV)
PREDICTIONS FOR 18 Mar 2013 10CM FLUX: 126 / AP: 016
PREDICTIONS FOR 19 Mar 2013 10CM FLUX: 123 / AP: 006
PREDICTIONS FOR 20 Mar 2013 10CM FLUX: 123 / AP: 004
COMMENT: Solar activity is eruptive with 6 C-flares in the past 12
hours. Four C-flares originated from NOAA AR1698 and two C-flares came
from an unnumbered region near AR1700. Solar activity is expected to
remain eruptive for the next 24 hours, mainly caused by AR1698. C-flares
are very likely, but there is also a slight chance for an M-flare.
AR1698 is approaching the west limb, so if it erupts a proton event is
possible. The solar wind is getting stable again; in the past 24 hours
the speed has decreased from 750 km/s to about 500 km/s. The
interplanetary magnetic field has returned to about 10nT, with a
positive Bz-component. Geomagnetic conditions are expected to be quiet
for the next 48 hours.

20863. Need CQ Zone 2 CW

Yahoo group: DX-IS (2013)
Date: 2013-03-18 13:05:44 UTC
From: GARY HUBER
Topic: 20863 Message: 20863

After looking at my DXLab DXkeeper log it is apparent I need only ZONE two to complete CQ WAZ CW. Since Zone two is not that far from W9 land I'd like to find someone who could help me get and set a sked with someone in VO2 (Labrador), the portion of VE2 Quebec north of the 50th parallel, and Nunavut Territories east of 102 degrees (Includes the islands of King Christian, King William. Prince of Wales, Somerset, Bathurst, Devon, Ellesmere, Baffin and the Melville and Boothia Peninsulas, excluding Akimiski Island, Bear Islands and East Pen Island in Hudson Bay).

Anyone?

Best regards,

CSM(r) Gary L Huber – AB9M

Keep an eye/ear for Naz/VO2NS - he's quite active on the higher bands
(particularly 20m) . He may be willing to sked - not sure,

73,

~iain / N6ML

I think he's the only kid in town (town being Zone 2), but as Iain says, he's on often. I heard him in the last week. Usually 20M, and always CW. I don't spot much on DX Clusters, but I do spot him because he is in Zone 2.

He is retired and spends a lot of time on the air. Has a hotmail address on QRZ.COM, or set an alarm with DX Labs -- the skimmers will find him if someone doesn't spot him manually. Wait for this geomagnetic activity to subside 'cuz he far enough north that it will really attenuate him.

In years past some OPs used to go to Zone 2 for major contests, but not as often lately. Yuru (VE3DZ) holds the call VE2IM, and he sometimes operates from Zone 2 during contests. He's almost all CW, but he doesn't live there and might only visit once or twice a year.

73, Paul VE1DX

FWIW, I have worked Naz several times/bands on SSB, and once on RTTY
(CQ WW, last month) - all during contests.

73,

Thank you all. I will look for VO2NS and / or try to contact him for a possible sked. I know I have NOT worked him or anyone else in ZONE 2 on CW recently as DXKeeper keeps track for me.

See you in the pile-ups, contests, etc.

73 ES DX,
Gary -- AB9M

FWIW, I have worked Naz several times/bands on SSB, and once on RTTY (CQ WW, last month) - all during contests.

VE2CSI occasionally gets on and he is in Z2. He also uses Tim, M0URX, ass his QSL route so you can get it via OQRS.

I think he's the only kid in town (town being Zone 2), but as Iain
says, he's on often. I heard him in the last week. Usually 20M, and
always CW. I don't spot much on DX Clusters, but I do spot him because

he is in Zone 2.

He is retired and spends a lot of time on the air. Has a hotmail address on QRZ.COM, or set an alarm with DX Labs -- the skimmers will find him if someone doesn't spot him manually. Wait for this geomagnetic activity to subside 'cuz he far enough north that it will really attenuate him.

In years past some OPs used to go to Zone 2 for major contests, but not as often lately. Yuru (VE3DZ) holds the call VE2IM, and he sometimes operates from Zone 2 during contests. He's almost all CW, but he doesn't live there and might only visit once or twice a year.

20872. First Class International Forever Stamp

Yahoo group: DX-IS (2013)
Date: 2013-03-18 21:42:13 UTC
From: Richard Solomon
Topic: 20872 Message: 20872

I see the USPS has issued a new "Forever" stamp for First Class International Mail (present rate is $1.10).

Now, it's been a while since I was fluent in the UPU regs, but I remember that ALL International Mail stamps must have the denomination, in at least Arabic Numerals, imprinted on the stamp, as well as the name of the issuing entity (there is ONLY one exemption to the name rule).

I guess the regs changed recently. Any experts out there on the UPU regs ?

73, Dick, W1KSZ

The US was not first to do it. I received a mailing from Finland in early January that had a new forever stamp.

p.s. - A little quick googling netted this on Wiki:

UPU approval

The Universal Postal Union approved the use of non-denominated stamps on international mail in 1995.

20875. RE: [DX-IS] Need CQ Zone 2 CW

Yahoo group: DX-IS (2013)
Date: 2013-03-19 08:38:17 UTC
From: Lance Martin
Topic: 20863 Message: 20875

Hi Gary,

Of this I am surprised.

Zone 2 is the rarest zone for us VK6ers here in Perth. It is always a thrill for us to hear someone in Zone 2, let alone work.

I have been fortunate enough to snag VO2NS on 20/15m and was delighted to contact VO2AAA in the Beru on 20m (whom I would have loved to have made the trip on 40m but alas...).

With equinox upon us, it's prime time for zone 2 here, so will be looking out for Naz on 40m.

73, Lance - VK6DU

From: DX-IS@yahoogroups.com [mailto:DX-IS@yahoogroups.com] On Behalf Of GARY HUBER

Subject: [DX-IS] Need CQ Zone 2 CW

After looking at my DXLab DXkeeper log it is apparent I need only ZONE two to complete CQ WAZ CW. Since Zone two is not that far from W9 land I'd like to find someone who could help me get and set a sked with someone in VO2 (Labrador), the portion of VE2 Quebec north of the 50th parallel, and Nunavut Territories east of 102 degrees (Includes the islands of King Christian, King William. Prince of Wales, Somerset, Bathurst, Devon, Ellesmere, Baffin and the Melville and Boothia Peninsulas, excluding Akimiski Island, Bear Islands and East Pen Island in Hudson Bay).

Anyone?

Lance, after a careful review it turns out I made a QSO with K9AJ/VY0 back in 2006 and research shows that to be good for a Zone two CW contact. The problem is I cannot find the QSL (yet). It may be tucked in amongst 30 years of cards, so I'm going to send Mike a note, find out if he still has the log and go from there. I may check ClubLog to see if the 2006 op was filed.

In the mean time, I do some research on VO2NS, figure out when he's likely to be active and then plan to find him the old fashion way before he's spotted.

Hope to hear you in the chase.

Hi Gary,

Of this I am surprised.

Zone 2 is the rarest zone for us VK6ers here in Perth. It is always a thrill for us to hear someone in Zone 2, let alone work.

I have been fortunate enough to snag VO2NS on 20/15m and was delighted to contact VO2AAA in the Beru on 20m (whom I would have loved to have made the trip on 40m but alas…).

With equinox upon us, it's prime time for zone 2 here, so will be looking out for Naz on 40m.

73, Lance – VK6DU

From: DX-IS@yahoogroups.com [mailto:DX-IS@yahoogroups.com] On Behalf Of GARY HUBER

Cc: CIDXCA
Subject: [DX-IS] Need CQ Zone 2 CW

After looking at my DXLab DXkeeper log it is apparent I need only ZONE two to complete CQ WAZ CW. Since Zone two is not that far from W9 land I'd like to find someone who could help me get and set a sked with someone in VO2 (Labrador), the portion of VE2 Quebec north of the 50th parallel, and Nunavut Territories east of 102 degrees (Includes the islands of King Christian, King William. Prince of Wales, Somerset, Bathurst, Devon, Ellesmere, Baffin and the Melville and Boothia Peninsulas, excluding Akimiski Island, Bear Islands and East Pen Island in Hudson Bay).

Anyone?

Best regards,

CSM(r) Gary L Huber – AB9M

It will never happen, Gary. He will call CQ once and as soon as he
sends the NS portion of his call, a skimmer will pick him up, send it to
a DX Cluster and 400 mice will click on the spot and send their call.
You won't find anything you need the old fashioned way tuning around.
That was very rewarding and most of my DXCC kills were found that way,
or at least by human spots. In the past couple of years the Skimmers
have changed that.

I've accepted it, and I use Skimmer technology to my advantage. I
even broadcast Skimmer spots on my DX Cluster node. However, I know
once I click on the call in question, I won't find the guy alone . . .
I'll find a pileup. That's the way it is in 2013.

If you want to find something on your own, you need to do it on
SSB. Occasionally I go into the phone bands for that very reason . . .
less chance of a pileup until some braggart works him and just has to
tell the world "TNX 9th Band, E-A-S-Y, One CALL!!!!!!" and the the SSB
mouse clickers are on him.

What is going on with propagation? The SFI is 115, the sunspot number is 116, the K index is 0, and I am hearing vitually no DX. To top it off, it is the equinox, which usually is a boost for propagation. These conditions really have me stumped.

From: GARY HUBER
Topic: 20863 Message: 20883

Paul, its not a SSB WAZ Zone two QSO that I need but a CW QSO. And for me, “doing it the hard way”, is figuring out the operator’s habits and being on frequency and ready BEFORE he tunes up or sends the first dit so as to be the first QSO of his operating session. In the past I’ve even called the DX before he I.D.’d much to their consternation. Before the skimmers, the first spots were 15 to 20 minutes AFTER the first contacts were made by the Old Men in the Dxing game so all I had to do was look for the pattern in start time and be on frequency a half hour earlier. Now there’s the reverse skimmer constellation which provides even better info.

When it comes to CW skimmers, I can play that game too. My FLEX-1500 with VAC feeding CWSkimmer provides a full 15 KHz of every CW signal received at my QTH, so that I can see all 400 of the mice calling, their individual callsigns and the 599 when they work the DX. We may not like the technology, but use it we must, lest we get left behind. Its how we use the technology Paul, that should matter to us Old Timers who like to turn the BIG KNOB, rather than click the mouse.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30320
SIDC SOLAR BULLETIN 20 Mar 2013, 1147UT
SIDC FORECAST (valid from 1230UT, 20 Mar 2013 until 22 Mar 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Minor geomagnetic storm expected (A>=30 or K=5)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 20 Mar 2013 10CM FLUX: 104 / AP: 012
PREDICTIONS FOR 21 Mar 2013 10CM FLUX: 102 / AP: 029
PREDICTIONS FOR 22 Mar 2013 10CM FLUX: 102 / AP: 013
COMMENT: Solar flaring activity is at C-class level with a C5.5 flare
as main event from NOAA AR1698, which is behind the west limb now. In
the next few hours solar activity is expected to be quiet. Small C-class
flares are likely with NOAA AR1692 (and AR1695) being the biggest
candidate as source region. The last 12 hours the solar wind speed was
between 400 and 500 km/s, now being 470 km/s. The Bz-component of the
interplanetary magnetic field is fluctuating between -5 and +5 nT.
Geomagnetic conditions are quiet to unsettled and are expected to
increase within the next 24 to 48 hours to active to minor storm levels,
due to the expected arrival of a halo CME of Sunday March 17 at 15h48
UT. From analysis of new data, the CME measured yesterday at 8h UT is
related to the NOAA AR 1698 and will probably not arrive at Earth.

PREDICTIONS FOR 23 Mar 2013 10CM FLUX: 110 / AP: 001
COMMENT: Solar activity was quiet for the past 24 hours, with only a
C1.0 flare from NOAA AR1692. Solar activity is expected to remain quiet
with a slight chance for an isolated C-flare. On March 20 UT ACE
measured a jump in the interplanetary magnetic field to 11 nT (starting
at 12h UT) and in the solar wind speed to 732 km/s, probably due to the
arrival of the CME of March 17. The solar wind speed and interplanetary
magnetic field are now returning to stable values, with a current speed
of 428 km/s and a magnetic field of 6 nT. Geomagnetic conditions in
Dourbes reached active levels (K=4) from 0 to 6 UT this morning.
Geomagnetic activity is expected to return to quiet levels and remain so
for the next 48 hours.

The USPS issued round a round stamp in 2000 for the Express Mail Rate.
They also issued a sheet of 5 Pentagonal Stamps, also in 2000.

They also issued Triangle Stamps in 1997 to commemorate Pacific 97.

I think they soon got rid of the guys that thought those up.

But, lots of countries have issued stamps of various sizes. Who could
forget
Tannu Tuva !!

20895. RE: [DX-IS] Re: First Class International Forever Stamp

Yahoo group: DX-IS (2013)
Date: 2013-03-21 17:49:15 UTC
From: VE1AL
Topic: 20872 Message: 20895

From their issuance in 2012, I used Canada's oversized Titanic stamp on most outgoing cards to overseas destinations. I didn't keep track to the number I used but it would have been a minimum of two dozen. This stamp may have been the largest stamp ever issued in Canada (after all, the Titanic was huge).

The rate of return on those cards has been dismal. This leads me to believe that the envelopes and their contents disappeared some time before they reached the addressee.

Using special commemorative stamps is nice (and I certainly appreciate it when I receive them) but I'm beginning to re-think my use special stamps in the future.

73

Al, VE1AL

This is worth a quick scan, when you've worked XR0YG on all the bands they've been on so-far........

SB DX @ ARL $ARLD012
ARLD012 DX news

ZCZC AE12
QST de W1AW
DX Bulletin 12 ARLD012
>From ARRL Headquarters
Newington CT March 21, 2013
To all radio amateurs

SB DX ARL ARLD012
ARLD012 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

RWANDA, 9X. Kiyo, JR1IZM is QRV as 9X0ZM in Kigali and expects to stay here for a year. He is active in his free time on 40 to 10 meters using mainly PSK31 and JT65 with some CW and SSB. QSL via JO1CRA.

TONGA, A3. Jacek, SP5EAQ will be QRV as A3EAQ from Tongatapu Island, IOTA OC-049, from March 26 to April 16. Activity will be on 80 to 10 meters using only SSB. QSL to home call.

BHUTAN, A5. Yuki, JH1NBN is QRV as A52W in his spare time until March 26 while here on business. QSL direct to home call.

EASTER ISLAND, CE0. Operators G7VJR, G3TXF, G4IRN and G3ZAY are QRV as XR0YG until March 27. Activity is on 160 to 10 meters using mostly CW. QSL via G3TXF.

IRELAND, EI. Olivier, ON4EI is QRV as EI8GQB from Fethard, IOTA EU-115, until April 3 using green power. He will be active as EI1A in the upcoming CW WW WPX SSB contest. QSL to home call.

MAYOTTE ISLAND, FH. Hartwig, DL7BC will be QRV as TO7BC or FH/DL7BC from March 26 to April 12. Activity will be on the HF bands using RTTY and PSK31. This includes being an entry in the upcoming CQ WW WPX SB contest. QSL to home call.

SWITZERLAND, HB. Members of the Tera Radio Club are QRV with special event call sign HB30OK until the end of 2013 in celebration of their 30th anniversary. They will also be active in the upcoming CQ WW WPX SSB contest as a Multi/Single entry. QSL via HB9OCR.

THAILAND, HS. Tana, E27EK plans to be QRV as E27EK/p from Chang Island, IOTA AS-125, on March 26. Activity will be on all HF bands. QSL to home call.

ALAND ISLANDS, OH0. Pertti, OG2W and Raimo, OH0BCI are QRV as OH0/OG2W until March 24. Activity is on all band and modes. QSL via OG2W.

BONAIRE, PJ4. Operators Steven, W1SRD and Dean, N6DE will be QRV as PJ4/home calls from March 26 to April 1. Activity will be on the HF bands with a focus on RTTY. They will also be active as PJ4D as a Multi-2 entry in the upcoming CQ WW WPX SSB contest. QSL contest call direct via W1SRD and all others to home calls.

GREECE, SV. Markus, DJ4EL will be QRV as SV8/DJ4EL from the islands of Proti and Sapientza, IOTA EU-158, from March 25 to 29. Activity will be on 15 meters. QSL to home call.

TUVALU, T2. Rich, DK8YY, Detlef, DL3ALI and Ingolf, DL4JS will be QRV as T2YY from March 23 to April 4 from Funafuti Atoll. Activity will be with two stations on the HF bands using CW, SSB and RTTY. QSL to DH7WW.

SOMALIA, T5. Tevfik, TA1HZ will be QRV as T5TC in Mogadishu from March 23 to April 4 while working on a humanitarian mission. QSL to home call.

ASIATIC RUSSIA, UA0. Vlad, RV3EFH will be QRV as RV3EFH/0 from Bolshevik Island, IOTA AS-042, from March 25 to October 2014. Activity will be on 40, 20, 15 and 10 meters using CW, SSB and various digital modes. QSL direct via RZ3EA.

UZBEKISTAN, UK. Operator UA1ZEY is QRV as UK/UA1ZEY from Samarkand until March 31. Activity is on the HF bands using CW and SSB. QSL direct to home call.

MARSHALL ISLANDS, V7. Ted, JF1CCH is QRV as V73TS until March 26. Activity is on 40 to 10 meters using only CW. QSL to home call.

NIUE, ZK2. Alan, VK4WR and Graeme, VK4FI are QRV as E6RQ and E6SG, respectively, until March 29. Activity is mainly on 6 meters with some HF. QSL both calls direct via VK4FI.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Rwanda, 9X0ZM, 2013 operation.

THIS WEEKEND ON THE RADIO. QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint, FOC CW QSO Party, Nauryz DX Contest, Alaska QSO Party and the UBA Spring SSB Contest are all scheduled for this upcoming weekend. The SKCC CW Sprint, CWops Mini-CWT CW Test and QRP CW Fox Hunt are scheduled for March 27. Please see March QST, page 84, and the ARRL and WA7BNM Contest websites for details.

SIDC SOLAR BULLETIN 22 Mar 2013, 1236UT
SIDC FORECAST (valid from 1230UT, 22 Mar 2013 until 24 Mar 2013)
SOLAR FLARES : Eruptive (C-class flares expected, probability >= 50%)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 22 Mar 2013 10CM FLUX: 104 / AP: 002
PREDICTIONS FOR 23 Mar 2013 10CM FLUX: 104 / AP: 001
PREDICTIONS FOR 24 Mar 2013 10CM FLUX: 104 / AP: 001
COMMENT: Flaring activity of the last few hours mainly originated from
active region NOAA 1692, which is at the west limb now. The largest
solar flare was an M1.6 flare which occurred at 21 March 22h UT. A CME
was associated with this flare, visible in LASCO as well as in STEREO A
and B. The CME seems to propagate to the west. At most we expect a
glancing blow of this CME to arrive at Earth. We are currently under
influence of a slow solar wind with a speed varying between 350 and 450
km/s and an interplanetary magnetic field with a magnitude of 6 nT.
Geomagnetic conditions are quiet and are expected to remain so for the
next 48 hours.

20899. Re: First Class International Forever Stamp

Yahoo group: DX-IS (2013)
Date: 2013-03-22 16:22:07 UTC
From: w8jmf
Topic: 20872 Message: 20899

First round one I remember but someone else recalled a round Express mail stamp. The Forever stamp on the letter I got from Finland was also round so maybe that's the preferred shape for International Forever stamps at this point in time. I dunno...

20900. ARLP012 Propagation de K7RA

Yahoo group: DX-IS (2013)
Date: 2013-03-22 18:10:03 UTC
From: jjreisert@...
Topic: 2832 Message: 20900

SB PROP @ ARL $ARLP012
ARLP012 Propagation de K7RA

ZCZC AP12
QST de W1AW
Propagation Forecast Bulletin 12 ARLP012
>From Tad Cook, K7RA
Seattle, WA March 22, 2013
To all radio amateurs

SB PROP ARL ARLP012
ARLP012 Propagation de K7RA

Average daily sunspot numbers over the past week (March 14-20) were up 16.2 points to 101.1, while average daily solar flux remained about the same, rising from 118.5 to 119. An eruption on March 15 caused a CME (Coronal Mass Ejection) which struck Earth on March 17, causing the planetary A index to jump to 46.

The predicted solar flux is 105 on March 22, 100 on March 23-27, 105 on March 28, 100 on March 29-30, 105 on March 31, 110 and 120 on April 1-2, 125 on April 3-6, 120 on April 7-8, 115 on April 9, 110 on April 10-11, then 105, 100, 120, 115 and 110 on April 12-16.

The planetary A index is predicted to be 8 on March 22-23, 5 on March 24-26, 12 on March 27-28, 10 on March 29, 5 on March 30 through April 16, and 8 on April 17.

F.K. Janda, OK1HH of the Czech Propagation Interest Group predicts the geomagnetic field will be quiet to active March 22, quiet to unsettled March 23, quiet March 24, mostly quiet March 25, quiet March 26, active to disturbed March 27-28, quiet to active March 29 and mostly quiet March 30-31.

He continues with quiet April 1-3, mostly quiet April 4, quiet April 5, quiet to unsettled April 6, quiet April 7, quiet to unsettled April 8, quiet April 9, mostly quiet April 10, quiet to unsettled April 11 and active to disturbed April 12.

Last weekend on March 16-18 the planetary A index was 10, 46 and 7. How well did our sources of geomagnetic forecasts foresee this?

>From late January through March 11, NOAA/USAF predicted a planetary A index value of 5 for all three days. This seems to be their default predicted value for low activity. I've never seen them issue a prediction for an A index value below 5, even though since the first of the year the planetary A index has been below this value on

January 1-12, 15, 21-24, 28-31, February 1, 3-6, 9-12, 15, 18, 24-25, 27, March 4-8, 10 and 13.

Their forecast was revised on March 12, when the values changed to 10, 5 and 5. That changed to 12, 5 and 5 on March 13-14, and on March 15, the forecast for March 16-18 was 12, 39 and 20. So two days prior to the event, they predicted 39 for March 17, which is not bad.

What did OK1HH predict for those dates? On February 28 the prediction was quiet to unsettled on March 16, and mostly quiet March 17-18. The March 7 prediction was quiet to unsettled on March 16-17 and quiet March 18. The March 14 prediction was quiet to unsettled March 16-17 and mostly quiet March 18, echoing the prediction from two weeks prior. Of course, the U.S. government source has the advantage of releasing a new prediction every day.

Spaceweather.com issued an alert about the event on Friday, March 15 at 2355 UTC. The message titled "Geomagnetic Storm Warning" said, "A magnetic eruption on the Sun during the early hours of March 15th hurled a coronal mass ejection (CME) directly toward Earth. NOAA forecasters estimate a 70% chance of polar geomagnetic storms when the CME arrives on March 17th."

Jack Kelley, K4WY of Fairfax Station, Virginia had an unusual experience on a seemingly dead band on Sunday. He wrote, "I had some interesting propagation in the wake of the CME last weekend. After checking the bands (160-10) the sole station I found was 5T0JL at S9 on 30 meters - we worked each other easily - and after listening to Jean's following QSOs I found he was working W6s almost exclusively. Again no other signal, anywhere. So how did this occur? The path was assumed to be east-west, and in darkness, but all the W6 QSOs stumped me, particularly after the worst of the CME effects. A similar scenario happened with 6V7S later that same evening as he plowed through the extremely high QRN."

This was Sunday night local time, 0130-0200z Monday. We ran this by Carl Luetzelschwab, K9LA, who indicated that the path through low latitudes was the key to success.

He wrote, "The effects from elevated K indices due to a CME include modification to the worldwide F2 region ionization. Generally the mid and high latitudes see a depletion of electrons, whereas low latitudes aren't affected too much (or even see an enhancement)."

He ran some numbers using the Space Weather Prediction Center STORM model, and said, "In both hemispheres the F2 region ionization was depleted significantly around 0200 UTC on 18 March. But the ionization at low latitudes in both hemispheres fared much better.

"Additionally, was there perhaps some 'spotlight' propagation going on? Could be. The ionosphere is very dynamic, especially under

disturbed conditions."

The day after the big blast, the New York Times ran an interesting article on solar flares and possible effects on the power grid, satellites and communications. Check it out at http://www.nytimes.com/interactive/2013/03/19/science/space/0319-solar.html and don't forget to click on the link, "Related Article," which takes you here: http://www.nytimes.com/2013/03/19/science/space/on-the-watch-for-a-solar-storm.html.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for March 14 through 20 were 133, 105, 90, 126, 116, 68, and 70, with a mean of 101.1. 10.7 cm flux was 122.8, 123.1, 126, 125.7, 117.6, 110.4, and 107.6, with a mean of 119. Estimated planetary A indices were 5, 6, 10, 46, 7, 5, and 9, with a mean of 12.6. Estimated mid-latitude A indices were 4, 5, 8, 32, 6, 4, and 7, with a mean of 9.4.

23 March 2013 A.R.I. DX Bulletin
No 1142
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

9V - Alan, G0RCI will be in Singapore and hopefully Malaysia on 1-12 April. He plans to operate as 9V1/G0RCI and 9M2/G0RCI "as much as the XYL allows". QSL via home call (direct). [TNX G0RCI]
C6 - Chuck, KG9N will be active as KG9N/C6A from Grand Bahama (NA-080) from 28 March to 4 April, including an entry in the CQ WW WPX SSB Contest. QSL via home call, direct or bureau, and LoTW. [TNX The Daily DX]
CT8 - Frank, PA4N and Dervin, PD9DX will be active as CT8/PA4N and CS8/PD9DX from Sao Miguel (EU-003), Azores from 26 March to 3 April. They will operate SSB and CW on the HF bands and maybe on 6 metres. Look for CS8/PD9DX to participate in the CQ WPX SSB Contest. QSL via home calls. [TNX NG3K]
DU - Dindo, DV1UD will visiting the islands of Bongao (OC-174), Tawi Tawi (OC-174) and Taganak (OC-225) in early April. He expects to leave Manila on 2 April, to reach Bongao by the 4th or 5th and to stay on each island for 2-3 days. This is not a DXpedition, but Dindo "will grab this opportunity to activate these rare IOTAs between his work commitments". He expects to be signing DX8DX on SSB and CW, running 100 watts into a loop antenna. QSL via M0OXO. Bookmark www.m0oxo.com/dx8dx.html for updates. [TNX The Daily DX]
GM - Graham, MM0GHM will be active as MM0GHM/m from the Isle of Barra (EU-010) on 24-29 March. QSL via home call, direct or bureau. [TNX rsgbiota.org]
H4 - The tentative dates for the H4 IOTA Tour [425DXN 1141] are as follows:
1-4 June H44 New Georgia OC-149
6-8 June H44 Russell Islands OC-168
10-13 June H44 Florida Islands OC-158
17-24 June H44 Stewart Island OC-285
1-7 July H40 Nendo Island OC-100
9-12 July H40 Vanikolo/Utupua OC-163
14-16 July H40 Reef Islands OC-065
Actual dates may vary due to the nature of the tour. Activity will be on 80-10 metres SSB and CW. Bookmark http://h44iota.com/ for updates.
KH2 - AH6KY (JA1MFR), NY8A (JG1ITH), W3JH (JR3QFB), W6LJ (JA1OZK) and

AI2K will be active as NH2KY (QSL via JR3QFB) from Guam (OC-026)
from 29 March to 2 April. They will participate in the CQ WW WPX
SSB Contest as KH2KY (QSL via JA1MFR). [TNX NG3K]
P4 - Helmut, DF7ZS will be active again from Aruba (SA-036) from 26
March to 3 April. He will participate in the CQ WW WPX SSB Contest
as P40Z; outside the contest he will be casual operating on the
WARC bands. QSL via W3HNK [TNX NG3K]
PJ4 - Steve, W1SRD and Dean, N6DE will participate in the CQ WW WPX SSB
Contest as PJ4D (QSL via LoTW or direct to W1SRD) from Bonaire
(SA-006). Outside the contest, between 26 March and 1 April, they
will be QRV as PJ4/homecall with a focus on RTTY. QSL via home
calls. [TNX OPDX Bulletin]
SV - Markus, DJ4EL will be active from IOTA group EU-158 between 25 and
29 March. He plans to operate as SV8/DJ4EL from both Proti (25-26
March) and Sapientza (28-29 March), using battery power on 15
metres only. QSL via home call. [TNX DX World]
VE - David, VE3VID is QRV in his spare time as VY0/VE3VID from Igloolik
Island (NA-174) until 29 March [425DXN 1141]. Ray, N6VR has
arranged a sked with him this Sunday, 24 March at 16 UTC (during
David's lunch break), on 14260 and up. "I am looking for guys to
email before the schedule so that I can have a list ready to run",
Ray says. You can email him at rayn6vr[@]cableone.net
VK9C - Chris, GM3WOJ and Keith, GM4YXI will be active as VK9CZ from the
Cocos-Keeling Islands (OC-003) from 30 March to 13 April [425DXN
1139]. They will operate SSB, CW and some RTTY on 160-10 metres.
They hope to have a real-time logging system and to upload to Club
Log and LoTW on a daily basis. QSL via N3SL. Further information
and updates at www.vk9cz.com.
VP9 - Kei, KG2A will be active as KG2A/VP9 from Bermuda (NA-005) from 29
March to 1 April. His main focus will be the CQ WW WPX SSB
Contest, with limited activity (mainly CW) before and after the
contest. QSL direct to KG2A.
XW - Steve, 9M6DXX will be active as XW8XZ from near Vientiane, Laos
between 30 March and 3 April. He will operate holiday style on SSB
only, using 100 watts (the maximum power permitted by the licence)
to a Butternut HF6V-X antenna with 12/17m kit. QSL via M0URX,
direct or bureau (OQRS at www.m0urx.com). Logs will be uploaded to
LoTW as quickly as possible after the operation. [TNX 9M6DXX]
YB - Hajar YB8HZ and Ram YB8BRI will be active (SSB, CW and RTTY) as
homecall/p from Balang Lompo (OC-236) on 27-31 March. They will
run two stations using a dipole for 40m and a hex beam for 30, 20,
17, 15 and 10 metres. Electricity will be available only between
10 and 16 UTC, and they will use battery power at other times.
[TNX JN6RZM]

DXCC NEWS ---> 9X0ZM (Rwanda, 2013 operation) has been approved for DXCC credit. [TNX NC1L]

OC-245 ---> Logsearch and OQRS for the recent IOTA DXpedition to Pulau Breueh can be found at www.mdxc.org/oc-245/log-on-line/.

ITALY: NEW PREFIX ---> All of the possible callsigns in the IZ-prefixed series (IZ#AAA-IZ#ZZZ) have been issued; newly licensed amateur radio operators in Italy will get callsigns with the IU prefix.

+ SILENT KEY + The DX community mourns the loss of Luis Chartarifsky, XE1L, who was stricken with a major heart attack shortly after returning to San Diego after the TX5K Clipperton Island DXpedition. A DXer, a contester and a DXpeditioner, over the years he participated in several major operations, such as XF4L (1989), 3Y0PI (1994), XR0Y & XR0Z (Easter Island & Salas y Gomez 1995), XZ0A (2000), 9M0M (Spratly Islands 2001), S07L (2002), TZ6RD (2003) and 9N7MD (2011). He was also involved in several IOTA activations, notably from three Mexican "new ones" back in 1993. An on-line condolences book, set up by the Radio Club Satelite, can be found at http://www.xe1rcs.org.mx/xe1l.
Other recently reported Silent Keys include Petras Mikalajunas (LY1PM, ex UP2BBB), Vladimir E. Sviridov (UA6AGK), Aleksandr P. Denisov (UR5FEL) and Jayant Bharamgonda Patil (VU2JBP, ex VU2JCX).

20904. Re: First Class International Forever Stamp

Yahoo group: DX-IS (2013)
Date: 2013-03-23 13:42:57 UTC
From: John
Topic: 20872 Message: 20904

IMHO, using any stamp that attracts attention only increases the probability that your envelope will be stolen rather than delivered. I use the Automated Postal Center at my local post office, which prints very plain computer-generated stamps.

73,

John, K9MM

SIDC URSIGRAM 30323
SIDC SOLAR BULLETIN 23 Mar 2013, 1208UT
SIDC FORECAST (valid from 1230UT, 23 Mar 2013 until 25 Mar 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 23 Mar 2013 10CM FLUX: 098 / AP: 004
PREDICTIONS FOR 24 Mar 2013 10CM FLUX: 098 / AP: 004
PREDICTIONS FOR 25 Mar 2013 10CM FLUX: 100 / AP: 003
COMMENT: Solar activity has been low during the past day with a few
small C-flares originating from active region NOAA 1692, located behind
the west limb. Solar activity is expected to be low for the next 48
hours. The solar wind speed is around 370 km/s and the Bz-component of
the interplanetary magnetic field is fluctuating between -5 and +5 nT.
Geomagnetic conditions have been quiet and are expected to remain so for
the next 48 hours.

The machine purchased DX airmail and conventional (read domestic) "stamps" at my
Auto USPS (just inside the door of the post office) mail center are rectangular.

Tom, WW5L

PREDICTIONS FOR 25 Mar 2013 10CM FLUX: 098 / AP: 001
PREDICTIONS FOR 26 Mar 2013 10CM FLUX: 100 / AP: 001
COMMENT: Solar activity has been very low during the past 24 hours. A
backsided CME propagating to the south was observed in STEREO A and B
and LASCO from 12h UT on 23 March. STEREO A/B EUV 195 images showed the
eruption to originate from NOAA AR1689. No Earth-directed component is
expected. A small low-latitude coronal hole is approaching the central
meridian. We expect arrival of the associated fast flow on 28 March. At
19h UT on 23 March, solar wind speed increased to 450 km/s and the
magnitude of the interplanetary magnetic field increased to 10 nT. The
K-index in Dourbes and Izmiran went to K=4. This was possibly related to
the arrival of the CME of 19 March. Geomagnetic conditions are quiet
again and expected to remain so for the next 48 hours.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 17th-March, through Sunday, 24th-Mar there were 234 countries active. Countries available: 1S, 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H3, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2E, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZD9, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2014 ANTARCTICA AND SOUTH AMERICAN TOUR. David, K3LP, has announced on his Web page that he will be operating from the Antarctica; Port Stanley, Falkland Islands; Chile, Argentina and Uruguay between February 2-16th, 2014. He informs OPDX that this is a family vacation and plans to operate

a few hours at each location (listed below) along the way. He plans to take a vertical antenna and IC-7000 on the trip. The tentative schedule and callsigns are as follows:
February 2-16th - Buenos Aires, Argentina; callsign LU/K3LP
February 6th - Ushualia, Argentina; callsign LU/K3LP
February 7th - Cape Horn, Chile; callsign CE/K3LP
February 8th - Schollart Channel, Antarctica; callsign ??/K3LP
February 8th - Paradise Bay, Antarctica; callsign ??/K3LP
February 8th - Gerlache Straight; callsign K3LP/MM
February 9th - Elephant Island, Antarctica; callsign ??/K3LP
February 11th - Port Stanley, Falkland Islands; callsign VP8/K3LP
February 13th - Puerto Madryn, Argentina; callsign LU/K3LP
February 15th - Montevideo, Uruguay; callsign CX/K3LP
QSL via his home callsign.

3B7C BOOK. During the middle of April, Pete, SM5GMZ, will releases another photo book (approx. 90 page) about the 2007 Saint Brandon DXpedition. Pete was one of the 20 operators who together managed to work 137,500 QSOs during an absolute sunspot minimum. The book consists of a large number of images, all in full color. In texts, Pete describes how it is to be on an uninhabited atoll in the middle of the southern Indian Ocean where nothing but amateur radio and satellite phones work. He also tries to explain the joy of endless multi-layer pile-ups and describes the enormous planning that comes with a DXpedition of this magnitude. For more info and details on how to order the book, see: http://www.3b7cbook.com

7T50/7T9, ALGERIA (Just Reminder). Members of the Algerian Radio Amateurs (ARA) will activate special event callsigns 7T9A (until March 30th, from Palais des Rais [Bastion 23] in Algier City; WCA 7X-00012) and 7T50ARA (until May 30th) to celebrate the 50th anniversary of the Algerian Amateur Radio Association. Activity will be on all bands and modes. QSL both callsigns by the Bureau or direct (NO IRCs) to: PO Box 1, Algiers RP 16000, Algeria.

A3, TONGA (Reminder). Jacek, SP5EAQ, will be active as A3EAQ from Tongatapu Island (OC-049) between March 26th and April 16th. Activity will be on 80-10 meters SSB only. QSL via SP5EAQ, direct or by the Bureau. For more details and updates, watch: http://sp5drh.com/a3eaq

C6, BAHAMAS. Chuck, KG9N, will be active as KG9N/C6A from Grand Bahama (NA-080) between March 28th and April 4th. Activity will include the CQWW WPX SSB Contest. QSL via LoTW (preferred), direct or by the Bureau.

CY0, SABLE ISLAND. Operators Gary/VE1RGB and Murray/WA4DAN are pleased to announce a DXpedition to Sable Island between October 1-11th, 2013. Approvals are in hand from Parks Canada and the Canadian Coast Guard. They have chartered with Maritime Air Charter LTD to provide the Britten Norman Islander aircraft for landing on the beach. The callsign CY0P has been issued for the October DXpedition. The CY0P(Parks) callsign was chosen in recognition of the newest National Park in Canada. VE1RGB is a veteran of two previous CY0 DXpeditions and is a top CW contester.

WA4DAN has coordinated two previous CY0 DXpeditions, including the October 2012 DXpedition that was cut short due to Hurricane Sandy. An all bands 160-10 meters, CW/SSB/RTTY operation is planned. Look for more details to follow in the coming months.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
9X0ZM ☐ Rwanda; 2013 operation

E5, SOUTH COOK ISLANDS. Bruce, ZL1AAO, will once again be active as E51AAO from Rarotonga Island (OC-013) between May 3-17th. Activity will be holiday style, and he will be operational on SSB only, 40-10 meters, using 100 watts to a dipole or 1/4 wave GP antennas. QSL via LoTW, eQSL and direct only; sorry no Bureau cards. He will upload the log when he returns home.

E5, SOUTH COOK ISLANDS. Tony, ZL2AGY, will once again be active as E51AGY from Rarotonga Island (OC-013) starting May 7th for about 24 days. He states, "This will be a CW only operation running my K3 barefoot, and may include some form of activity in the WPX CW Contest during the last weekend of May..... I hope to be reasonably active, but the food, the weather, the sea, the people, are all very pleasant in Raro, so I might have other things to occupy my time as well!" QSL via his home callsign, direct (preferred - see details on QRZ.com).

EI, IRELAND. Olivier, ON4EI, will once again be active as EI8GQB and EI1A between March 23rd and April 3rd. He plans to operate from his caravan using green energy. Olivier will activate EI1A callsign during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band/Low-Power entry. His objective is to run the 48 hour contest with green energy only and score among the "TOP 10" European stations. You can follow his activities and antenna experimentation on: http://www.qrz.com/db/EI8GQB
This is a very interesting QRZ.com page. There you will find a live information banner with on air frequencies and information. His equipment will consist of:
18m top loaded vertical monopole for 160-80m-40m bands + 32 radials.
3 elements East-West directional inverted V beam for 40m band.
200m long beverage RX antenna East-West directional.
2 Spiderbeam antennas for 20/15/10m bands.
Rigs are Elecraft K3+P3 & Kenwood TS2000 100W.
500Ah battery bank + 180W solar panel and 400W wind generator.
Also, live video streaming will be provided on:
http://www.ustream.tv/channel/ei8gqb
QSL via PA3249, direct or by the Bureau.

FOC EVENT (And Award). To commemorate their 75th anniversary in May, the FOC (First Class CW Operators' Club) is holding a month-long on-air event featuring more than 20 special ☐FOC☐ suffix calls. These will include GB75FOC, a special anniversary callsign for their club station. (GP4FOC will be used when operating from Guernsey, GS4FOC from Scotland and GT4FOC from Isle of Man). There will be many other FOC callsigns

from the USA and VE and from more exotic locations such as VQ9, HZ1 and 5T. Stations will gain points for contacting any FOC member and a beautiful certificate will be presented to stations who reach certain point levels. Complete details are available on the FOC Web page at: http://www.g4foc.org/Default.aspx?pageId=1537887

FR, REUNION ISLAND. Cyril, FR4NT, will be active during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Low-Power entry. QSL via FR4NT direct (NO IRCs).

GB0, ENGLAND (CASHOTA Monument Ops). Look for John, M0JFE, of the Fleetwood Radio Enthusiast Group, (along with the help of others) to activate some CASHOTA monuments during the month of April. He has obtained the special callsign GB0FRG. His tentative schedule is as follows:
April 2nd - The Mount Pavilion & Tour of the Clock Workings; Reference numbers: LR SD333481, WAB SD34 and QRA IO83LW
April 9th - I.O.M Ferry Berth (Location where the Anchors of the Titanic where transferred from Train to Ship to be shipped to Belfast); Reference numbers: LR SD340483, WAB SD34 and QRA IO83LW
April 16th - War memorial in Memorial Park Fleetwood; Reference numbers: LR SD328474, WAB SD34 and QRA IO83LW

April 23rd - Activation Jubilee Towers Quernmore just outside of Lancaster; Reference numbers: LR SD542573, WAB SD55 and QRA IO84PA
Activity will be on 80-10 meters and 2m & 70cm; propagation dependant. Stations that work ALL 4 activations and E-mail in their log to <gb0frg@...> will be E-mailed a special certificate from their club. The club's Web site is: http://www.fleetwoodradiogroup.moonfruit.com/#

GJ, JERSEY (Update/Callsign Change). Richrad, M5RIC, will be active as GJ2A (not MJ2Z) for the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All Band/High Power entry. QSL via M5RIC. He will sign MJ5RIC for any activity outside the contest.

H44, SOLOMON ISLANDS (IOTA Op/Update to OPDX.1103/1104). Operators Ralph, 5W0W/H44RK, Dom/SQ9KWW, Tom/WL7HP and Maggie/H44MK (the only local YL Ham from Sikiana) will be active as H44IOTA during their upcoming IOTA tour which will start during the first week of June. Preliminary dates have now been announced for each island, but may vary due to the nature of the tour. Here is their announced schedule:
June 1-4th - New Georgia Island (OC-149)
June 6-8th - Russell Islands (OC-168)
June 10-13th - Florida Islands (OC-158)
June 17-24th - Stewart Island (OC-285) **
July 1-7th - Nendo Island (OC-100)
July 9-12th - Vanikolo/Utupua (OC-163)
July 14-16th - Reef Islands (OC-065)

** Of special interest to IOTA chasers is Stewart Island (OC-285)
having NEVER been activated.

Activity will be on 80-10 meters using CW and SSB. See OPDX.1104
for frequencies. All QSL requests are via QSL Manager Rex Turvin, NR6M.
For updates, it is suggested to watch: http://www.qrz.com/db/H40RK
The group now has a Web, Twitter and FaceBook page at:
http://www.h44iota.com
https://twitter.com/h44iota
https://www.facebook.com/pages/H44-IOTA-DXpedition/136003426577924

HB0, LIECHTENSTEIN. A group of Dutch radio amateurs will be operating
from Liechtenstein between April 13-20th, as HB0/homecall. Activity will
be on 160-10 meters using CW, SSB and PSK31. During this week, a couple
of SOTAs will be activated as well. Operators mentioned are Mans/PA2HGJ,
Hugo/PA2HW, Robert/PA2RDK, Frank/PA3CNO, Paul/PA3DFR, Henny/PA3HK, Gert/
PE0MGB and Piet/PE1FLO. QSL via PE1FLO.

IOTA NEWS.............
AS-125. Tana, E27EK, will be active as E27EK/p from Chang Island,
Thailand, between March 26-27th. Activity will be on all HF
bands. QSL via his home callsign direct. Please NO eQSLs.

EU-028. Members of the Valle Brembana DX and Contest (VBDXC) Team will
be active as IA5A from Giglio between April 29th and May 4th.
Operators mentioned are Ezio/IK2AHB, Diego/IW2MZX, Alessandro/
IW5ELA, Andrea/IZ2AJE and Fabio/IZ2GMT. QSL via IK2AHB, direct
or by the Bureau.

EU-125. Rico, DO6EBB, will once again be active as OZ/DO6EBB from
Fano Island (DIA NS-002, WWFF OZFF-004) between June 22nd
July 7th. Activity will be holiday style on 160-2 meters
using SSB and some Digital modes. QSL via his home callsign,
direct or eQSL.

EU-158. Markus, DJ4EL, will be active as SV8/DJ4EL from both Proti
(March 25-26th) and Sapientza Islands (March 28-29th). This
is a rare IOTA. Activity will be on 15 meters only using
battery power and a simple Quad antenna. Markus hopes to
make 1000 or more contacts. QSL via LoTW, by the Bureau or
direct.

NA-041. David, K0DCH, will be active as K0DCH/KL7 from Mitkof Island
(USI AK155S, WLOTA 2115) between July 12-16th. Activity will
be on or near the usual island and IOTA frequencies. QSL via
his home callsign direct only.

IOTA TOUR (Philippines). Dindo, DV1UD, finally received permission (after
trying for several months) to land on and activate three of the 'most
wanted' Islands in the DU area. Dindo will visit Bongao Island (OC-174),
Tawi-Tawi Island (OC-174) and Taganak Island (OC-225). This is to complete
some survey and research as part of his work requirements. His tentative
schedule is for the first week of April. Hopefully this will allow him to

stay on each island for 2-3 days. He will grab this opportunity to activate these rare IOTA's between his work commitments. On Friday he announced that his equipment will be an Icom IC-7000, AH-4 Tuner and 100w into a Loop Antenna. Tentative departure from Manila is April 2nd, and he expects to be in Bongao, Tawi Tawi, by April 4th or 5th, via Zamboanga City. His callsign will be DX8DX, and activity will be on CW and SSB. QSL via M0OXO OQRS. For more details, visit his Blog page at: http://www.m0oxo.com/dx8dx.html

IU, ITALY (Attention Prefix Hunters). The Ministry of the Economy of the Italian Republic announced that it used up the prefix IZ and will now use the new prefix is IU.

J3, GRENADA (Update to OPDX.1104). Operators Tom/OE2ATN and Franz/OE2SNL will be on a suitcase DXpedition to Grenada Island (NA-024, WLOTA 0718) between October 28th and November 10th. The callsign has not been issued yet. Operations will be on CW, SSB and RTTY with 100-200 watts. Their Web page is now available at: http://j3.oe2atn.at

KH8, AMERICAN SAMOA (Update/Operator Needed). Bill, N6MW, will make one last try to activate American Samoa as KH8/N6MW from a hotel in Tutuila between November 11-21st. The focus will be on "Maximum number of different stations contacted; CW, some SSB and RTTY if/when things slow down; EU when possible on higher bands; and Significant 160m effort." The location on the island will be well south of the Pago Pago harbor area to avoid as much mountain low angle cut off as possible. The DX-pedition's Web page states, "Total of 3 operators planned, 2 of the slots available." For more details and updates, visit: http://n6mw.jimdo.com

LX, LUXEMBOURG. Matthias, DJ8OG, will be active as LX7I during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band entry. QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

OX, GREENLAND. An international group of YLs will once again activate amateur radio from Kangerlussuaq between August 16-20th. Operators

mentioned are Unni/LA6RHA, Mio/JR3MVF, Chae/HL1KDW, Kay/WA0WOF and Solveig/SM6KAT. The last YL expedition was in 2010 and was very successful. For more information, visit their Web site at: http://home.online.no/~la6rha/greenland2013.htm

PA150, NETHERLANDS (Special Event). Fred, PA0FAW, will be active as PA150BA between April 1-28th. Activity is to celebrate the 150th anniversary of Bronbeek, a former Royal palace in Arnhem that is now a museum and a home for elderly soldiers and disabled KNIL (The Royal Netherlands East Indies Army) soldiers. The inhabitants took their collections of 'souvenirs' with them. This turned into a museum about the Dutch East Indies. Operations will be mainly CW, with some Digital and SSB. This operation will have a World Flora Fauna (WFF) reference number of WFF-PA-005. Fred is a member of the ISWL and Euro PSK club. QSL via PA0FAW, by the Bureau, eQSL and direct, but no LoTW. SWL reports are welcome direct, no need for return postage.

QSL INFO AND NEWS.....
QSL-INFO from DB0SDX (Not Available This Week)

(e) eQSL only (d) direct only (B) Bureau only (L) LoTW only

PY0SJ 1982 LOTW. Cesar, PY2YP, reports that he typed the log into LoTW and it is now working on the PY0ZSC operation which is three times larger. The Rocks web page <www.py2yp.com/spsprocks> shows several logs and cards. Stay tuned.

TX5K OQRS. The TX5K OQRS is now operational online at: https://secure.clublog.org/charts/?c=TX5K#

UT1FG/MM QSL STATUS. John, K8YSE, reports, "Eugene, UX0FY, advises that he has not received logs for UT1FG/MM after November 2012. He hopes to have the December 2012 thru March 2013 logs in a few weeks. Then he will be answering all QSL requests that he has received so far. He asks everyone to be patient."

QSL RECEIVED VIA LoTW: 4Z5MU, 8P5A, 9K2F, 9M4SLL, BU2AW, DH6BH, EA7TG, EI3GG, H40T, H44G, KH2L, KP2MM, MI0BPB, OS8A, PY0SJ, PY5ZD, RI1ANF, RU0FM, RX6BH, RZ6BS, SV5FRD, T2GM, T88TF, VK3HJ, VP9I, XR0YG, XT2AA, XT2TT, ZF2AM and ZF2UL

QSLS RECEIVED VIA MAIL: 3D2C, 7X2ARA, A62A, CT9/DG3FAW, CX5CBA, DU3/N0QM, ES4RD, FR4NT, J8/W6HGF, KH8/M1KTA, LU6W, TX9, V25A, XU1A, XV2RZ, Z81Z, ZB3R and ZL9HR

QSLS RECEIVED VIA THE BUREAU: 4L1MA, 5W1SA, 9M6Z, A5A, AC2AI/KH2, AH0BT, AH0S/KH2, BA7MG, C31KC, C50C, EO2112WZA, HF1918RO, ISO/DK7ZB, JD1BMH, KB7OBU/KH2, T8CW, T88CR, T88GO, T88ME, T88ZO, TT8PK, V55A, WH2DX, Z60K, ZD8W and ZL50GH

SILENT KEY (DXer's Have Lost Another Legend). It is with great sorrow to report that DXers have lost a great friend and well-known DXer. Luis, XE1L,

became a Silent Key, shortly after returning to San Diego from the recent TX5K Clipperton Island DXpedition. Reports indicate that Luis was stricken with a major heart attack and passed away within minutes. An ARRL Life Member, Luis held Top of Honor Roll (Phone and Mixed), with all 340 current entities confirmed. He also held DXCC for Mixed, Phone, CW and RTTY, as well as 5-Band DXCC, and had a total of 354 entities, including deleted. World-Wide DXers will miss him greatly on the air. Here are just a few places, major DXpeditions and contests that Luis has operated:
Major DXpeditions:
3Y0PI, 9M0M, 9N7MD, S07L, TZ6RM, XF4L, XR0Y, XR0Z and XZ0A

Contests Callsigns:
4A7L, 4A9LCH, 6D1LCH, 6D7LCH, 6H1L, 6J1L, W4/XE1L (Various IOTA), W4T (Dry Tortugas), XF0L, XF5L, XF6L and YW5L.

Other Entities Callsigns:
4K/XE1L, 4U/XE1L/ITU, 4U/XE1L/NY, 4U/XE1L/YK, 4X/XE1L, 6Y5/XE1L, 8P9/XE1L, 9N7MD, C6A/XE1L, CE0/XE1L, CE3/XE1L, FM5/XE1L, FS5/XE1L, J6/XE1L, KH7/XE1L, KP4/XE1L, P4/XE1L, PJ2/XE1L, TG9/XE1L, TZ6L, VE7/XE1L, VP8CPJ, W/XE1L, W4/XE1L, XE0LCH, XE1LCH, XE1L, XE1L/XF2, XE1L/XF3, XF3/XE1L, XZ1L, YV5/XE1L and ZD8/XE1L.

OPDX and it readers would like to send out our deepest smypathy to the family and friends of XE1L. A "Condolences Book" has been setup on the Radio Club Satélite's (XE1RCS) Web page at: http://www.xe1rcs.org.mx/xe1l
To read more about Luis, XE1L, visit the ARRL Web page at:
http://www.arrl.org/news/view/noted-contester-and-dxer-luis-chartarifsky-xe1l-sk

SOUTHEAST ASIAN TOUR. The "425 DX News" reports that Alan, G0RCI, will be in Singapore (9V) and hopefully Malaysia (9M2) between April 1-12th. He plans to operate as 9V1/G0RCI and 9M2/G0RCI "as much as the XYL allows". QSL via his home callsign direct.

T2, TUVALU (Update). Tim, NL8F, is now active as T2TT from Tuvalu until April 2nd. Activity will be mostly SSB. QSL via K8NA.

V6, MICRONESIA. Operators Takio/JH3QFL and Keizo/JH3AZC will be active as V6H and V6S, respectively, from the South Park Hotel in Pohnpei between April 29th and May 5th. Activity will be on 80-6 meters using CW, SSB, RTTY and JT65. QSL via their home callsign.

VP9, BERMUDA. Kei, KG2A/JJ1RJR, will be active as KG2A/VP9 from Bermuda (NA-005) between March 29th and April 1st. Activity will be on the HF bands using CW and SSB. His operations will include the CQWW WPX SSB Contest (March 30-31st). QSL via KG2A direct.

XP, GREENLAND. Henning, OU2I/OZ1BII, will once again be active as XP2I from Kangerlussuaq between May 23-27th. Activity will be CW only. He will also be in the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-Band/ Low-Power entry. QSL via OZ1BII (see www.oz1bii.dk/qsl-info.htm).

XW8, LAOS. Steve, 9M6DXX, will be operating holiday style as XW8XZ from
near Vientiane, Laos, between March 30th and April 3rd. Activity will
be SSB only, using 100 watts (the maximum power permitted by the licence)
to a Butternut HF6V-X antenna with 12/17m kit. QSL via M0URX, by OQRS
(see <www.m0urx.com/oqrs>), direct, or by the Bureau. Logs will be uploaded
to LoTW as quickly as possible after the operation.

Nominations Sought for 2013 Amateur Radio Newsline☐ ☐Young Ham Of The Year Award☐

The nominating period for 2013 Amateur Radio Newsline☐ "Young Ham of the Year Award" is now open. Originally known as the "Westlink Report Young Ham of the Year," this award program, now in its third decade, is presented annually to a United States or Canadian licensed Radio Amateur (Ham) who is 18 years of age or younger and who has provided outstanding service to the nation, his/her community or the betterment of the state of the art in communications through the Amateur Radio hobby/service. (Please see application form for details.)

ELIGIBILITY

The award is open to any licensed amateur radio operator residing in the 50 states that comprise the United States plus U.S. territories and 10 Canadian provinces. Nominees must hold a currently valid Amateur Radio License issued by the FCC (United States) or Industry Canada (Canada) and meet the 18 year or younger age qualification.

OBTAINING NOMINATING FORMS

Applications forms are available for a self addressed stamped envelope mailed to the 2013 Young Ham of the Year Award % Newsline, 28197 Robin Avenue Santa Clarita California 91350. These nominating applications are also available for electronic download in .PDF format from our website at <http://www.arnewsline.org/YHOTY>.

NOMINATION CUTOFF DATE

All nominations must be submitted before midnight your local time on May 30, 2013 on an official nominating form and accompanied by verification materials for declarations noted within the nomination.

NOMINATION FILING

Paper nominations should be sent by regular mail only to The Amateur Radio Newsline, Inc., Att: YHOTY 2013, 28197 Robin Avenue, Saugus CA, 91350. (Note: Please do not send in any mail that requires a recipient signature as there is nobody here to provide this.)

Electronic nominations scanned as .JPG files should be e-mailed to newsline(at)arnewsline(dot)org.

PRESENTATION IN 2013

With continued corporate sponsorship, the 2013 Amateur Radio Newsline Young Ham of the Year Award presentation will take place in August at the 2013 Huntsville Hamfest. The Huntsville Hamfest is one of the

nation□s largest and most popular Amateur Radio conventions. It is held annually the third weekend in August at the Von Braun Civic Center in downtown Huntsville Alabama and usually attracts upward of 5000+ attendees.

AWARD BACKGROUND

The Amateur Radio Newsline□ □Young Ham of the Year Award□ program was conceived in 1985 by then Westlink Report "Editor-in Chief" Bill Pasternak, WA6ITF. His desire then and now is to highlight the accomplishments of the nation's many young radio hobbyists, and to encourage the entry of more young people into the exciting and rewarding hobby of Amateur Radio.

With the absorption in 1995 of the Westlink Report readership base into Worldradio Magazine, the awards originator has decided to continue it under the banner of his own "Amateur Radio Newsline□" organization. It is his belief that this real-life experience may lead the award winners and many other young hams into technology based careers that will make them the scientific leaders of the future.

ABOUT THE AWARD SPONSORS

The Amateur Radio Newsline, Inc., better known as "Newsline" is the world□s largest not for profit (501(c)(3) and totally independent ham radio broadcast news and data information service. It was organized in 1976 by Jim Hendershot WA6VQP and Bill Pasternak WA6ITF. Since that time it has produced and put to air over 1850 consecutive weeks (35+ years) of free news bulletin programming dealing with Amateur Radio and related personal communications issues.

Primary corporate underwriting since the inception of the "Young Ham of the Year Award" in program in 1986 is from Yaesu U.S.A. Corporation. Yaesu is a world leader in the design, manufacture and distribution of Yaesu brand high quality Amateur Radio equipment. See: www.yaesu.com

As of 1995, CQ Communications Inc. has been an additional corporate underwriter. CQ Magazine and its sister publications CQ-VHF, Popular Communications and Worldradio OnLine are owned by CQ Communications and are considered the trend-setting magazines serving today's modern radio amateur radio community. See: www.cq-amateur-radio.com

In 2008 Heil Sound Ltd.; an innovative manufacturer of microphones and accessories for the amateur, professional sound and broadcast industries joined as the latest corporate underwriter. See: www.heilsound.com

PAST RECIPIANTS

1986 - Shawn Alan Wakefield, WK5P
1987 - David Rosenman, KA9PMK
1988 - Jonathan Binstock, NK3D
1989 - Erin McGinnis, KA0WTE

ABOUT AMATEUR RADIO

The world-wide Amateur Radio service is force of more than 2.5 million publicly spirited personal radio operators who are licensed and regulated by their respective administrations. They are available as a voluntary group of skilled public service-oriented individuals with their own radio equipment who are available to provide emergency communications in times of disaster. They also provide a pool of trained radio operators and technicians to assist in improving international relations.

SIDC SOLAR BULLETIN 25 Mar 2013, 1211UT
SIDC FORECAST (valid from 1230UT, 25 Mar 2013 until 27 Mar 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 25 Mar 2013 10CM FLUX: 095 / AP: 001
PREDICTIONS FOR 26 Mar 2013 10CM FLUX: 095 / AP: 001
PREDICTIONS FOR 27 Mar 2013 10CM FLUX: 097 / AP: 001
COMMENT: Solar activity is expected to be low for the next 48 hours,
with only a slight risk of a C-class flare from NOAA AR 1702 and a new
small sunspot area still unnumbered (Catania AR 25). The last 24 hours
were very quiet in terms of flaring activity. To be noticed is the
eruption of a filament on March 24th, near the central meridian around
10:00 UT, with dimming area forming in the same area a few hours later.
Around 1600 UT, LASCO C2 observed a complex CME event, on the West limb.
This is a rather slow and long lasting event, and the link with the
filament eruption is not clear. A second filament eruption took place to
the north-east of Catania AR 25, around 1900 UT. We do not expect
noticeable effects on the geomagnetic activity from both events.
Geomagnetic conditions are expected to be low for the next 48 hours.

From: VE1AL
Topic: 20911 Message: 20911

I'm not trying to instigate an argument here. I just want some honest feedback from list members who would like to comment on the value of spots on the cluster emanating from W3LPL.

Personally, I am generally unable (over 95% of the time) to hear spots with W3LPL as the spotter. I would have thought that if a spot came from W3LPL I would at least have a hint that the signal spotted would be audible if I went to that frequency and tuned up and down a bit.

This morning, for instance, I saw a spot from W3LPL for 30M for a station in the Pacific at a time when the sun was well up out here in NE VE1. Of course there wasn't a hope in Hades that I'd be able to hear that station. Throughout the day I noticed the very same thing happened virtually every time W3LPL spotted something. No matter where it was, I couldn't hear it.

Now I don't have a mega-station with big beams at 150' or anything like that. Perhaps, if I did, I'd be able to hear some or all of the W3LPL spots. However, those of us who have more modest stations, I would like to think, appreciate spots from more down to earth operators who aren't among the less than 1%.

I've tried everything I can (and with ideas from others) to eliminate spots by W3LPL from my cluster. I use VE7CC and VE1DXI for spots and K3LR if there's any trouble on this side of the border. Nothing has worked and I am seemingly stuck with W3LPL. My opinion is that W3LPL is completely useless and causes me unnecessary stress.

Anyone care to comment? Agree? Disagree?

FWIW Paul, you're not the only one who finds no value in Frank's spots.

I seem to recall when he first started, he was using W3LPL to (in essence) relay Skimmer spots from other stations onto the cluster.

At the time, I sent him a couple of emails about it. Never heard a word back from Frank.

I no longer argue the point. I simply filter the W3LPL spots out.

Al, I generally don’t chase the cluster spots, but on occasion I’ve seen spots that I might use for a band / mode fill from W3LPL. I can’t recall a time when I could hear a W3LPL spot but I haven’t given up. T6MO is an example.... spotted by W3LPL (probably via the reverse beacon network), I’ve heard other 8s and 9s calling Eric, but not T6MO’s signals.

My personal opinion is that if you want skimmer spots, build your own skimmer. Use your own antennas so that you know the spots skimmed / heard may be worked. Just because a skimmer in Europe can hear T6MO and it gets reported by the cluster network really doesn’t mean much to me.

From: VE1AL
Topic: 20911 Message: 20914

So, from the four comments received (so far?) I get the distinct impression that I am not alone.

Could someone please tell me how the W3LPL spots can be filtered out of VE7CC and/or K3LR. I have tried all of the scripts suggested for both and have had no luck whatsoever in eliminating the W3LPL "garbage". I am interested in knowing what I am likely to hear, not what I might hear if I lived outside the city and had loads of moolah.

If it helps, you could answer me off-line.

Thanks & 73

Hi Al,

You are definitely not alone. I'll refrain from further comment, based
on "if you have nothing nice to say, ..."

I'm not sure it's possible to filter spots from a specific callsign in
CC Cluster - it doesn't appear so from:

http://bcdxc.org/ve7cc/ccc/CCC_Commands.htm

If you used SpotCollector from the DXLab Suite, you could specify
W3LPL (and variants) as "BadSource" special callsigns.

There is no way for a user to filter spots from a specific user with CC Cluster commands. The SYSOP has to do it for everyone. As you say, it can be done with SpotCollector from AA6YQ's DX Labs, and probably many other client packages. Even VE7CC's client component for CC Cluster (CC User) will do it.

Guys, the ONLY real value in any of the spots is KNOWING THAT THE DX IS ON THE AIR and maybe WHERE. Look at your Geochron or prop software to determine when a path is open for you.

Al, I generally don't chase the cluster spots, but on occasion I've seen spots that I might use for a band / mode fill from W3LPL. I can't recall a time when I could hear a W3LPL spot but I haven't given up. T6MO is an example.... spotted by W3LPL (probably via the reverse beacon network), I've heard other 8s and 9s calling Eric, but not T6MO's signals.

My personal opinion is that if you want skimmer spots, build your own skimmer. Use your own antennas so that you know the spots skimmed / heard may be worked. Just because a skimmer in Europe can hear T6MO and it gets reported by the cluster network really doesn't mean much to me.

Subject: [DX-IS] cluster spots

I'm not trying to instigate an argument here. I just want some honest feedback from list members who would like to comment on the value of spots on the cluster emanating from W3LPL.

Personally, I am generally unable (over 95% of the time) to hear spots with W3LPL as the spotter. I would have thought that if a spot came from W3LPL I would at least have a hint that the signal spotted would be audible if I went to that frequency and tuned up and down a bit.

This morning, for instance, I saw a spot from W3LPL for 30M for a station in the Pacific at a time when the sun was well up out here in NE VE1. Of course there wasn't a hope in Hades that I'd be able to hear that station. Throughout the day I noticed the very same thing happened virtually every time W3LPL spotted something. No matter where it was, I couldn't hear it.

Now I don't have a mega-station with big beams at 150' or anything like that. Perhaps, if I did, I'd be able to hear some or all of the W3LPL spots. However, those of us who have more modest stations, I would like to think, appreciate spots from more down to earth operators

who aren't among the less than 1%.

I've tried everything I can (and with ideas from others) to eliminate spots by W3LPL from my cluster. I use VE7CC and VE1DXI for spots and K3LR if there's any trouble on this side of the border. Nothing has worked and I am seemingly stuck with W3LPL. My opinion is that W3LPL is completely useless and causes me unnecessary stress.

Anyone care to comment? Agree? Disagree?

73

From: Jim Kehler
Topic: 20911 Message: 20922

Funny you should mention W3LPL. I've been working on my own cluster client lately, after a 10 year break, and I just added some special W3LPL code:

```
If Left(SpotSender, 5) = "W3LPL" Then
Exit Sub '(Ignore Spot)
End If
```

Apparently what he's doing is skimming skimmer spots. Or aggrigating skimmer spots. Or aggravating everybody. One of the above....

I think spots from "W3LPL-#" he actually heard the DX, but spots from "W3LPL" he did not.

You can't hear what he spots probably because he didn't hear it either.

At least that's what it looks like to me. I seriously doubt there is a real person sitting at W3LPL sending spots manually 24/7. Maybe Bernie is having trouble sleeping, I don't know....

I noticed I can't hear most of what he spots either.

I guess "Don't spot yourself." is a rule, but "Don't spot stuff you can't hear." is not.

In the scheme of things, the extra garbage he generates is minimal.

Here's Russian DX Contest weekend stats:

48 hours, Friday Midnight to Sunday Midnight

Total DX Spots: 384,187
Skimmer Spots: 338,353
Skimmer Percentage: 88.07%
Skimmer Dupes: 213,991
Skimmer Dupes Percentage: 63.24%
Max Spots in One Minute: 548

(Skimmer Dupe, in this case, is same call spotted again in less than 3 minutes).

I don't really know who sucks what from where, but wrap your head around that and it says that in a weekend we sent 213,991 skimmer dupes around the world; 56% of the total cluster volume was worthless.

The RBN was a wonderful idea. Whom ever decided to suck all that into the cluster can't spell "Advanced Planning".

But for some reason, LPL sticks out like a sore thumb. Why, I dunno.
I had not been near a cluster in five years and the first 10 minutes
I was back I noticed him.

So I agree. I was tired of seeing him too. So I don't see him anymore.

The cluster has reached the point where it's totally impossible for
a human being to use the data without serious help from a computer.
The "more is better" gang obviously won. Filter it down too tightly,
and you miss stuff. Don't filter it and the junk drives you nuts.

You might want to look at CC User - I don't know what you are using
for cluster software, but it will feed another telnet program and it does
some serious filtering. It has a "Keyword" filter, which I haven't tried,
but my guess is that you plug W3LPL into that and he'll be gone forever.

20923. RE: [DX-IS] cluster spots

Yahoo group: DX-IS (2013)
Date: 2013-03-26 01:35:53 UTC
From: KQ8M
Topic: 20911 Message: 20923

Here's how it works.

W3LPL has his own program which monitors the Reverse Beacon Network. It checks that a call was spotted by X amount of skimmers. Then
That call is compared against a list of callsigns he has so no common calls get spotted. Or not too common. Whatever he adds to the
list. Then this program re-spots it to the cluster system. He also has skimmers which feed the RBN. So when he puts out BY on 160 at
1 in the afternoon eastern time it is not that he hears it but the JA's spotted the BY.

Paul,
That is true BUT I ham from Hawaii and from CONUS (I keep a large RV in Montana). RV ops tend to favor county hunting over DX.

Any SPOT for a DXCC entity you NEED for a new one is worth the effort to listen no matter where you got the freq and mode.

DX IS! (Really)

John K1ER or K1ER/KH6 or other places.

That's Kewl. Reminds me of way back when. When the ARCluster kids were sucking spots out of DX Summit and sending them round the world. And round and round and round. For weeks on end.

So much for filtering spots by what was heard in your neighborhood I guess.....

I guess if we all had a software defined radio, we could write software to check
and see if we could really hear the DX before the cluster software shows us the
spot.

Also the BY is really there, regardless of whether or not we can
hear it. Stats on regular skimmers with the -# tag claim 93% accuracy .
. . in other words, 7% of the -# originating spots are busted calls. If
you see BY1ABC spotted by XXXXX-#, there is a 7% chance it is DY1ABC.
It if comes from W3LPL, it is really BY1ABC.

I think we ought to understand what W3LPL spots are before we
criticize them as useless.

I happen to agree with you Ron, but then the ability to filter leaves it to the discretion of each individual. If you don't mind it
you don't have to filter it but if you do then by all means filter it out. No sense in blowing this up as things can be taken care
of as you want. Might take a little research but there is always a way to handle it.

That call is compared against a list of callsigns he has so no common calls get spotted. Or not too common. Whatever he adds to the
list. Then this program re-spots it to the cluster system. He also has skimmers which feed the RBN. So when he puts out BY on 160 at
1 in the afternoon eastern time it is not that he hears it but the JA's spotted the BY.

Subject: Re: [DX-IS] cluster spots

Funny you should mention W3LPL. I've been working on my own cluster client
lately, after a 10 year break, and I just added some special W3LPL code:

```
If Left(SpotSender, 5) = "W3LPL" Then
Exit Sub '(Ignore Spot)
End If
```

Apparently what he's doing is skimming skimmer spots. Or aggrigating
skimmer spots. Or aggravating everybody. One of the above....

I think spots from "W3LPL-#" he actually heard the DX, but spots from
"W3LPL" he did not.

You can't hear what he spots probably because he didn't hear it either.

At least that's what it looks like to me. I seriously doubt there is a real
person sitting at W3LPL sending spots manually 24/7. Maybe Bernie
is having trouble sleeping, I don't know....

I noticed I can't hear most of what he spots either.

I guess "Don't spot yourself." is a rule, but "Don't spot stuff you can't
hear." is not.

In the scheme of things, the extra garbage he generates is minimal.

Here's Russian DX Contest weekend stats:

48 hours, Friday Midnight to Sunday Midnight

Total DX Spots: 384,187
Skimmer Spots: 338,353
Skimmer Percentage: 88.07%
Skimmer Dupes: 213,991
Skimmer Dupes Percentage: 63.24%
Max Spots in One Minute: 548

(Skimmer Dupe, in this case, is same call spotted again in less
than 3 minutes).

I don't really know who sucks what from where, but wrap your
head around that and it says that in a weekend we sent
213,991 skimmer dupes around the world; 56% of the total
cluster volume was worthless.

The RBN was a wonderful idea. Whom ever decided to suck all
that into the cluster can't spell "Advanced Planning".

But for some reason, LPL sticks out like a sore thumb. Why, I dunno.
I had not been near a cluster in five years and the first 10 minutes
I was back I noticed him.

So I agree. I was tired of seeing him too. So I don't see him anymore.

The cluster has reached the point where it's totally impossible for
a human being to use the data without serious help from a computer.
The "more is better" gang obviously won. Filter it down too tightly,
and you miss stuff. Don't filter it and the junk drives you nuts.

You might want to look at CC User - I don't know what you are using
for cluster software, but it will feed another telnet program and it does
some serious filtering. It has a "Keyword" filter, which I haven't tried,
but my guess is that you plug W3LPL into that and he'll be gone forever.

So, I'm not alone! I'm really pleased to read that many others are just as frustrated as I am.

Look, I've done everything I know to eliminate W3LPL spots from both VE7CC/VE1DXI and K3LR.

Admittedly, I'm not the sharpest knife in the drawer (and getting duller daily). I need someone to tell me the exact script to type into the filters of both VE7CC and K3LR so I can get rid of W3LPL's spots for ever and ever, amen. Obviously, having read the user manuals for AR Cluster and VE7CC I have made an error. On the other hand, I have gotten rid of the W3LPL offspring -- W3LPL#, But W3LPL as a stand alone spotter is still there.

Some of you might find W3LPLs spots interesting. I, however, scan the spots to see if there's something, somewhere, that I have a chance of hearing. I am not, and never will be, interested in RBN and skimmers. I actually spend 98% of my time listening and don't find a spot, click on it, go to a frequency and tune up before listening.

If someone can assist me with the syntax for ending this annoyance (to me), I would surely appreciate it.

It is bedtime for bonzo so I'll see any responses later this morning.

Many, many thanks to all who commented. ☺

Well, that’s the rub, isn’t it Tim.

If I’m interested in RBN spots, I’ll monitor them on my own.

Relaying them through another station (that may or may not be able to hear them himself) strikes me as pointless.

And I simply don’t understand why they are relayed onto the cluster.

But… it’s no longer a problem here. I just filter out everything from Frank’s call. If it means once in a while I miss out on something, so be it.

Here's how it works.

W3LPL has his own program which monitors the Reverse Beacon Network. It checks that a call was spotted by X amount of skimmers. Then That call is compared against a list of callsigns he has so no common calls get spotted. Or not too common. Whatever he adds to the list. Then this program re-spots it to the cluster system. He also has skimmers which feed the RBN. So when he puts out BY on 160 at 1 in the afternoon eastern time it is not that he hears it but the JA's spotted the BY.

20933. Re W3LPL-3 spots was: Re: [DX-IS] cluster spots

Yahoo group: DX-IS (2013)
Date: 2013-03-26 11:24:24 UTC
From: Pete Smith N4ZR
Topic: 20911 Message: 20933

This is *almost* correct. Here is what Frank said in response to an inquiry:

"Automated CW DX spots from W3LPL are produced by custom software that monitors the DX spots from the Reverse Beacon Network, a global network of CW Skimmers. There are no radios involved except at the approximately 50 CW Skimmers [now 90+ - N4ZR]that originate the DX spots sent to the RBN.

Core to the software is a list of one thousand rare and semi-rare DX callsigns. Each callsign has an appended DX spotting rule that specifies the bands that should be spotted for that callsign and the re-spotting interval (typically one to three hours).

When a DX spot is received from the RBN, it is compared to the list of 1000 calls. If there is an exact match, the software then waits for a second RBN spot of the same exact callsign. If one or more of the spots originated from a CW Skimmer in the USA, the DX spot is sent to the DX Cluster network as specified by the DX spotting rule appended to that callsign. If neither RBN spot originated from a CW Skimmer in the USA, the software continues to search for an RBN spot for that exact callsign from a CW Skimmer in the USA. If within ten minutes it receives a DX spot for that exact callsign from a USA CW Skimmer a DX spot is sent to the DX cluster network, otherwise it times out and no spot is sent.

Most CW Skimmers use a Quicksilver QS1R SDR, covering seven ham bands simultaneously. My QS1R is fed by my transmit monoband phased arrays on 40 thru 6 meters, and by my Beverage antennas on 160 and 80 meters. Please send me an email whenever you see a bad callsign spotted by W3LPL. That always means there is a bad callsign in the list of 1000 calls!" [Endquote]

So, to deal with one issue, W3LPL-3 only relays spots from Skimmers in the USA. No JA spots of BYs, etc. W3LPL-# only sends spots that are actually heard at W3LPL's Maryland QTH, but of course with his antennas, he will hear things that others do not.

That said, I have been asking Frank for a couple of years now to have the software modified so that it puts the spotter's state in the Comment field. I don't understand why that has not happened, but suspect that both he and his software guy have been focused on erasing the razor-thin margin by which his multi-multi has lost to K3LR in recent years.

I don't understand why people have difficulty filtering out either W3LPL-3 or W3LPL-# callsigns. KQ8M already mentioned the "spotter <>" filter in AR Cluster V6, and N6ML mentioned the filter in Spot Collector. I'm sure CC User has something similar.

I don't think there's any reason to have to put up with the W3LPL-3
spots if you don't want them, or to want him to stop making them
available to those who do.

I'll address the RBN angle in a separate post.

20935. The RBN

Yahoo group: DX-IS (2013)
Date: 2013-03-26 11:45:22 UTC
From: Pete Smith N4ZR
Topic: 20935 Message: 20935

As many/most are aware, I'm one of the people behind the RBN. Reading the recent traffic about W3LPL-3 spots, I ran into a couple of things that I thought might be worth commenting on.

Someone characterized 50-odd percent of RBN spots during a recent DX contest as "useless" because they were duplicates. I think this misses one of the points of the RBN, which is to provide a database of everything that is heard at 90+ locations around the globe, as well as to provide spots for the cluster network. Initially we were very concerned that RBN spots would even get onto the Cluster network, but happily the majorsoftware folks - both the cluster guys and the logging software people - quickly adapted to this and provided a variety of filters. Now everyone filters out duplicates - and yes, that does involve using a computer, but so does getting Telnet spots in the first place.

Someone else said that RBN spots are 93 percent accurate. That may be correct, in any given case, but only if carefully qualified. Each individual Skimmer is > 99% accurate, but if you have 10 99%-accurate Skimmers all hearing the same station, there is a 10 percent chance that *one of them* will miscopy the callsign.

This is the basis for ARC Version 6's excellent "unique>x" filter. Briefly, it only passes a spot on to the user if the spot has been duplicated by ">x" Skimmers around the world.

During the last ARRL DX Contest, I had over 1000 S&P QSOs, and even on Sunday afternoon, I saw only one busted spot. The reason? I was using a compound filter that read like this:

SET DX FILTER call=n4zr OR (SKIMMER AND UNIQUE>2) and (spotterstate=md OR spotterstate=pa OR spotterstate=va OR spotterstate=WV)

This filter only let me see spots originating in those 4 states, which had ALSO been heard anywhere in the world by at least 2 other Skimmers. As a final touch, it told me whenever *I* was spotted anywhere - since I wasn't running, that didn't happen often.

Bottom line - when it comes to the RBN, you can have your cake (the worldwide database) and eat it too.

Pete,
Thank you very much for your detailed explanations. That does clear a few things up... and to be honest (and this is a comment, not a complaint) that's more than I've ever gotten from Frank.
I still fail to understand why Frank is distributing his information to the entire cluster. It seems clear that it is disturbing a great many more people than it is helping, and in large part because most people don't have an understanding for what he's doing, and why. However... as more than one has already mentioned, I do not wish to complain about it. I just filter it out as clutter. And with that, I think I've said about everything useful I can say on the subject today.
Thanks again.

Thanks, Ron. In fairness to Frank, I think his basic philosophy is that all information is useful, and it's just a matter of how you use it. That he filters the W3LPL-3 information as tightly as he does - requiring confirmation, presence on a master list of callsigns, etc. - says to me that he is trying to make the information broadly useful to DXers. That's why I do not understand the failure to include state of origin in the W3LPL-3 spots, which would substantially enhance their usefulness. I've made another pitch to him about that, and hope he'll agree.

I am glad to know at least how he is generating these spots. I used to see some of his spots for Asia or the Pacific on 40m and really shake my head in disbelief. These would occur an hour after my sunrise, and I know he has sunrise probably 90 minutes before me. The disbelief was from trying to guess what sort of antenna setup he had that he could hear this stuff that late in the morning on 40m. Now I know he wasn't actually the one hearing them.

Pete,
Thank you very much for your detailed explanations. That does clear a few things up... and to be honest (and this is a comment, not a complaint) that's more than I've ever gotten from Frank.
I still fail to understand why Frank is distributing his information to the entire cluster. It seems clear that it is disturbing a great many more people than it is helping, and in large part because most people don't have an understanding for what he's doing, and why. However... as more than one has already mentioned, I do not wish to complain about it. I just filter it out as clutter. And with that, I think I've said about everything useful I can say on the subject today.
Thanks again.

On 03/26/13, Pete Smith N4ZR wrote:

This is *almost* correct. Here is what Frank said in response to an inquiry:

"Automated CW DX spots from W3LPL are produced by custom software that monitors the DX spots from the Reverse Beacon Network, a global network of CW Skimmers. There are no radios involved except at the approximately 50 CW Skimmers [now 90+ - N4ZR]that originate the DX spots sent to the RBN.

Core to the software is a list of one thousand rare and semi-rare DX callsigns. Each callsign has an appended DX spotting rule that specifies the bands that should be spotted for that callsign and the re-spotting interval (typically one to three hours).

When a DX spot is received from the RBN, it is compared to the list of 1000 calls. If there is an exact match, the software then waits for a second RBN spot of the same exact callsign. If one or

more of the spots originated from a CW Skimmer in the USA, the DX spot is sent to the DX Cluster network as specified by the DX spotting rule appended to that callsign. If neither RBN spot originated from a CW Skimmer in the USA, the software continues to search for an RBN spot for that exact callsign from a CW Skimmer in the USA. If within ten minutes it receives a DX spot for that exact callsign from a USA CW Skimmer a DX spot is sent to the DX cluster network, otherwise it times out and no spot is sent.

Most CW Skimmers use a Quicksilver QS1R SDR, covering seven ham bands simultaneously. My QS1R is fed by my transmit monoband phased arrays on 40 thru 6 meters, and by my Beverage antennas on 160 and 80 meters.
Please send me an email whenever you see a bad callsign spotted by W3LPL. That always means there is a bad callsign in the list of 1000 calls!"

[Endquote]

So, to deal with one issue, W3LPL-3 only relays spots from Skimmers in the USA. No JA spots of BYs, etc. W3LPL-# only sends spots that are actually heard at W3LPL's Maryland QTH, but of course with his antennas, he will hear things that others do not.

That said, I have been asking Frank for a couple of years now to have the software modified so that it puts the spotter's state in the Comment field. I don't understand why that has not happened, but suspect that both he and his software guy have been focused on erasing the razor-thin margin by which his multi-multi has lost to K3LR in recent years.

I don't understand why people have difficulty filtering out either W3LPL-3 or W3LPL-# callsigns. KQ8M already mentioned the "spotter <>" filter in AR Cluster V6, and N6ML mentioned the filter in Spot Collector. I'm sure CC User has something similar.

I don't think there's any reason to have to put up with the W3LPL-3 spots if you don't want them, or to want him to stop making them available to those who do.

I'll address the RBN angle in a separate post.

Bravo John! You have described the very reason that I got tired &
frustrated with these posts, and subsequently blocked them.

I have no interest in spots made from BFE. If, however, Frank does decide to filter them by state, it would likely make them just another redundant spot, and would simply create more clutter on the cluster, because, as we all know, a very high percentage of the spots are no more than brag spots, especially for the more rare DX.

In layman's terms, a "high tech dupe generator", since it only spots
calls that were already spotted.

Yes, I think skimmer dupes are useless. Put them all in the database,
that's fine. Just don't send them to everybody in the world who is
connected to the cluster.

Pete, I don't think the RBN is useless. I think it's a wonderful tool.

I can call CQ on 40 meters and immediately know where I'm being
heard in the world. By far the neatest ham shack demo ever.

Personally, the database is of little use to me, because I haven't
figured out how to call CQ yesterday. But I'm sure the data collected
can be analyzed and is of use to someone.

I think the concept of the RBN feeding everything to the cluster is
wrong. Today I get spotted by 40 skimmers. Six months from now
will I get spotted by 400 skimmers? Six years from now will I get
spotted by 4,000 skimmers? Is there a master plan as to who,
where, and how many people can run skimmers?

Would the NCDXF CW beacon system on 14.100 be more useful
if 500 people around the world decided they were going to help out
by putting 500 more CW beacons on 14.100 tomorrow morning?

Google collects, categorizes, and stores every URL I visit on the
Internet. Would it be useful to distribute those URL's in real time to
everybody in the world who was connected to the Internet when
I visited them?

I share your concern. The RBN is going to make the DX cluster
totally useless eventually if something doesn't change. The more
is better mentality just doesn't work forever. Sooner or later the
pipes are going to bust.

In my view, a DX spot has finite value. You can use a database of
old DX spots to produce fun factoids of numbers and percentages,
but you can't use it to calculate when the next time the DX will show
up or what frequency he'll be on. Yesterday is over. I can't work

TX5K next week because he's in the database two weeks ago.

The problem is simple. The FILTER is in the wrong place. There shouldn't need to be a bunch of "cluster guys and logging software people who are quickly adapting and creating a variety of filters". There should be a MASTER filter, between the RBN and the DX Cluster that eliminates the unnecessary data (dupes, redundant spots, whatever you want to call it) before it ever gets to the DX cluster.

But I think it's too late to make that happen, because too many people are busy worrying about how to aggregate and consolidate and crunchinate and storeinate old, useless DX spots into a database, in fear that the other guy's database will have one more spot in it than theirs does. More is better. Let's suck spots from DX Summit. Let's skim the skimmers. Or maybe we can skim the skimmers who are skimming the skimmers. My cluster software will process ten million spots a minute and never slow down; totally useless to a human being, but nevertheless, very Kewl.

The simple fact that "cluster guys and logging software people are quickly adapting and creating a variety of filters" should tell us something. A "filter" blocks things that are not wanted......

One thing I have seemed to notice is that with the advent of the skimmers, a lot of real people seem to have made the decision that it's no longer necessary for them to spot anything. If I turn the skimmers off, the cluster will put me to sleep in about 10 minutes.

From: Dave AA6YQ
Topic: 20935 Message: 20944

For many DX stations, past behavior is a reasonable predictor of future behavior. Maintaining a database of spots from the RBN and other spot sources enables one to understand the operating habits of needed DX stations, which improves one’s chances of listening for and working such stations before they are spotted.

Filtering one’s view of a database is not the same as filtering a spot. The latter results in permanent loss of information; the former does not.

That's a novel concept. I'll have to check the Google Play store
and see if there's a APP for that....

"Before they are spotted" is a REALLY novel concept. Seems
to me that three CQ's and two KH2D's and the "before" time frame
has expired.

Dave, there is no such thing as "Before they are spotted". There
used to be, but there isn't any more. You should know that.

Maybe we need an APP that figures out, from the database, what
frequency the DX is THINKING about calling CQ on, so we can call
him before he makes any noise and the skimmers get hold of him.

Yeah. An ESP filter. That'd work. Does ARCluster have that already?

I very much agree with AA6YQ. When I was running AB9M-7 / N1SF / N9PE (same machine different callsigns at different times) internet connected to K9CW (K9USA) and an East coast gateway to the European Cluster system, which delivered spots locally only via RF, my personal spot filtering included spots from European stations for entities I still needed so that I might have an advance notice before I had propagation. I also found the various history commands of Show/station (or entity) , band, mode, date-range , etc, to be an excellent data mining tool once the node with the most relevant historical data was identified. Had I not had a DXSpider Operators manual as in http://www.dxcluster.org/main/usermanual_en.html#toc10.2 , I probably would not understood the difference between SET (for spot filtering to individual) and SHOW (display spot HISTORY of the node) commands.

As I understand it there may very well be an issue of individuals reading the manual to SET their individual filters at the NODE(s) from which they receive spots in order to meet their objectives AND reduce their frustrations.

After reading Pete’s (N4ZR) explanation, I have a greater understanding of what the the RBN really does and how my friends K9CT, WB9Z, and others are using the RBN in some of their competitive events.

Pete, I don't think the RBN is useless. I think it's a wonderful tool.

I can call CQ on 40 meters and immediately know where I'm being heard in the world. By far the neatest ham shack demo ever.

Personally, the database is of little use to me, because I haven't figured out how to call CQ yesterday. But I'm sure the data collected can be analyzed and is of use to someone.

I think the concept of the RBN feeding everything to the cluster is wrong. Today I get spotted by 40 skimmers. Six months from now will I get spotted by 400 skimmers? Six years from now will I get spotted by 4,000 skimmers? Is there a master plan as to who, where, and how many people can run skimmers?

Would the NCDXF CW beacon system on 14.100 be more useful if 500 people around the world decided they were going to help out by putting 500 more CW beacons on 14.100 tomorrow morning?

Google collects, categorizes, and stores every URL I visit on the Internet. Would it be useful to distribute those URL's in real time to everybody in the world who was connected to the Internet when I visited them?

I share your concern. The RBN is going to make the DX cluster totally useless eventually if something doesn't change. The more is better mentality just doesn't work forever. Sooner or later the pipes are going to bust.

In my view, a DX spot has finite value. You can use a database of old DX spots to produce fun factoids of numbers and percentages, but you can't use it to calculate when the next time the DX will show up or what frequency he'll be on. Yesterday is over. I can't work TX5K next week because he's in the database two weeks ago.

The problem is simple. The FILTER is in the wrong place. There shouldn't need to be a bunch of "cluster guys and logging software people who are quickly adapting and creating a variety of filters". There should be a MASTER filter, between the RBN and the DX Cluster that eliminates the unnecessary data (dupes, redundant spots, whatever you want to call it) before it ever gets to the DX cluster.

But I think it's too late to make that happen, because too many
people are busy worrying about how to aggregate and consolidate
and crunchinate and storeinate old, useless DX spots into a database,
in fear that the other guy's database will have one more spot in it
than theirs does. More is better. Let's suck spots from DX Summit.
Let's skim the skimmers. Or maybe we can skim the skimmers who
are skimming the skimmers. My cluster software will process ten
million spots a minute and never slow down; totally useless to
a human being, but nevertheless, very Kewl.

The simple fact that "cluster guys and logging software people
are quickly adapting and creating a variety of filters" should tell us
something. A "filter" blocks things that are not wanted......

One thing I have seemed to notice is that with the advent of
the skimmers, a lot of real people seem to have made the decision
that it's no longer necessary for them to spot anything. If I turn
the skimmers off, the cluster will put me to sleep in about 10
minutes.

Topic: 20935 Message: 20948

I don't quite understand here. I am gathering from the comments that people think the skimmer spots are being broadcast all over the
cluster network. This idea is totally false. Some cluster node operators have elected to have the RBN spots on their node. Others
like mine have elected to only have my own skimmers spotting on my node and others have NO skimmers. With the ARCluster V6 if the
node has skimmers, the filter: NOT SKIMMER added to your filter will stop all of those spots. Period. Again, if you don't want them
then filter them but please don't try to force everyone to your beliefs. Let each individual choose.

stations, which improves one's chances of listening for and working such stations before they are spotted.

That's a novel concept. I'll have to check the Google Play store
and see if there's a APP for that....

"Before they are spotted" is a REALLY novel concept. Seems
to me that three CQ's and two KH2D's and the "before" time frame
has expired.

Dave, there is no such thing as "Before they are spotted". There
used to be, but there isn't any more. You should know that.

Maybe we need an APP that figures out, from the database, what frequency the DX is THINKING about calling CQ on, so we can call him before he makes any noise and the skimmers get hold of him.

Yeah. An ESP filter. That'd work. Does ARCluster have that already?

Thanks, Dave. I appreciate the comment. We really had two reasons for not trying to filter outgoing spots - we wanted to preserve for our users access to as much or as little of the information as they wanted, in near-real-time. Also, one very useful function of dupes is the "unique>x" filter for busted spots - if you filter them out at the server you lose this.

This is still an ongoing discussion - if we can find a way to filter out busted spots and dupes at the RBN server we may try to do that. But keep in mind that we're handling an average of >20 spots per second during a major contest, with peaks that run three times that. A couple of contests ago we ran into trouble simply trying to insert all of these into the database. It's a learning process.

If you're getting that many "Cluster spots" of one call at once from skimmer's and you don't like it then maybe you should find a
different node. There a many out there.

Jim, I think it is going to turn out to be pretty self-limiting. We already are pretty well saturated in parts of Europe and the US. My guess is that the useful growth will be in places that aren't well-represented now, such as Oceania, mainland East Asia, mainland Africa and Central/South America.

Whether the last 54 spots of K8QM on 14.001 are a waste of bandwidth depends on how you're using the spots. For me, seeing the DX side of a spot alone is never enough to make the spot useful. If you're into chasing rare DX, though, then maybe it is.

I use RBN spots to visualize and predict propagation - in which case the specific spots for a given DX call that are useful to me in ZL may be completely different from those that useful to you in US. For hams located near K8QM, all 55 spots might be useful, to help you know where in the world you're likely to be heard, as well as which beam headings are likely to productive for listening.

Hardly anyone takes a full raw feed from the RBN and attempts to use it in a contest or chasing dx. That's just crazy. There are simply too many spots to handle. Besides, as I see, at about 6-7% of raw RBN spots are busted. These will ALL show on your band map, unless you work the busted calls and log them...

Users should connect the DX Node of their choice and set up appropriate filtering. CC Clusters such as VE1DXI etc remove the busted calls automatically. AR Clusters require you to enter commands to eliminate the busted spots. Then you need to set up bands/modes etc as you see fit.

My CC User program was designed to go between the DX Node and your contesting program. It eliminates dupes. It can eliminate W3LPL spots and others. It requires less CPU time than the contest program and unloads a huge amount of CPU loading from the cluster. The clusters are simply unable to handle the volume of spots. At 60 spots per second and checking the last several hundred spots for dupes requires tens of thousands of checks per user per second.

.
.
.

I disagree. The FILTER is in the right place.

If you eliminate "dupes" before they get to the cluster, what happens when one cluster user wants only spots from say the east coast and another only wants west coast spots? At least one of these users won't get that spot, since you threw away all but one spot. The cluster has to receive ALL the RBN spots in order that as many as possible pass the ALL the users' filters.

.
.
.

> The simple fact that "cluster guys and logging software people
> are quickly adapting and creating a variety of filters" should tell us
> something. A "filter" blocks things that are not wanted......

That is correct. What good is a filter if it doesn't block what is not wanted? It lets through what is wanted. Filters have been around since long before the RBN was even thought about.

Spotters come and go. However, the number of non-skimmer spots has continued to increase, year over year, even after the RBN came on the scene.

SB DX ARL ARLD013
ARLD013 DX news

This week's bulletin was made possible with information provided by NC1L, XE1H, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TONGA, A3. Jacek, SP5EAQ is QRV as A3EAQ from Tongatapu Island, IOTA OC-049, until April 16. Activity is on 80 to 10 meters using only SSB. QSL to call.

QATAR, A7. Operators A71BX, A71CO, A71CV, A71AM and RA9CKQ will be QRV as A71AM from Dukhan in the CQ WW WPX SSB contest as a Multi/2 entry. QSL via bureau.

BAHAMAS, C6. Chuck, KG9N is QRV as KG9N/C6A from Grand Bahama Island, IOTA NA-080, until April 4. This includes an entry in the CQ WW WPX SSB contest. QSL to home call.

CUBA, CO. Members of the Las Tunas Contest Crew will be QRV as T48K from Las Tunas in the CQ WW WPX SSB contest. QSL via F5FYO.

PHILIPPINES, DU. Operators DU1BP, DL2KGS and LA6FJA will be QRV as DZ1B from Luzon, IOTA OC-042, in the CQ WW WPX SSB contest. QSL via DU1BP.

REUNION ISLAND, FR. Cyril, FR4NT will be QRV as a Single Op/Low Power entry in the CQ WW WPX SSB contest. QSL direct to home call.

JERSEY, GJ. Richard, M5RIC is QRV as MJ5RIC until March 31. He will be active as GJ2A in the CQ WW WPX SSB contest. QSL both calls via M5RIC.

HONDURAS, HR. Ray, WQ7R will be QRV as HQ9R from Isla de Roatan, IOTA NA-057, in the CQ WW WPX SSB contest. QSL direct via K5WW.

MARIANA ISLANDS, KH0. Members of the Saipan BBQ Contest Club will be QRV as AH0BT from Saipan, IOTA OC-086, in the CQ WW WPX SSB contest. QSL via 7L1FPU.

BULGARIA. LZ. Special event station LZ134SOF is QRV in celebration of the 134th anniversary of the capital city of Sofia. Activity is on all bands and modes. QSL via LZ1KZX.

DENMARK, OZ. Operators DL1TM and DJ4MG will be QRV as OZ7TM and 5P4MG, respectively, from April 1 to 18. Activity will be on 160 to 10 meters using SSB and PSK. They may also be active as OU1RAEM. QSL OZ7TM via DL1TM, 5P4MG via DJ4MG and OU1RAEM via DF5LW.

TUVALU, T2. Tim, NL8F is QRV as T2TT from Funafuti Island, IOTA OC-015, until April 2. Activity is on 80 to 10 meters using mostly SSB with some digital modes. He will also be active in the CQ WW WPX SSB contest as either a Single Op/All Band or Single Band on 10 meters entry. QSL via K8NA.

SOMALIA, T5. Tevfik, TA1HZ will be QRV as T5TC from Mogadishu in the CQ WW WPX SSB contest as a Single Op/All Band/Low Power entry. QSL to home call.

COCOS (KEELING) ISLAND, VK9C. Operators GM3WOJ and GM4YXI plan to be QRV as VK9CZ from March 30 to April 13. Activity will be on the HF bands using CW, SSB and some RTTY. QSL via operators' instructions.

MEXICO, XE. Special event station 4A1TD will be QRV as a Multi Op entry in the CQ WW WPX SSB contest in celebration of the 80th anniversary of the founding of Club de Radio Experimentadores de Occidente. QSL via XE1GZU.

LAOS, XW. Steve, 9M6DXX will be QRV as XW8XZ near the capital of Vientiane from March 30 to April 3. Activity will be holiday style on the HF bands using SSB. QSL via M0URX.

INDONESIA, YB. Operators YB8BRI and YB8HZ are QRV from Balang Lompo Island, IOTA OC-236. Activity is on 40 to 10 meters using CW, SSB and RTTY with two stations active. This may also include an entry in the CQ WW WPX SSB contest. QSL via operators' instructions.

THIS WEEKEND ON THE RADIO. The CQ World Wide WPX SSB Contest, ARLHS Annual Spring Lites QSO Party, QRP CW Fox Hunt, NCCC RTTY Sprint and the NCCC Sprint will certainly keep contesters busy this upcoming weekend. The Low Power Spring CW Sprint, 144 MHz Spring Sprint and RSGB 80-meter Club CW Championship are scheduled for April 1. The ARS Spartan Sprint is scheduled for April 2. The QRP CW Fox Hunt is scheduled for April 3. Please see March QST, page 84, April QST, page 84, and the ARRL and WA7BNM Contest websites for details.

Seattle, WA March 28, 2013
To all radio amateurs

SB PROP ARL ARLP013
ARLP013 Propagation de K7RA

This bulletin is issued a day early this week due to the Good Friday holiday.

Solar activity was down this week, with the average daily sunspot number less than half last week's figure, at 49.6. Average daily solar flux dropped 22 points to 97. Geomagnetic activity was quiet also.

The predicted solar flux is 95 and 100 on March 28-29, 105 on March 30-31, 110 on April 1-3, 115 on April 4, 120 on April 5-7, 125 on April 8-10, 120 on April 11-13, 115 on April 14, 110 on April 15, then it drops below 100 on April 20-24.

The predicted planetary A index is 22, 18 and 8 on March 28-30, 5 on March 31 through April 22, then 8, 18, 15 and 8 on April 23-26, and 5 through the end of April and into the first week in May.

Lee Gordy, W4KUT of Cartersville, Georgia wrote to say he just finished reading Carl Luetzelschwab's article "The Sun and the Ionosphere" in the March 2013 QST for the third time.

Lee wrote, "For me, It's consoling to know that knowledgeable professionals such as Carl Luetzelschwab are having exciting difficulties rounding up Ol' Sol's secrets. There's a fine and mystical line between prophesy and prognosis, and the even bigger consolation prize I've taken away from Luetzelschwab's informative writings is a closer understanding of songwriter Joni Mitchell's wonderful composition, 'Both Sides, Now' -- 'It's cloud illusions I recall, I really don't know clouds, at all.' I was there for Cycle 19. It was mystical and magical, and I have every hope that I'll experience a like ionospheric folly before I send my final SK. Who knows, maybe this cycle will have another peak, and we'll hear non-stop, worldwide 10 and 6 meter activity. In the meantime, it's fun to try and outguess Solar Mojo. It's a big part of the

infectious excitement and thrill of amateur radio."

Lee added later, "Regarding the Sun, we can literally see 'both sides now.' And it just seems like the more we know about it, the less we really know!"

W4KUT must be referring to the Solar TErrestrial RElations Observatory project, or STEREO (http://stereo.gsfc.nasa.gov/), which does allow us to observe both sides of the Sun, with real time images, too, updated every few minutes.

Bill Tynan, W3XO of Kerrville, Texas (in grid square EM00kd) wrote, "The CME of March 15 apparently caused a major North/South opening on 6 meters. Sunday, March 17 at 2122 UTC, I worked HC5VF. He was S-9 with 50 Watts. I did not hear any Central American stations, so my conclusion is that it was via F2, not multi-hop Es. I rule out TEP as HC is above the magnetic equator.

"Then beginning from 2154 to 2256 UT, I worked LUs 7YA, 9EHF, 1DA, 3EX and 7YS. I also heard but did not work, a CX.

"These could have, of course, been TEP, since they are south of the geomagnetic equator. But, since they followed so closely on the HC, it makes me wonder."

Bill has an interesting bio and description of his current station activities on his QRZ.com page, at http://www.qrz.com/db/W3XO. You'll need to log in, but the account is free. His email signature says "700 watts to an 11 element M2 Yagi at 70 feet." I assume that is for 6 meters.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for March 21 through 27 were 60, 54, 56, 45, 56, 41, and 35, with a mean of 49.6. 10.7 cm flux was 106.1, 100.9, 98.2, 96, 92.6, 92.4, and 93, with a mean of 97. Estimated planetary A

indices were 12, 4, 11, 5, 4, 3, and 14, with a mean of 7.6.
Estimated mid-latitude A indices were 11, 2, 10, 6, 3, 2, and 9,
with a mean of 6.1.

#-----------------------------------------------------------------#
# DAILY BULLETIN ON SOLAR AND GEOMAGNETIC ACTIVITY from the SIDC #
# (RWC Belgium) #
#-----------------------------------------------------------------#
SIDC URSIGRAM 30329
SIDC SOLAR BULLETIN 29 Mar 2013, 1219UT
SIDC FORECAST (valid from 1230UT, 29 Mar 2013 until 31 Mar 2013)
SOLAR FLARES : Quiet conditions (<50% probability of C-class flares)
GEOMAGNETISM : Quiet (A<20 and K<4)
SOLAR PROTONS : Quiet
PREDICTIONS FOR 29 Mar 2013 10CM FLUX: 104 / AP: 019
PREDICTIONS FOR 30 Mar 2013 10CM FLUX: 106 / AP: 007
PREDICTIONS FOR 31 Mar 2013 10CM FLUX: 108 / AP: 007
COMMENT: Solar activity is expected to remain at low levels for the
next 48 hours, with only a small chance for an isolated C flare from
NOAA AR 1708. Geomagnetic conditions are currently active at planetary
levels (Kp=4), as the Earth is still under the influence of a coronal
hole. Unsettled to isolated periods of active conditions are still
possible today, but we expect the geomagnetic activity to return to
quiet levels by March 30.

April 1, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, W2GB, W2VU, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, W5JON, KH6BZF, WB6RSE, K8GI, K8YSE, W8GEX & 60m News, W9HBH, W9ILY, AT International, DL6JGN, DK8JB & The DX News Letter, DL1SBF, DL7ZZ, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, LU6XV, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and XE1H for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 23rd-March, through Friday, 29th-March there were 233 countries active. Countries available: 1S, 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TZ, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2M, SCOTLAND (Satellite/Low Band Op). Paul, 2E1EUB, will once again be active as 2M1EUB for 7 days beginning April 6th. Activity will be from the eastern side of Scotland in the Cairngorms National Park (WFF GMFF-001). Activity will be on 160m, 80m, and the satellites (mostly AO-7 B/A mode), as well as 2m SSB. Check out QRZ.com under 2M1EUB for more info.

3V, TUNISIA. Hrane, YT1AD, will be active as 3V8BB (or possibly a special callsign to be announced before the contest) from the "Institute Superieur de L'Animation Pour la Jeunesse et la Culture" station in Tunis, during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/All-Band/High-Power entry. QSL via LX1NO.

3V, TUNISIA. Ashraf "Ash", KF5EYY (SWL 3V4-002), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Single-Band (15m)/ Low-Power entry. QSL via LoTW or to LX1NO. Read about Ashraf on the following Web page at: http://www.kf5eyy.info

4A, MEXICO. Members of the Club de Radio Experimentadores de Occidente are celebrating the 80th anniversary of the founding of their club during the year 2013. The Club de Radio Experimentadores de Occidente has sought and obtained from COFETEL the special callsign "4A1TD" which will be used by a team of operators in different competitions (ARRL, CQ and WAE..etc.) and in activity normally throughout the year. Look for 4A1TD to participate in the CQWW WPX SSB Contest (March 30-31st). The QSL Manager for 4A1TD is XE1GZU. More information is available at: http://www.qrz.com/db/4A1TD

4K, AZERBAIJAN. Alim, 4K6FO, will be active during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Single-Band (??m)/Low-Power entry. QSL via 4K6FO.

5X8C UGANDA VIDEOS. Alain, F6ENO, has uploaded two videos to the Web on the recent 2013 5X8C DXpedition by the F6KOP team. They are available at:
http://www.youtube.com/watch?v=S95F_htjj_g
http://www.youtube.com/watch?v=WqvWqPwbFH8

5B, CYPRUS. Tony, RT9T, will be active as 5B4ALB before and after the CQWW WPX SSB Contest (March 30-31st) [See H27 below]. He will be there until April 3rd. Bands and modes of activity were not provided. QSL via RT9T direct only.

5W, SAMOA. Just a reminder that a team of 15 German operators will be active as 5W0M from Le Lagoto between April 4-18th. Activity will be on 80-6 meters using CW, SSB and RTTY plus 2 meter EME (see OPDX.1087 for suggest frequencies). They plan to have four stations active simultaneously on the air with amp and various antennas. QSL via DL4SVA, direct or by the Bureau. QSL EME QSOs via DL9MS. A OQRS will be available for QSL requests for Bureau QSLs or direct cards. A Web page is available at:
http://5w0m.hkmann.de

CQ NEWS. Richard Moseson, W2VU, Editor of CQ Amateur Radio, provided the following press release dated March 27th: "Terry Zivney, N4TZ, Named Director of CQ WPX Contests -- Terry Zivney, N4TZ, has been named Director

of the CQ World Wide WPX Contests, effective immediately, CQ Publisher Dick Ross, K2MGA, announced today. Terry succeeds Randy Thompson, K5ZD, who has been WPX Contest Director since 2008 and recently was named Director of the CQ World Wide DX Contests.
Licensed since 1961, Zivney has held N4TZ since 1977 and has had numerous top-five USA finishes in the single-op/all-band (SOAB) low power category of CQWW, CQWPX (as KS9K), and ARRL DX contests. He also competed in the 2010 World Radiosport Team Championship in Russia, and has had three articles published in the National Contest Journal. Professionally, Zivney will retire in May 2013 from Ball State University in Muncie, Indiana, as the Maxon Distinguished Professor Emeritus of Finance and Insurance. In the 1970s he worked as an electrical engineer at Scientific Atlanta and Computer Sciences Corporation.
'As a long-time low power contester,' said N4TZ, 'I especially appreciate the WPX contest because its unique mix of exotic DX and plentiful domestic contacts ensures that great fun will be had by all participants regardless of the propagation conditions. I look forward to harnessing the momentum this contest has developed under the leadership of K5ZD and respecting the legacy of former directors K6AW, N8BJQ, and W8IMZ.'
CQ Publisher Ross noted that 'in my early talks with Terry, he has already offered several innovative ideas. Plus, he brings with him the valuable perspective of the low-power contester. I am looking forward to working with him as WPX Contest Director.'
The CQ World Wide WPX Contests are the second-most popular amateur radio contests in the world (after the CQ World Wide DX Contests). The SSB portion of the 2013 WPX Contest is this weekend, March 30-31; the CW weekend is in May. Any questions regarding the 2013 WPX Contests should be directed to Terry via e-mail to <director@...>.
We thank K5ZD for his dedicated service to the WPX Contests and look forward to a seamless transition to N4TZ's administration of the event."

EB8, CANARY ISLANDS. Look for EB8AH to be active from Magic Mountain in Gran Canaria during the CQWW WPX DX SSB Contest (March 30-31st) as a Multi-Single entry. Operators mentioned are Toivo/ES2RR, Salvadoe/EA5DY, Pekka/EA8AH, Manual/EA8ZS and Juan/EA8RM. QSL via LoTW. Visit the EB8AH FaceBook page at:
http://www.facebook.com/pages/EA8-Magic-Mountain-Contest-Station/268124623206320

ED9, CEUTA AND MELILLA. Operators Jorge/EA7HZ, Julio/EA7JB, Chris/EA7RU and Jorge/EA9LZ will be active as ED9Z during the CQWW WPX SSB Contest (March 30-31st) as a Multi-Single entry. The group will probably use Spiderbeam antennas again. QSL via LoTW or EA9LZ direct. No Bureau.

EV50, BELARUS. Here is your last chance to work special event station EV50WB this week. In celebration of the 50th anniversary, members of the Dalnye Strany Radio Club (EW1WB) will be active during the CQWW WPX SSB Contest (March 30-31st) as a Single-Band (40m)/Low-Power entry. QSL via EU1AZ, direct or by the Bureau. Also via LoTW.

FH, MAYOTTE. Members of the "Italian Dxpedition Team" have announced that their next DXpedition will be to the Island of Mayotte Island between

October 3-17th. The only other details that were provided are:
HF Pilot station: Fred, IK7JWY
6m Pilot station: Sergi, IK0FTA
Software Management (real-time log on line) by Giacomo, IH9GPI
More details will be forthcoming. Related Web pages are:
Official website: http://www.i2ysb.com
Official forum: http://www.hamradioweb.org

H27, CYPRUS. Operators Tony/RT9T, Alex/5B8AD, Eugene/R2AA, Mike/RK3QS, Oleg/UA9CDV, Alex/R9WR, Vadim/UA9SCX, Alexey/RN3TT and Victoria/UU6JR will be active as H27A during the CQWW WPX SSB Contest (March 30-31st) as a Multi-Op/Single-Transmitter entry. QSL via RW3RN.

HQ2, HONDURAS. Hiro, JA6WFM, will be active as HQ2N from San Pedro Sula during the CQWW WPX SSB Contest (March 30-31st) as a Single-Op/Single-Band (10m)/Low-Power entry. QSL via EA5GL or LoTW. Hiro will be here until January 2014.

IOTA NEWS.....
EU-042. Harald, DJ2II, will be active as homecall/p from Langeness Island (DID N-019, WLOTA 1245, WWFF DLFF-013) between May 21-30st. Activity will be on 80-10 meters using CW and SSB. QSL via his home callsign, by the Bureau or direct. Visit his Web site at: http://www.dj2ii.de

SA-049. Members of the Radio Club Ushuaia (LU8XW), who activated the special callsign LT5X from Isla Redonda, had to limit their operation on March 24th due to bad weather and lack of electricity.

SA-055. Horacio, LU4DXU, will be active as LU1DMG from Martin Garcia Island between now and April 2nd. Activity will be on 80-10 meters using a Yaesu FT-857 with a TL-922 amp into a 3 element Tri-band yagi and slopers for the lower bands. QSL via LU4DXU.

ISWL CALLSIGNS (For April). The following ISWL club callsigns will be used throughout the month of April 2013:

GX4BJC/A - Operated from Towcester, in Northamptonshire, by Phil, G4DMS (ISWL Council Member). (/A WAB Square SP65, England, and IOTA EU-005).

MX1SWL/A - Operated from Lambourn, in Berkshire, England, by John, G0GWK. (/A WAB Square SU37 and IOTA EU-005).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

KH8, AMERICAN SAMOA. Aki/ZL1GO (JE4EKO) and Jacky/ZL3CW (F2CW/WE3B)
reportedly have booked/confirmed a trip to American Samoa. Activity
will be from the Turtle and Shark Lodge, Village of Vaitogi, on the
southeast coast of Tutuila Island (OC-045, USI AS007S, WLOTA 4385)
between November 12-26th. Their operations will include the CQWW DX CW
Contest. They will join Bill, N6MW, who will be there between November
11-21st. Look for more details to be forthcoming.

PJ7, SINT MAARTEN. Philip, WA1ZAM, will be active as PJ7PL, a week before
the CQWW DX SSB Contest (October 26-27th) and a week after. He will be
a Single-Op entry during the contest. Outside of the contest, he will
try some RTTY. QSL WA1ZAM.

M3WRL RAF Cranwell Data Only (no other information received); Contact Chris, M3WRL
W2R USA 0001-0400z 7.026/CW, 7.145/SSB, 1030-1800z 14.055/CW, 14.180/SSB Mike KE2EH

Note: Contact names are the persons who organised the SES.

ST2, SUDAN. Mario, CT1FTR, is now active as ST2FT from Khartoum until June. Activity will be on the HF and VHF bands using a Yaesu FT-857 with a SGC-230 tuner into a loop antenna. QSL via CT1FTR.

T2, TUVALU (Op Becomes SK). Andi, DL7ZZ, informs OPDX just before going to print that Ingolf, DL4JS, on March 28th, became a Silent Key during terrible accident during the DXpedition T2YY. No other details were provided. Ingolf was one of three German operators during the T2YY operation. He was a well-known serious technician and RTTY-operator and took part in activities such as 6V7M, HU2DX T00SW, 5K0Z, XV4YY, XU7AJS,

TO8YY, 9H9OB and 5T5DC. Operators Rich/DK8YY and Det/DL3ALI will still be active as T2YY in honor of Ingolf until April 4th as planned. They hope all DXers understand that their operation will only be sporadic. OPDX and it readers would like to send out our deepest sympathy to the family and friends of DL4JS.

T33, BANABA ISLAND. Reports indicate that last year's attempt to activate Banaba Island (OC-018) has been rescheduled during the first part November of this year. Other details mentioned are:
* The T33A team has booked a larger boat for this trip.
* They also state that the license has been approved by the government and have obtained landing permission.
* Elecraft is supplying six stations, both radios and amps.
* They are still looking for 2-3 operators to join them on this trip.
For Stateside operators that are interested, they will return before the Thanksgiving holiday. For more details, E-mail them at:
t33-ops@...
A Web site is under construction at: http://www.t33a.com

TM28, FRANCE (Special Event). Look for special event callsign TM28UFT to be active during the 28th annual meeting of the French CW Society, the Union Francaise des Telegraphistes UFT, which will be held in Panazol, Région Limousin, Center France, between April 7-21st. Activity will be on the HF bands and possibly more, for this CW only operation. QSL Manager is Bernard, F9IE. All QSOs will be confirmed by the Bureau. SWL QSL cards should go also via the French Bureau. After the operation and before you QSL, please check your QSO online at the UFT Web site <www.uft.net>. However, those who would like to have a direct card, should ask for it not before July 15th, to Bernard, F9IE, (QRZ.com address is correct). In such a case, don't forget SAE and 1 valid IRC or 2 USDs.

TM35, FRANCE (Special Event). To commemorate the 35th anniversary of the world well-known ARC of Provins, F6KOP, and the inauguration of its new facilities, look for the special callsign TM35KOP to be active between May 3-18th. Activity will be on all modes, including rare ones being used on 160m to 10 GHz. The WW Locator is JN18PN. Most of the activity will be on the weekend; May 8-9th and May 18, date of the manifestation in Provins. QSL via F6KOP via the French Bureau. Direct QSLs go to F5NQL (address ok on QRZ.com; include SAE, 1 valid IRC (preferred) or 2 USDs). As you know, F6KOP organized some big DXpeditions in the past like 5V7C, TO7C, 5H1C, J5C, XT2C, PJ4C, TJ9PF, 5X8C, TK7C, IS0R, TS7C, TM7CC, TM7C, and more in the French IOTAs.

FM/TO5, MARTINIQUE (NA-107). Al, F5VHJ, will once again be active as TO5A, from FM5BH's QTH during the CQWW DX SSB Contest (October 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ, direct or by the Bureau. Logs will be uploaded to LoTW.

V4, ST. KITTS. Jon, W5JON, will once again be active as V47JA from his vacation home in Calypso Bay, St. Kitts (NA-104, WW Loc. FK87SG), hill-side QTH located 300 feet from overlooking the Caribbean Sea and Atlantic

Ocean, between July 9th and August 10th. Activity will be on 160-10 meters (including 60m) using SSB and RTTY/Digital modes. Equipment is a Kenwood TS-590S, Yaesu FT-857D, and SB200 Amplifier. Antennas include: a 80-10m Multi-band Dipole, and metal roof mounted S9, 18' and 31' Verticals and 3 element Yagi for 6m. His operations will include the IARU HF Championship Contest (July 13-14th) and the RSGB IOTA Contest (July 27-28th0 as a Single-Op/All-Band entry. Also, XYL Cathy, W5HAM, will occasionally operate as V47HAM. ALL QSLs go to W5JON direct or via LoTW.

ZK3, TOKELAU (Update to OPDX.1095/Date Change). Operators Hans/DL6JGN and Guenter/DL2AWG will now be active as ZK3N from Nukunonu Atoll (OC-048) between April 15-30th (not April 23rd and May 8th as first announced). Reason for dates being changed is that the shipping service used has "updated boat schedule from Samoa to the Tokelau Islands." Therefore, they had to rebook their flights. For more details, visit the ZK3N Web page at: http://www.tokelau2013.de

---
The following stations are expected to be active in the
CQWW WPX SSB Contest (March 30-31st, 2013)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2013 CQWW WPX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

5W - Suggested frequencies for the 4-18 April 5W0M operation from Samoa (OC-097) [425DXN 1125] are:
CW 3526, 7026, 10116, 14026, 18086, 21026, 24906, 28026, 50107
SSB 3805, 7095, - 14210, 18120, 21255, 24945, 28440, 50110
RTTY 3580, 7041, 10137, 14077, 18104, 21098, 24924, 28098
A large team of German operators will be active with four stations and various antennas, with a serious effort on EME on 144 MHz. QSL via DL4SVA, direct or bureau; QSL for EME QSOs via DL9MS. The log will be uploaded to LoTW about 6 months after the expedition. Logsearch, OQRS for direct/bureau cards and further information at http://5w0m.hkmann.de/
8P - Jeff, VA3QSL will be active holiday style as 8P9HI from Barbados (NA-021) on 6-13 April. QSL via home call, direct or bureau.
9M2 - Jacek, SP5APW will be active as 9M2/SP5APW from Pulau Perhentian Besar (AS-073) on 1-7 May. He plans to be QRV holiday style on 20, 15, 12 and 10 metres SSB and some digital modes. QSL via home call. Updates will be posted to http://as-073.blogspot.com [TNX SP5APW]
CO - Look for T48T to be active from the historical site of Playitas de Cajobabo, Cuba (NA-015) on 6-7 April. Activity will be on 80, 40, 20, 15 and 10 metres SSB, CW and digital modes. QSL via EA5KB. [TNX EA5KB]
CY0 - Gary, VE1RGB and Murray, WA4DAN will be active from Sable Island (NA-063) on 1-11 October. The call CY0P has been chosen and issued in recognition of the newest National Park in Canada. They will operate CW, SSB and RTTY on 160-10 metres. Further information is expected in due course. [TNX NG3K]
E5_sc - Mauri, AG1LE will be active as E51DXX from Rarotonga (OC-013), South Cook Islands on 1-13 April. QSL via home call.
F - Special callsign TM28UFT will be active on 7-21 April for the 28th General Assembly of the Union Francaise des Telegraphistes (www.uft.net) to be held in Panazol (Limoges). QSL via F9IE (all of the QSOs will be confirmed automatically via the bureau). [TNX F5NQL]
F - Celebrating the 35th anniversary of the Radio Club de Provins (F6KOP), special callsign TM35KOP will be in use on 3-18 May on

all bands and modes. QSL via bureau to F6KOP or direct to F5NQL.
[TNX F5NQL]
F - A team of ten operators from Belgium will be active as TM7T from
the Chausey Islands (EU-039) on 26-28 July. The main activity (SSB
and CW) will be during the IOTA Contest. QSL via ON8ZL, direct or
bureau. [TNX rsgbiota.org]
FH - Silvano, I2YSB and the Italian DXpedition Team will be active from
Mayotte (AF-027) on 3-17 October. Further information is expected
in due course. [TNX IK7JWY]
FR - Guy, F5MNW will be active as FR/F5MNW from Reunion Island (AF-016)
on 6-29 April. He will operate only CW on the HF bands. QSL via
home call. [TNX DX World]
G - Commemorating the 75th anniversary of the First Class CW
Operators' Club (FOC), a month-long event will be held on 1-31 May
featuring many special "FOC" suffix callsigns from around the
world. The anniversary call for FOC club station will be GB75FOC,
with GP4FOC to be used when operating from Guernsey, GS4FOC from
Scotland and GT4FOC from the Isle of Man. QSLs via G3SWH.
Information on the relevant award can be found at www.g4foc.org
[TNX KR3E]
I - Ezio IK2AHB, Diego IW2MZX, Alessandro IW5ELA, Andrea IZ2AJE and
Fabio IZ2GMT will be active as IA5A from Isola del Giglio (EU-028)
from 29 April to 4 May (www.vbdxc.altervista.org). They will
operate SSB, CW, RTTY and PSK31 on 80-6 metres with three
stations. QSL via IK2AHB, direct or bureau. Logsearch and OQRS on
Club Log. [TNX IZ2GMT]
J6 - Look for Rob, J6/N7QT and Frans, J69DS to be active from St Lucia
(NA-108) on 5-16 April. They will operate CW, SSB and RTTY or PSK
on 80-10 metres, with field portable activity (battery only and
lightweight antennas) from beaches or mountain tops. QSL J6/N7QT
via home call (direct or bureau), LoTW and eQSL; QSL J69DS direct
only. [TNX NG3K]
J8 - Brian, GW4DVB (www.g4dvb.co.uk) will be active as J8/G4DVB from
Palm Island (NA-025) on 13-20 April. [TNX DX World]
JA - Takio, JH3QFL (V6H) and Keizo, JH3AZC (V6S) will be active from
Pohnpei (OC-010), Micronesia from 29 April to 5 May. They will
operate SSB, CW, RTTY and JT65 on 80-6 metres. QSL via home calls.
[TNX NG3K]
KP2 - Look for K1HP/KP2 (QSL via JE2EHP), KP2/JF1BVG (QSL via JF1BVG)
and WH7P/KP2 (QSL via JP1IOF) to be active on all bands and modes
from St. Croix, Virgin Islands (NA-106) on 3-9 April. QSL direct
or via the JARL bureau, and LoTW. [TNX NG3K]
LU - Horacio, LU4DXU expects to be active on 80, 40, 20, 15 and 10
metres as LU1DMG from Martin Garcia Island (SA-055) from 30 March
to 2 April. QSL via LU4DXU. [TNX DX World]
OZ - Ela, DL1TM (OZ7TM) and Tor, DJ4MG (5P4MG) will be active from
Vendsyssel-Thy / Nordjylland (EU-171) on 1-18 April. They plan to
be QRV on 160, 80, 40, 20, 17 and 15 metres SSB and PSK31. QSL via
home calls, bureau preferred. [TNX DXNL]
PA - Fred, PA0FAW will be active as PA150BA on 1-28 April to celebrate

the 150th anniversary of Bronbeek, a military museum and home for veterans in Arnhem. He will operate mainly CW, with some SSB and digital modes. QSL via home call, direct and bureau, and eQSL.
PA - Queen Beatrix of the Netherlands will formally end her 33-year long reign on 30 April, and leave monarchy to Crown-Prince Willem-Alexander. To celebrate this event, quite a number of Dutch special stations will be active before, during and after the inauguration day. To name a few:
02 April - 30 April PA13KING QSL via PA9JO
11 April - 08 May PB200KING QSL via PA1TX
15 April - 12 May PB2013KING QSL via PA9LUC
18 April - 05 May PA200KING QSL via PD5ROB
20 April - 01 May PB33Q QSL via PA7DA
20 April - 11 May PG6KING QSL via PD9ND
22 April - 02 May PC13KING QSL via PA1DV
26 April - 23 May PA33KBX QSL via PA0ABM
T33 - The T33A DXpedition to Banaba Island (OC-018) [425DXN 1120] has been rescheduled with 6-17 November as expected QRV dates. Activity will be on all bands and modes with six stations. Two or three experienced operators are being sought. If willing to join the group, email t33-ops[at]t33a.com. A website is under construction at www.t33a.com [TNX The Daily DX]
V4 - Once again John, W5JON will be active as V47JA from St. Kitts (NA-104) from 9 July to 10 August. He will operate SSB and digital modes on all bands, and will participate in the IARU HF World Championship and the RSGB IOTA Contest. His wife Cathy, W5HAM will occasionally operate as V47HAM. QSL via W5JON and LoTW. [TNX W5JON]
V6 - Haru, JA1XGI will be active as V63XG from Pohnpei (OC-010), Micronesia on 3-11 April. He plans to operate CW, SSB, RTTY and JT65 on 160-6 metres. With a 2-element yagi for 17 and 12 metres, and a vertical for 40, 30, 20, 15 and 10 metres. QSL via JA1XGI, direct or bureau. Further information and logsearch at http://island.geocities.jp/v63xg/index.htm
VP9 - Gary, WB4DNL will be active as WB4DNL/VP9 from Bermuda (NA-005) on 3-10 April. He will operate SSB and CW on 160-10 metres. QSL via home call, direct or bureau, and LoTW. [TNX The Daily DX]
W - Ron, K5HM and Matt, K5NGU will use the Brazos Valley ARC's callsign KK5W to operate from Mustang Island (NA-092) on 6-7 April. QSL direct to KK5W. [TNX rsgbiota.org]
